His Excellency Ban Ki-Moon
Secretary General of the United Nations
United Nations
New York, NY 10017

Paris, 03 AOÛT 2016

Dear Mr Secretary General,

In 2001, EDF decided to join the UN Global Compact. Ever since, we have worked in line with the Global Compact's principles and I am proud to reaffirm my support to this initiative. The UN Global Compact, together with the OECD Guidelines and the UN Guiding Principles on Business and Human Rights, provide us with a solid foundation of internationally recognized principles that support a more sustainable business.

We recognize that a key requirement for participation in the UN Global Compact is the annual submission of a Communication on Progress (COP) that describes our company's efforts to implement the ten principles.

Moreover, in 2016, in line with the Sustainable Development Goals, we decided to commit ourselves on six Corporate Responsibility Goals, enshrined in our strategy called CAP 2030:

- Go beyond the requirements of the 2°C trajectory set by COP21 by drastically reducing our CO₂ emissions;
- Integrate best practice in the way we develop our people: health and safety, gender diversity and internal development;
- Offer all vulnerable people information about and support with energy use and energy benefits;
- Innovate through digital energy efficiency solutions to enable all customers to use energy better;

- Systematically organize a process of transparent and open dialogue and consultation for every new project around the world;
- Launch a positive approach to biodiversity, not limited to understanding and reducing the impacts of our activities in the long run but having a positive effect on biodiversity.

By implementing the UN Global Compact principles and by committing ourselves on these six Corporate Responsibility Goals, we strive to remain an efficient, responsible electricity company that champions low-carbon growth.

Sincerely yours,

A handwritten signature in blue ink, consisting of several overlapping loops and strokes.

Jean-Bernard Lévy
