Ajinomoto Group Integrated Report 2017

Publication of Ajinomoto Group Integrated Report 2017

Since 2016, the Ajinomoto Group has been publishing an integrated report. In an easy-to-understand manner, the Group's integrated reports set out to discuss and provide examples of the efforts the Group is making to improve corporate value through ASV (The Ajinomoto Group Creating Shared Value) with the aim of becoming a "Genuine Global Specialty Company."

Through this report, the Group hopes to deepen the understanding of all of its stakeholders, starting with shareholders and other investors, regarding its approach to realizing sustainable growth.

July 2017

Organizational Scope

This report covers the activities of the Ajinomoto Group, comprising, unless otherwise noted, Ajinomoto Co., Inc. ("the Company") and its Group companies (as of March 31, 2017), including consolidated subsidiaries and other Group companies subject to reporting under the equity method. Where sufficient information for the entire Ajinomoto Group ("the Group") was unavailable, the limitation in scope is explicitly defined.

Period Covered by This Report

Fiscal 2016 (April 1, 2016–March 31, 2017)
When appropriate, however, exceptions to this general rule are made, as when citing past circumstances and data or using recent examples for illustration purposes.

Precautions Related to Forward-Looking Statements

Forward-looking statements, such as business performance forecasts, made in these materials are based on management's estimates, assumptions and projections at the time of publication and do not represent a commitment from Ajinomoto Co., Inc. that they will be achieved. A number of factors could cause actual results to differ materially from expectations.

Overview of Information

The Integrated Report summarizes particularly important financial and non-financial information that directly relates to corporate value improvement. The report has been edited to present content in a story format that is easy for stakeholders to understand. More detailed information is available on our corporate website.

Who is the Ajinomoto Group?

What the Ajinomoto Group Aims For

Since its founding, the Ajinomoto Group has been consistently engaging in initiatives to resolve social issues through its business. By improving economic value through the creation of shared value with society and local communities, these initiatives have contributed to the Group's growth. These kinds of initiatives have been named ASV (The Ajinomoto Group Creating Shared Value). We have positioned ASV at the core of the Group's corporate philosophy "Our Philosophy" as we strive to realize our mission and vision adopted under this philosophy.

Our Philosophy

ASV Value Creation Model

ASV creates a virtuous cycle (the ASV cycle) that reinvests the economic value created through the resolution of social issues in our business activities (technologies, talent, etc.), which in turn contributes to the further resolution of social issues. In this way, ASV represents a strategic initiative for realizing sustainable growth. Through the ASV cycle, we will improve employee self-realization and engagement while enhancing corporate value by building up the value of our corporate brand.

Who is the Ajinomoto Group?

The Ajinomoto Group’s Model for Business Expansion and Source for Growth

The history of the Ajinomoto Group began when its founder Saburosuke Suzuki II started marketing umami, which was discovered by Professor Kikunae Ikeda, as an umami seasoning called *AJI-NO-MOTO*®. Since then, the Group has made efforts in amino acid-oriented R&D as glutamic acid, an amino acid, represents the essence of umami. Centered on the unique, leading-edge bioscience and fine chemical technologies cultivated through these efforts, the Group is involved in Food Products and AminoScience businesses.

The Ajinomoto Group’s Business Expansion

* Figures are sales in FY2016 (IFRS).

Sources of Growth for the Ajinomoto Group

Technology

Realizing business diversification and globalization through the development of core technologies

Technologies that leverage the various functions of amino acids to bring about innovation represent one of the Ajinomoto Group's strengths. Supported by quality assurance and other platforms based on world-leading analysis technologies, the Group is expanding its business with a high level of technological superiority. Through the constant pursuit of scientifically backed efforts such as the multi-dimensional analysis of deliciousness and enhancements to the safety and security of its products, the Group is providing the value of amino acids in a variety of ways.

Open & Linked Innovation

Creating new value through open & linked innovation

Since its founding, the Ajinomoto Group has not only been engaging in sole efforts to develop its business but also has collaborated with external organizations through open & linked innovation. In doing so, the Group continues to diversify its business and achieve results in a number of research fields.

Main Business Partners

Year	Business Partner	Business Domain/Field
1962	Kellogg Company	Corn flakes
1963	CPC International Inc.	Soup
1970	ITOCHU Corporation	Frozen foods
1973	General Foods Corporation	Coffee
1980	Cie Gervais Danone	Dairy products
2013	Toyo Suisan Kaisha, Ltd.	Instant noodles
2014	Kyoto University	Cell culture medium for regenerative medicine
2015	T.HASEGAWA CO., LTD.	Fermented natural flavors

Customer Focus

Pursuing thorough, customer-focused innovations

The Ajinomoto Group is developing its business based on a thorough, customer-focused approach that fully comprehends the changes in customers' life stages and lifestyles as well as the characteristics and needs of each region of operation. In recent years, the Group has been working to create new value that better answers the growing needs of health and nutrition.

Examples of Customer Value Creation

Nabe Cube
Launched in 2012
Makes it possible for customers to enjoy hot pot dishes alone or with a large group of people

Cook Do® Kyo-no Ohzara
Launched in 2013
Original ingredients that make use of unique technology and allow for significant reductions to boiling time

Amino Aile®
The "Foods with Functional Claims" product submitted first in the domain of supplements that support muscle protein synthesis

Oniku-Yawaraka-No-Moto
Launched in 2016
Allows for delicious and tender meat even after a fair amount of time passes after preparation, such as the case with boxed lunches or meals eaten by families at separate times

ONIGIRIMARU
Launched in 2017
Original refrigeration technology that allows for thick and creamy dishes to be used as filling in rice balls

Regional Expansion

Providing value around the world through globalization

Soon after its founding, the Group began to actively expand its business overseas. In 1910, the year after its founding, the Ajinomoto Group established a sales agent in Taiwan. In 1917, the Group opened a purchasing and sales office in New York. Now, the Group is selling its products in over 130 countries and regions.

Establishment of Overseas Locations by Region

Region	Year of Establishment	Location
North America	1917	New York purchasing and sales office
East Asia	1918	Shanghai sales office
Southeast Asia	1927	Singapore sales office
South America	1956	Ajinomoto do Brasil Indústria e Comércio de Alimentos Ltda.
Europe	1974	Eurolysine S.A. (presently AJINOMOTO EUROLYSINE S.A.S.)
Africa	1991	West African Seasoning Co., Ltd.

Who is the Ajinomoto Group?

The Path for Growth: Expanding Our Business While Offering Value to Society

While promoting the diversification of its business centered on technology, a customer-focused approach, and open & linked innovation, the Ajinomoto Group has advanced globalization through regional expansion. By contributing to the resolution of social issues around the world through food and wellness, the Group has expanded its business while providing social value.

Who is the Ajinomoto Group?

Results Achieved over the Years

In the 108 years since its founding in 1909, the Ajinomoto Group has established a superior position in numerous product categories, starting with its mainstay dry savorys. In addition, by leveraging the various functions of amino acids to bring about innovation, the Group has established a position as the world's largest amino acid manufacturer in such ways as being the first company of its kind to enter a wide variety of markets.

Overview of the Ajinomoto Group (As of March 31, 2017)

Share of Dry Savories* Market

With umami seasonings and flavor seasonings tailored to the eating habits of each country, the Ajinomoto Group is expanding its share in each country and establishing a top global position. In addition, the Group will acquire the clear No. 1 share in dry savorys* by refining the quality and strengthening the production of existing products along with an active creation of new product lines.

(In-house investigation)
* Umami seasonings and flavor seasonings (powder, cubes, etc.)

Share of Frozen Foods Market

In the North American market, we are leveraging the business foundation of Ajinomoto Windsor, Inc. and have acquired the No. 1 share in the Asian foods category. Moreover, in the Japanese market, five of our products have become top-ten best sellers, including Gyoza, which is our clear No. 1 product. In these ways, we are working to expand sales of core products and making efforts to create new categories through the introduction of new products.

(In-house investigation)

Share of Coffee Market

The stick product category represents a growth field in the home-use coffee products market in Japan. Ajinomoto AGF, Inc. (hereinafter, AGF), which focuses on stick coffee, has grown its business by creating new markets, actively launching new products, and promoting advertising and sales activities. Going forward, AGF will expand into a leading force in the industry by enhancing its response to more personalized needs.

(In-house investigation)

Amino Acids

With glutamic acid, the essence of umami and an amino acid, the Ajinomoto Group has pursued efforts in amino acid-based research and has been the leader in commercializing a wide variety of amino acid products and starting new businesses. Accordingly, the Group has established a superior position as a global amino acid manufacturer.

Year	Substance/Technology	Business	Year	Substance/Technology	Business
1909	Monosodium glutamate	Umami seasoning <i>AJI-NO-MOTO®</i>	1982	Aspartame	Sweetener business, aspartame, etc.

A Solid Track Record and the Next Step Forward Message from the President & CEO

By carrying on the aspiration of our founding through our “Food and AminoScience” businesses, we will become a “Genuine Global Specialty Company” that can grow sustainably and contribute to a healthy future for humanity and the earth.

Takaaki Nishii

Representative Director,
President & Chief Executive Officer

What We Aim For

It has been 108 years since businessman Saburosuke Suzuki II founded Ajinomoto Co., Inc., a year after Professor Kikunae Ikeda discovered the fifth basic taste, umami. The aspiration of these two men to promote the health of Japanese people by improving nutrition with umami has extended across the globe. Throughout the years, the Ajinomoto Group has engaged in research and development originated from glutamic acid, the taste of which was identified by Professor Ikeda as an umami substance, and has pursued the development of leading-edge bioscience and fine chemical technologies as well as the world’s No.1 seasoning technologies. With these technologies acting as our core, we have evolved into a unique food company group, diversifying our business to span a wide range of fields, from food to healthcare and life support.

Through this evolution, we believe that our food and AminoScience businesses can contribute significantly to the resolution of issues facing society in the 21st century, including issues related to “health and well-being,” “food resources,” and “global sustainability.” Through dialogue with our stakeholders, we also understand that even larger expectations are being asked of us to resolve such issues.

Currently, we have adopted the term ASV (The Ajinomoto Group Creating Shared Value) to refer to the economic value we have consistently created since our founding by resolving social issues through our business. I feel confident that the evolution we have made with ASV will help us realize sustainable growth that is befitting of a global company. Going forward, we will forge ahead with our FY2017–2019 (for FY2020) Medium-Term Management Plan (hereinafter, the FY17–19 MTP), with ASV evolution underpinning our core.

“Genuine Global Specialty Company”
Why We Aim to be a “Global Top 10 Class Food Company” by Fiscal 2020

Economic and Financial Perspective

Currently, the Ajinomoto Group is expanding two pillars of businesses, the food business and the AminoScience business, the latter of which covers the fields of life support and healthcare. Our fundamental medium- to long-term management policy is to realize sustainable growth within these businesses as a global food company group. Such growth can be achieved by bringing together our core competencies: leading-edge bioscience and fine chemical technologies, which originate from amino acids and also lead to deliciousness technologies, and our thorough marketing approach that adapts to local cultures and customers.

Giving consideration to the necessary growth investments to realize sustainable growth and the required cash balance to carry out shareholder returns, from a management strategy perspective, our business profit*1 scale needs ¥130 billion or more. I believe that such a scale represents a benchmark for entering the top 10 class of global food company groups.*2

After setting other global food company groups as a benchmark for ourselves, we established the following medium-term aims: contribute to the future progress of humanity and the earth; possess our own industry-leading technologies and business domains; assemble a group of diverse, globally capable talent; achieve the business and profit scale of a global company; and meet global efficiency standards to generate profit. While setting numerical targets to the greatest extent possible, we will continue to move forward with efforts to reach these aims.

*1 An original profit KPI adopted by the Group following the voluntary application of International Financial Reporting Standards for management purposes. The KPI is defined as follows: Sales – Cost of sales – Selling expenses, Research & development expenses, and General & administrative expenses + Share of profit of associates and joint ventures

*2 Excludes primary processed food companies, including milling, oil extraction, and animal product processing companies (raw materials such as grain, livestock, etc.) as well as alcoholic beverage and soft drink companies and general trading companies

Social and Non-Financial Perspective

In recent years, an international consensus has been reached in terms of addressing the social issues that have been caused by the activities of the human race, as reflected by the United Nations’ Sustainable Development Goals (SDGs). At the same time, there has been a rising social interest in how corporations will create social value to help address such issues.

Within the dialogue we have with our stakeholders, the demand for us to share precise environmental, social, and governance (ESG) policies, in addition to non-financial targets, has been growing stronger by the day. As such, I believe that improving social value related to ESG through our food and AminoScience businesses has become a necessary condition for realizing sustainable growth. Leading global company groups, which represent our competition, have promptly adopted non-financial targets that conform to the international consensus on the resolution of social issues, in addition to plans for achieving these targets. In doing so, these companies are developing their businesses while enhancing their social presence. Under the FY17–19 MTP, we have clarified policies and aims at the level that meets the standards of leading global companies in terms of social value, and we have started to work toward these goals. For the Ajinomoto Group, social value creation represents another reason to strive to become a “global top 10 class food company” by fiscal 2020.

“Genuine Global Specialty Company”

- 1 Contribute to the future progress of humanity and the earth
- 2 Possess our own industry-leading technologies and business domains
- 3 Assemble a group of diverse, globally capable talent
- 4 Achieve the business and profit scale of a global company
- 5 Meet global efficiency standards to generate profit

Elements needed to become a “global top 10 class food company”:
What the Ajinomoto Group aims for

Achieve sustainable growth through ASV
that creates specialties

Awareness of Current Issues

Unlike other leading global food companies, the Ajinomoto Group currently faces the following challenges.

The first challenge we face relates to financial targets, that is to say, our business scale and level of efficiency in generating profits. Under the FY2014–2016 Medium-Term Management Plan (hereinafter, the FY14–16 MTP), we adopted the basic strategy of “FIT & GROW with Specialty” and promoted the further reinforcement of business structure (FIT) and growth driver advancement (GROW). Accordingly, the operating income of specialty businesses within the food business and the AminoScience business grew steadily, exceeding the original plan, but we could not offset the impact of the deteriorating profits of some of the commodity businesses due to intensified global competition. As a result, the Group’s overall operating income, operating income margin, and ROE targets have not been achieved. Therefore, structural reforms to the specialty business through the “FIT & GROW with Specialty” strategy are the most important strategic initiatives under the FY17–19 MTP.

