Social Responsibility Report

2015

Guangxi Penshibao Co.,Ltd

Chairman Wang Xianglin

- Member of the 8th, 9th and 10th Sessions of the CPPCC National Committee
- Member of the Standing Committee of All-China Federation of Industry and Commerce
- Academician of World Academy of Productivity Science (WAPS)
- Vice-chairman of China Soil Fertilizer Industry Alliance
- Member of the Standing Committee of Guangxi Zhuang Autonomous Region of the CPPCC
- Gainer of Outstanding Contribution Award of China Glorious Cause
- Vice-president of the Chamber of Commerce of Guangxi Zhuang Autonomous Region
- Medalist of National Labor Medal
- Advanced Individual of National Unity of China
- One of Top 10 National Outstanding Private Entrepreneurs
- One of Top 10 Low-carbon Characters of China Entrepreneurs
- The Most Influential Model Worker in Guangxi since the Establishment of the P.R.C

Address from the Chairman

Year 2015 marked the 30th anniversary of Penshibao Company. Over 30 years, we have been adhering to the idea of green development and developing and producing efficient, safe, low-carbon and friendly-environmental Penshibao organic water-soluble fertilizers, making a great contribution to the national food safety and agricultural sustainable development.

What we have achieved over the 30 years is benefited from the reform and opening up policies of our Communist Party and the nation. Also, we are grateful for various agricultural technology sectors, scientific research institutions and news media in providing technical backup and public opinion support for a long time and thank all staff for their tireless efforts.

As a significant year during which we have made unremitting efforts, overcome difficulties and undergone difficult transition, 2015 is a year worthy to be remembered by every old and new employee. In 2015, we were successfully listed on the New OTC Market as the first company in Guangxi water-soluble fertilizer industry, laying a solid foundation for standardizing corporate operation and management and boosting sustainable innovation and development. By strengthening technological innovation, we have made new achievements in product R & D, and obtained 10 items of national patent authorization and the key technology of some patents of invention have filled the domestic blank. Backed by various agricultural technology sectors and scientific research institutions, we expanded research and experimental demonstration on Penshibao products and achieved significant success in decreasing fertilizer usage amount, degrading pesticides and reducing heavy metal pollution. We adhered to the idea of green development and actively fulfilled our corporate social responsibility. In November 2015, we were invited for Paris Climate Conference. We made a commitment to carbon emission control through practical action and have it released on the UN website.

In 2016, we will stand at a new starting point in history. We will continue to follow the state's new idea of green development, push forward reform, innovation and technology by the good opportunity of listing on the NEW OTC Market, and continue to develop more new products that can efficiently improve agro-products and food safety. Through sticking to mutual benefit, we wish to enhance friendly cooperation to make a new contribution to modern agricultural development.

About the Report

This report is the 8th consecutively released social responsibility report of Guangxi Penshibao Co., Ltd (“Penshibao Company” or “Penshibao”) since Penshibao Company’s entry into the United Nations Global Compact (UNGC) in 2007, with the purpose of objectively and truly reflecting the information on various work of the company in its fulfillment of corporate social responsibility, and improving the understanding and links between the company and interested parties. The time range of the report is from 1 Jan. to 31 Dec. 2015, and related information and data are from Guangxi Penshibao Co., Ltd.

As a member of the UNGC and a New OTC Market listed company, we conscientiously observed the 10 principles of the UNGC, and actively fulfilled our social responsibility to build a good corporate social image. Over 30 years since our establishment, while focusing on corporate development, creating outstanding performances and insisting on serving “the three rural issues”, we have always integrated our social responsibility into the whole process of corporate strategy, culture and operating management, effectively protected the legal interests of our staffs, creditors, clients and related, vigorously advanced comprehensive utilization of resources and ecological environmental protection, to facilitate the integration of enterprise, economy, society and environment and promote agricultural sustainable development.

The Company and all members of its Board of Directors ensure the authenticity, accuracy and completeness of the contents of the disclosure and that there is no any false records, misrepresentations or major omissions.

