Chair Message

Dear Members,

I would like to thank every member of PROFOH for all the work done in 2016 to make the world better and healthier. We will always have challenges in our work, but I believe we can overcome them. There is always a price to pay, but there are also rewards from God, because the best way to serve God, I believe, is to serve humanity. Thank you for the devotion, day to day work, resilience and hope.

To my Board colleagues, members and friends working in PROFOH, we appreciate you all for the support and hard work. We had some great, great achievements in 2016! I am happy that we accomplished several medical missions in Africa and South America. We have added a new chapter in Ireland as the organization was incorporated there this year. Additionally, we signed several MOUs to fast track our support base and improve our services.

During this past year, we reached out to many institutions and individuals. This led to ground-breaking strategic partnership agreements with three formidable groups in the US, Nigeria and China. The aim of these MOUs, among others, is to raise funds and support to enable our organization scale up our critical interventions next year. The demand for the services of PROFOH from across the world is huge, but we are severely limited by lack of funds. In spite of this, we managed to conduct several missions this year in parts of Africa and South America. We could have done more.

I am especially proud of the medical mission in Kaduna, Northern Nigeria -which made a huge difference—saving lives, providing critically needed medical care to those who've been hardest-hit by poverty, brutal ignorance, conflict and disease. Reports at my disposal state that due to our organization's efforts, the government is now renovating some hospitals across the state for a proposed mega cataract surgical mission next year. Our members and partners from Egypt, the Netherlands and US are standing by.

Furthermore, we need to buckle up for 2017. The world we live in seems to spiral in the wrong direction and stories of pain, disease, burden, desperation, suffering and preventable deaths are around us every day. We can only pray and hope that 2017 will be different even though we have no idea what it might bring, realistically. However, each of us has inner strength and power that nothing can defeat – the power of hope and love for each other, the power to care and of compassion. This is strength and power we as an organization have used wisely in the past. Let's increase the usage of this power. Perhaps, the world will become what we wish to leave for our children.

Again, I'd like to thank all the numerous volunteers and members especially the doctors and teachers for donating their time and skills. "There is nothing stronger than the heart of a volunteer." These words, spoken by American Lt Col James Doolittle in April 1942, in the aftermath of the Japanese attack on Pearl Harbor, are as true today as they were over 74 years ago. I draw profound inspiration from my colleagues on the Board, even as we face the challenge of providing more and better services with fewer resources. With this kind of selfless dedication to the greater good, and with your continuing support, I am confident that together we will be able to rise to the challenges and fulfill our commitments as a caring organization.

Truly Yours,

**Reem N. Bsaiso,
Chair, Board of Directors**

Executive Director's Message

Dear PROFOH Members,

I am excited to share remarkable news for 2016 about Reem Bsaiso, a woman of extraordinary modesty and humility, the new Chair of PROFOH Board of Directors. Reem has served as a Director since 2013 and behind the scene, she has provided leadership and has connected PROFOH with other international organizations including Global Thinkers Forum, London, etc. She has also made efforts to recruit volunteers from world class universities in the US and Europe. Recently, Reem volunteered to update our electronic newsletter. Speaking as a close friend and a brother, this is a proud moment. But, I believe that you will be equally excited from your perspective as a member or volunteer, as you learn of Reem's experience as former CEO with World Links of the World Bank and her other activities. Her roots with humanitarian work and life of service were established long ago, even before she graduated from University as a medical microbiologist in Jordan. Additionally, Reem was trained in the United States and the Netherlands. She sits on the Board of several international organizations globally.

Working with humanitarian organization that is worst hit with funding deficit can be very challenging. I'm sure this reality is applicable to you too. However, in spite of the financial constraints, PROFOH made real transformative difference in people's lives within the past 12 months. Our organization is doing its best to meet the needs of marginalized women, men and children across the globe - those, who so often bear a disproportionate disease burden or when emergency strikes. Many government officials have approached us to provide quality health care, education support and safe drinking water to their constituencies, because of our reputation and almost 20 years solid track record. They are convinced that no matter where the front lines are located, PROFOH will deliver - delivering critical health care in the most difficult and dangerous environments. But we have only done so with support and prayers from people like you. Please make a tax-deductible gift today to help provide health care to women and children around the world who need it most. PROFOH is covered by 501 status in the United States. The need for better ways to assist the communities we serve has never been greater.