The next challenge we face is the resolution of social issues. Thus far, we have achieved a great deal of noteworthy results when it comes to social and environmental issues. For example, we have led the way in tackling issues related to nutrition in developing countries such as Ghana and have contributed to resolving nutrition-related issues for elderly people in Japan. We have also reduced our greenhouse gas emissions and promoted activities to eliminate waste. However, when we give consideration to global standards, we have yet to sufficiently announce Group-wide policies that fully encompass ESG, and efforts to outline our initiatives toward resolving social issues in local communities are lacking. Based on the input we received from opinion leaders—who represent society and the capital markets—regarding the integrated report we published in 2016, we decided to pursue initiatives to address these concerns under the FY17–19 MTP.

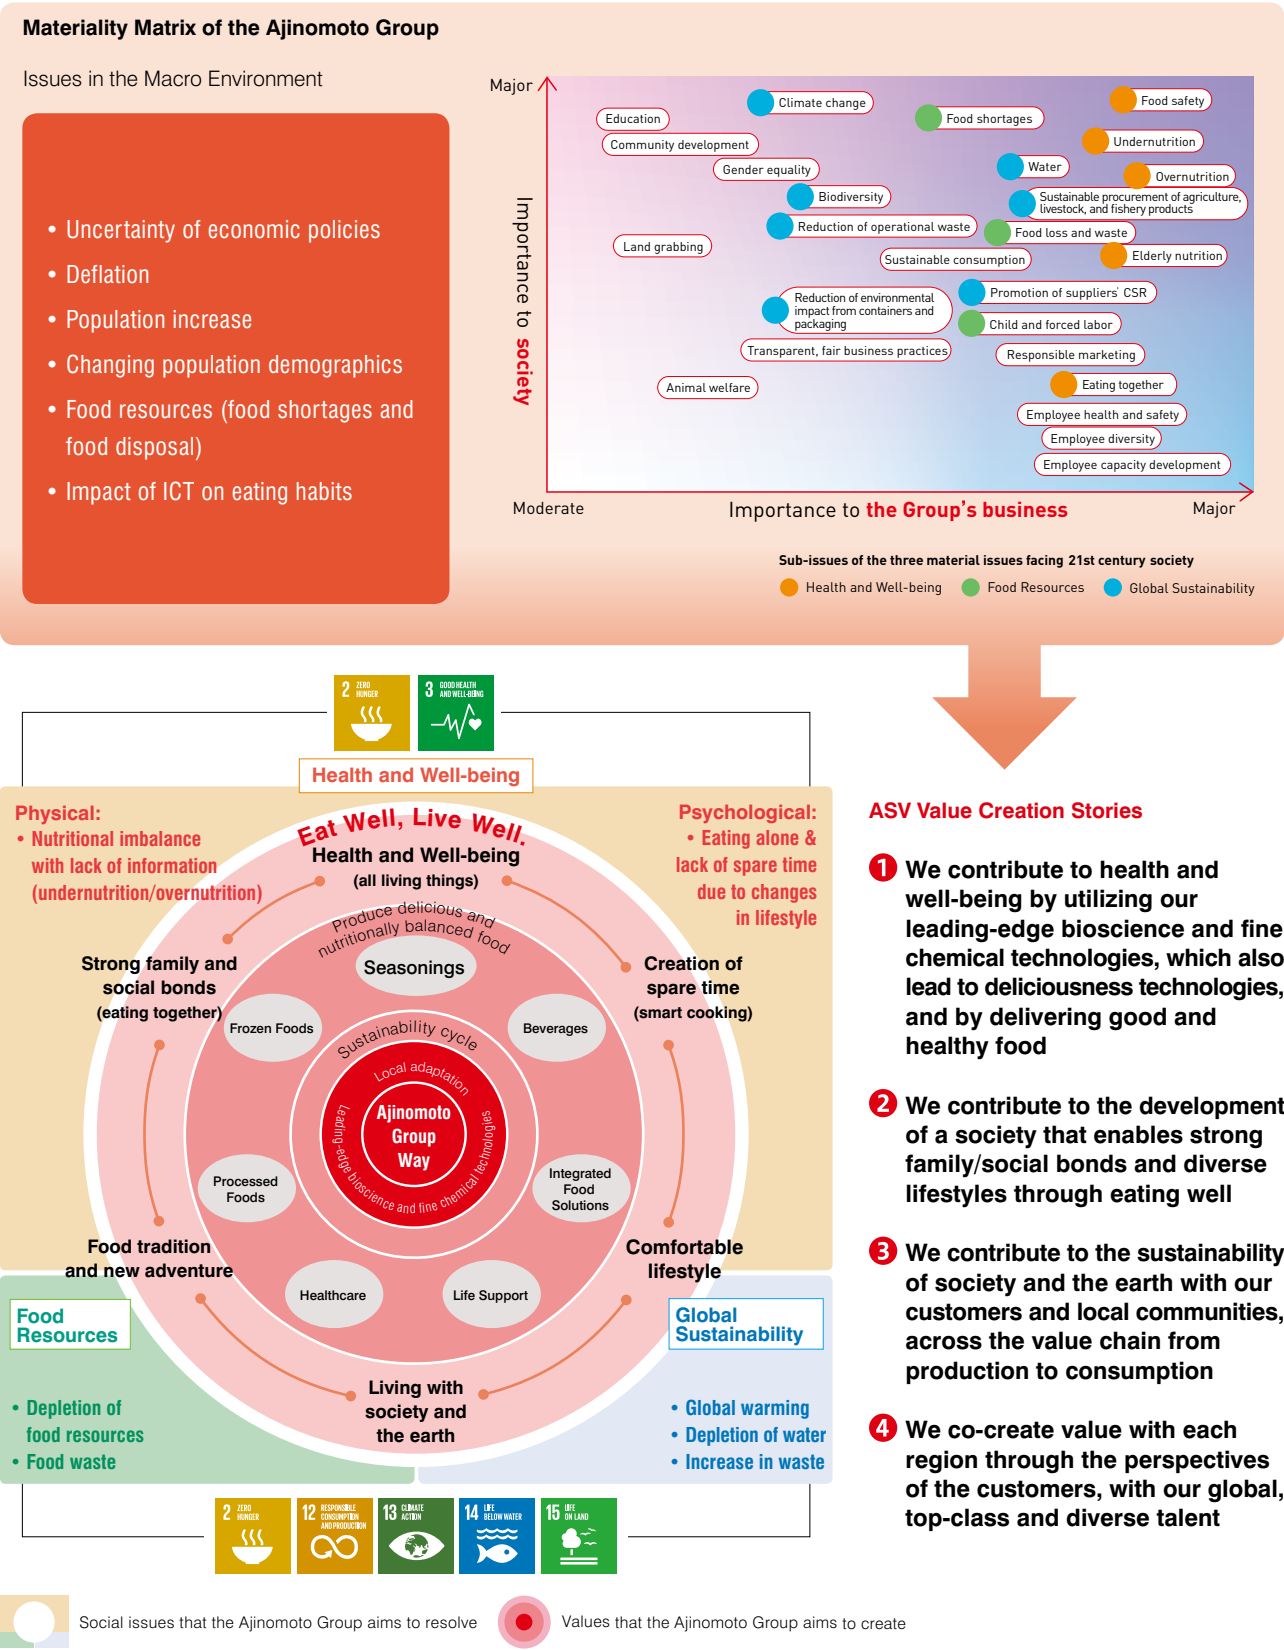

Evolving ASV and Realizing Sustainable Growth

Taking a comprehensive look at the opinions held toward the Group by our stakeholders in society and the capital markets, we understand that we are expected to realize sustainable growth through the enhancement of financial and non-financial indicators. However, the priority given to major indicators and the timeframe in which we are expected to achieve results differ by stakeholder. In some instances, stakeholder expectations conflict with each other. Accordingly, to bridge the gap between differing stakeholder expectations to the greatest extent possible, we have formulated the FY17–19 MTP that centers on ASV value creation stories supported by not only the resolution of social issues but also leading-edge bioscience and fine chemical technologies, which also lead to deliciousness technologies, and a thorough marketing approach that adapts to local cultures and customers, which represent our core competencies.

Social Issues to Resolve and Value to Create as the Ajinomoto Group

In light of the current business environment, the Ajinomoto Group has engaged in dialogue with external experts to identify several materiality items in non-financial areas by evaluating their level of importance to the Group’s business and to society as a whole. The Group has adopted “health and well-being,” “food resources,” and “global sustainability” as three areas in which it should address social issues and has developed a four-part story for value creation that will act as its approach to resolving issues in these areas.

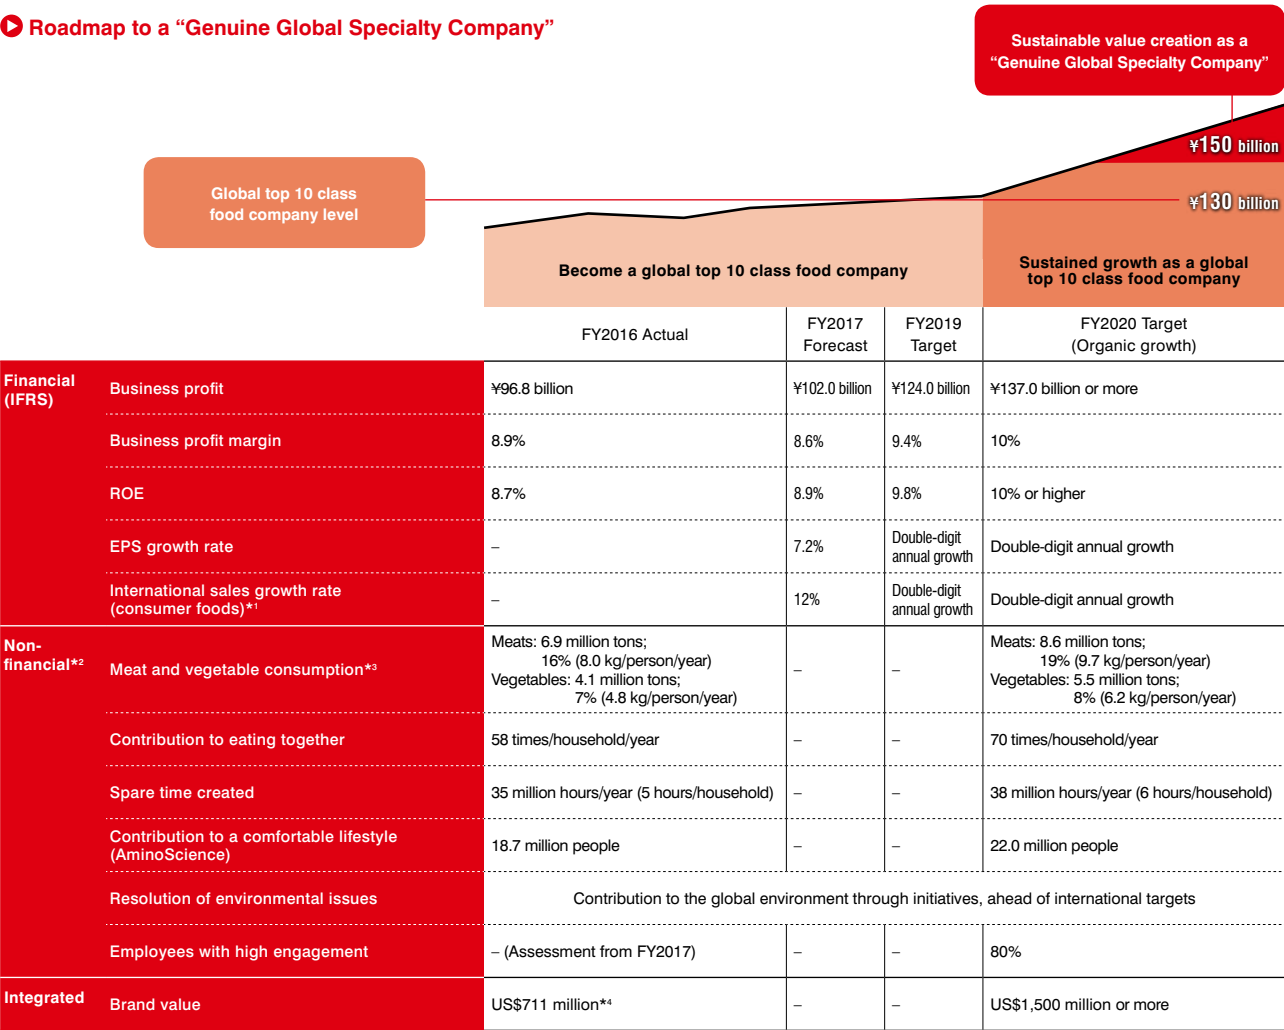

Target Management Indicators

The management indicators adopted under the FY17–19 MTP are as follows. For financial targets, we will continue to realize profit growth throughout the three-year period from fiscal 2017 to fiscal 2019. Such growth will act as a milestone for becoming a “global top 10 class food company” by fiscal 2020. For non-financial targets, we will focus on contributing to healthy living for humankind, as mentioned in the ASV value creation stories. At the same time, we will pursue a policy of proactively engaging ourselves in the United Nations’ Sustainable Development Goals (SDGs) and other efforts related to the international consensus on ESG.

In addition, we have incorporated “improving employee engagement” as a corporate governance item that targets approximately 33,000 Group employees. This reflects the Ajinomoto Group’s belief that employee engagement is the most important foundation for not only improving social value but also enhancing corporate governance as a corporate group originated in Japan.

