# Corporate Social Responsibility

## Global Compact - Communicating on Progress

A/S Uglands Rederi has traditionally had and has a strong focus on sustainable business practice. Safety has always been the number one priority, but other key elements such as environmental and social impact as a consequence of conducting our business have received increased focus. Knowing that company activities affect society in many ways, and that the company is affected by its surroundings, it is important for A/S Uglands Rederi to contribute to creating and maintaining a positive and sustainable shipping environment.

As a consequence of the above, A/S Uglands Rederi joined the UN Global Compact during 2012. The UN Global

Compact is a strategic policy initiative for businesses that are committed to aligning their operations and strategies with ten universally accepted principles in the areas of human rights, labour, the environment and anti-corruption. This has been integrated, as part of the A/S Uglands Rederi company policy, and the corporate culture.

As member of this initiative an annual "Communication on Progress" is required, and has been submitted, which is available on the Global Compact website. This is a public disclosure to stakeholders on progress made in implementing the ten principles.

## THE UN GLOBAL COMPACT TEN PRINCIPLES

### HUMAN RIGHTS

- |             |  |
|-------------|--|
| Principle 1 | Businesses should support and respect the protection of internationally proclaimed human rights; and |
| Principle 2 | Businesses should make sure that they are not complicit in human rights abuses.                      |

### LABOUR STANDARDS

- |             |  |
|-------------|--|
| Principle 3 | Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining; |
| Principle 4 | Businesses should uphold the elimination of all forms of forced and compulsory labour;                                   |
| Principle 5 | Businesses should uphold the effective abolition of child labour;  |
| Principle 6 | Businesses should uphold the elimination of discrimination in respect of employment and occupation.                      |

### ENVIRONMENT

- |             |   |
|-------------|---|
| Principle 7 | Businesses should support a precautionary approach to environmental challenges;                     |
| Principle 8 | Businesses should undertake initiatives to promote greater environmental responsibility; and        |
| Principle 9 | Businesses should encourage the development and diffusion of environmentally friendly technologies. |

### ANTI-CORRUPTION

- |              |  |
|--------------|--|
| Principle 10 | Businesses should work against corruption in all its forms, including extortion and bribery. |

## Implementation of the UN Global Compact ten principles 2015

The most important corporate social engagement is to provide a safe, sustainable and long term business and work environment for the employees, business partners and the local community. A/S Uglands Rederi (UR) supports several initiatives in various communities, believing that social engagement in communities where business is conducted, contributes to creating shared value for both the company and society as a whole. UR is engaged in different social activities both in Norway and in the Philippines, seeking to continually renew and improve its approach to the local community.

In 2015, in accordance with ISO standards, efforts to ensure continuous improvement in safety and environmental performance were made. Continued focus on reducing energy consumption and seeking environmentally friendly technologies are important, both for the company and its stakeholders. One newbuilding eco-design supramax bulk carrier was delivered and has been in operation since the spring of 2015. Four

new eco-design supramax bulk carriers are on order for delivery 2016/2017 from Japanese yards. The PSV Juanita of the SALT 100 design has been in operation since the spring of 2014, showing favourable fuel economy and operational flexibility. In addition the PSV Juanita was awarded the Support Vessel of the Year 2015 by the Offshore Support Journal.

UR supports and respects the protection of internationally proclaimed human rights, and as a consequence, the Supplier Declaration process is still ongoing (a questionnaire to suppliers related to Quality, Environment, Social Responsibility, Transparency and Health & Safety). The supplier declaration provides guidance when choosing suppliers identifying those that support a precautionary approach to environmental and social challenges, undertake initiatives to promote greater environmental responsibility, and encourage the development and diffusion of environmentally friendly technologies. UR through policy and procedures strives not to contribute to any kind of forced

labour, child labour and discrimination in respect of employment, occupation, gender, age and culture.

UR has procedures and guidelines in place related to averting corruption through gifts and other more specific office related subjects. Anti-corruption efforts continue to be a point of focus with training and reporting in line with the anti-corruption procedure. The said procedure has been implemented, strengthening the existing routines, enabling an enhanced and systematic stance against corruption. Experience from 2015 confirms the usefulness of said procedure heightening the threshold for resisting corruption attempts, and employee awareness. Employees are trained in accordance with recommendations from UNODC, Global Compact and The Norwegian Shipowners' Association (NSA).

