

MESA MAKINA DOKUM A.Ş COMMUNICATION OF PROGRESS REPORT

MESA MAKINA A.S. BRIEF

Founded in 1979, Mesa Makina looks back on a long tradition of casting and today has become one of the prominent OEM part producer in providing machined castings. Mesa Makina has the vision of being a regional leader by making a difference in its field.

Behind the success of Mesa Makina there lies a customer-focused production that exactly meets customer demands with an expert staff. Our business activities are beyond the production of high-quality and hard-to-do castings. Our Product R&D team provides comprehensive support to his customers from production development stage.

Being a member of UN Global Compact, Mesa Makina seeks to maximize his market recognition not only in Turkey but also in the regional and global context.

More than 160 skilled workers at Mesa Makina give detailed attention to their particular jobs as manual working man or expert technicians and engineers.

Having the ISO TS 16949 quality management system, the range of casted materials offered by Mesa Makina varies from grey cast iron and spheroidal cast iron to SiMo and high nickel alloys and wear resistant high-chromium white iron. Machining is offered on all parts, and inspection and testing available includes Ultrasonic, X-ray, Magnetic particle inspection and others.

With a production capacity of 12.000 tons of castings, we produce unit weights of 3 – 60 kg of machine moulded castings with high-pressure vacuum technology.

In addition to plant and machinery investments, Mesa Makina keeps his investments on quality and training of employees which he gives great importance. The IVECO (OTOYOL) quality award received in 2003 and ISO TS 16949 certificate gained in 2008 demonstrates the emphasis given on quality. Started production to OEM parts in 1984 with exhaust manifolds, today Mesa Makina enjoys exporting to 80 % of its production to automotive, agricultural machinery, construction machinery, defense, mining and energy industries in 3 continents, Europe is being in the first place. Mesa Makina's aim for recognition is not only within the borders of Turkey, upgrades on a global scale export to 5 continents.

OUR MISSION

We are existing as solution partner for your dreams of shaping the metal.

OUR VISSION

To be a leader , innovative and global company producing information and technology together with our employees being a strong and trusty family.

OUR VALUES

Honest and Trusty

Dynamic, Flexible and Agile

Complementary Teamwork

Creative and Innovative

Effective and Efficient

Internal and External Customer Satisfaction and Addiction

Community-sensitive and Enviromentally

OUR STRENGTS

37 years experience in sector

Having ISO TS 16949

A Class Supplier

Export 80% of Our Products to the EU Countries

Co-design capability

'Market-oriented' global perspective

MANAGING DIRECTOR MESSAGE

We are very happy to be a member of Global Compact. Our company values and our vission are also support Global Compact Principles.

We signed the UN Global Compact in June 2010 which is a strategic policy initiative for business that are committed to aligning their operations.

Our company commit that we will carry out on implementing the ten principles of Global Compact and undertake a make clear statement of this commitment.

Seyma AYHAN

Managing Director

1. HUMAN RIGHTS and WORK STANDARTS

Our organization protection of human rights policy and practice in this area performance supported importance. In the our business connection there is no difference between language, gender, political opinion, philosophical belief, religion and sect. If there is no obligation according to biological cause or works risk, workers safety, legal obligation, there is no application about making work contract, ending work about gender or pregnancy. Worker takes similar salary for same or similar works, there is no big differences between salaries for similar works.

Value chain, which created by our organization, in ahead our workers and stakeholders you can see applications which are respectful sensitive to humans rights, for

improving this senses we always work. According to this mentality we do not staff child worker, we do not staff under compulsion.

For our organization our workers safety and health is so necessary. For this subject always we control and improve status. For this mentality we use occupational safety and health committee. This committee makes periodic meetings for seeing and following processes improving, and planning safety and health improvements. For prevent industrial accident committee makes risk appraisal, and take preventive measures according to this risk appraisal, technology and work applications are seeing and our workers takes trainings.

In 2015 160 workers had 18 hours occupational safety and health training.

We make table of statistic for industrial accident, and we compare with previous years. In starting to our organization we want health knowledge and report, which include that person is useful for this job according to health details, this report legal obligation.

| Pieces | |
|-------------------------------|----|
| SHE Committee Pieces | 1 |
| Number of Employees Committee | 10 |
| SHE Team Pieces | 9 |
| Number of Employees SHE Team | 40 |

We provide service for medical examination with our organizations doctor. In the same time we gave trainings to our workers about occupational and social, clash exposure negative influence, hygiene and occupational illness.

