ENHAS is focused on saving the environment and making it better by ensuring sustainability in the management of all our activities to minimize impact on the environment. We have continued our efforts from previous years to reduce hazardous environmental releases.

## ENHAS Initiatives

Practical actions were taken most notably on protection of the environment through conservation and management of natural resources/unique habits (game reserves) for rare species.

ENHAS has continued to condemn ivory trade /trafficking through Entebbe International Airport by constantly engaging our stakeholders. This has yielded results by a positive change in attitude amongst the security organs at the Airport.

We have continued to acquire a number of electrical forklifts. They have zero emissions resulting in a better and safer work environment and less noise during operations which has resulted to a better and safer work environment for the employees.

## **Anti-Corruption**

Principles of the UNGC: Businesses should work against corruption in all its forms, including extortion and bribery.

ENHAS continues to observe a zero tolerance to corruption. We adhere to the strongest anti-corruption principle of them all; transparency. All elements of trade are completely transparent to everyone interested in knowing more. The transparency principle means that no customers or suppliers are treated differently than others, reducing the element of corruption greatly. We have a description of our policies in place and company goals on anti-corruption.

## **ENHAS Initiatives**

The principle of transparency is one of the most important elements of ENHAS's core values. To ensure that these values are constantly met, all new employees are educated on the principle.

We are continuing to utilize the Lie Detector on work related topics. This is useful in reducing the incidences of fraud, theft, dishonesty and all illegal activities at the work place. All employees are regularly sensitized about the Lie Detector. New staff are subjected to the new technology which protects us as a company and the airport community at large from recruiting people who are security threats.
