Sustainability at work

Sustainability at work is about understanding and maximizing how, through our engineering expertise and services, we make a difference. This includes:

- Helping clients obtain project approval
- Sourcing, hiring and investing locally to build local prosperity and capacity
- Reducing our energy consumption, resource use and carbon emissions
- Engaging with communities and stakeholders around sustainability issues
- Earning our social license to operate
- Further embedding sustainability in our processes, projects and decisions

About SNC-Lavalin

Founded in 1911, SNC-Lavalin is one of the leading engineering and construction groups in the world and a major player in the ownership of infrastructure. From offices in over 50 countries, SNC-Lavalin's employees are proud to build what matters. Our teams provide engineering, procurement construction, completions and commissioning services together with a range of sustaining capital services to clients in our four industry sectors, oil and gas, mining and metallurgy, infrastructure and power. SNC-Lavalin can also combine these services with its financing and operations and maintenance capabilities to provide complete end-to-end project solutions.