I .Summary

(I) Corporate Profile

Founded in 1985, Guangxi Penshibao Co., Ltd is one of the earlier, larger and influential water-soluble fertilizer enterprises in China and is also one of the UNGC member enterprises. For over 30 years, following the tenet of “Serve the Agriculture and Benefit the Human” and the concept of “Agriculture-oriented, Low-carbon Life”, we have been dedicated to increasing grain production, improving environmental protection and sustainable agricultural development.

In strict accordance with the ISO9001 and ISO14001, we researched and produced a series of Penshibao organic water-soluble fertilizers which have independent intellectual property rights and are recognized as “China Well-known Trademark” by the Trademark Office under the SAIC. Moreover, we have registered our trademark in over 60 countries in the world. For a long period, by continuous experimental demonstrations, product mechanism researches and popularization and application through the National Agricultural Technology Extension and Service Center (NATESC) together with scientific research institutions, it proves that Penshibao products have a significant effect on increasing crops yields and farmer incomes, and improving quality, enhancing resistance, degrading pesticide residue, and reducing heavy metal pollution, as well as resisting to natural disasters and preserving the ecological environment.

For a long time, Penshibao product has been honored as “Fertilizer King of China” and highly regarded as “Miraculous Water of the Orient” by customers around the world. Successively, it has gained over 200 domestic and international honors, including China’s Trustworthy Key Brand in Environmental Protection and Quality, the Most Trustworthy Low-carbon Brand of Chinese Consumers, Use Permit of Certification Mark for Green Food Production Material, National Hi-tech Enterprise, China Green Science and Technology Innovation Achievement, the 21st Geneva International Fair and the gold award at the 72nd International Agricultural Fair in Avignon in France, etc.

With entry into the UNGC in 2007, we exemplarily comply with the 10 principles of the UNGC and promote environmental protection and sustainable agricultural development, which are highly appreciated by the UNGC. At the invitations of UNSG Ban Ki-moon and relevant departments, Penshibao Company has successively attended many important conferences including the UN Global Compact Leaders Summit 2010, and International Sustainable Agricultural Seminar 2014, and became the first signatory to UN Food and Agricultural Business Principles. In 2015, we were invited for Paris Climate Conference. We made a commitment to carbon emission control and have it released on the UN website. This has a profound and far reaching significance to enhance the company’s popularity and influence, advocate environment-protecting concept and push forward sustainable agricultural development.

With fulfillment of our social responsibility, we have been offering donations (accumulatively over 150 million yuan) of money and materials for Hope Projects, risks resistance and disaster relief, poverty-stricken areas, hometown construction and other public utilities. We have obtained Outstanding Contribution Award of China Glorious Cause, and Poverty Alleviation Innovation Award, etc. In recent years, we have offered donations of products worth of about 30 million yuan to support to improve tea quality across the country and help Guangxi’s freeze-stricken areas to resume production, which were highly appraised by the society.

We will actively adapt to the new normal of economy, persist in technological innovation and intensify new products R & D and technical services, to proactively push forward our 3-D mode of fertilization and to make a new contribution to promoting food safety and boosting green development.

I .Summary

Speech by Chairman Wang Xianglin at the 30th Anniversary of Guangxi Penshibao Co., Ltd

