ABOUT TERANGA GOLD

Teranga Gold Corporation (Teranga) is a Canadian-based gold mining company which operates through its Senegalese subsidiary, Sabodala Gold Operations (SGO), the only gold mine and mill in Senegal, West Africa.

Cover: Marieme is the SGO Environmental Supervisor. As part of her duties, she works on rehabilitation and oversees the tree nurseries of Mamakhono village.

ABOUT THIS REPORT

With four years of learnings behind us since the publication of our first responsibility report, we have enhanced our approach to communicating our Corporate Social Responsibility (CSR) strategy. We believe that the success of our CSR strategy is best demonstrated by showcasing the stories of our people and our culture, which are responsible for making Teranga successful in Senegal. This report focuses on our key activities, initiatives we've implemented and the results of our actions over the course of 2015, with a distinct lens into the impact of our people and our culture. This report is complemented by our corporate website, which includes additional investor-based CSR reporting such as the Global Reporting Initiative (GRI) G4 index, as well as our new community website in the French language (the official language in Senegal).

* Identified ounces on the Birimian greenstone belt, which straddles the border of Senegal and Mali, West Africa, refers to gold ounces historically mined in addition to gold ounces currently reported as Measured and Indicated Resources, as available on GFMS Thomson Reuters and the latest company reserve and resource statements as of March 23, 2016.

1,032

Gross wages and benefits paid locally¹

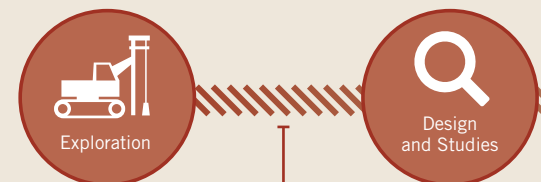

US\$9,165,929

¹ Direct SGO employees only.