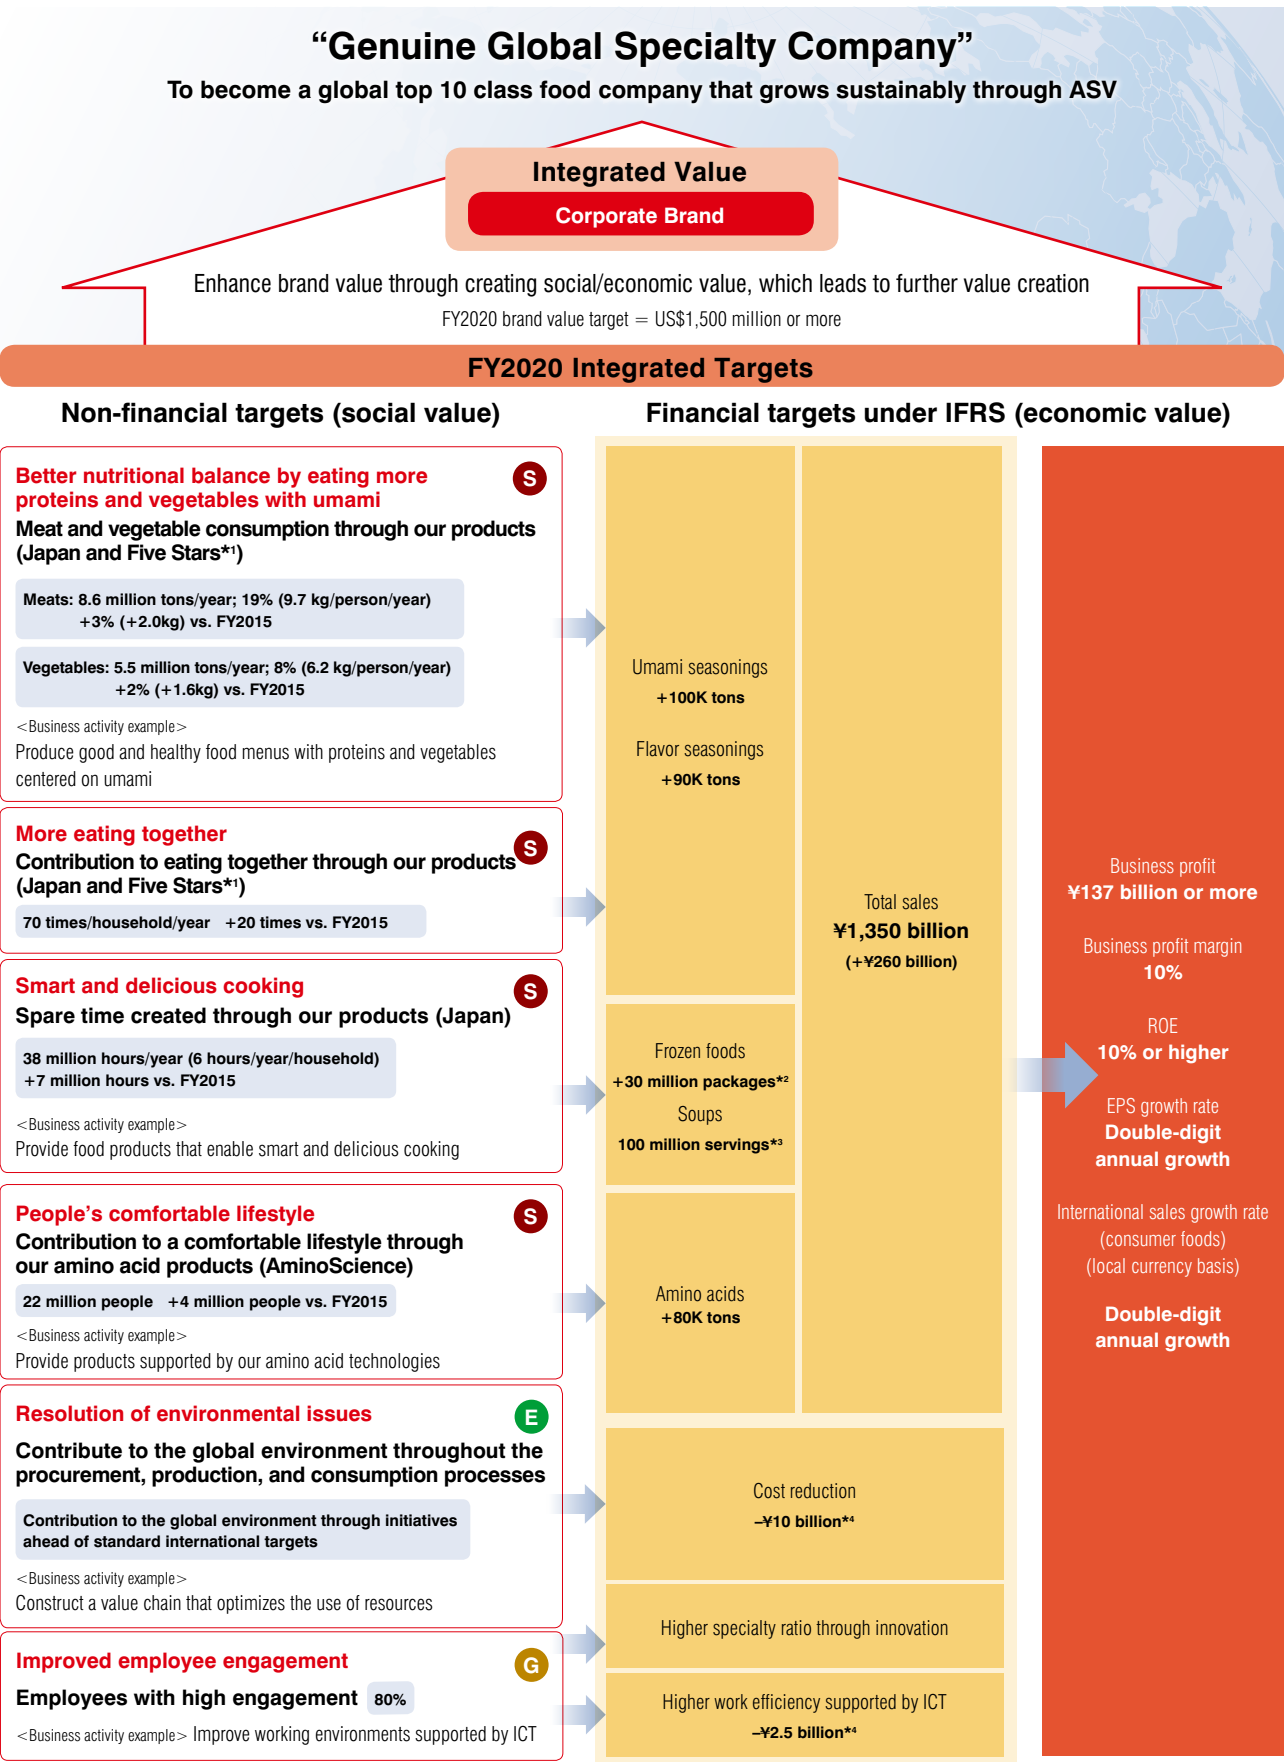

Furthermore, we have established the enhancement of our corporate brand as an integrated target. To this end, we have set a medium-term target of “Ajinomoto Brand” value, which is evaluated by the brand consulting firm Interbrand. As a result of medium- to long-term benchmarking, corporate brand value is a value crystallization generated by all corporate activities of the Ajinomoto Group that comprehensively collect evaluations from each stakeholder including customers, business partners, and employees. Thus, we have judged that it is a suitable indicator for measuring sustainable growth.

Roadmap to a “Genuine Global Specialty Company”

*1 Local currency basis *2 Please refer to pages 20, 21, and 49 for details on non-financial targets. *3 Annual total and % of annual consumption per person *4 Evaluated by Interbrand, “Japan’s Best Global Brands 2017”

A Key Strategy of the FY2017–2019 (for 2020)
Medium-Term Management Plan

While the Ajinomoto Group will continue to adopt the “FIT & GROW with Specialty” strategy under the FY17–19 MTP, the Group will fully carry out the aims of the strategy to pursue greater results. For further business structural reform (FIT), we will give the utmost priority to implementing the fundamental shift from commodities to specialties, primarily in the animal nutrition business. Also, we will restructure the value chain for food products in Japan and beef up value chains across various businesses through the promotion of resource conservation within our global business activities.

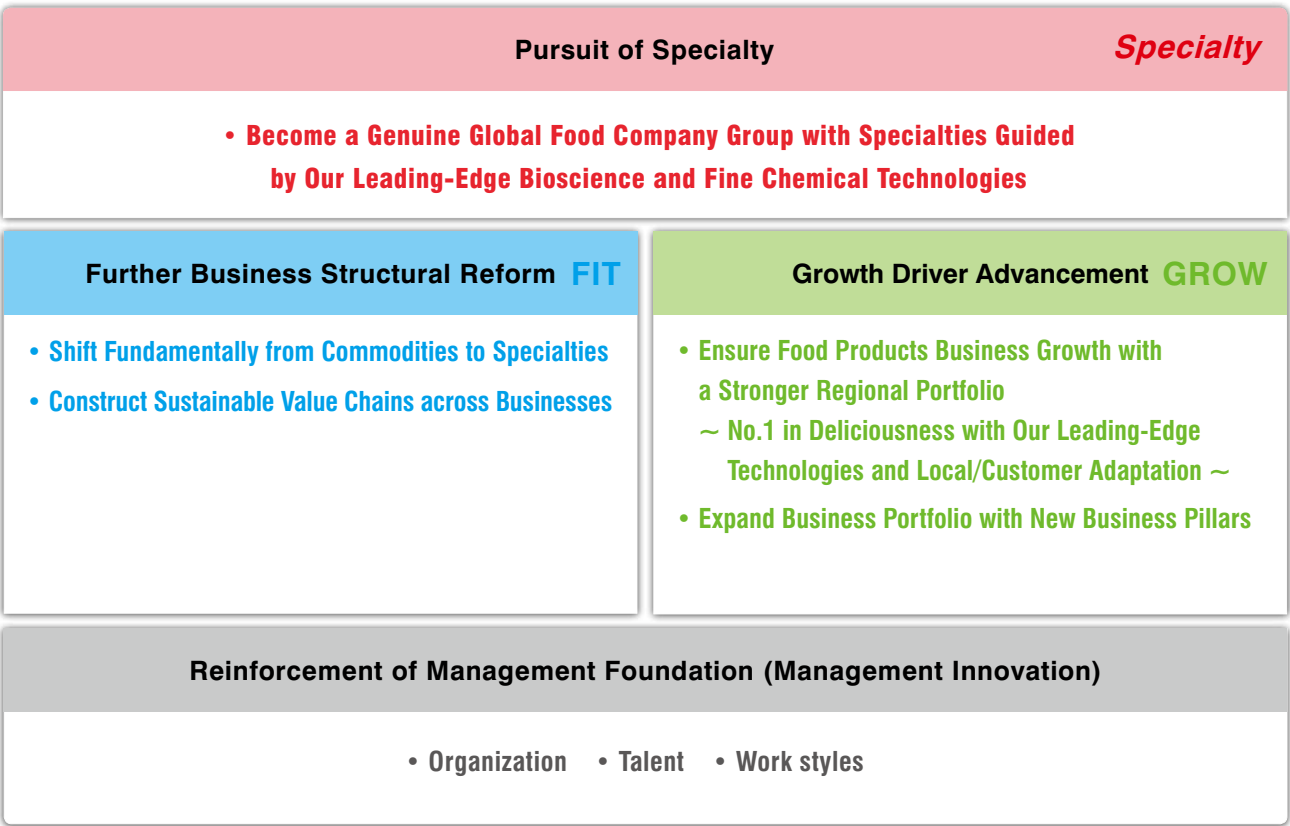

In regard to growth driver advancement (GROW), we will ensure global business growth in food products with a stronger regional portfolio. Moreover, we will achieve further growth in existing areas of operation by leveraging leading-edge technologies and adapting to the needs of local cultures and customers. We will also accelerate our expansion into new regions.

Additionally, we will further enhance our business portfolio by nurturing the seeds for new businesses that we sowed under the FY14–16 MTP into new business pillars for the FY17–19 MTP.

We will also leverage ICT to improve the quality and efficiency of our organization, talent, and work styles, which will act as the management foundation that supports all of our efforts in the “FIT & GROW with Specialty” strategy.

Overview of Business Strategies

FIT & GROW with Specialty

A Message to Our Stakeholders

To realize sustainable growth through ASV and become a company that is even more essential for society, we have established the FY17–19 MTP, which centers on ASV value creation stories. We have also established integrated targets for fiscal 2020 that combine both financial and non-financial targets.

The new plan is a three-year plan aimed at accelerating the pace for becoming a “Genuine Global Specialty Company.” At the same time, we have incorporated investments in new businesses and the management foundation into the plan to act as the groundwork for realizing sustainable growth after fiscal 2020. To fulfill the expectations of our stakeholders and ensure that we reach our integrated targets for fiscal 2020 and improve corporate value, I, as President & CEO, will lead the way as we leverage the comprehensive strengths of the Ajinomoto Group to carry out the initiatives of the plan.

Finally, I sincerely hope that this integrated report serves as a means to encourage dialogue with our stakeholders.

July 2017

Takaaki Nishii
Representative Director,
President & Chief Executive Officer

Details of the Ajinomoto Group’s Non-Financial Targets

S Social

Nutrition Policy

The Ajinomoto Group has established the Nutrition Policy, which acts as a guide for realizing health and well-being, and the Nutrition Strategy Guideline, which is based on the policy. The Nutrition Policy and the Nutrition Strategy Guideline provide a foundation for the Group’s business activities aimed at realizing its integrated targets.

Nutrition Policy

- 1 We aspire to focus on the nutritional needs of people of different regions, ages, lifestyles, and health conditions and provide products and information that improve the nutritional balance of daily meals.
- 2 We assist people in enjoying delicious food and contribute to emotional and physical nourishment through smart cooking*1 and recommendations of delicious menu utilizing Umami.
- 3 We provide reliable solutions based on scientific research that utilize the nutritional and physiological properties of protein and amino acids.
- 4 We assist consumers in the selection of more healthy food products by devising and implementing voluntary labelling and communication strategies while following guidelines of national and public agencies.
- 5 We continue to conduct socially beneficial activities related to nutrition and build ties with diverse stakeholders.

*1 Enabling consumers to have enjoyable and efficient experiences in preparing meals including shopping, cooking, and cleaning up after meals.

Nutrition Strategy Guideline

https://www.ajinomoto.com/en/activity/policy/nutrition_guideline.html

1 Meat and Vegetable Consumption (Japan: Five Cook Do® products, Gyoza; Five Stars: Flavor seasonings)

In advanced and developing countries alike, poor nutritional balance has been a major cause of lifestyle diseases. In light of these conditions, the Ajinomoto Group will promote balanced nutrition through using the Group’s products of each country. In doing so, the Group will help realize health and well-being for people around the world and enhance the added value of agricultural products.

Example of Masako® in Indonesia

Communication Initiatives

Highlight vegetable soup in television commercials

Deploy Dapur Umami recipe information site

Introduce nutritionally balanced menus on the back of packages

2 Contribution to Eating Together

(Japan: Five Cook Do® products, Gyoza; Five Stars: Flavor seasonings)

Due to recent changes in lifestyles, family and community bonds have been weakening. Amid this environment, it is estimated that the percentage of times a person eats alone has increased by four points in the past 15 years in Japan, and by two to five points in the past 10 years in the “Five Stars.” To address this issue, the Ajinomoto Group will help families and community members share the joy of eating together through meals made using the Group’s products.

3 Spare Time Created

(Japan: Gyoza, Yawaraka Wakadori Kara-Age (fried chicken), THE ★CHA-HAN (fried rice), three Knorr® Cup Soup products)

Due to recent changes in lifestyles, people are becoming busier. Under these circumstances, the Ajinomoto Group will contribute to spare time created through smart cooking, enabling delicious meals to be made easily and allowing people with busy lifestyles to enjoy cooking with the Group’s products.