Work Conference 2015 & Commendation Meeting 2014 by Guangxi Penshibao Co., Ltd

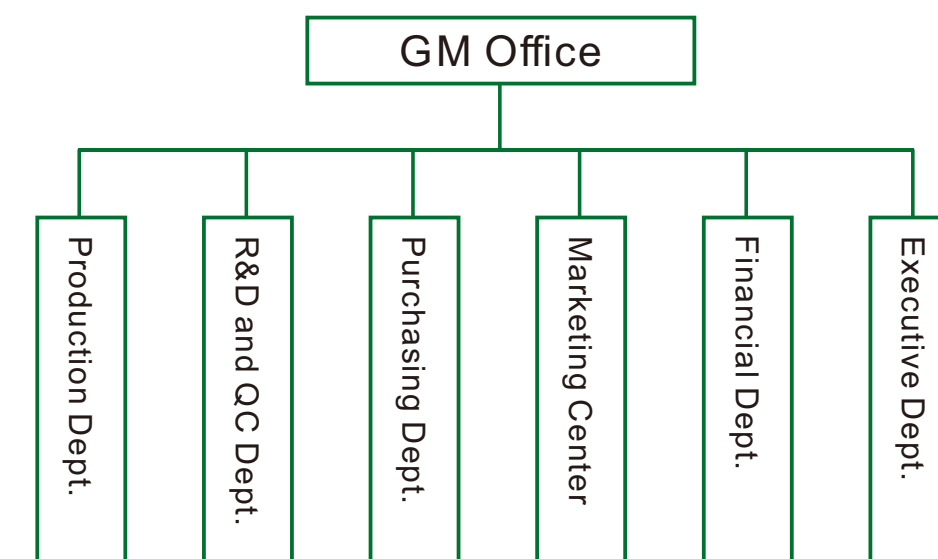

Group Photo of All Employees at the Work Conference 2015 of Guangxi Penshibao Co., Ltd

(II) Organizational Structure

In 2015, according to the need of operating management, we established our current organizational structure---under the leadership of the board of directors, the general manager is responsible for overall work, vice-general manager takes on responsibility by dividing works, general manager office is responsible for general coordination and all functional departments perform their own duties, in order to ensure smooth and effective overall corporate operation.

I .Summary

(IV) Corporate Events

Corporate Events in 2015	
January 2015	We passed the accreditation of National High-tech Enterprise
January 2015	China Eco-Tea Garden Management Seminar Held in our company
February 2015	Work Conference in 2015 & Commendation Meeting in 2014
April 2015	We co-organized the 4th China irrigation Technology Seminars of Efficient Integration of Water and Fertilizer
April 2015	We attended Guangxi selenium enrichment project training and made a speech
June 2015	We introduced our experiences at the news conference of Guangxi Corporate Social Responsibility Report
June 2015	We attended the 15th anniversary conference of UN Global Compact
July 2015	Survey team of the NPC Standing Committee of Guangxi visited to our company
July 2015	We were awarded "China Green Science and Technology Innovation Achievement"
August 2015	We were honored with Guangxi Culture Construction Demonstration Enterprise of Private Enterprises
September 2015	Xianlin Development Foundation held commendation activity of "Respect Teachers & Love Study"
October 2015	We sponsored the 17th National Fertilizer Information Exchange and Products Fair
October 2015	Opening of the 1st "Penshibao Cup" Juvenile Table Tennis Invitational Tournament in Guangxi
October 2015	We were ranked as pilot enterprise of "Good-Conduct on Standardization" at autonomous region level
November 2015	We were invited for Paris Climate Conference in France
December 2015	we were successfully listed on the New OTC Market as the first company in Guangxi water-soluble fertilizer industry
December 2015	We celebrated our company's 30th anniversary

We were invited for the 15th anniversary conference on "Global Compact" by the United Nations

We sponsored the 17th National Fertilizer Information Exchange and Products Fair

We co-organized China Eco-Tea Garden Construction Seminar

II .Social Responsibility

As an enterprise member of the UNGC and as a responsible private enterprise, Guangxi Panshibao Co., Ltd persisted in maintaining the lawful rights and interests of all employees, dealers, suppliers, clients, communities and other interested parties, and made an effort to achieve sustainable development of enterprise operation and the economic society, resources and environment.

(I) Fully Building Harmonious Labor Relations

We treated well the staff, respected their value, brought into playing their enthusiasm and creativity and provided them with an outstanding platform of career development.

1. Increased Employees' Wages and Benefits

Through carrying out performance appraisal and salary reform to straighten out the relation between job performance and individual salary and rationally define fixed salary and ratio of floating wages. Wages and benefits of 75% of the staff have been increased.

