

## **Annual Communication on Engagement**

### **Introduction:**

Hamada Community Development Foundation was established in 2009. It started as a Youth Social Research Group that was mainly concerned with the youth political participation and the essence was to generate and develop baseline data and information on the socio-political situation of our youth that could be used by Government and Development Institutions for planning to empower youth. The Organization works primarily for young men and women's empowerment. It is a forum for addressing issues affecting young men and women including children. It is equally aimed at strengthening the civil society through networking with other organizations.

However, after series of constructive engagement with the community members, the organization realized that there was the need for holistic approach to community development. This exigency called for redirection of focus which also compelled the founding members to name the organization "Hamada Community Development Foundation". Hamada Community Development Foundation is a non-profit, non-political civil society organization that is concerned with the general improvement of the living condition of our community through Participatory Development Approach (PDA).

The Organization is now registered with Yobe State Ministry of Youth and Social Development.

### **Technical Session:**

To start with, we engage the serves of some of our staff in administering Community Score where citizen's perception was view on the Health serves they receive at their various Health Facilities.

Participants were taken through the objectives of the meeting, the concept of community score card and how it serve as a tool to measure community perception of health services, as well as the Community Score Card tool its self.

A total of 25 people attended the meeting, which is Stakeholders Sensitization on the use of the community score card. This is a combination of Government Representative, Media, the CSOs, and the MNCH2 staff.