OUR APPROACH

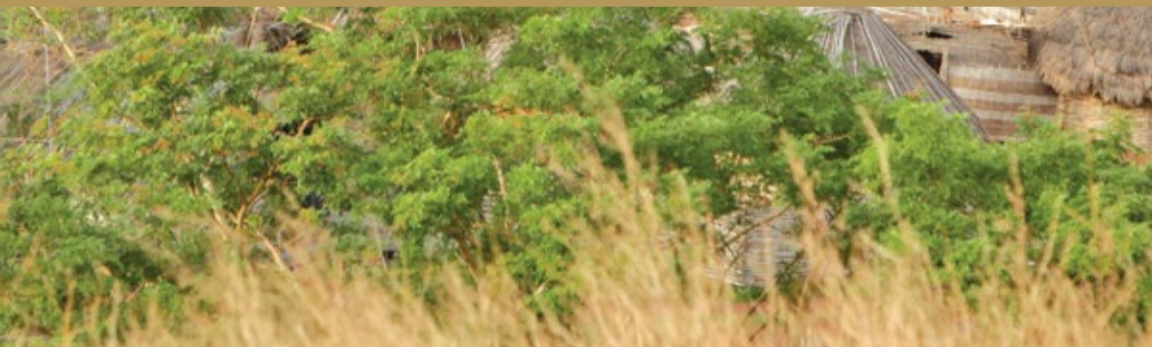

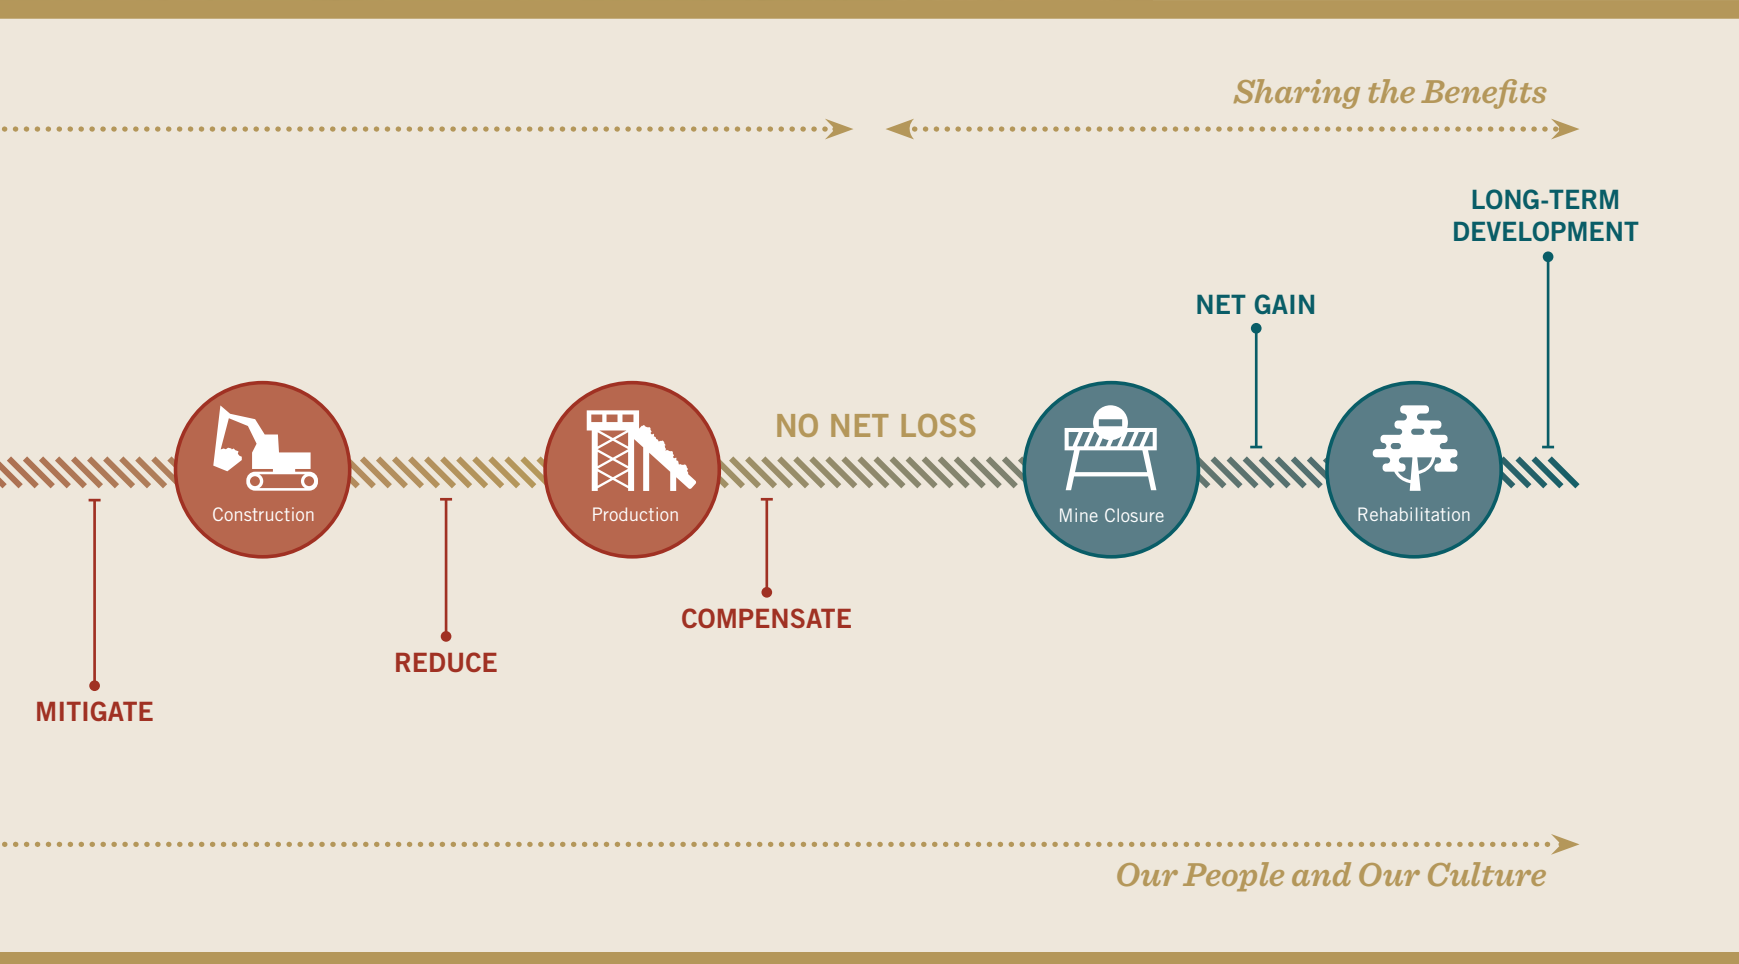

At Teranga, we have integrated responsible mining into all aspects of the mine life cycle, from early stage exploration through to mining and eventual closure and reclamation.