The survey team of All-China Federation of Trade Union surveyed the income distributions of the front-line workers at our company

2. Improved the Rights and Interests Protection Systems of Employees

By signing annual responsibility agreements with executives and sales personnel to clarify annual work objectives and ways of rewards and punishment, which were beneficial to motivating the management personnel and push forward all related businesses.

Chairman of our company's labor union made a speech on experiences at Guangxi democratic management conference

3. Enhanced Staff Professional and Technical Training

In light of the demands of management and development, we organized more than 30 trainings about product technology, financial management, e-business platform, operation, marketing, safety production and laws and regulations to improve employees' professional skills.

We organized professional quality training for employees

4. Organized Various Recreational and Sports Activities

We motivated young employees to attend Beihai's "Discover Coastal City's History and Feel its Culture" and Silk Road Hiking Orienteering Challenge and by means of traditional festival to organize various recreational and sports activities, to enrich employees' spare time life.

Our staff at the 2nd Balloon Volleyball Match by Beihai Federation of Enterprises

II .Social Responsibility

(II) Establishing Strategic Partnership

Persisting in the principle of good-faith business, benefit sharing and mutual benefit, we established and maintained a long-term good strategic partnership with dealers, suppliers and clients.

1. Established Cooperative Relationship

We regarded good-faith business as corporate development cornerstone, focused on communication with interested parties, treated partners' satisfaction as one of work measurement standardizations, fully respected and protected the lawful rights and interests of dealers, suppliers and clients, and prevented commercial bribe and improper trading, etc.

We established strategic partnership with clients based on persisting in good-faith business

2. Ensured Quality of Products

In strict accordance with related standards, our QC and production scheduling departments well organized production and strengthened supervision and inspection to ensure stable product quality. Qualified rate of original liquid production was 100%, comprehensive qualified rate of packaging of products/ton was 99.75%, and qualified rate of outgoing products was 99.7%, with a little increase in overall qualified rate than that of last year.

We strengthened quality management to ensure product quality and were highly appreciated by customers

3. Improved Level of Service

We often organized technicians for site instructions in most provinces and regions in China, to attend experimental demonstration on-site meeting and special sessions to introduce new achievements of Penshibao technologies, visited clients and dealers to have a better understanding of product usage, and timely surveyed and solved clients' feedbacks.

We actively offered superior service to develop Guangxi's selenium-enriched industry

4. Established a Good Image

By service hotline, network and picture information, we timely solved problems of clients and salesmen arising from product selling and use. Business managers of provinces and regions regularly visited dealers personally or communicated with them by telephone, so as to enhance their trust and satisfaction with our products and establish a good image.

Our company leaders released responsibility report at 2015 Guangxi corporate social responsibility report release conference

II .Social Responsibility

(III) Highly Valuing Safety Production Management

We attached importance to improving safety production management and took effective measures to ensure no major social security accident or personal injury accident throughout the year.

1. Enhanced Safety Production Awareness

We intensified education on safe production, formulated and implemented safety production training programs and valued safety management personnel construction, as well as assigned outstanding employees to attend “enterprise safety management” training by Beihai supervision authorities of safety production.

We intensified production safety inspection and enhanced employees' safety precaution awareness

2. Improved Safety Management Systems

We paid high attention to safety production . We especially set up a production safety management group, established and completed production safety management systems, conducted regular inspection on implementation of production safety, and timely solved any problem once found.

The Production Safety Management Group held a special meeting on researching production safety

3. Improved Safety Management Quality

We always took every effective measure to formulate emergency plans for safety accidents, carry out emergency rescue drills for safety precautions and get familiar with using fire extinguishers, and thus to improve the abilities of safety management, organizing and precaution, and accident handling.

We organized safety emergency drills to improve the abilities of safety management, organizing and precaution, and accident handling

4. Attached Importance to Equipment Maintenance and Management

In strict accordance with related safety management systems, we strengthened maintenance for production workshop machines to improve the rate of equipment availability, avoid accident occurrence during production and thus to ensure the safety of employees and enterprise property.