Again this year, due to Nigeria economic recession that resulted in gross under funding of our activities, we missed our targets of four international missions: South Sudan, Nepal, Kenya and Cameroon-we pray to deliver next year. However, history is likely to repeat itself next year courtesy of Amb. Sylvester Parker-Allotey, current Ghana Ambassador to Japan and Chair of PROFOH Ghana Board. He has indicated that plans are in advanced stage to conduct a medical mission for West Africans residing in Japan, as we did in Lagos during Ghana Cocoa Day, July 2010 when Mr. Parker Allotey was the Ghanaian Ambassador to Nigeria.

Finally, I am enormously grateful to our Chair, Reem Bsaiso, for her leadership, the Vice Chair, Lorinda Liang for her guidance and she is instrumental in putting some of these MOUs together and also our next year medical mission in Ghana, other Board members, especially Brian Camazine, for making five mission trips within one year; Stuart Quartermont, two trips, Conrado Ordenoz for flying PROFOH flag in Honduras, Cliff Jarrell for keeping a date with thousands of IDPs in Northern Nigeria, etc. Anina Nazami for also flying our flag in India, Gbaranen Gbaanador for support and leadership, others are Joe Ayalogu, Markus von-Have, Angela Chester- Johnson, Camille Bradshaw, Orson Nurse, Olayinka Ajiboye, Melina Mesanovic, Natasa Skribic, Anita Singh, Marcie Russell, George Abdallah Clara Ndive, Prosper Ahworegba, Elvis Obukowho, Yaron Aharon, Julius Atanawhemera, Dotun Daniel, Mohammed Biu, Linda Odu Kama, Lawal Mohammed, Bala Kaoje, Sugun Olawin, Mustapha Sabra in Egypt, Edwin Annorg in Ghana, Adel Regab in the Netherlands.. We wouldn't be where we are today without you. Thank you for believing in this work.

Sincerely,

Gbemuotor Kama
Executive Director

MISSION:

...Since 1998, we support weak and compromised communities globally to overcome Health, Education, and social challenges arising from ill health, poverty, and man-made or natural disasters. This work substantially supports men, women and children through critical interventions including medicine, safe water, education, and necessary policies around them.

VISION:

Is the elevation of the human race through medical and social interventions and access to high quality health care by vulnerable populations in all cultures throughout the world.

Photo of the Year:

MEDICAL

FIRST KADUNA STATE MEDICAL MISSION

Photo; Dr. Quartemont & Dr. Davis in the surgical theatre at Mercy Angels Hospital

Our first mission this year took place in Kaduna, Dr Quartemont led the team. PROFOH collaborated with our long standing partner Medical mission International on this mission. We are glad to inform you that the mission was successful as over 200 patients benefited from the intervention. The mission was in collaboration with a faith-based group called Mercy Orphanage Clinic, Rev. Tunde Bolanta the general overseer of Restoration Ministry and host of the team was handy daily to see to the smooth running of the facility. A beneficiary of the surgical out reach, Mrs Ese Amakiri who had a case of fibroid expressed her gratitude to the both organizations and Dr. Quartemont. "I was earlier diagnosed with fibroid but due to the high cost of medical health care in Nigeria we just couldn't afford the cost of a surgery, to see a group of highly trained professionals come here and carry out this same operation for free is beyond words. my prayer is for God to keep strengthening the group. Another beneficiary ,Mrs Mercy Ayodele who had suffered from fibroid and ovarian cyst expressed her joy after her successful surgery "I have never seen such grace and professionalism from doctors like this before, the love they radiates while working on you is more than a million bucks and to know these are done for free is unbelievable. The doctors congratulated me after the surgery and said I should expect the best. I thank PROFOH for giving me hope at this point in my life when I had lost it. May God continue to replenish their efforts." For almost two week the mission lasted before the team moved to Port Harcourt ,location was New Mile I Hospital were about 50 patients were seen clinically and several surgeries performed..

