

Communication on Progress (COP)

Norske Skog signed the Global Compact in 2003. The Global Compact embraces a worldwide network of enterprises, governments, unions, civil organisations and the UN, which is dedicated to dialogue and coordinated action to promote a sustainable and inclusive global economy.

- Even in demanding times for our company, we keep a strong focus on our commitments to a sustainable performance within our corporate social responsibilities. We are a large consumer of recovered paper, we source timber and woodchips from sustainably managed forests, we have a goal to reduce the environmental footprint from our activities to a minimum and to reduce our emissions of greenhouse gases by 25 per cent by 2020, compared with 2006. We are committed to the ten principles of UN Global Compact, states President and CEO Sven Ombudstvedt.

Norske Skog's core values of openness, honesty and cooperation as well as our policies and guidelines build on the UN Universal Declaration of Human Rights and the 10 principles of UN Global Compact.

- We have entered a partnership with the Bellona Foundation for making Norske Skog even more environmentally friendly and resource efficient.
- We are investing in new biogas facilities at some of our production sites, contributing to the carbon solution.
- We are committed to respect the freedom of association as laid out in the Global Framework Agreement on the Development of Good Working Relations, concluded by Norske Skog and the IndustriALL Global Union.
- We were accordingly the first international pulp and paper company to sign a global agreement on employees' rights with the International Federation of Chemical, Energy, Mine and General Workers Unions (ICEM)
- We have a close and good collaboration with our unions through several channels worldwide.
- We accept our social responsibility to the local communities in which our operations are pursued. Business units and employees involve themselves in a number of areas in these communities, supporting activities, which help to improve the quality of life, health and knowledge.

Sven Ombudstvedt
President & CEO

Global compact 2015