We strengthened maintenance for production workshop machines to improve the rate of equipment availability

II. Social Responsibility

(IV) Promoting Environmental Protection and Sustainable Development

We persisted in the idea of green development and vigorously promoted ways of saving-type economy to ensure actual effect of energy saving and emission reduction and promote environmental protection and sustainable development.

1. Established Environmental Protection Conception

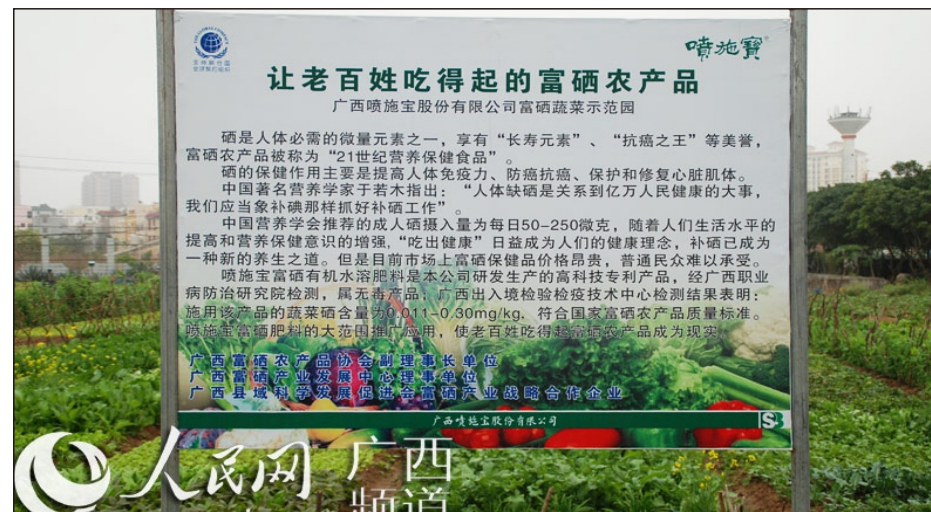

We have persisted in low-carbon environment conception for a long time. In 2015, we were invited for the summit of enterprise forum on caring for climate during the Paris Climate Conference. We submitted our commitments on carbon emission and released it on the UN website.