SECOND KADUNA MEDICAL MISSION

Photo; PROFOH team of Doctors in Kaduna

Kaduna North clinical medical mission took place on the 29 Feb, sponsored by Senator Suleiman Othman Hunkuyi, the Senator representing Kaduna North Senatorial District of Kaduna State. The Senatorial Zone comprises of eight (8) Local Government Areas namely; Lere, Kubau, Ikara, Makarfi, Kudan, Sabon Gari, Zaria and Soba.. The mission was led by Dr. Marcie Russell, she expressed gratitude to the Senator, our Chief Host, the Executive Governor of Kaduna State Malam Nasir Ahmed El-Rufai and all the wonderful people for their support. They made this particular mission one of PROFOH best in recent years. The mission was conducted at State Government owned health facilities in the eight LGAs of the senatorial zone which lasted for three weeks. At the end of the exercise 10, 987 patients benefited. Similarly 3,019 patients with optical challenges shall be issued with glasses freely. Thousands of patients with complex surgical cases were penciled down for surgical operation schedule for June/July next year. The surgical mission will be carried out by several partners from the Netherlands, Egypt and the United States, the focus shall be in surgery, currently the Kaduna Government is renovating some of the hospitals to be used for the mission .It is also important and gratifying to know that the Ahmadu Bello University Teaching Hospital has officially approved of request of collaboration for the project. The University is the largest in Northern part of Nigeria as it covers about 19 states of Nigeria's 36 states. Our organization had a training session for students in the Kaduna School of Nursing.

THIRD KADUNA MEDICAL MISSION

Dr. Quartemont led a team of Six for 2-weeks joint mission trip in Kaduna- Nigeria with 3 medical students from Atlanta and 1 from Bryan, TX. First time in Nigeria, Africa for that matter, they saw a different Nigeria –very different from the stereotypes by the international media. "Their eyes were opened," with many new sights & experiences in this amazing country. The team initially arrived in the capital city of Abuja. We were unable to do any medical outreaches in Abuja as planned, but made a good contact for future outreaches. We then travelled to Kaduna by road in a minivan with 16 pieces of luggage (primarily consisting of medical supplies), that we had strapped to the roof, maxing out the vans weight capacity. We literally prayed our way on this 2-1/2 hour journey, and God was with the team as they arrived without incident. We were welcomed to Kaduna by Pastors Tunde and Tina Bolanta. The mission was designed for the Kaduna North District of Senator Hunkiyyi but fails to commence. Consequent upon our arrival the next day we commenced surgery at Mercy Angels Hospital and Mercy Home Orphanage, where we addressed many pre-surgery issues before the surgical cases were dealt with. By and large 28 surgeries were performed with the assistance of 3 other Nigerian doctors. However, hundreds of patients benefited from clinical consultations and treatments.

Photo: Dr. Quartemont and his team during surgery in Kaduna

FOURTH MEDICAL MISSION-HONDURAS

Professionals For Humanity (PROFOH) is proud to part of the group that conducted a clinical and social mission in Honduras in Central America and was even prouder that our very own Board member, Dr. Conrado Ordonez, was a leading member of the team. Dr. Conrado is a dedicated family medicine practitioner. The mission covered a one-week period. It involved minor surgeries, out-patient consultations and treatments including some low level training of local health workers. There was also other aspect of education and distribution of several gifts items to the community where several local experts also assisted the team. Over 100 persons were direct beneficiaries. Plans are in advanced stage for the next medical mission in Honduras for next year. The Chair and the entire Board express their profound gratitude to Dr. Conrado for flying the flag of PROFOH in South America; he is also working on plans for the next mission in Ghana. Dr. Conrado has also represented PROFOH at the World Bank/IMF meetings in Washington, DC in addition to conducting several medical missions in Africa