Mitigating Our Impacts

AVOID

Good Governance

OUR PEOPLE AND OUR CULTURE

SHARING THE
BENEFITS

MITIGATING OUR IMPACTS

GOOD GOVERNANCE

Our duties as a corporate citizen are to limit and mitigate our impacts on the community and environment by striving for zero harm to our ecosystems. Beyond this, we work hard to share the benefits of our mining activities with our local and regional stakeholders by developing impactful partnerships with our host communities to progress their immediate and longer-term needs.

Achieving our goals requires adherence to our own rigorous corporate governance standards and complying with all aspects of Senegalese law. Further, we believe that to achieve our goals, we must support our employees in their personal and professional development and allow them to share in the benefits.

MESSAGE FROM THE CHAIRMAN AND THE PRESIDENT & CEO

At Teranga, we strongly believe that our success is tied to the success and stability of our host communities and our reputation as a responsible partner in sustainable resource development.

In striving to set the benchmark of responsible mining in Senegal and West Africa, we understand that we are guests in the regions in which we operate and our right to operate must be earned. We approach responsible mining by engendering a culture of shared long-term value within our host communities. As a leading corporate citizen in Senegal, we have implemented best-in-class policies and programs that respect Senegalese law, provide a safe and nurturing work environment for our employees, minimize our environmental footprint and share the long-term benefits of our activities with our stakeholders. We believe achieving a long-term social license to operate and developing lasting relationships with our stakeholders are the responsibility of each of our employees.

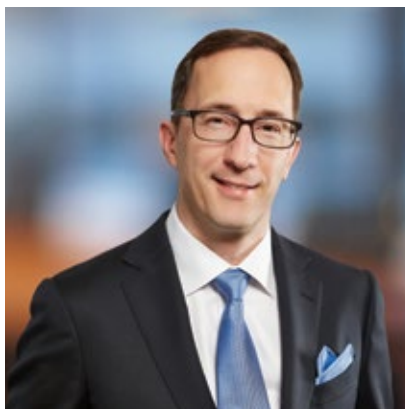

We are committed to delivering on our priorities as a means to achieving our business objectives in a sustainable manner. In 2015, we continued our world-class safety record, surpassing 2.5 years without a lost time injury. We

We believe that open and transparent dialogue with all our stakeholders is key to our success. Here, Sega, our Community Relations Coordinator, engages with the women of Madina-Sabodala in the market garden provided by SGO.

Alan R. Hill, Chairman

Richard Young, President & CEO

launched a local employee leadership development program covering topics ranging from management skills, business improvement, communication and more. We progressed the Teranga Development Strategy (TDS) through the advancement of a number of social investment programs in agriculture, food security, youth and training, and sustainable economic growth. Beyond our community investment programs, 2015 was a year when our development partnerships made significant progress. In particular, the Canadian Cooperation Roundtable, led by Teranga, gathered 30 development stakeholders in the Region of Kedougou to advance 20 different projects at various stages of implementation. One such project is the Paul Gérin-Lajoie Foundation partnership with the Canadian government to provide 50 youths in the region with hands-on vocational training in agricultural skills and technical maintenance. Our White Gold for Life initiative, a multi-stakeholder, country-wide program that aims to revive Senegal's cotton industry, is nearing the completion of its test phase with support from our in-country partners.

Finally, we continue our collaboration with the Government of Senegal by being the partner of choice in the execution of its Emerging Senegal Plan through several key in-country economic development initiatives, which include supporting the publication of the first ever Extractive Industries Transparency Initiative (EITI) report in Senegal, the international standard-setting platform for transparency in the oil, gas and mineral resources sectors.