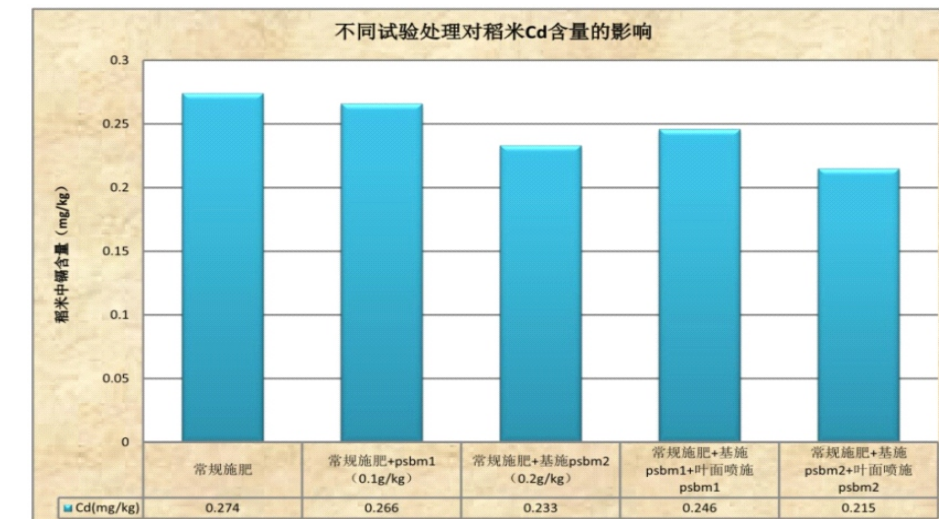

Our representatives were invited for the UN Climate Change Conference in Paris

2. Attached Importance to R & D of Green Products

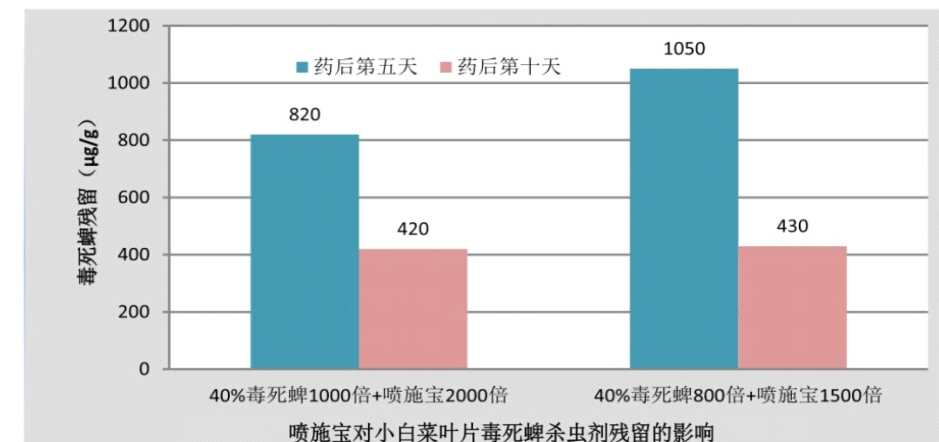

We persisted in technology innovation and invested largely to organize personnel to develop and produce a new generation of Penshibao water-soluble fertilizers which are featured with improving agro-products yield and quality, degrading pesticide residue and protecting soil eco-environment.

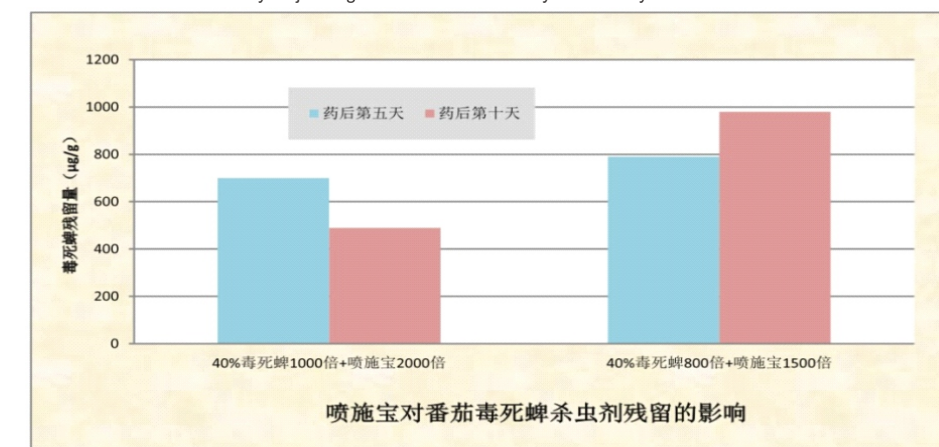

We organized to develop selenium-enriched organic water-soluble fertilizer to produce affordable selenium-enriched products for ordinary people

Experimental study on reducing Cd concentration of brown rice by using Penshibao Products by Agricultural University of Hunan

Experimental study on degrading pesticide residue by applying Penshibao products by Fujian Agriculture and Forestry University

Experimental study on degrading pesticide residue by applying Penshibao products by Fujian Agriculture and Forestry University

II .Social Responsibility

3. Intensified Research Experiment

For consecutive 9 years, we have entrusted NATESC, agricultural technology sectors at the levels of province, autonomous region and city, China Agricultural University, Hunan Agricultural University and other scientific research institutions to conduct experimental demonstrations and mechanism researches on the effect of Penshibao products on fertilizer efficiency, degrading pesticide residue and reducing heavy metal pollution, and we have achieved satisfactory research experiments.

