Communication on Engagement

13 November 2017

With this letter the Global Public Policy Institute expresses its continued support for the United Nations Global Compact and renews its ongoing commitment to the initiative and its ten principles.

Since our membership in January 2012, we have taken several actions to engage with the Global Compact initiative and to support the principles. In line with the Global Compact recommendations, we have conducted applied research, consulting activities and dialogue programs which stress the importance of sustainability, the Sustainable Development Goals, the Principles of the Global Compact as well as the objectives and values of various Global Compact platforms such as . With some of these projects, we also played a technical role in helping governments and institutions define various positions with respect to sustainability.

Also within our organization, we promote values such as an equal opportunity environment, gender equality, transparency and accountability and we also promote these values vis-à-vis our funders and partners. As part of our general project evaluation, we assess the outcomes of our projects on quantitative and qualitative terms.

We look forward to continuing our support of the Principles of the Global Compact in the years to come.

Yours sincerely,