To conclude, responsible mining is the way we do business. It is part of our culture and embodies our core values of integrity, care, respect, collaboration, performance and communication. We believe our commitment to responsible mining will lead to significant and sustained value creation for all of our stakeholders.

Richard Young
President & CEO

In 2015, Teranga signed development conventions with the Communes of Sabodala and Khossanto for a total of US\$1 million for the provision of grain mills, an ambulance for the Khossanto health post, infrastructure (such as roads, classrooms, market gardens, and water boreholes) and other income-generating projects.

SHARING THE BENEFITS

Teranga is committed to becoming a long-term partner in the development of the regions where we operate. We believe that our presence will provide many development opportunities for the Sabodala area, the Kedougou Region and the country of Senegal as a whole.

CANADIAN COOPERATION AND REGIONAL DEVELOPMENT

Teranga has proactively sought partnerships with governments, non-governmental organizations (NGOs) and other organizations that have a similar interest in supporting the long-term socio-economic development of the Kedougou Region towards the fulfillment of its commitments as part of the Teranga Development Strategy. Our most successful partnership is through the Canadian Cooperation Roundtable, with 20 projects – such as the Paul Gérin-Lajoie Foundation/ Teranga youth vocational training program – now in various stages of implementation.

Our partnership with Global Affairs Canada (formerly the Department of Foreign Affairs, Trade and Development) has supported the creation of three economic development departmental plans for the Kedougou Region, which are nearing completion in 2016, making the Kedougou Region a pioneer in the new decentralization reform.

INVESTING IN THE COMMUNITY

Every year, Teranga invests in the surrounding communities through a fund referred to as the Social Fund. Decisions regarding the use of funds are made in partnership with the local administration itself in order to ensure alignment with local and regional development priorities, as outlined in the Teranga Development Strategy (TDS).

AGRICULTURE AND FOOD SECURITY

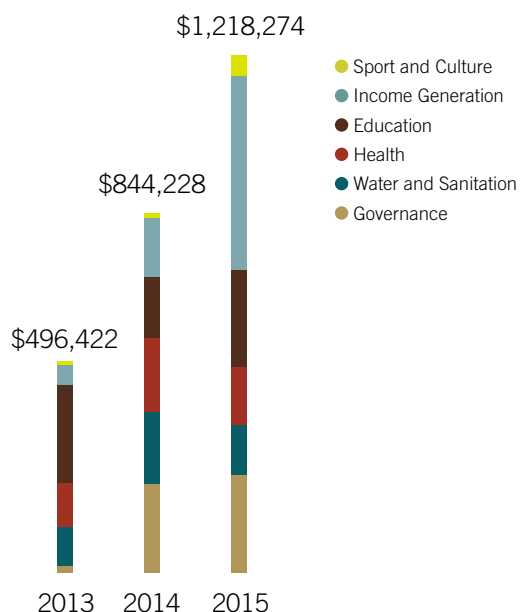

The Kedougou Region has high agricultural potential. In order to realize this potential, Teranga is proactively working with the community to improve animal health and develop husbandry (particularly in the poultry sector) through the donation of equipment and technical services to the region.

We also work closely with women from nearby villages on initiatives such as the market gardens, which are aimed at empowering them to create their own sustainable livelihoods.

Since 2013, SGO has invested more than US\$220,000 into implementing seven fully equipped market gardens that have benefited 600 women. In the past three years, more than 280 tons of vegetables have been produced.

SOCIAL FUND INVESTMENTS (US\$)

In 2015, SGO supported the Sabodala community's agricultural and food security priorities by building the first vaccination park for cattle in the district, expanding its poultry program, and donating three fully equipped tractors and nine lawn tractors to farmers in the villages.

SUSTAINABLE ECONOMIC GROWTH

Successful community development starts with access to basic social services and infrastructure. Teranga supports communities in gaining better access to social services, such as healthcare, education, water and sanitation.

Teranga is supported by its business partners in the provision of infrastructure, financial contributions and material donations to help boost regional economic growth.

Water is one of the main concerns for the communities surrounding our operations. We are conscious of our impacts on this resource and support our host communities in gaining better access to reliable water sources.