The NATESC held experimental technique training 2015 in Beihai

4. Advocate Low-carbon Concept

Through various exhibitions, we popularized our new mode of 3-D fertilization and actively marketed new products of degrading residual pollution, which drew attention of numerous old and new dealers and clients. During the 31st China Plant Protection Information Exchange & Pesticide and Sprayer Facilities Exhibition held in Hefei, Anhui Province in 2015, many merchants signed distribution agreement with our company.

We advocated vigorously the mode of low-carbon fertilization.

5. Continuously Carried Forward Energy Saving and Emission Reduction

We attached high importance to work of energy saving and emission reduction. All sectors by all manner of means reduced consumptions of raw and auxiliary materials to save management expenses and ensure obvious continuous decrease of various purchase costs, with an overall decrease in the whole year by 9.11%.

Purchasing Dept., Production Dept. and Executive Dept. took effective measures for promoting energy saving and emission reduction and achieved significant results

Introduced new equipments for energy saving and emission reduction

II .Social Responsibility

(V) Actively Participating in Social Welfare Undertakings

While strengthening enterprise management and considering operating profit, we actively participated in construction of harmonious society and stable surroundings, persisted in fulfilling our corporate social responsibility and vigorously supported and developed public welfare undertakings to maintain the harmony and stability of enterprises and the society.

In 2015, we donated 819 boxes of products for an accumulative total area of 18565mu. These products were mainly used in freezing disaster and typhoon disaster rescues and for poverty alleviation, cooperative development and experiment, etc. The main donated objects were the farmers' specialized cooperatives and farmers of the townships and villages around Hepu County.

Together with China Co-operation Times, we organized China Eco-Tea Garden Journalist Tour activity

We actively involved in providing technical support to the poor for poverty alleviation. Penshibao Company's leader was in an interview with the media

Xianlin Development Foundation held commendation activity of "Respect Teachers & Love Study"

The 1st "Penshibao Cup" Juvenile Table Tennis Invitational Tournament in Beihai, Guangxi

II .Social Responsibility

(VI) Establishing and Improving Public Relations

We maintained good communication with local government, industry and information committee, tax bureaus, technical supervision bureaus, environmental protection bureaus, labor unions, associations of industry and commerce, hi-tech development zones and other authorities, to win the understanding and support of all aspects of society.

Personnel of related authorities paid a visit to our company

Democratic management work conference on factory affairs opening by Beihai Federation of Trade Unions was held in Penshibao Company

Peng Qinghua (third from right), secretary of the Party committee of Guangxi, had a cordial meeting with Chen Shu (first from left), representative of NPC, and area sales manager of Xinjiang

Representatives of the Democratic Management Work Conference on Factory Affairs Opening visited Penshibao Company's honors room

III. Social Appraisal

(I) Penshibao Company was accredited as National High-tech Enterprise

人民网南宁2月15日电 (记者庞革平) 记者15日从广西北海国家高新技术产业开发区获悉，广西喷施宝股份有限公司于2014年12月被认定为国家级高新技术企业。

People's Network (people.com.cn) report on 15 Feb.2015:
Penshibao Company passed the accreditation of National High-tech Enterprise

(II) Penshibao Company popularized new mode of 3-D fertilization in serving green agriculture

2015年11月22日在安徽合肥举行的第31届“中国植保双交会”，是农化行业和植保系统中享有极高声誉的大会。广西喷施宝股份有限公司组成20多人的营销团队参加了本届盛会。

喷施宝公司近年来坚持科技创新，组织力量开发研制的新一代喷施宝水溶肥，经试验示范和科研院所进行机理研究表明，该系列产品具有控制农药残留，确保粮食安全、农产品质量安全和生态环境安全等功能。公司根据本届全国植保会主题，精心设计布置展位，突出宣传公司低碳环保理念，大力推广喷施宝立体施肥新模式，积极推介降低残留污染的新产品，受到众多新老客户的关注。不少经销商对加盟喷施宝，共同合作开拓销售市场表示浓厚兴趣，其中部分经销商达成合作意向并签订了经销合同。

