

UNITED NATIONS GLOBAL COMPACT

2015 Communication On Progress – Advanced Level

Tarkett CEO's statement of continued support to the Global Compact

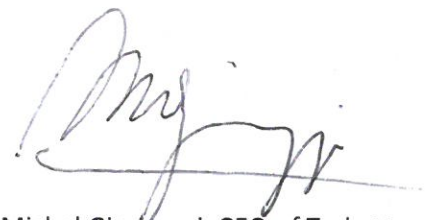

May 2016

"Sustainability is a key differentiator for Tarkett, one the few companies to have fully integrated sustainability into its business strategy and to have embarked on this inspiring journey along with all its stakeholders.

At the heart of our "4P" sustainable strategy (Purpose, People, Planet, Profit) is the long-term relationship of confidence that our teams build with our clients, our suppliers, our investors and local communities in order to construct a better world together, for today and for tomorrow.

In complete keeping with Tarkett's ethical code of conduct, we are committed to respecting and promoting among our various stakeholders the 10 principles of the United Nations Global Compact in addition to the principles of the Declaration of Human Rights and fundamental social rights.

Since 2010, Tarkett has proudly been a signatory of the United Nations Global Compact. The company's 2015 Activity & Sustainability Report, available on our corporate website and the UN Global Compact one, as well as the 2015 CSR Report (2015 Registration Document – Chapter 3), demonstrate our progress in living by and promoting the 10 principles of the Global Compact."

Michel Giannuzzi, CEO of Tarkett