Access to healthcare services is a key priority for the communities around the mine site. In 2015, beyond the usual malaria spray program and donation of medicine, Teranga donated an ambulance to the Khossanto health post to support the Sabodala health post ambulance previously donated by SGO.

SGO supports education from kindergarten to the secondary level by providing infrastructure, materials, equipment and a number of bursaries. We also provide accommodation to 200 Kedougou students studying in Dakar.

YOUTH AND EDUCATION

Teranga takes youth education very seriously, and provides support to local youth through the provision of equipment and infrastructure for schools within the Communes as well as several bursary programs.

In 2015, we launched a high school bursary program to allow the best 30 college students in the Saraya department to attend high school and complete their studies. This three-year bursary will support 90 students each year once fully ramped up in 2017.

PARTNERING WITH SENEGAL

Teranga works in close partnership with the Government of Senegal towards the achievement of its Emerging Senegal Plan goals. The Emerging Senegal Plan prioritizes critical infrastructure development as a means towards realizing long-term sustainable growth in the country.

US\$10 MILLION
contribution to finance construction projects in Senegal

Teranga is involved in a number of partnerships to establish long-term, large-scale and structuring development projects in support of the Emerging Senegal Plan (PSE). First, with the Government of Senegal itself, we are contributing US\$10 million to finance construction projects such as the Domaines Agricoles Communautaires d'Itato in Kedougou and the development of fisheries in Saint-Louis. Second, in 2014, we initiated the White Gold for Life project, which aims to revive the cotton industry in Senegal. This is a large-scale partnership between Teranga, the government, and local businesses involved in the cotton value chain. Upon completion of a successful test-phase expected to be finalized in 2016, a comprehensive program will be launched to implement the project.

White Gold for Life gathers cotton producers, textile companies and the Government of Senegal with the goal of reviving the whole value chain of the textile industry in Senegal. Teranga is involved in several ways, first through its partnership with SODEFITEX, which supports more than 500 cotton producers, and also in the discussions around the revival of the industry. The textile industry is a priority of the PSE, and, if the White Gold for Life is successful, there is an opportunity to create long-term value for the entire country and to provide a sustainable alternative to artisanal gold mining in the region.

The partnership between SGO and SODEFITEX has been fruitful in the region, with a production increase in cotton of 92% in the Saraya sector and of 21% in the region. Here, the partners are visiting the fields of cotton producers in Sabodala.

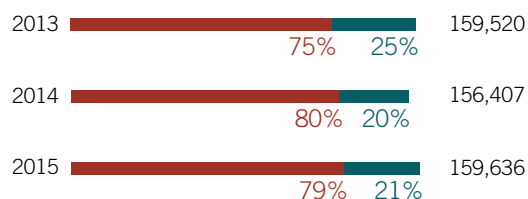

PROMOTING LOCAL PROCUREMENT AND BUSINESS DEVELOPMENT

More than 75% of our purchases are made in Senegal. We believe that one of our biggest levers towards contributing to the long-term development of the region and the country is local procurement and supporting local businesses in developing the skills and means required to be competitive in the mining supply chain. In 2015, we launched a local procurement pilot program to provide training and assistance to small and medium-sized enterprises (SMEs) in the Kedougou Region.

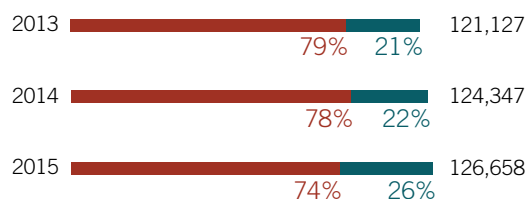

In 2016, we expect to sign several agreements with Kedougou SMEs, and will continue to help them in developing their skills to remain competitive and sustainable.

SUPPLIERS BY ORIGIN (US\$000s)

- Senegalese suppliers
- Foreign suppliers

SENEGALESE SUPPLIERS PER OWNERSHIP ORIGIN (US\$000s)

- Subsidiaries of foreign companies
- Suppliers with more than 50% ownership from Senegal

Women comprise approximately 9% of the workforce at our Sabodala mine site. We are supporting their path to promotion within Teranga and towards advancing their careers within the mining industry, an industry generally dominated by men. The women of Teranga occupy positions within all our departments, from driving heavy mining equipment, to working in our IT and protective services departments, and more.