People's Network (people.com.cn) report on 9 Dec.2015:
Penshibao Company's new products of reducing residual pollution received widespread attention

(III) We were awarded “China Green Science and Technology Innovation Achievement”

中新网7月29日电 近日在北京举行的第三届“生态文明-美丽家园”关注气候中国峰会公布了2015年度“中国企业十大绿色行动”以及“中国绿色科技创新成果”，广西喷施宝股份有限公司被授予“中国绿色科技创新成果”奖项。

据悉，第三届“生态文明-美丽家园”关注气候中国峰会由联合国全球契约中国网络主办，作为2015年12月联合国巴黎气候大会在中国的预备会之一，受到来自政府有关部门、企业界及专家学者的高度重视和积极响应。

China News (www.chinanews.com) report on 29 July 2015:
Penshibao Company was awarded “China Green Science and Technology Innovation Achievement”

(IV) We were awarded “Guangxi Culture Construction Demonstration Enterprise of Private Enterprises”

8月25日，广西壮族自冶区工商联在南宁举办全区民营企业文化建设培训班。自治区党委统战部副部长、工商联党组书记熊春寒，自治区工商联副主席韦峰芳，自治区工商联宣传培训企业文化建设专委会成员，14个市工商联分管宣传教育工作领导，以及广西喷施宝股份有限公司等民营企业代表参加了培训。自治区工商联授予广西喷施宝股份有限公司等68家民营企业为“广西民营企业文化建设示范企业”。

会场剪影
人民网南宁12月29日电（记者庞革平）日前召开的中央经济工作会议强调，要加快优化产业结构，加快推进现代农业建设。记者在采访过程中了解到，许多涉农企业已经意识到，贯彻落实中央部署要求，发展现代农业，不仅要实现规模化，也要重视绿色发展和生态保护。据悉，中国农资集团作为全国性的集生产、流通、服务为一体的专业经营农业生产资料的大型企业集团，近年来已经将加快适应农业产业结构优化问题摆上议事日程，并通过调研考察，认为广西喷施宝股份有限公司的经营理念和产品功效符合本企业转型升级的需要，达成了与喷施宝密切合作的意向。为什么中国农资集团在众多肥料企业中唯独选择了喷施宝公司？这是耐人寻味的。

People's Network (people.com.cn) report on 29 Dec. 2015:
Penshibao Company led the green agriculture development by giving full play to our brand advantages

III. Social Appraisal

IV. Future Expectations

In the New Year 2016, Penshibao Company will follow the national "13th Five Year" development program and put forward the concept of "Innovation, Coordination, Green, Open and Sharing" in order to promote continuous innovative development.

(I) Persist in Green Development Concept and Push Forward Enterprise's Continuous Development. We will integrate the concept of "Agriculture-oriented, Low-carbon Life" into our country's development concept to make a great contribution to promoting sustainable agricultural development.

(II) Give Full Play to Brand Advantages to Improve Agricultural Quality and Yield. According to our country's objectives of largely promoting construction of high-standard farmland, we will give full play to the brand advantage of increasing crop yield and farmers' income to improve quality and benefit.

(III) Intensify Technical Training and Implement 3-D Mode of Fertilization. Through strengthening agricultural technology extension and scientific fertilization training, we will continue to complete our 3-D mode of fertilization to improve agricultural quality and benefit.

(IV) Adapt to Change of Business Entities and Expand Product Sales Markets. Adapting ourselves to the development demands of new-type business entities and served users, we will proactively intensify exchange and communication and offer technical consultation services.

(V) Expand Product Experimental Demonstration and Propel Agricultural Green Development. By experimental demonstration cases, we will continue to intensify product publicity and thus to let customers know, accept and use our products.

(VI) Persist in Fulfilling Our Social Responsibility and Actively Involve in Anti-poverty Development. We will summarize our successful experiences in supporting poor areas using technology over the years to make a new contribution to poverty alleviation and building a comprehensive well-off society.