We make periodical examinations and carrier examination test. For white collar offered the opportunity for group private health insurance.

In 2015 periodic examination rate is %100. All workers had periodic examinations for two times in a year.

In 2014 May Mesa started to works for OHSAS 18001, and in 2015 june we completed. We have OHSAS 18001 certificate.

In 2015 for occupational safety and health we paid 205000 TL.

Mesa sees his workers as worthy capital, the factor, which bringing goals, is piecing differences of his workers perspective, experiences, effort. According to this mentality Mesa A.Ş. Goal is taking persons which is brilliant and competency.

In 2015;

Contract of employment distribution= Time limit %0, Indefinite period %100

Work type worker distribution= Full time %100 , Part time %0

Recruitment type worker distribution = White collar %25, Blue Collar %75

According to Gender of workers distribution; Women %4 Men %96

Continuous improvement is one of the most important factors are the employees feedback. Employee feedbacks are important guiding our target of continuous improvement in business processes as we see. Employees' opinions, ideas and our organization for receipt of requests for proposal system are effectively operated. Suggestions which our employee gave us evaluate according to procedures. Practicable suggestions are rewarding according to procedure criteria.

In 2015 our employees gave 97 pieces suggestions.

2. CORPORATE SOCIAL RESPONSIBILITY

2.1 Forestation

Through by Environmental protection organizations, we planted 100 cedar trees to Konya district's Seydişehir.

2.2 Subscriptions:

Automotive Parts Manufacturers' Association (TAYSAD), Quality Association (KALDER), Turkey Personnel Management Association (PERYÖN), Turkey Casting Industry Association (TÜDÖKSAD), Konya Automotive Parts Industry Cluster (Konya CLUSTER), Konya Chamber of Industry (KSO), Konya Chamber of Commerce (KTO), the Central Anatolian Exporters Union (OAİB), Railway Industry Association (RAYDER), Eastern Anatolian Exporters Association (DAİB), Anatolian Rail Transportation Cluster (ARUS)

2.3 Sponsorship: OSEG 2016:

The first cluster for supporting the spare part producer is established from the chamber of Industry of Konya. This organization has started in the year of 2010 every 2 years in the name of "OSEG". The forth one will be done in 25-26 march of this year and Mesa Makine is one of the sponsors of this organization.

2.4. Conflict Minerals

Conflict of minerals is one of the most problem of the companies. Tin, volfram, Tantalum, Gold such elements are produced in small and illegal mines of the Democratic Republic of Congo where the civil war is still continuing also in this places there is still child and forced labored. This is also an outcome of the civil war which ongoing 10 year civil war. After the shaping of the Dodd Frank code section 1502 in 2012 the conflict of minerals become importance. After shaping of this code the companies had to declare from where they did buy these materials. Are they using these materials from the Democratic Congo Republic or even from the neighbor countries? After this the companies had to declare from where they bought these materials while this is contributing for human rights violations.

According to these new regulations Mesa Makina is working in cooperation with its suppliers that they are not using 3TG materials. First fully starting from our raw material suppliers and our sub suppliers we are taking and using Conflict of Minerals Reporting Templates (CMRT).

2.5. Prohibited Materials

We are giving importance to the human health and environment according to that we are every time the materials which are produced in accordance to the prohibited materials list. We are also taking and giving declarations that we are not using and buying prohibited materials.

3. ENVIRONMENT

While the responding growing needs and other side production processes, using product and services effects to environment must be decreased, todays primary liability of business world is solving environmental problems.

Our organization keeps under control effects of environmental while we are manufacturing, and we make some improvements for decreasing of effects to environment. For achieving to our environment goal we allocate resources.

Waste management, waste disposal companies under the contaminated package, oil and coolant fluid, chips , carton, paper end electronic waste are given in waste recycling.

The EIA report was taken in 2013.

| | Cost (TL) |
|---------------------------------------|-----------|
| In 2015 environmental protection cost | 30400 |
| In 2015 Cost of waste disposal | 43550 |

Our organization has reached “a sustainable structure to be firm” strategy in 2016 with the ISO 14001 Environmental Management System will begin to work.

In 2016 we started kaizen studies which’s subject is Environment and Energy, we aim that take seizing %10 for Energy and 100% recycling of recyclable waste.

4. ANTI-CORRUPTION

Rights and obligations of our employees publish a regulation. In this regulation; occupational safety and health, rules of attitude, confidentially, working times, overtime, national holiday, annual leave, ingress and egress to the workplace, cleaning work, work place general demeanor, performance consideration, repeal, social help subjects are explaining.