OUR PEOPLE AND OUR CULTURE

A safe work environment, and a focus on promoting and developing our employees.

People are at the heart of Teranga. We are committed to providing a healthy and safe environment for all our employees, and we are putting an emphasis on recruiting, training and promoting Senegalese employees within the regions in which we operate. In 2015, we launched several new training programs, including a site-wide literacy program, and leadership and business skills development classes for our local employees.

We also have a strong track record of recruiting interns from Senegal to work within various departments at the mine site. In 2015, we recruited 19 interns within the mining, processing, community relations, and health and safety departments.

CAREER DEVELOPMENT OF SENEGALESE EMPLOYEES

* Progression is a career advancement within the same role, while promotion is a change of role.

HEALTH, SAFETY AND SECURITY

Protecting the health and the safety of our people is one of our main priorities at Teranga. Our mine site is classified for the protection of the environment (ICPE), limiting access to the public to maximize safety for everyone. However, our community relations department offices are located outside the site gates, to welcome anyone seeking to get in touch with us.

850 DAYS

worked without a lost time injury

(as at December 31, 2015)

Teranga has achieved an industry-leading safety record since the very beginning of its mining activities. The rigor of our “safety first” culture continued in 2015, when we achieved zero lost time injuries for the second year in a row. Our commitment to the well-being and technical proficiency of our employees is at the heart of our safety performance.

Beyond the mine site, our health and safety department is working to promote and improve health in the wider area and in the Kedougou Region. Our annual malaria spray program targets more than 12,000 people around the mine site and within the surrounding villages. In 2015, our site clinic worked with the authorities to limit the spread of the Chikungunya pandemic emerging in the region. Our health and safety department also launched a site-wide AIDS detection program for our employees in partnership with the health authorities in the region.

Leadership training includes several modules supporting our Senegalese employees' development into leadership and managerial positions within SGO. More than 550 employees participated in these sessions in 2015.

Our Emergency Response Team (ERT) is always ready to intervene.

Teranga takes its environmental responsibilities very seriously, and it works in partnership with communities to find innovative rehabilitation solutions. At Mamakhono, we have built a fully equipped nursery with the capacity for 10,000 plants that operates using an automated solar water supply. Members of the Mamakhono community work at the nursery, ownership of which will eventually be transferred to the community itself, helping to create a long-lasting business for its members.

MITIGATING OUR IMPACTS

Knowing our impacts and putting in place the necessary resources to reduce them.

ON THE ENVIRONMENT

The principle duty of our environment department in Sabodala is to ensure the proper management of our site, and adherence to national and international environmental standards.

Water used by Teranga is sourced from rainwater stored within the three dams on our site, and it is never returned to the environment. Our environmental officers undertake monthly sampling of the surface and underground water around our site. The results, analyzed by independent laboratories, are communicated to the environmental authorities every quarter.

The water dams we installed have created favorable ecosystems for flora and fauna. A number of species are enjoying their new environs, particularly migrating birds having stopovers at our site.

Our environment department is also in charge of mitigating the nuisances associated with our daily activities, such as noise, vibrations and dust. These effects are regularly monitored and any issues are communicated to the administration.

Teranga regularly works with women, who play a crucial role in the community. In 2015, we donated 13 grain mills to villages near our mine site, in order to ease their workload.

ON THE COMMUNITY

One of the most important impacts our operations have on our communities is in the area of land takes. In order to limit and compensate the impact of land takes, we have implemented a Livelihood Restoration and Resettlement Policy which complies with international standards and establishes a formal mechanism for open dialogue between the community, the Company and the administration.

The treatment of land takes at the Gora deposit is an illustration of how we proactively manage the impact of land takes. Teranga began the development of the Gora deposit within its mining lease in 2015 to support the growth of its operations.

Located 25 km northeast of the main Sabodala mine site, the Gora deposit holds significant mineral potential for the Company and for the country of Senegal. The project site is surrounded by the villages of Diakhaling, Kobokhoto, Keniekeniebanding, Tourokoto, Djegoune and Broumbroum.