UR has collaborated with NSA in combating corruption on specific cases during 2015.

## Global Reporting Initiative

Global Reporting Initiative, as the most widely applied standard for reporting on the ten principles of Global Compact, has been chosen as the company's reporting framework. The objective of the Global Reporting Initiative is to create a platform where the reported information is transparent, reliable, comparable and precise.

The Global Reporting Initiative's (GRI) vision is that disclosure on economic, environmental, and social performance is as commonplace and comparable as financial reporting, and important to organizational success.

Sustainability reports based on the GRI framework can be used to benchmark organizational performance with respect to laws, norms, codes, performance

standards and voluntary initiatives; demonstrate organizational commitment to sustainable development; and compare organizational performance over time.

UR is through its improvement cycle continuously seeking best practice. UR has performed a materiality analysis identifying aspects that have the most material value for the company. Improvement initiatives have focused on these aspects. The three aspects that warrant the company's focus are as follows: Environment, Anti-Corruption and Supply chain. A materiality analysis can be described as a CSR checklist. It enables the company to perform a self-evaluation as well as an evaluation by external stakeholders: owner, employees, clients/main suppliers, partners/financial and insurance institutions, local community(ies).

To facilitate the materiality analysis, stakeholders were identified. "Stakeholder" is a term for those parties that are affected by or affect the company.

They may also have constructive feedback/criticism worthwhile for the company to listen to and take action accordingly. For UR the following five stakeholders have been identified and indirectly engaged;

- Owner
- Employees
- Clients/Main Suppliers
- Partners/Financial Institutions
- Local Community(ies)

The above process was an agenda item and confirmed in the latest Management Review, a key stone part of the annual improvement cycle.

The company has engaged the five stakeholders as follows;

**Owner:** The Owner participated in the decision to become a UN Global Compact company and to report in line with GRI. The Owner is also part of the board of directors.

**Employees:** As a result of an external audit, an internal working environment questionnaire amongst the employees was recommended and executed during May 2013. In addition, through Department Management review, Master review and Management review processes employees are able to voice their opinions and suggest improvements.

**Clients/Main Suppliers:** Clients are requested and encouraged to give customer satisfaction feedback in line with ISO 9001. In addition, offshore related tenders require the companies' CSR status to be given. The company's main suppliers have also been requested to read and return the supplier declaration signed and/or commented. 80% of said suppliers have responded.

**Partners:** Cooperating Partners such as financial institutions, insurers and partners in ownership are well informed of the company's CSR activities and have the opportunity to voice their opinions and thoughts in regular meetings and other formal and informal points of contact. In addition, they are receivers of the annual report and are through this

informed of the company's CSR position and work.

**Local Community:** UR has a long reputation in supporting and working interactive with the local community. The term "JJ Ugland Companies" has often been used as the sponsoring entity. General reference is made to the JJUC.no home page. Through sponsor meetings and participation, opinions and viewpoints are exchanged.

Work with respect to reengagement of the above has commenced. A specific questionnaire is under development and planned complete and ready for issue to the stakeholders during 2016. Their response will facilitate and form the basis for a new materiality analysis for 2017.

The last and still valid materiality analysis for both the internal company and stakeholder highlighted three aspects that warrant the company's focus as follows:

- **Environmental work**
- **Anti-Corruption work**
- **Supply chain with a special focus on labour conditions**

These three aspects will then be reported in the GRI 4 report as core aspects. The aspects are of material value both for the company and society at large and as such are viewed without boundaries. The A/S Uglands Rederi Global Reporting Initiative report is structured as a matrix naming the GRI element/indicator and referenceing the documents and page where relevant information is publicly noted. When not referenced, specific information may be noted. For further information and details, please review the company's home page [www.jjuc.no](http://www.jjuc.no).

This report has not been subjected to verification by an external body nor submitted specifically to GRI for verification purposes. The report is made and published in an honest and open manner representing the status of CSR and the Global Compact – GRI status for 2015.