4 Contribution to a Comfortable Lifestyle (AminoScience)

(Amino acids for pharmaceuticals and foods: For use in transfusions and medical foods, amino VITAL®, No-Mikata®, Glyna®, etc.)

From healthy people to those suffering from illness, the Ajinomoto Group will provide support for a comfortable lifestyle through various ingredients and products centered on amino acids.

E Environmental

	Long-Term Vision	Indicators	International Goals
1 Reduce greenhouse gases	Overall product lifecycle to become carbon neutral	Greenhouse gas production volume vs. emission intensity FY2020: 5% reduction (vs. FY2015) FY2030: 50% reduction (vs. FY2005) Renewable energy use ratio FY2020: 20% FY2030: 50% CFC*1 elimination FY2025: 100% for new facilities FY2030: Extremely small volume of HFCs*2	• Paris Climate Conference • CGF, POPs Convention, Montreal Protocol  
2 Reduce food loss	Cut food loss within lifecycle by half by 2050	Reduce food loss from receipt of ingredients through to customer delivery FY2020: 20% reduction (vs. FY2015) FY2025: 50% reduction (vs. FY2015)	• 
3 Secure food resources and protect natural environment, including ecosystems and biodiversity	Secure food resources for the next generation, contribute to the protection of the natural environment including ecosystems and biodiversity, achieve sustainable procurement	Sustainable procurement FY2020: 100% for palm oil & paper FY2030: 100% for other ingredients Reduce natural raw materials used via resource-saving fermentation technologies, by-product and alternative material technologies FY2025: 100%	• CGF, RSPO, FSC, ASC  
4 Conservation of water resources	Create an environment where water resources are sustained	Production volume vs. water usage at plants FY2020: 5% reduction (vs. FY2015) FY2030: 80% reduction (vs. FY2005)	• 
5 3R for waste material (Reduce, Reuse, Recycle)	Zero emission of waste materials	Reduce waste generated via business activities/recycle ratio FY2020 and FY2025: Maintain 99% or higher	• 

*1 Chlorofluorocarbon *2 Hydrofluorocarbons

G Governance

Employees with High Engagement

The Ajinomoto Group will improve engagement as an organization and enhance its business performance by boosting organizational capabilities. Targeting nearly 33,000 full-time employees, including those at Group companies in Japan and overseas, we will measure the proportion of employees who feel that their respective company is creating value by addressing social issues, and feel that they are contributing to that value creation.

Engagement Survey Items

- Understanding of mission, vision, targets, and strategies
- Talent and career development
- Improvement of social value (social responsibility and contributions)
- Diversity, health, and well-being
- Top management’s leadership
- Sustainable employee engagement, etc.

Approach to Financial Strategy Geared toward Fiscal 2020

Under the FY2017–2019 (for FY2020) Medium-Term Management Plan (hereinafter, the FY17–19 MTP), we have declared our intention to become a “global top 10 class food company” by fiscal 2020. To continue to resolve social issues through value created by ASV and realize sustainable growth, it is essential for us to maintain sound financial health. At the same time, we must also transition to a business and financial structure that is befitting of a “global top 10 class food company.” To this end, we will connect social value creation with economic value and use the cash generated from that economic value to reinvest in growth fields. In doing so, we will endeavor to create even more value and realize stable shareholder returns while at the same time working to achieve sustainable growth in profits.

In terms of profits, we pursued significant initiatives in the pharmaceuticals and sweeteners businesses under the FY2014–2016 Medium-Term Management Plan with the aim of raising our specialty ratio. However, as our failure to reach the planned targets in the animal nutrition business indicates, we are still in the process of reforming our business structure. We therefore will accelerate a fundamental shift from commodities. Also, amid our promotion of industry-leading technologies and business domains, which represent one of the elements of a “global top 10 class food company,” we have obtained the top share in the dry savories and have established a superior position as a global amino acid manufacturer. Going forward, we will further enhance the quality of our products and services and increase product categories for which we can obtain a global top three position. In doing so, we will bolster profits by further solidifying our business pillars.

We have established ROE as the most important indicator for capital efficiency. As ROE represents the multiplication of

ROA (the ratio of return on sales × asset turnover ratio) and financial leverage, it is crucial for us to boost ROA. First, we will accelerate the expansion of highly profitable specialties through the fundamental shift from the commodities business, thereby raising the ratio of return on sales. At the same time, we will reduce inventories and accounts

ROE and ROA Targets

(Percentage figures are FY2016 Actual ⇒ FY2019 Target)

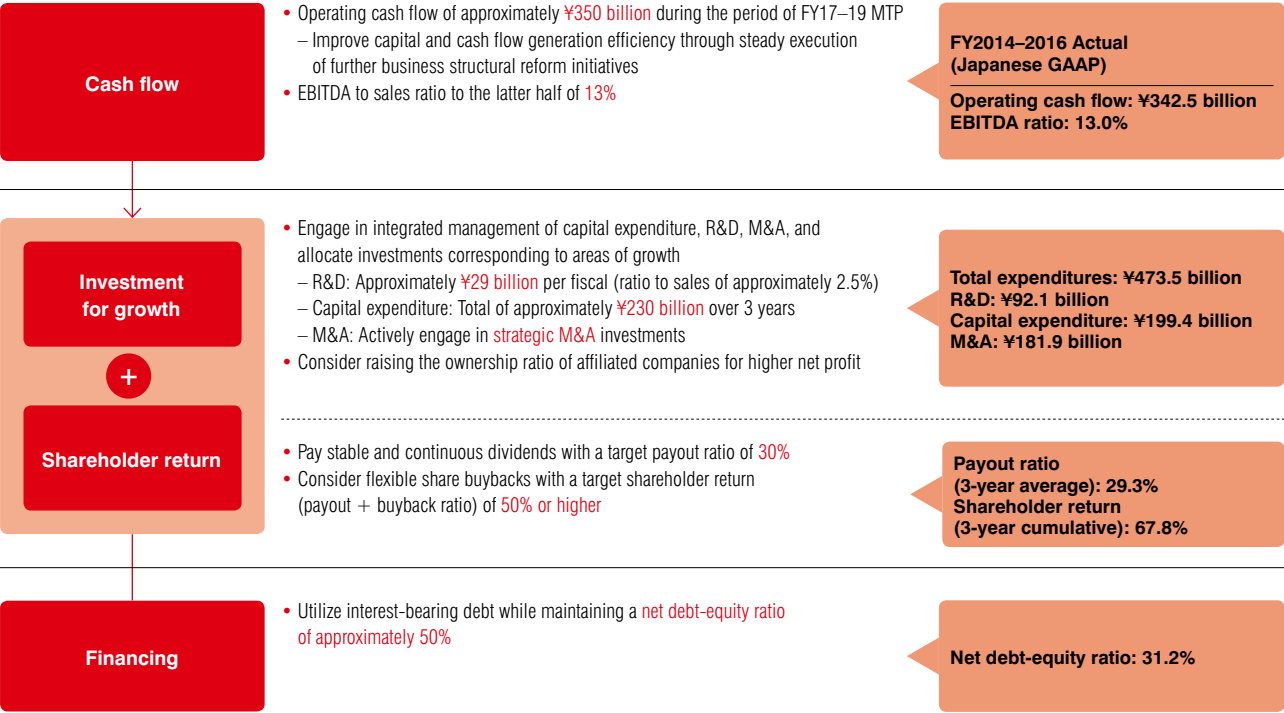

* Company-wide common expenses are allocated to each business segment; Company-wide common assets (cash and deposits, Ajinomoto Co., Inc.'s head office assets, etc.) are not allocated.

receivable by leveraging ICT to make our entire supply chain more efficient. These efforts will in turn boost our asset turnover ratio through the reduction of our cash conversion cycle. The Ajinomoto Group operates food products and AminoScience businesses, and the characteristics of these businesses differ. As such, we have set ROA targets specific to each business. In this way, we will control our Group-wide financial leverage while reinforcing the management of each individual business, thereby accelerating efforts to enhance capital efficiency.

Through these kinds of initiatives toward profitability and capital efficiency, we plan to raise our EBITDA to sales ratio to the latter half of 13%. We also plan to generate operating cash flow of approximately ¥350 billion during the period of the FY17–19 MTP, which we will allocate to growth investments and shareholder returns. On the topic of shareholder returns, we aim for a payout ratio of 30% per fiscal year under the plan as well as a target shareholder return of 50% or higher, while giving priority to maintaining a sound financial structure and carrying out investments to realize continuous profit growth to secure future resources.

Financial Strategy

The Ajinomoto Group’s Unique Growth Investment Approach and Management Frameworks

To realize further profit growth, we will implement an integrated management approach of capital expenditure, R&D, and M&A so that we are able to flexibly and appropriately allocate resources while ascertaining key domains. We will also heavily concentrate resources in growth domains. Specifically, we will position international food products, integrated food solutions, and advanced biopharmaceuticals as key domains in which we will actively carry out growth investments. During the period of the FY17–19 MTP, we plan to implement capital expenditure totaling approximately ¥230 billion (cumulative three-year total)

and R&D investments totaling approximately ¥29 billion (for each fiscal year). We will also maintain the net debt-equity ratio for M&A at around 50% while strategically utilizing interest-bearing debt. However, we will be open to having the net debt-equity ratio exceed 50% in the event we identify an M&A project that would be important for future growth.

For investment decisions, we have thus far made evaluations based on uniform standards, regardless of whether the investment is in an existing business or a new business. We have, however, established separate standards

A Solid Track Record and the Next Step Forward

Message from the Corporate Senior Vice President in Charge of Finance

for investments in new businesses and in emerging countries, thereby changing our evaluation standards from a wide variety of perspectives. Specifically, in addition to making sure an investment meets the minimum standard of securing profitability that exceeds capital cost, we now carry out an analysis of country risks that are difficult to quantify, the future outlook of an emerging country, and the overall size of business opportunities. In doing so, we are able to make comprehensive investment decisions that take into account a wide variety of circumstances.

Additionally, in light of the increased level of uncertainty in the macro economic environment, we have established strategic KPIs that each business division can commit to without being affected by the external environment. Through these KPIs, we are able to monitor various aspects of each business, including the number of stores handling our products as well as store turnover. This in turn helps us establish frameworks that allow for comprehensive management decisions.

Cultivation of Talent for Finance Positions and the State of Leadership //

The Ajinomoto Group's overseas sales and business profit ratios are over 50%. Accordingly, there is a growing number of projects that require a global response, starting with the Base Erosion and Profit Shifting (BEPS) Project, and the importance of cooperation between our global headquarters and each overseas location has reached an all-time high. There has also been a rise in the number of projects that require a high level of expertise, which means we must secure and cultivate superior finance talent at our global headquarters in order to strategically bring together various functions and exercise and enhance our competitive edge. Rather than simply ensuring a thorough adherence to rules such as international tax obligations, it has become more and more important for a company to boost the profitability of business itself and execute more efficient and effective financial strategies. Going forward, to improve not only business profit but also profit attributable to owners of the parent company, we will manage other income/expenses and strategically raise our ratio of equity in consolidated subsidiaries whose business performance have a significant influence on the Group as a whole. In addition, it is necessary to take initiatives across all corporate divisions to promote such

efforts, rather than just in the financial divisions. Accordingly, we are restructuring our global organizational structure for the purpose of making enhancements and improving expertise throughout the corporate divisions as well as boosting the Group-wide efficiency of cross-organizational support functions. In doing so, we aim to lower the ratio of net sales to Group shared expense from 3.2% in fiscal 2016 to 2.5% by fiscal 2020.

The Company has now entered an extremely important period in which it must prove whether or not it can become a "global top 10 class food company" and continue to earn the trust of its stakeholders, starting with its shareholders and other investors, as it attempts to do so. As such, the sense of crisis is high. I entered into the corporate sector after spending time in business division, and I am now in charge of management of corporate departments, including finance. Going forward, corporate departments such as corporate planning, finance & accounting, and legal affairs will demonstrate proactive leadership while enhancing their respective expertise and mutually incorporating new perspectives through strategic integration to strengthen the Group's management foundation.

Voluntary Adoption of IFRS

The Ajinomoto Group has adopted the International Financial Reporting Standards (IFRS) in replacement of the Japanese accounting standards beginning with the financial statements for the annual securities report for the fiscal year ended March 31, 2017. The purpose of adopting IFRS is to improve international comparability of financial information in and outside the Group, while enhancing communication with shareholders, investors, and other stakeholders.

Impact on Business Profit

* The figure for fiscal 2016 operating income (Japanese GAAP) is shown for reference and has not been audited.

Stakeholder Engagement

The Ajinomoto Group believes it is essential to proactively communicate the intention behind its business strategies and efforts to resolve social issues through ASV to all of its stakeholders. The Group also believes it is important to strengthen mutual understanding through stakeholder dialogue. As such, the Group will enhance its efforts to communicate with stakeholders as it aims to become a corporate group that earns a high level of stakeholder trust.

ESG Briefing

Every year, the Ajinomoto Group holds ESG briefing for institutional investors and analysts. The purpose of this meeting is to deepen investors' and analysts' understanding of ESG information and to help encourage dialogue from a medium- to long-term perspective. On March 27, 2017, an ESG briefing was held under the theme of "contributing to healthy living through food and amino acids."

Educational Programs on Dashi, Umami, and Taste

Ajinomoto Co., Inc. offers educational programs where children, who will be responsible for carrying on the next generation, can learn about dashi, umami, and taste in a fun and exciting manner. These programs are closely connected with local communities, with local employees serving as lecturers. They are held at approximately 100 schools a year, with nearly 10,000 children participating.

ASV Sessions

The Ajinomoto Group's corporate philosophy "Our Philosophy" positions ASV as the core for value creation. To deepen, instill, and encourage an understanding of ASV among its employees, the Group holds ASV sessions for all Group employees.