BRIAN CAMAZINE MEDICAL MISSION TRIPS TO NIGERIA

Photo: Dr. Camazine and his team at the NCH Nigeria

Dr Brian Camazine, President ESF and Board member PROFOH, made several mission trips to NCH Nigeria. During the year, 5 eventful trips, dozens of Nigerian upper level healthcare workers participated, and they acquired valuable experience and exposure to handle complex surgical cases. Nigeria Christian Hospital, Aba South –East of Nigeria has been a medical Mecca for doctors, nurses, healthcare workers and medical students, including senior consultants from government-owned medical facilities. This aspect of the trip is quite unique and Dr. Camazine is very proud to get such a strong local participation. The mandate of ESF is also provide education and manpower development. Over 5000 patients were treated and more than 550 difficult surgeries performed. The next medical mission from him is schedule to take place in January next year, He has graciously agreed to repeat history with our organization -joint medical mission between PROFOH and ESF ,exactly what we did in Ogoniland in 2013 where we broke our records, by performing 25 bold surgeries in one single day.. . The Chair and the entire Board express their profound gratitude to Dr. Camazine for his amazing dedication and call on members of PROFOH to support and donate to ESF as both organizations are strategic partners; Please find the list of his trips to NCH during the year.

MISSION TRIPS

1. **On 1/2/16**, Dr. Camazine returned to the Nigerian Christian Hospital for a mission trip. During this 4 week trip, 10 Nigerian upper level healthcare workers participated including Drs. Jombo, Acho, Enyinnah, Akunekwe, Akpanudo, Madu, Nkeonye, Ifeanyi, Oje and Nurse Anesthetists, Wilson, Uruakpa and Oje. Many nursing, medical and nurse anesthetist students were also present. Over 750 patients were treated and 150 operations performed. All members of the team

were Nigerians except Dr. Camazine. This aspect of the trip is quite unique and we were very proud to get such a strong local participation.

2. **On 3/23/16**, Dr. Camazine returned to the Nigerian Christian Hospital for a mission trip. During this 4 week trip, 11 Nigerian upper level healthcare workers participated including Drs. Jombo, Acho, Enyinnah, Akunekwe, Akpanudo, Madu, Nottidge, Oje and Nurse Anesthetists, Wilson, Uruakpa and Oje. Many nursing, medical and nurse anesthetist students were also present. Over 700 patients were treated and 147 operations performed. All members of the team were Nigerians except Dr. Camazine.
3. **On 5/29/16**, Dr. Camazine returned to the Nigerian Christian Hospital for a mission trip. During this 4 week trip, 13 Nigerian upper level healthcare workers participated including Drs. Jombo, Dabs, Acho, Enyinnah, Akunekwe, Akpanudo, Madu, Unaka, Chidi, Nottidge, Oje and Nurse Anesthetists, Wilson, Uruakpa and Oje. General surgery residents from Federal Medical Center, Uhmaiha (Drs. Okpokiri, Chukwu, Nnana) started official 3 month rotations at the Nigerian Christian Hospital in order to get exposure to complex cases. Many nursing, medical and nurse anesthetist students were also present. Over 700 patients were treated and 121 operations performed.
4. **On 8/10/16**, Dr. Camazine returned to the Nigerian Christian Hospital for a mission trip. During this 5 week trip, 13 Nigerian upper level healthcare workers participated including Drs. Jombo, Dabs, Acho, Akunekwe, Akpanudo, Madu, Nottidge, Oje and Nurse Anesthetists, Wilson, Uruakpa and Oje. General surgery residents from Federal Medical Center, Uhmaiha (Drs. Imahigbe, Udemezue and Orgi) came to get exposure to complex cases. Many nursing and medical students were also present. Over 700 patients were treated and 138 operations performed.
5. **On 11/1/16**, Dr. Camazine returned to the Nigerian Christian Hospital for 4 weeks. During this 4 week trip, 13 Nigerian upper level healthcare workers participated including Drs. Jombo, Dabs, Acho, Akunekwe, Akpanudo, Madu, Nottidge, Oje and Nurse Anesthetists, Wilson, Uruakpa and Oje. General surgery residents from Federal Medical Center, Uhmaiha (Drs. Imahigbe, Udemezue and Orgi) came to get exposure to complex cases. Many nursing and medical students were also present. Over 700 patients were treated and 138 operations performed. This trip all the pathology was performed locally by Chidi Onwuka. MD, at Surepath Pathology Consultants.

ONE OF THE OVER 550 SURGERIES PERFORMED BY CAMAZINE AT NCH NIGERIA-2016

This little child had a fast growing mass in the left orbit. We did an enucleation and the pathology showed retinoblastoma. The child is about to start chemotherapy and later, perhaps, radiation as well. Charlotte Jacobs, MD, at Stanford University, has been helping with post surgical treatment recommendation.