In 2014, Teranga carried out a series of public consultations to discuss the results of the environmental and social impact assessment studies. The results of the studies and consultations

with the six surrounding communities highlighted the potential impacts of the project on the income-generating activities of people in these communities. In response, Teranga established a fund to address the negative effects of the project on the economic well-being of members of the surrounding communities, and to build capacity for community members through livelihood improvement projects supporting their path towards sustainable livelihoods. The technical services team and local authorities were also consulted to ensure these projects supported local and regional development plans.

SGO's community relations team has been working directly with village members and local civil society actors to implement and monitor these projects, which will start in 2016. Execution of the projects will be carried out by the community members themselves in order to empower them and foster a sense of ownership. A management committee will be established to provide oversight to the process of identifying and implementing the livelihood projects. The committee will be made up of representatives of the six surrounding villages and several members of the local government.

GOOD GOVERNANCE

Transparency, open dialogue and collaboration with all our stakeholders.

Teranga and its employees are committed to conducting their activities in compliance with the highest ethical standards as set out in the Company's Code of Business Conduct and Ethics.

2015 HIGHLIGHTS

Teranga, alongside the Government of Senegal, achieved a major milestone in 2015 with the submission of the first Senegalese Extractive Industries Transparency Initiative (EITI) report to improve in-country transparency of extractive industry revenues and dialogue. Teranga was a leading member of the multi-stakeholder group responsible for the report's submission.

Regionally, Teranga's Regional Development Strategy forum is held annually to inform stakeholders of its progress on the 78 actions

Teranga committed to in the areas of sustainable economic growth, agriculture and food security, and youth and training. Teranga also regularly leads regional events and roundtables involving civil society, government, NGOs and donors that focus on the socio-economic development of the Kedougou Region. One such initiative is the Canadian Cooperation Roundtable, where Kedougou is the first Senegalese region to realize its goal of independent regional socio-development with the completion of its departmental development plans.

Locally, Teranga maintains strong relationships with communities through formalized dialogue. A committee chaired by local authorities involving Teranga and representatives from the seven villages around the mine (women, youth and elders included) convenes monthly to review community issues and opportunities relating to the Sabodala mine.

PAYMENTS TO THE GOVERNMENT OF SENEGAL (US\$000s)	2013	2014	2015
Direct taxes ^{1,3}	6,870	5,024	3,770
Indirect taxes ^{2,3,4}	7,228	8,548	17,589
Mining royalties	10,000	15,089	11,012
Gold reserves	925	925	0
Water and forestry	401	31	50
Dividends paid in advance	2,700	0	0
Social security and pension	336	354	294
Advance royalties	0	1,534	9,154
Institutional support	248	764	881
TOTAL	28,708	32,269	42,751

Our community relations team in Sabodala holds a meeting with the women of the Sabodala market garden, funded by Teranga. Open dialogue and transparency is critical in maintaining meaningful engagement with our community, which is why we have 10 community liaison officers working on the ground.

1 Direct taxes include income and withholding taxes.

2 Indirect taxes include non-recoverable value-added tax, customs duties and fuel taxes.

3 The Company's tax exemption status ended May 2, 2015. From this point forward, the Company is subject to higher rates for customs duties, non-refundable value-added tax on certain expenditures, petroleum tax on light fuel oil and income tax at a rate of 25%.

4 2013 and 2014 figures have been restated to include fuel tax levies.

DETAILED CSR PERFORMANCE INDICATORS

Our main performance indicators are described in the table below. For more details and to see our GRI G4 index, please visit our website: www.terangagold.com/responsibility.

IN CONCLUSION

Being the first gold mine in operation in the country has been a tremendous privilege, providing a unique opportunity to partner with world-class organizations to progress the long-term development of the communities in which we operate and of Senegal as a whole.

We take our responsibilities in the region seriously. We approach responsible mining from a fully integrated value-chain perspective, where we seek not only to mitigate our impacts on the community and the environment but also to share in the long-term benefits of our mining activities.

At Teranga, we believe that in order to maintain our social license to operate and to be an active participant in the long-term success of Senegal, we must invest in the safety, health and development of all our employees and the communities in which we operate. We achieve this through open dialogue, full transparency, and the empowerment of our employees and communities.

If you wish to know more about us, please feel free to contact us or visit our website.