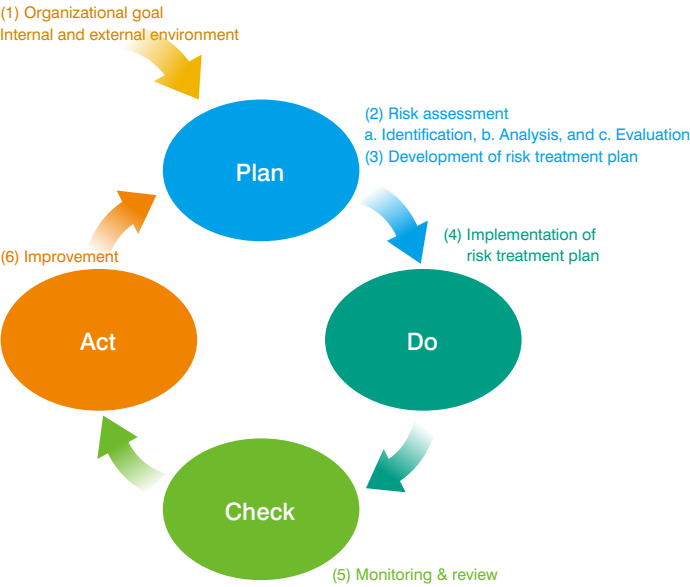

Risk Management Basic Policy

Objective	By promoting strategic risk management, we make the Ajinomoto Group resilient to risks, and increase the group values.
Action Guide	We recognize risk management as an important instrument for internal control, which is a part of management responsibilities. In conjunction with group management strategies and individual business strategies, the Ajinomoto Group takes necessary actions: (1) To implement risk process following the self-governing PDCA cycle with close stakeholder communications (2) To enhance response capabilities against significant risks.
Code of Practice	(1) We, even at ordinary times, make every effort to make adequate preparations of both hardware and software in order to obviate crises. (2) Once a crisis happens, we respond to the crisis promptly and take any necessary actions to minimize the damage. (3) In the case of emergency, we prioritize our objectives, 1) human safety comes first, followed by 2) society and 3) business.

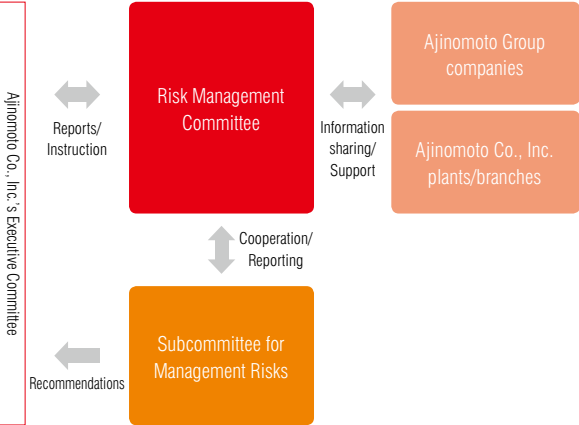

Risk Management Process

The Ajinomoto Group sets in motion a PDCA cycle to manage risks that occur in the management and business promotion of each organization within the Group.

Risk Management Structure

The Ajinomoto Group established the Risk Management Committee in 2002. With a basic policy of proactive risk prevention, the Committee is working to strengthen its capacity to deal with crises, such as accidents or incidents, in the rare event one should occur. Furthermore, the Group has established the Subcommittee for Management Risks that functions under the jurisdiction of the Risk Management Committee. In these ways, the Group is engaging in initiatives to respond to changes in the macro environment that affect its business as well as to tackle governance-related issues.

Response to Major Risks

Taking into account the business environment and political, economic, and social conditions around the globe, the Ajinomoto Group has identified and compiled Group-wide risks that require cross-organizational management. In addition to formulating Group-wide response measures, the Group works to monitor and manage the progress of its response to risk on a regular basis.

	Risk	Details	Response
Global development	Geopolitical macro environment S	Risks due to terrorism and military conflict that impact people's safety as well as risks associated with the rapid changes in the political, economic, and social environment in areas of operation that impact business plans	<ul style="list-style-type: none">• Monitor information on safety in each country on a daily basis• Outline the factors that lead to economic crises and visualize risks• Send emergency alerts to the Executive Committee
	Violation of laws and regulations in each country G	Risk of losing social trust due to the unintentional violation of laws or the receipt of orders to suspend operations stemming from a lack of understanding of newly established laws and information on business regulations	<ul style="list-style-type: none">• Establish a legal network in each region of operation
	Global governance G	Risk of negative impact on business management or confusion within organizational management resulting from a delay in fully disseminating the Global Governance Policy	<ul style="list-style-type: none">• Specify and maintain the necessary policies for a global corporation
	Global competition S G	Risk of being unable to survive against competition from other companies due to an inability to anticipate trends in the market environment and trends of competitors	<ul style="list-style-type: none">• Enhance analysis of market environment and competitive trends
Social issues	Global climate change E	Risk of being unable to provide products due to a suspension of production caused by water shortages at plants	<ul style="list-style-type: none">• Conduct R&D on water-conserving technologies• Examine methods to monitor water-related risks
	Human rights S	Risk of being unable to respond to human rights-related issues that impact the Company's business activities	<ul style="list-style-type: none">• Strengthen monitoring functions by establishing a special committee
	Procurement S E	Risk of being unable to procure raw materials due to the occurrence of an environmental issue within the supply chain, such as climate change, or the destruction of ecosystems	<ul style="list-style-type: none">• Monitor environmental and social issues related to important raw materials and formulate and execute measures to respond to such issues
Corporate management	Business portfolio management G	Risk of being unable to respond to environmental changes due to insufficient quantification of risk across the Company's entire business portfolio and unsuitable risk assessment methods	<ul style="list-style-type: none">• Implement appropriate risk assessment
	Product evaluation S	Risk of a negative reputation being spread regarding umami or the umami seasoning <i>AJI-NO-MOTO</i> ®	<ul style="list-style-type: none">• Implement awareness-raising activities in cooperation with the NPO Umami Information Center, etc.

A Discussion: Connection between the Ajinomoto Group's ASV and Corporate Value Creation

Takaaki Nishii

Representative Director,
President & Chief Executive Officer

Tetsuo Kitagawa

Professor, Graduate School of
International Management,
Aoyama Gakuin University

Under the FY2017–2019 (for FY2020) Medium-Term Management Plan (hereinafter, the FY17–19 MTP), the Ajinomoto Group aims to realize sustainable growth through ASV. In this section, Aoyama Gakuin University Professor Tetsuo Kitagawa, who is also chairman of the Working Group on Incorporating Issues Regarding Sustainability into Investment (Ministry of the Environment of Japan), and Ajinomoto Co., Inc. President & CEO Takaaki Nishii sit down for an in-depth discussion on the connection between the Ajinomoto Group's ASV and corporate value creation.

The Ajinomoto Group's Approach to ASV and Corporate Value

Nishii The Ajinomoto Group began its business by marketing umami seasoning as a product called *AJI-NO-MOTO*®. Since then, the Group has grown while carrying on the aspiration of its founder, which is to improve nutrition through delicious meals. In addition to improving nutrition, the use of umami seasoning not only allows for the creation of spare time by shortening the cooking process, it also helps families share the joy of eating together and creates affluent lifestyles by interconnecting different food cultures. Through business development centered on umami seasoning, we have spread the value that food itself possesses around the world. Accordingly, food has become our most significant business domain.

Also, due to the fact that the essence of umami, glutamic acid, is an amino acid, we have promoted research on amino acids to scientifically clarify their functions and efficacies. We have also enhanced technologies for manufacturing high-quality amino acids. We have applied such research and technologies to establish the AminoScience business, which comprises the life support and healthcare fields, and as a result of expanding our business domains guided by the

aspiration of our founder, which is "Eat Well, Live Well.", we have developed into the corporate group that we are today.

Through our business activities, we have created new value through the resolution of issues facing society and have realized growth as a corporation by improving economic value. We have adopted ASV as a term that describes this process, and ASV itself represents the core concept of the Ajinomoto Group that has guided our efforts since our founding.

Kitagawa ASV is a concept that summarizes and thoroughly explains the way the Ajinomoto Group has grown by leveraging its long-cultivated expertise and strengths. In recent years, the announcement of Japan's Corporate Governance Code, the Stewardship Code, and the Ito Review* has had a significant impact on corporate management. The underlying focus of such measures is to ensure the sustainable growth of corporations, and significant attention is now being paid to what a company should do to continue to realize sustainable growth over the long term. The Ajinomoto Group has led the way in responding to this issue

and has disclosed the details of relevant initiatives. The fact that the Ajinomoto Group is able to summarize these initiatives toward sustainable growth in the single concept of ASV reflects a solid, original foundation—and this is something that I am extremely impressed with.

Nishii We have been working to thoroughly communicate information on our corporate activities to our various stakeholders, whose interests differ from group to group. We aim to facilitate an understanding that the sustainable growth of the Ajinomoto Group will lead to profits for the stakeholders themselves. I believe such an understanding will help boost our corporate value.

Kitagawa In the investing world, public pension funds are placing emphasis on ESG, and various financial institutions are pursuing deep ESG research. Such factors demonstrate the rising interest toward ESG. Overseas investors, especially in Europe, place significant value on ESG initiatives, and there are a great number of financial institutions that evaluate a company from the perspective of sustainability. Considering these trends, I believe that actively conveying the fact that the Ajinomoto Group has been bolstering its ESG initiatives centered on ASV will lead to sophisticated communication with investors. Furthermore, through this kind of communication, the Ajinomoto Group can inspire and further engage investors through its outstanding information disclosure as a global company, and positive investor feedback will likely tie into the further advancement of the Company's business activities. I refer to such process as a "positive spiral," and I believe that the Ajinomoto Group has reached a stage where it can create this spiral.

The Establishment of Integrated Targets in the FY17–19 MTP

Nishii In the FY17–19 MTP, we have set the goal of becoming a "global top 10 class food company" by fiscal 2020 as an important milestone. Speaking in terms of numbers, that means we are aiming for business profits of ¥130 billion. This amount represents the minimum necessary to balance essential strategic investments in the AminoScience business, for which anticipatory investments are crucial, and the food products business with shareholder returns in order to realize our vision. This also represents the minimum amount necessary to enhance our social impact and value and demonstrate our influence to the outside world. This aspiration, however, does not mean that we will be satisfied with becoming the 10th-place company within the global top 10, but rather that business profits of ¥130.0 billion and the 10th-place position just happen to best represent what we are aiming for from a financial and non-financial perspective at this time.

Nishii Taking a look at our sales ratios, the AminoScience business accounts for roughly 20% of our overall sales. There are many areas within this business that require anticipatory investment, and, in some cases, it will likely take 10 to 15 years before we start seeing results. If we do not fulfill our responsibility to raise the level of clarity in our communication and provide thorough explanations regarding businesses that will improve our corporate value over the long term, then we will not be able to gain the understanding of our stakeholders. Therefore, I personally have been actively pursuing dialogue and further engagement with our stakeholders over the past two years.

Kitagawa I have many opportunities to talk with investors. I make sure to tell them that before they engage in dialogue with a company, they must first have a sufficient understanding of that company's approach and beliefs. After gaining such an understanding, they should communicate their way of thinking. At the same time, it is extremely important for companies to thoroughly advocate their approach when communicating with investors. Investors, on their part, need to have the ability to ask excellent and high-level questions. In Japan, I feel that both investors and companies still have many areas where they need to improve in terms of communication. I therefore hope that the Ajinomoto Group can lead the way in realizing more fruitful dialogue between investors and companies.

* The Ito Review refers to the final report of the "Competitiveness and Incentives for Sustainable Growth: Building Favorable Relationships between Companies and Investors" project (Ministry of Economy, Trade and Industry of Japan), which was published in August 2014. This project was chaired by Professor Kunio Ito of the Graduate School of Commerce and Management, Hitotsubashi University.

Nishii As an integrated target for the FY17–19 MTP, we adopted corporate brand value as an important management metric for the first time ever. We based this target on the surveys conducted by the brand consulting firm Interbrand. However, if we look at the results of these surveys, we see that there is an extremely small number of Japanese companies whose brands are evaluated on the global market.

Kitagawa Japanese companies are not very aware of this, but corporate brand value is a significantly important concept. While there are many ways to measure corporate value, companies should now place considerable emphasis not only on their market capitalization for investors but also on their corporate reputation and corporate brand value. Accordingly, I believe it is necessary for companies to assess the special qualities they possess within the industry, analyze the value they offer in a levelheaded manner, and set targets for enhancing their level of recognition in the global market.

Nishii Corporate brand value is evaluated based on the expectations of the brand over the long term and how important the brand is to society. This naturally means that corporate brand value is an important evaluation standard in terms of ESG as well. I therefore believe that corporate brand value represents the most optimal evaluation criteria for the Ajinomoto Group, which aims to realize sustainable growth through ASV.

Kitagawa Aside from corporate brand value, I am impressed with the detailed process the Ajinomoto Group took to establish the non-financial targets of the FY17–19 MTP. For example, while most companies would incorporate

employee engagement as an indicator for social (S) initiatives, the Ajinomoto Group has established it as an indicator for governance (G). I feel that this reflects the Group's belief that employee engagement is an important matter that relates to the core of its management. This also indicates the strong desire on the part of management to hold discussion on employee engagement. It is important for a company to have its governance (G) initiatives provide impetus to its social (S) initiatives, and I feel that the Ajinomoto Group's decision to adopt employee engagement as an indicator for governance (G) will invite excellent questions from investors at dialogue sessions.

Nishii I believe Mr. Kitagawa makes a great point in terms of employee engagement. When all is said and done, it is our talent that is the driving force behind creating innovative products. Our talent is also a necessary part of strengthening our governance foundation. There are many aspects behind boosting employee engagement. To thoroughly investigate these aspects, we will conduct a survey of all full-time employees, including those at Group companies in Japan and overseas, in October 2017. We will commence initiatives under the theme of enhancing employee engagement.

Kitagawa Investigating the details of employee engagement will help improve motivation and encourage more active working habits. This, in turn, connects to the career development of each employee and will ultimately lead to the improvement of the Company's total value. Employee engagement provides the roots for a company's development, and it is therefore essential to pursue efforts to enhance it.

ASV represents the core concept of the Ajinomoto Group that has guided our efforts since our founding.

I would like to see the Group continue to boost its presence as a global leader that actively works to resolve the issues that society faces.

The Future of the Ajinomoto Group

Nishii Compared with the Millennium Development Goals, the Sustainable Development Goals (SDGs) were created from the perspective of 21st century society. In the past, nutrition-related issues were only prominent in certain regions of Africa and Asia. However, these issues have now spread on a global scale, affecting both developed countries and emerging countries alike. Amid these circumstances, the importance of improving nutrition through food is garnering significant attention in various countries and regions, making the approach of the Ajinomoto Group even easier to understand. To demonstrate our presence on a global stage, we will more actively promote efforts to improve nutrition.

Also, in terms of fairness, there are many aspects we still need to improve from the perspective of sustainable procurement, which includes issues related to the working

environment, forced labor, and child labor. Rather than taking an exhaustive approach, we will adopt important indicators for areas that relate highly to these issues and make concerted efforts toward improvement.

Kitagawa To join the “top 10 class,” it is crucial for the Ajinomoto Group to demonstrate leadership in achieving the SDGs. As the Group has incorporated international indicators into its framework and is carrying out its business activities accordingly, I believe it is prepared to demonstrate such leadership. The Group will further enhance the level of trust it receives from ESG investors by ascertaining worldwide trends and working to demonstrate solid leadership. I would like to see the Group continue to boost its presence as a global leader that actively works to resolve the issues that society faces.