EDUCATION

Photo: PROFOH team conducting training session for nursing students in Kaduna- Nigeria

Our organization is a member of several international groups promoting and advancing quality education globally, including International Network for Education in Emergencies, which has inspired our education interventions during our medical missions, in the past, we have offered several scholarships and provided writing desks to public school in Nigeria. In February, we conducted two medical mission in Kaduna concurrently, one was more surgical while the other was clinical, the second mission was designed to accommodate teaching and training for young nurses at the Kaduna School of Nursing and midwives the state government expressed gratitude to our team for the excellent intervention and requested we come back next year for another round of training .Additionally, we have the **Girl Child Education Project** currently going in some high schools in two selected states –Delta and Ogun, subject to funding we shall expand the program to five educational disadvantaged states ,this program support only female students who are very smart academically but are in danger of dropping due to(Poverty) financial burden. PROFOH Nepal is still running our rebuilding educational opportunities for kids heavily impacted by the earthquake. These on-going emergency education programs include the award scholarship to several kids -Mandira Rimal. from Dhading district, Nepal was among the first beneficiaries- According to PROFOH's Country Director ,more and more people are signing up to be members of the organization, she sincerely appeal to the Board to support PROFOH Nepal.

WATER

PROFOH MARKED WORLD WATER DAY

PROFOH is a member of the United Nations Water Mandate headquartered in Sweden thus have participated in several online activities of the agency. Water Mandate is working round the clock to ensure effective Water governance and global access to millions of people—its ironic that water covers over 70% of earth surface, yet nearly a billion people do not have access to this most important liquid to human. According to the United Nations over 700 million people around the world do not have access. In spite of remarkable progress of access to improved drinking water since 1990s, significant disparities persist, 90 per cent live in rural areas, and are being left behind in their countries progress. For children, lack of access to safe water can be tragic. On average, nearly 1,000 of them die every day from diarrhoeal diseases linked to unsafe drinking water, poor sanitation, or poor hygiene. For women and girls, collecting water cuts into time they can spend caring for families and studying. In insecure areas, it also puts them at risk of violence, rape and attack. UNICEF estimates that in Africa alone, people spend 40 billion hours every year just walking to collect water. Building on a successful roll-out last year, UNICEF and partners are again this year engaging the public in a social media campaign to help raise awareness. Our organization issued a Press Statement to mark the day.

HIGHLIGHTS OF THE YEAR

PROFOH MARKED WORLD TB DAY WITH HIGH LEVEL ADVOCACY CAMPAIGN

PROFOH is a leading member of WHO STOP TB Partnership. TB is a disease of poverty, it spreads like wildfire through places where nutrition is poor, living conditions are overcrowded, and treatment doesn't exist—infesting and killing millions of people in the poor nations where we work. Last year we promised to do better, with all sense of modesty, we did much better in terms of turn out and participants. Drug –resistant TB has been a major concern to our organization. With other stakeholders, ministry of health, private sector and groups. We had a huge walk over 3000 activists, government ministry, banks .telecommunication firms ,etc to raise awareness in Port Harcourt, Rivers State Nigeria , where PROFOH also Chair the TB network of the State with over 30 different organizations as members. We're aiming at helping many more patients with tuberculosis get access to TB drugs. To mark the day, PROFOH also issued a press statement. Special thanks to Mrs. Gift Akoma of DOLF, PROFOH partner organization and Mr. Muzan Messiah, our coordinator for South-South of Nigeria and Chair TB network for the superb work he did in putting the all –important event together.