Initiatives to Improve Nutrition in Vietnam

The Ajinomoto Group has established the ASV Award Program, which recognizes initiatives that embody the spirit of ASV. For the First Annual ASV Awards, which took place in fiscal 2016, “Initiatives to Improve Nutrition in Vietnam” was chosen as the grand prize winner.

Vietnam Nutrition System Establishment Project

Knowledge and awareness of nutrition-related issues among Vietnamese citizens is less than sufficient, and malnutrition and overnutrition have become significant social issues. As a means of resolving this situation, the Ajinomoto Group launched the Vietnam Nutrition System Establishment Project (hereinafter, VINEP) in 2011 with the aim of training and utilizing “messengers” who can deliver accurate nutritional information.

Through VINEP, the Institute for Innovation of Ajinomoto Co., Inc., collaborated with Ajinomoto Vietnam Co., Ltd. (hereinafter, AVN), the National Institute of Nutrition, and other related Vietnamese government institutions, to help support the establishment of education systems in Vietnam for training dieticians (approved by Vietnam’s Ministry of Education and Training, in 2012), which did not exist at the time of VINEP’s founding, and the passing of a government regulation specifying the status of dieticians (approved by the Ministry of Health and Ministry of Home Affairs in 2015). In addition, together with AVN, we have made efforts to maximize the Ajinomoto Group’s full potential, including the creation and provision of a scholarship system, support for creating teaching materials including information on umami and amino acids, and lectures on nutritional physiology. In addition, the Ajinomoto Group, together with AVN, leveraged its comprehensive strengths to provide scholarships, offer support for the creation of educational materials, including materials on umami and amino acids, and conduct lectures on nutrition for professional programs. In this way, through the improvement of infrastructure to convey accurate nutritional information through the enhancement of a nutritional system, the Ajinomoto Group contributed to raising and disseminating accurate nutritional knowledge to the whole country. Through such efforts, dieticians who have acquired proper knowledge of nutrition will help Vietnamese citizens improve their nutrition on their own initiative. At the same time, these efforts will boost the level of trust Vietnamese citizens have in AVN and foster an understanding of the superior quality of the company’s products. This, in turn, should lead to increased sales.

School Meal Project

In Vietnam, there is no law that requires the provision of school meals. At elementary schools, the preparation of school meals is entrusted to teachers and cooking staff, and there are no guidelines for making nutritionally balanced meals. As such, meals that support the healthy development of children are not necessarily being provided on a consistent basis. In addition, while many children in rural communities suffer from malnutrition, an increasing number of children in urban areas are dealing with obesity and overweight issues. To fundamentally resolve these issues, AVN launched the School Meal Project (hereinafter, SMP) in 2012. Through SMP, AVN has been providing comprehensive support for enhancing the quality of school meals at elementary schools, as well as for improving the health and nutrition of students. As a result, awareness toward the importance of school meals has risen significantly at Vietnam’s Ministry of Education and Training and Ministry of Health. Thanks to this heightened awareness, in January 2017 menu-creating software developed by AVN was introduced at 3,880 elementary schools across Vietnam that have food preparation facilities. AVN’s products are being used to prepare nutritionally balanced meals at these schools, which is contributing to sales increases. At the same time, various media have covered the efforts of SMP in Vietnam, thereby improving the value of the Ajinomoto Group’s corporate brand. On March 21, 2017, the initiatives of SMP were reported to the National Assembly, and, as a result, it was decided to expand SMP to nursery schools. Going forward, we will further enhance initiatives to improve nutrition in Vietnam.

What are the ASV Awards?

The Ajinomoto Group is developing businesses with ASV as its core. To advance ASV in each country and region of operation going forward, it is necessary for us to facilitate an understanding of the background and importance of ASV among our employees. As an effort to foster such an organizational culture, we have established the ASV Award Program. This program recognizes initiatives that create both social and economic value through innovative and creative business activities. We will introduce initiatives that were selected to receive the ASV Award Grand Prize through integrated report.

Advancing ASV through Initiatives Unique to the Ajinomoto Group

The Ajinomoto Group is working to advance ASV in each region and in each business. This section introduces an initiative to reduce our environmental impact in Thailand and an initiative to support athletes through food.

Case 1 Realizing Eco-Friendly Production through the Introduction of Biomass Cogeneration Systems

Ajinomoto Co., (Thailand) Ltd. aims to reduce CO₂ emissions and reduce costs in Thailand, a country that is expecting further business growth. To this end, the company introduced a biomass cogeneration system*¹ in April 2016 at the Ayutthaya Factory, which produces the umami seasoning *AJI-NO-MOTO*®. This system, which is the first of its kind to be introduced to the Ajinomoto Group, uses the renewable energy source rice husks*² as fuel. Through the introduction of this system, the Ayutthaya Factory was able to completely eliminate the use of fossil fuels—its former fuel source—and realize an annual CO₂ emission reduction of roughly 59,000 tons. In addition, the system is able to convert a certain amount of purchased power into power generated on-site, thereby reducing energy costs and lessening the risk of business opportunity loss during times of power failure. The Ajinomoto Group has a proven track record of using biomass fuel in Thailand, Vietnam, Brazil, and France. With the cogeneration system introduced at the Ayutthaya Factory, the Group is able to control all aspects of production on its own, from rice husk procurement and system operation and maintenance to the effective utilization of incinerated ash, which the system creates as a by-product. Combining this system with the active expansion of its long-cultivated biomass fuel utilization technology, the Group will continue to pursue eco-friendly production going forward.

The Ayutthaya Factory

Rice husk fuel

*¹ As plants absorb CO₂ during the growth process, biomass fuel (rice husks), which is derived from plant-based materials, does not emit CO₂ even when burned, making it carbon neutral. Energy that is obtained from biomass fuel is considered to be renewable energy.
*² A cogeneration system that uses a heat source to generate electricity and steam. Cogeneration systems are also referred to as combined heat and power systems.

Case 2 Supporting the Improved Competitiveness of Athletes through Food and Amino Acids with the Victory Project®

In 2003, Ajinomoto Co., Inc. signed a partnership contract with the Japanese Olympic Committee (JOC) aimed at making comprehensive improvements to the international competitiveness of Japanese athletes. Under this partnership, the Company and JOC have been promoting the *Victory Project*®. In addition, leveraging the expertise in food and amino acids that it has cultivated since its founding, Ajinomoto Co., Inc. is conducting support activities for Japan's top athletes, such as daily sports nutrition guidance and amino acid conditioning, to help them boost their degree of success at the international level.

The staff involved in the *Victory Project*® accompanies athletes on international competitions and provides food-related support to athletes to prepare for competitions. To properly condition athletes, these staff members bring with them amino acid-based granule products, such as *amino VITAL*®, and seasonings and processed food products, such as *HON-DASHI* and *Nabe Cube*. The staff also offers support in other ways, including providing *Kachi-Meshi*® and creating meal and nutritional-intake programs for each individual athlete (contract sports organizations). These initiatives have received high praise from athletes and sports organizations alike, thereby helping to improve the Ajinomoto corporate brand.

Athletes eating *Kachi-Meshi*® on an international competition

TOPICS

Looking toward the Tokyo 2020 Games

On March 28, 2016, Ajinomoto Co., Inc. became an official partner* of the Tokyo 2020 Olympic and Paralympic Games within the scope of its official contract category, "Cooking Condiments, Dehydrated Soup, Amino Acid-Based Granules, and Prepared Frozen Foods."

In 2016, the first year as an official partner of the Tokyo 2020 Olympic and Paralympic Games as well as the JOC and the Japanese Paralympic Committee (JPC), Ajinomoto Co., Inc. provided support for the Japanese national teams at the Rio 2016 Olympic and Paralympic Games, so that they could perform to the peak of their abilities throughout the Games. As part of these efforts, Ajinomoto Co., Inc. supplied 300,000 units of amino acid-based granule products, including *amino VITAL*® *Rio 2016 Japanese national teams Special* (not for general sale), thereby supporting the comprehensive conditioning of the athletes.

Building on these efforts, the Company will contribute to the success of the Tokyo 2020 Olympic and Paralympic Games by actively offering support to the Japanese National Team and the Tokyo 2020 Games Committee.

* Ajinomoto Co., Inc. is an official partner of the JOC and JPC (contract category: Cooking Condiments, Dehydrated Soup, Amino Acid-Based Granules, and Prepared Frozen Foods).

Expanding the Value of Deliciousness and Health in North America by Instilling ASV in Ajinomoto Windsor, Inc.

In North America, the Ajinomoto Group acquired Windsor Quality Holdings, LP (hereinafter, Windsor), a company that possesses strengths in the Asian foods category of the frozen foods market in 2014, and launched Ajinomoto Windsor, Inc. in 2015. By melding the strengths of the Ajinomoto Group with those of Windsor and leveraging superior technologies to offer deliciousness and health as new value to the North American dinner table, we aim to obtain the undisputed No. 1 share in the North American Asian foods market.

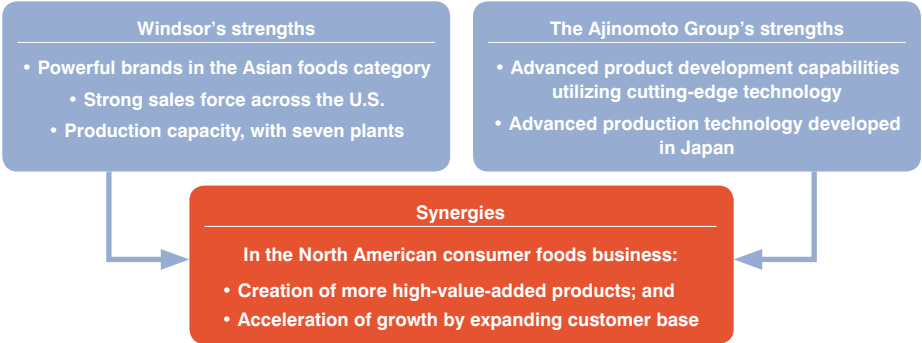

Background to the Acquisition

Objectives and Outcomes of Acquiring Windsor

In the Overseas Consumer Foods Business, the Ajinomoto Group is promoting global growth with the aim of becoming No. 1 in deliciousness by leveraging our unique technologies and thoroughly pursuing adaptation to customers and countries in business development. In the developed countries of Europe and the Americas, we are expanding businesses specializing in Asian food products in a manner that adapts to local cultures. This expansion centers on unique products from Japan that have high value, with a particular focus on frozen and processed foods. In 2000, the Ajinomoto Group launched a genuine frozen foods business in North America and has been providing high-quality products such as gyoza, noodles, and rice in a way that caters to local tastes.

Under management that is savvy in the frozen foods business, Windsor, had an expansive distribution network in the U.S. frozen foods market, including major distributors, with 80,000 stores handling their products. Windsor also has a strong business foundation in terms of the restaurant industry, as their products are used at approximately 120,000 dining establishments. Through the acquisition of Windsor, we will draw on the company's sales network, centered on the Ajinomoto Group's forte products of gyoza, noodles, and rice, which will allow us to accelerate sales to retail channels throughout the U.S. and establish a strong sales foundation for restaurant channels. We are currently generating various synergies with the new company Ajinomoto Windsor, Inc. and have grown our Overseas Consumer Foods Business to a scale of ¥100.0 billion.

Objectives and Outcomes of Acquiring Windsor

Progress after the Merger

Sharing and Instilling ASV

To promptly maximize synergies through Ajinomoto Windsor, Inc., we have worked to find a harmonious balance between the approach to business strategies and the cultures of the Ajinomoto Group and Windsor. In particular, we had key personnel from Ajinomoto Windsor, Inc. participate in training programs in Japan, allowing us to share our strategies and ASV approach, which represents the core of those strategies, geared toward becoming a "Genuine Global Specialty Company." In addition, members of Ajinomoto Co. Inc.'s managerial ranks, including the president & CEO, visited Ajinomoto Windsor, Inc. to directly explain our growth strategies through ASV to its employees. In these ways, we are communicating the direction that the Ajinomoto Group is heading and forging a mind-set that each employee plays an important role in embodying ASV.

Specific Examples of Synergies

R&D

To respond to the heightened health consciousness in North America, we are promoting the Low-Sodium Project. By combining the low-sodium ingredients of Ajinomoto Co., Inc. and the low-sodium technologies of Ajinomoto Frozen Foods Co., Inc., we are realizing a balance between low-sodium content and deliciousness. In March 2017, we launched the mainstay brand *TAI PEI*®, and have been gradually growing its sales since.

Production

To boost the level of safety and quality and enhance the facilities and working environment of each factory, employees of Ajinomoto Frozen Foods Co., Inc. have become deeply involved in on-site production through the introduction of *kaizen* (improvement) activities. These activities have brought about very tangible improvements, thereby not only instilling a new *kaizen* culture at each plant and enhancing productivity but also making specific improvements in terms of safety, the environment, and quality.

Message from the President

The Deep Transformation of Our Business Foundations is Starting to Take Shape and Will Contribute to Revitalizing Growth

Bernard Kreilmann
President, Ajinomoto Windsor, Inc.

Our success will depend on the performance of our products, as well as on the engagement of our employees. Our new HR enterprise will support more collaboration and promote the development of our skills and capabilities to become among the best in our industry. We are also very excited about creating economic value with the purpose of generating a positive impact on society. A key part of our ASV priority is to create better meals that combine deliciousness and goodness. We will contribute to improving eating habits in North America and will focus on reducing our impact on the environment. We are looking to the future with optimism and pride to represent the Ajinomoto Group's core values in North America.

Growth Strategies of the Ajinomoto Group

Review of the FY2014–2016 Medium-Term Management Plan

Under the FY2014–2016 Medium-Term Management Plan (hereinafter, the FY14–16 MTP), the Ajinomoto Group promoted the shift to a specialty-oriented business structure based on its "FIT & GROW with Specialty" policy. In fiscal 2016, the Group recorded operating income of ¥85.3 billion. While it was unable to reach the plan's targets due to challenging conditions in the animal nutrition and pharmaceuticals businesses, the Group has been realizing steady profit growth in specialty businesses since fiscal 2013, with profit levels exceeding the targets adopted under the FY14–16 MTP. Under the FY2017–2019 (for FY2020) Medium-Term Management Plan (hereinafter, the FY17–19 MTP), the Group will accelerate initiatives to address the issues that still remain from the previous plan.

Achievements and Remaining Issues under the FY14–16 MTP (Japanese GAAP)

	Achievements	Strategic Targets	FY2016 Target	FY2016 Actual	Remaining Issues
FIT Further Reinforcement of Business Structure	Significant progress made but underdelivered vs targets <ul style="list-style-type: none">Launched EA Pharma Co., Ltd. with Eisai Co., Ltd.Sold Ajinomoto Sweeteners Europe S.A.S. and GABAN Co., Ltd. 		EPS growth rate (3-year average)	Around 10%	8.2%	
		Shareholder return (3-year cumulative)	50% or more	67.8%	
		Payout ratio	30%	32.6%	

*1 As of fiscal 2016, international household business expansion accelerated with a portfolio shift in international processed foods (powdered beverages). As revisions have been made to numerical assumptions in accordance with this change, the results for fiscal 2016 are not shown.
*2 Results for fiscal 2016 are not shown due to a deficit in the commodities business. *3 Thailand, Brazil, Indonesia, Vietnam, Philippines

Operating Income by Business (Japanese GAAP)

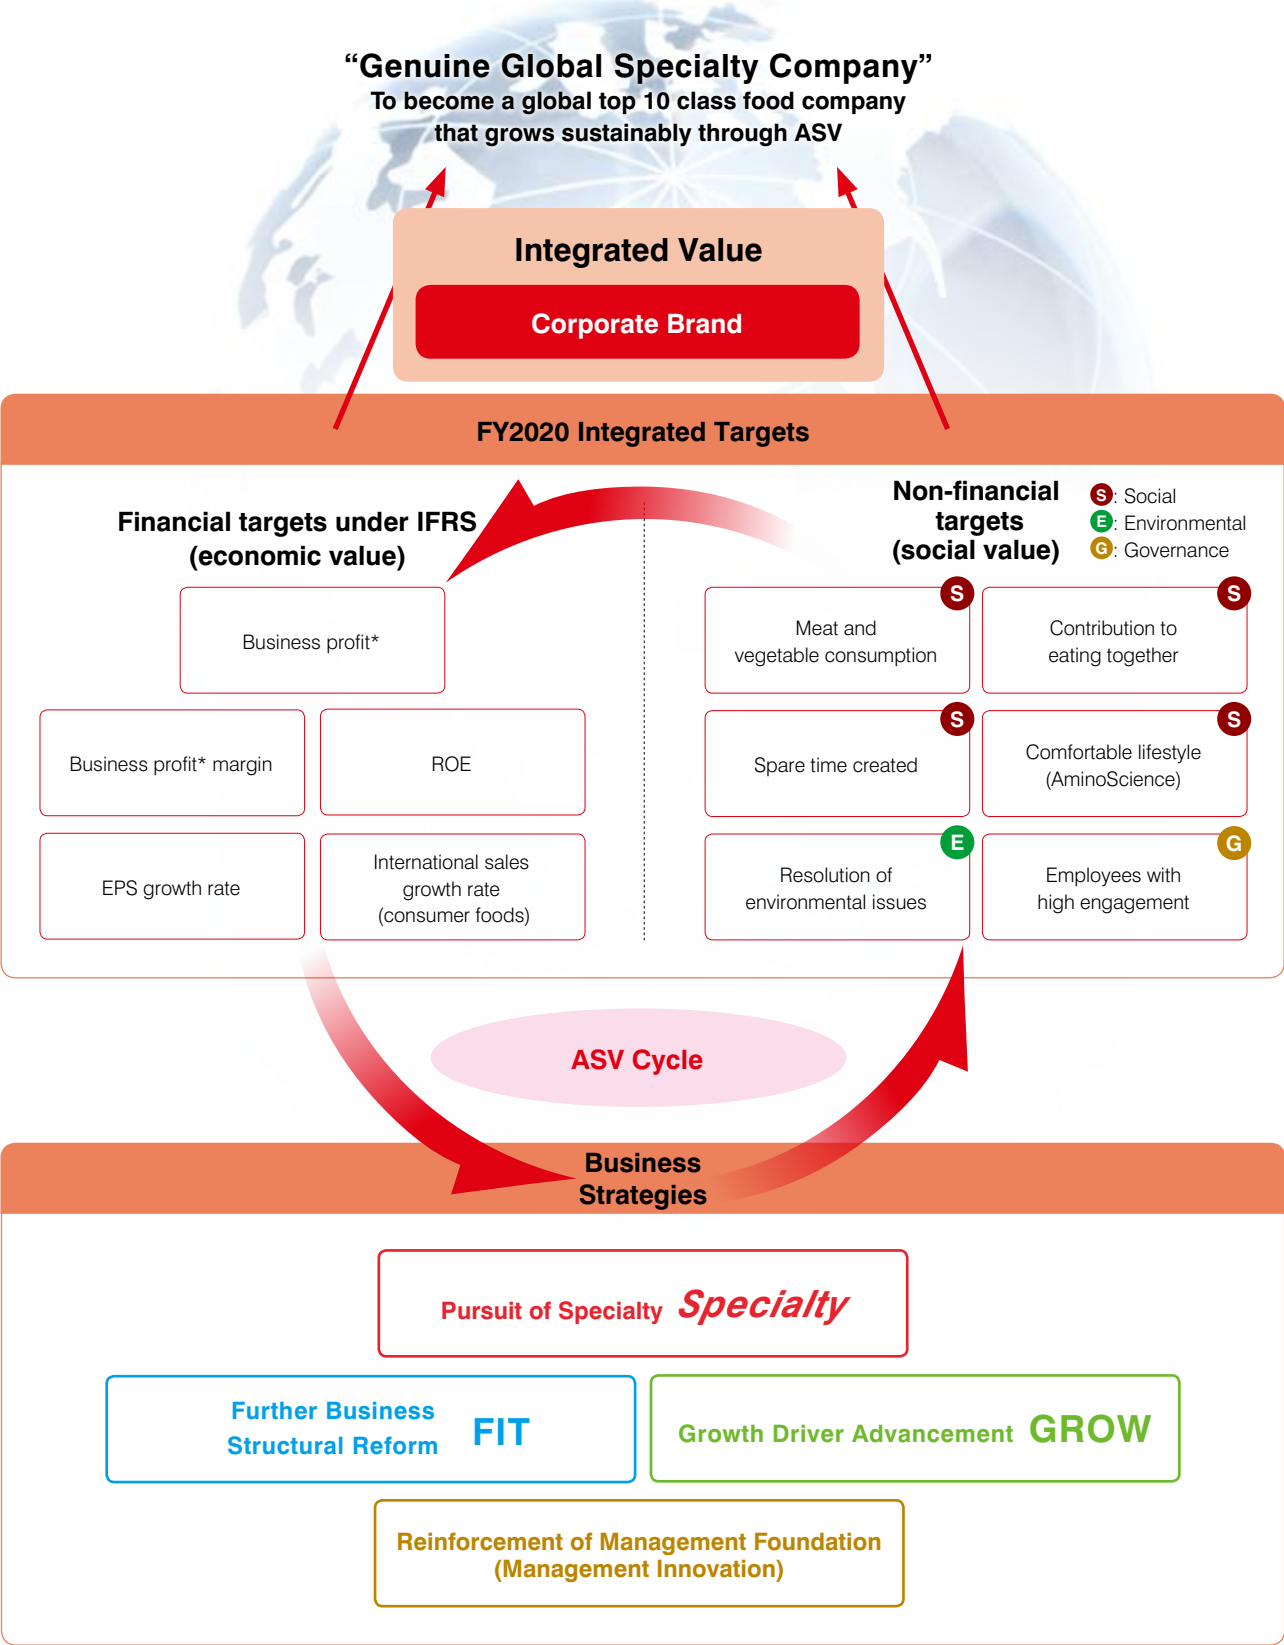

Direction of the FY17–19 MTP

- Scale down commodities and expand specialties
- Enhance growth drivers by adapting to changes in lifestyles in "Five Stars"
- Reinforce our organization, talent, and work styles as a global top class company
- Establish business structure with high asset/capital efficiency capable of creating sustained profitability

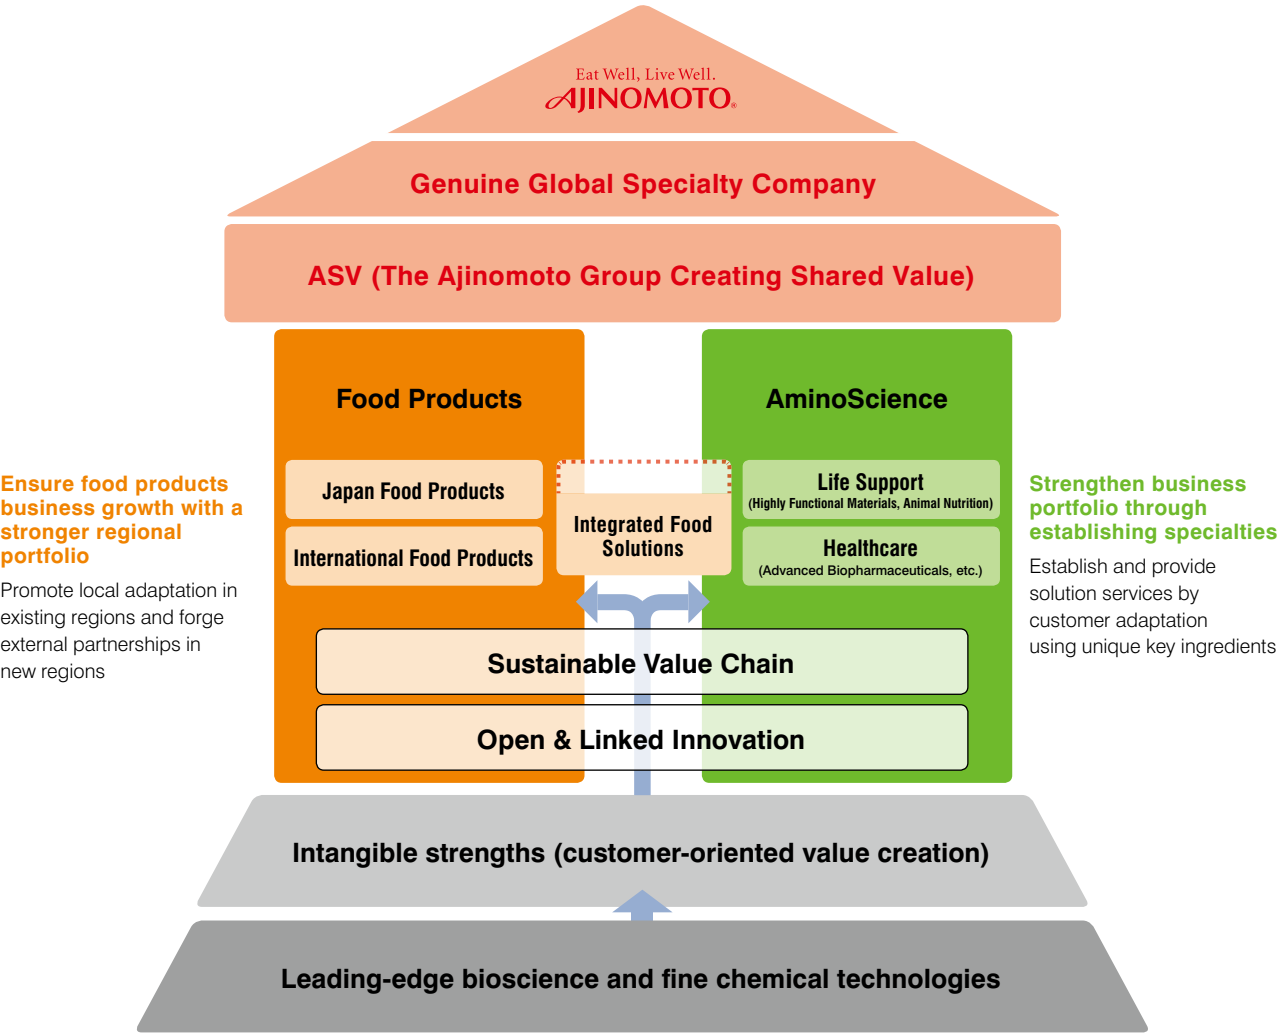

Overall Outline of Initiatives toward Fiscal 2020

To realize sustainable growth through ASV, the Group has formulated its first-ever integrated targets. These targets combine non-financial targets, which share value with society and local communities through ASV, and financial targets, which represent the economic value created from the achievement of these non-financial targets. By realizing these integrated targets, the Group will accumulate corporate brand value and create a cycle that allows for further value creation. In doing so, the Group aims to become a “Genuine Global Specialty Company.”

Direction Our Business is Heading under the FY2017–2019 (for FY2020) Medium-Term Management Plan

Supported by specialties derived from the integration of leading-edge bioscience and fine chemical technologies and our ability to create customer value, the Ajinomoto Group has established “Food Products” and “AminoScience” as its two business pillars. For the direction of strategies for these two pillars, we are working to ensure global business growth in food products by improving the regional portfolio and strengthening the business portfolio of AminoScience through establishing specialties. Furthermore, we have established a new food business model that focuses on integrated food solutions, which integrates food products and AminoScience. For this domain, we will leverage our deliciousness technologies to provide solutions for home meal replacements (HMR), food services, and food processing. In doing so, we will develop integrated food solutions as a new business pillar.