Photo: Thousands of activists on TB awareness walk in Port Harcourt- Nigeria

PROFOH BOARD MEETING

The joint Board meeting of PROFOH took place in May 2016 in Abuja Nigeria, Present at the meeting were members of Directors and Advisory Board, and PROFOH Nigeria Board. The meeting was presided by our organization International Board of Directors, Vice Chair, Dr. Lorinda Liang, Mr. Cliff Jarrell and Mr. Gbemuotor Kama, From the International Advisory Board, is also the Vice Chair of that body, Mr. Joe Ayalogu, a former Nigeria Ambassador to Switzerland and the United Nations, Dr Safiya Umar ,Chief Host, Chair PROFOH Nigeria Board, others Nigeria Board members included Hon. Bala Kaoje, former Minister of Sports in Nigeria ,Mr. Elvis Obukowho, Dr. Marcie Russell, Prince Nafeeu Aliyu Those who could not make it sent their apologies. Several issues were discussed including fund raising, how to respond to several invitation received by the organization, Proposed MOUs with other organizations, the retirement of several members including former Chairman of Board of Directors Phil Nugent and confirmation of **Ms. Reem Bsaiso** as the new Chair person of PROFOH for the next four years. Reem is trained as medical microbiology and also an Expert in Knowledge Economy. A lavish dinner was held at Abuja Sheraton Hotel immediately after the meeting in honor of members especially Dr. Lorinda Liang who flew from Denver Colorado, United States to attend the Board meeting.

PROFOH CONGRATULATES A NIGERIAN SURGEON FOR MIRACLE SURGERY

A Nigerian surgeon Dr. Oluyinka Olutoye and his partner Dr. Darrell Cass of the Texas Children's Hospital, carried out the operation on 23-week –old foetus in the United States. The baby Lynlee Hope, who suffered from a tumor known as Sacrococcygeal Teratoma was removed from her mother's womb, operated on and returned to the womb. The baby got healed and continues to grow until she was finally delivered at the 36 weeks. The Doctor explained that the tumor is trying to grow by sucking blood from the baby, yet the baby is also trying to grow too, so it becomes a competition inside the womb. And in some instances, the tumor wins and the heart just cannot keep up and the heart goes into failure resulting to death. In this case, with a large tumor stealing the blood supply, the fetus was becoming more ill each day, doctors explained to the expectant mother, something has to be done because at 23 weeks the tumor was shutting her heart down and causing her to go into cardiac failure, so it was a choice of allowing the tumor to take over her body or giving her a chance at life. It was not an easy decision for us; we wanted to give her life. She was 23 weeks and 5 days pregnant, when the team of Dr Olutoye and Cass performed the emergency fetal surgery, by this time, the tumor was nearly larger than the fetus. They operated for five hours. Most of the was spent opening the uterus, which was described by the doctor as a big muscle line with membranes, we do not want the

mom's health to be jeopardized, they work carefully ,making the incision and sewing it up in order . He credits the heart specialist, a key member of the team for giving the right medication and transfusing the right amount of fluid, allowing the surgeons to continue their work. When they finished their operation, the surgeons place Lynlee back inside the womb and sewed her mother's uterus .It's a kind of a miracle you're able to open the uterus like that and seal it all back and the whole thing works. Boemer Mother was on bed rest for the reminder of her pregnancy for another 12 weeks to nearly 36 weeks-full term- When Lynlee Hope was born for the second time via C-section on June 6, She weighed 5 pounds and 5 ounces.

Photo: Dr. Oluyinka Olutoye of the Texas Children's Hospital and baby born twice

PROFOH INCORPORATED IN IRELAND

The Board of Directors expressed their profound gratitude to the Irish Country Director Mr. Olayinka Ajiboye and his team in Dublin. Our organization was certified on Wednesday 16th March 2016 by the registrar of companies in Dublin. The PROFOH headquarters is in capital Dublin. Ajiboye has worked tirelessly since 2014 on the incorporation in that great country. We wish to gently remind all directors and members, particularly those in United States, where the giving is more established, to intensify fund raising efforts to support our new chapter. As part efforts to hit the ground running PROFOH Ireland has indicated interest in the Partnerships for Global Health Africa Grants Programme (AGP) project that supports the training of health workers in low- and middle-income countries. The project is funded by Johnson and Johnson, the AGP engages partnerships between organization in the UK and Ireland, and their counterparts in Africa. The long-term aims of the AGP are to save and improve the lives of women and children, prevent disease in vulnerable populations and strengthen the healthcare workforce in Africa. The AGP will support projects that mobilise UK and Irish health workers to develop the capacity of health workers in Africa through skills transfer, training, mentoring and other collaborative work. The funding will support projects designed to improve the standards of clinical training (at all education levels), the technical skills of staff, or the efficiency and capacity within healthcare systems. Our interest is on both Surgical and Anaesthetic Care and Community Health Care.

PROFOH SIGNED SEVERAL MOUS

As a member of several international bodies including the United Nations Global Compact one of our objectives is to seek viable partnerships and collaborations, I am glad to report that 2016 was not record breaking year for us, but record smashing for our organization, we signed four MOUs and three others groups are in various level of discussions, The MOUs include the private/corporate and development sector.

The first MOU was just a formalization of a two years strategic working relationship with the **State Clinical Translational Scientific Research Group**. It's an international organization that operates in several countries including the United States,

Ghana, China and Nigeria. As their name implies they conduct clinical trials, scientific research, Pharmaceuticals, biomedical activities technology transfer, housing projects, medical equipments supplies, etc PROFOH will handle their CSR them in countries where the operates, especially in Africa.

The second MOU was with **Jan's Haven International Foundation** based in the United States and the Caribbean, the purpose of our partnership was to provide PROFOH Medical Missions with qualified health care professionals of Caribbean descent offering the opportunity to expand on their clinical training and the possibility of furthering their educational development and securing job placement. The group shall be creating a data base of health care professionals, operate within PROFOH's guidelines and rule of engagements to solicit, screen and schedule such professionals. In addition to creating the above-mentioned data base, Jan's Haven shall source and submit to our organization, potential opportunities for missions within the Caribbean. This Medical Mission will be coordinated with our organization as a part of PROFOH's ongoing global humanitarian outreach. PROFOH – shall set up missions and extent relationships with Universities and Hospitals to Jan's Haven in order to infuse educational development and job placement for the qualified participants. The Foundation will design initiatives and events to collectively fundraise to support PROFOH approved projects in the Caribbean. Our joint efforts will also increase the visibility of PROFOH in areas that will improve PROFOH's international fundraising efforts.

The Third MOU was with **Inner Mongolia Kangjia Tech Company Limited** with its headquarters in Hohhot near Beijing China. The company produced high quality medical instruments, apparatus, public health equipments, etc, with very impressive profile as it has exported products and services to the US, Japan the EU and several African countries. The purpose of our partnership was to provide PROFOH with financial and material support to enable it render its humanitarian services in line with the Firm Corporate Social Responsibility policy, our organization shall introduce the company brand to our partners ministries of health in the countries where we operates.

The Fourth MOU was with **Prowess Energy Limited** based in Abuja, the purpose of our partnership was to provide PROFOH platform for the construction of 200-bed Hospitals in some local government council or county across West Africa, starting from Nigeria as long as such county is certified by the United Nations system, World Health Organization (WHO) or UNICEF if is Children Hospital that is being requested. Our organization will work with Prowess Energy Limited to provide the expertise and technical know-how. The firm will also facilitate some medical missions to underserved communities for their CSR activities

EVENTS & NEWS IN BRIEF-2017

PROFOH-CORDIALLY INVITED- Our organization is an international player. Accordingly, we have received several invitations for 2016/2017. These are few of them for next year. Members are encouraged to attend/participate in some of the high profile meetings and gathering

Missions

The next Dr. Brian Camazine Mission **January 2017** at NCH Nigeria

 7th PRME Assembly, **18-19 July 2017**, New York City, United States.

2018

Proposed PROFOH General Assembly will take place in Dubai, UAE. The PROFOH family will come together to celebrate our 20 years of existence.

FINANCIAL REVIEW

PROFOH is a 501 (c) (3) nonprofit organization and a self funded organization by the Board and some dedicated members, our annual expenses have grown more than 10-fold within recent years. As an international organization we commits to the highest level of efficiency and transparency in our work through financial management system. Our methodology minimizes overhead to almost zero costs and maximizes the impact of our interventions. Our transparency is consistent with the commitments of the Paris Declaration on Aid Effectiveness., The 2016 audit of our financial statements will be done by an independent accounting firm. We would be happy to provide the full report upon availability.

OUR TEAM

The Board of Directors is a leadership group that promotes understanding and support for the organization. They include:

• Ms. Reem Bsaiso	Chair	Jordanian
• Dr. Lorinda Liang	Vice Chair	American
• Prof. Gbaranen Gbaanador		American
• Mr. Markus von- Have		German
• Mr. Cliff H. Jarrell.		American
• Ms .Melina Mesanovic		Serbian