FY2019 Financial Targets		
Business profit	Business profit margin	ROE
¥124billion	9.4%	9.8%
EPS growth rate	International sales growth rate (consumer foods)	
Double-digit annual growth	Double-digit annual growth	

FY2019 Non-Financial Targets

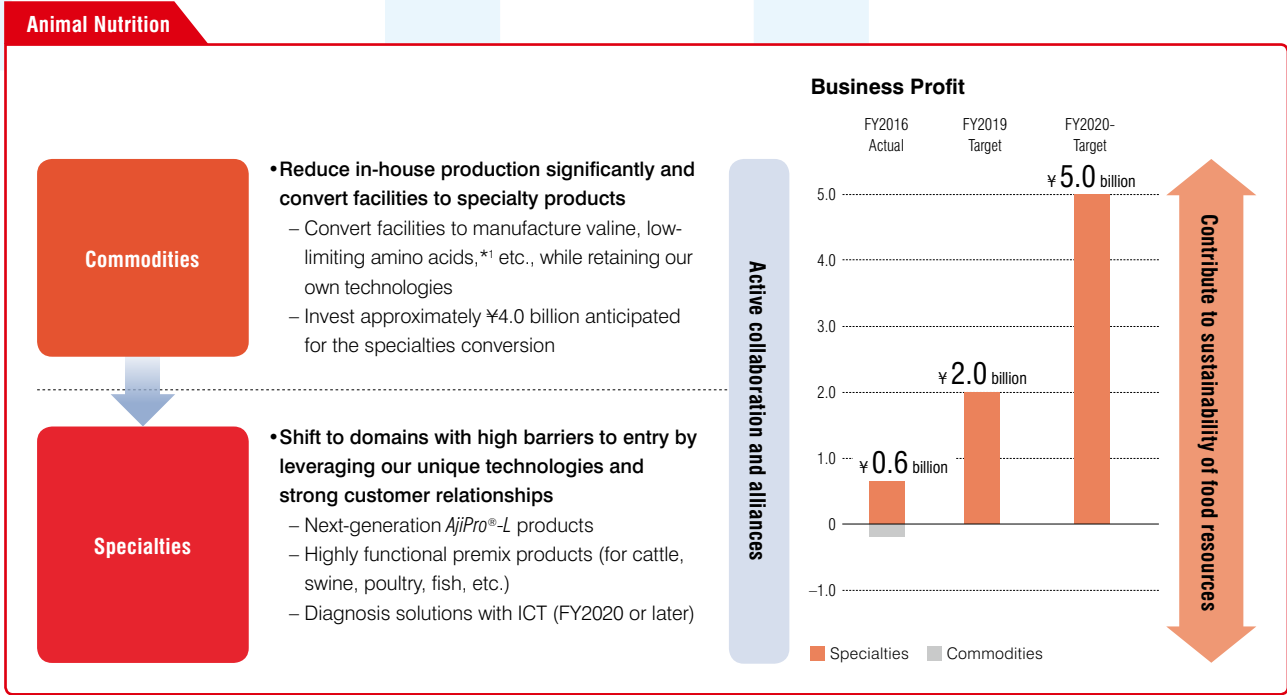

Promote business activities toward achieving the FY2020 non-financial targets

* An original profit KPI adopted by the Group following the voluntary application of International Financial Reporting Standards (IFRS) for management purposes. The KPI is defined as follows: Sales – Cost of sales – Selling expenses, Research & development expenses, and General & administrative expenses + Share of profit of associates and joint ventures

Shift Fundamentally from Commodities to Specialties

In our bulk businesses, we are accelerating the shift from commodities to specialties and enhancing added value. At the same time, we are strengthening cost competitiveness by improving our business structure. In particular, for animal nutrition, we will actively collaborate with external parties to overcome the deficit in commodities and increase profits in specialties. In doing so, we are establishing a foundation for stable profit creation.

Accelerate shift to specialties

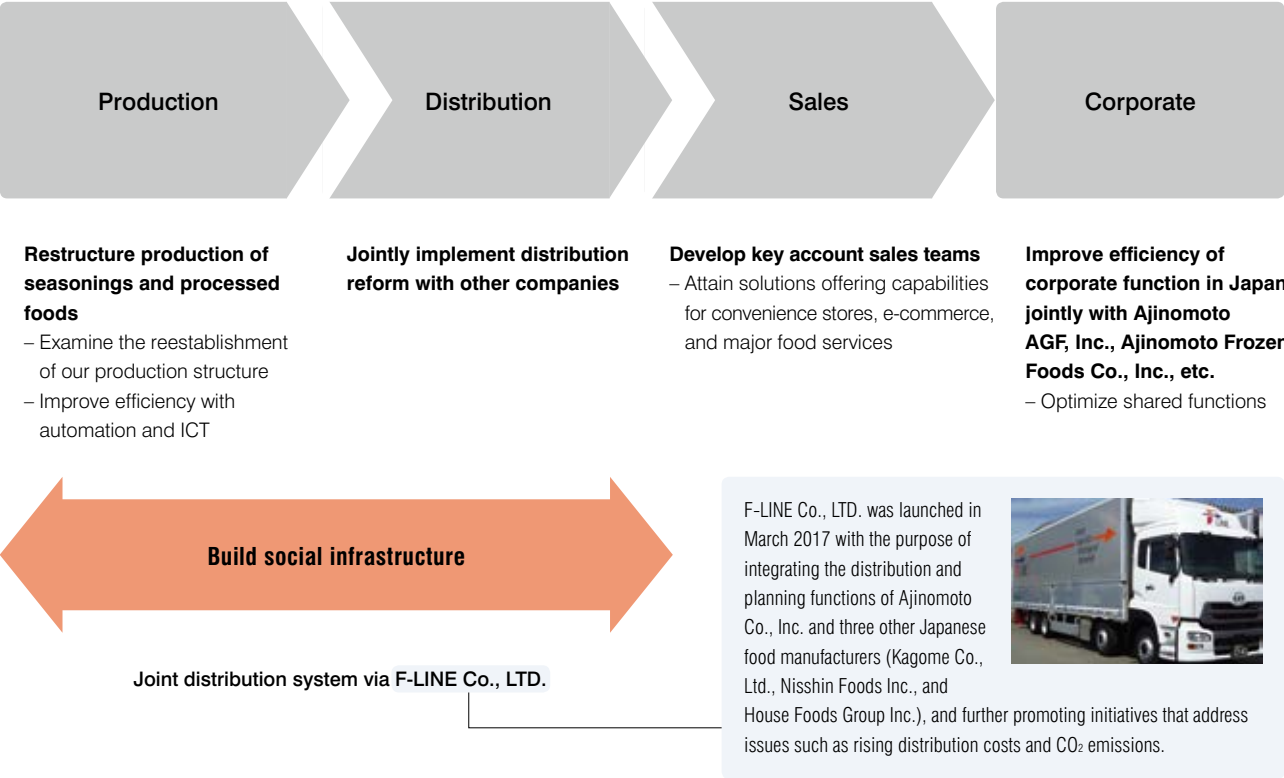

*1 Amino acids that become limiting amino acids after lysine and threonine *2 Sterile filling and formulation of biopharmaceuticals *3 Antibody Drug Conjugate

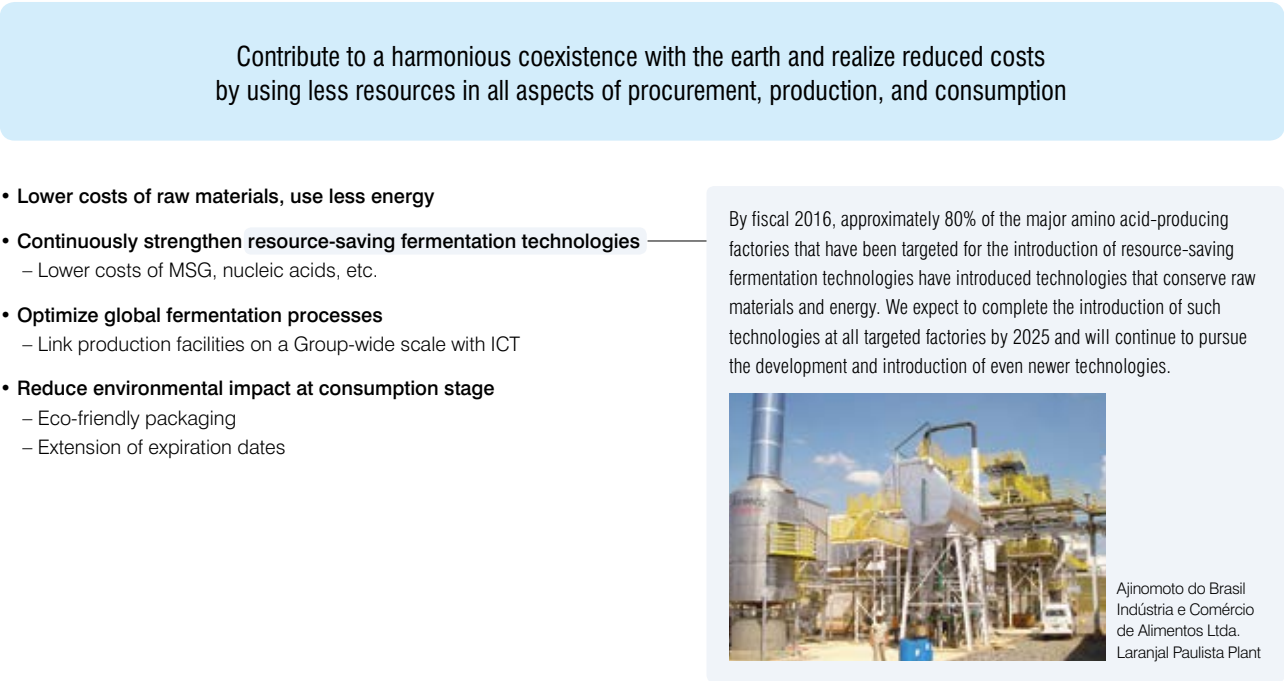

Construct Sustainable Value Chains across Businesses

We will construct value chains across our businesses that support sustainable growth. In Japan, we will reinforce our business structure by reorganizing the overall value chain for food products together with our affiliated companies. Globally, we will cut costs and contribute to the global environment by reducing the amount of resources used in procurement, production, and consumption processes.

Restructure value chains food products in Japan jointly with affiliated companies

Construct sustainable value chains on a global scale

Growth Strategies of the Ajinomoto Group
Growth Driver Advancement “GROW”

Ensure Food Products Business Growth with a Stronger Regional Portfolio

We have worked continuously to strengthen the regional portfolio of the food products business. Thanks to these efforts, our existing business structure that was heavily dependent on Japan and Thailand is starting to change. Under the FY17–19 MTP, we will establish a solid business foundation that is less affected by market growth and foreign exchange rate fluctuations through the creation of an extremely well-balanced regional portfolio. In doing so, we will realize steady growth. Furthermore, in accordance with regional strategies, we aim to be No. 1 in deliciousness for each category by leveraging our leading-edge technologies and know-how in local and customer adaptation.

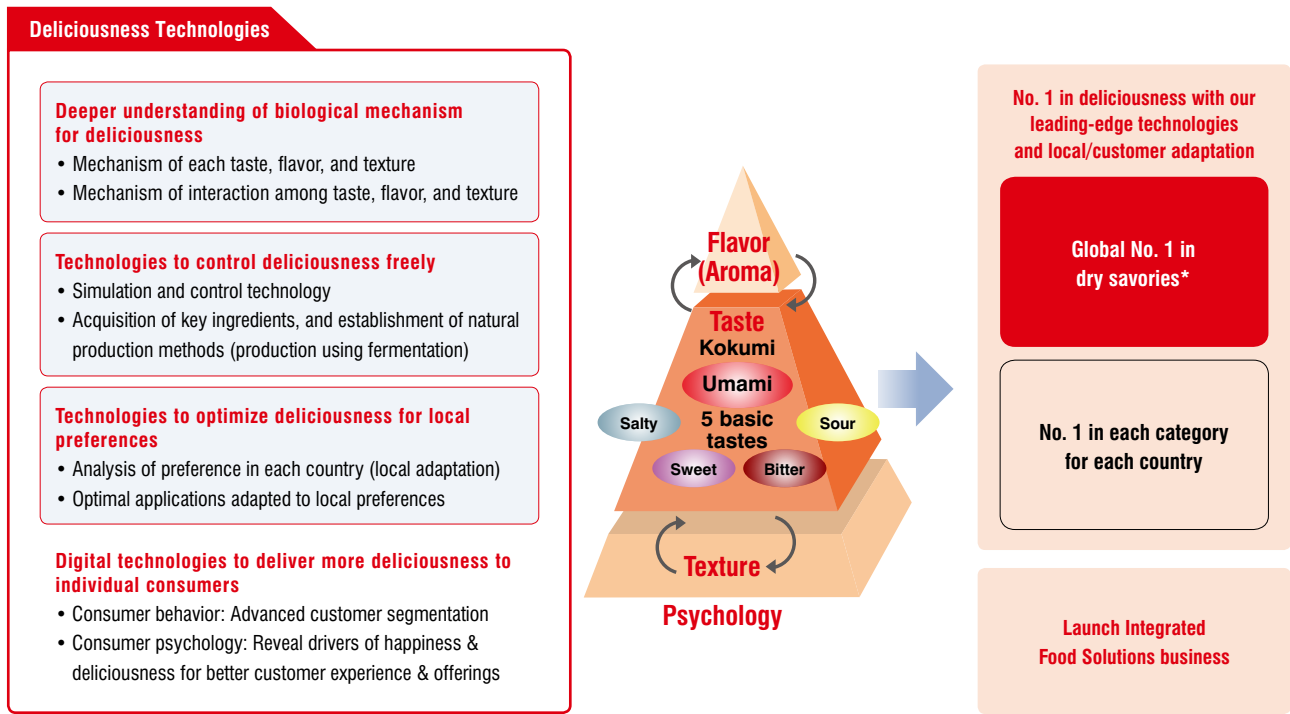

Maintain well-balanced portfolio covering both developed and emerging countries for sustained growth

Business profit*1 composition by region (Yen based)

*1 Before allocation of Company-wide common expenses
*2 Includes Africa, Turkey, Malaysia, Singapore, Cambodia, Peru, China, Taiwan, Korea, Hong Kong
*3 Japan, North America, Europe
*4 Five Stars, Rising Stars

Deepen our deliciousness technologies

* Umami seasonings and flavor seasonings (powdered, cubes, etc.)

Japan Food Products

Key Product Innovation in Group Technologies

Our proprietary deliciousness technologies leveraged to reinforce products, enhance brand equity, and expand into adjacent domains

Customer Application Capabilities Powered by Science and Digital

Enrich health & well-being value offerings through co-creation with local communities/customers

Establish world-class quality and productivity with the most advanced facilities

International Food Products

Core Strategies in “Five Stars”

- Deepen value proposition of seasonings, and develop new categories that adapt to local eating habits and lifestyles
- Capital expenditure of approximately ¥35 billion to be invested

Refine quality of existing products × More new product lines

- “No. 1 in deliciousness” with our unique ingredients and technologies
- Menu-specific seasonings: Expand menu and regional coverage as the next pillar after umami seasoning *AJI-NO-MOTO*® and flavor seasonings
- Powdered beverages: Leverage Ajinomoto AGF, Inc.’s coffee technology to strengthen cost competitiveness and expand into tea domain
- Expand sales to food services and food processing companies

Launch new categories × Exploit new channels & occasions

- Product development for frozen foods (Gyoza, frozen bread, frozen cakes, etc.) addressing convenience needs
- Instant noodles with larger regional coverage (*YumYum*®)
- Light meal (snacks, kids category, etc.) as a new category
- Product development for food services and convenience store channels

Core Strategies in North America and Europe

- Expand the frozen foods business by leveraging our industry-leading technologies and know-how as well as the business foundation of Ajinomoto Windsor, Inc.
- Capital expenditure of approximately ¥20 billion to be invested in the renovation and expansion of production platform

North America
Become No. 1 in the Asian food category by introducing new lineups and pursuing deliciousness

Europe
Build business platform in Europe through M&A

Core Strategies in “Rising Stars”

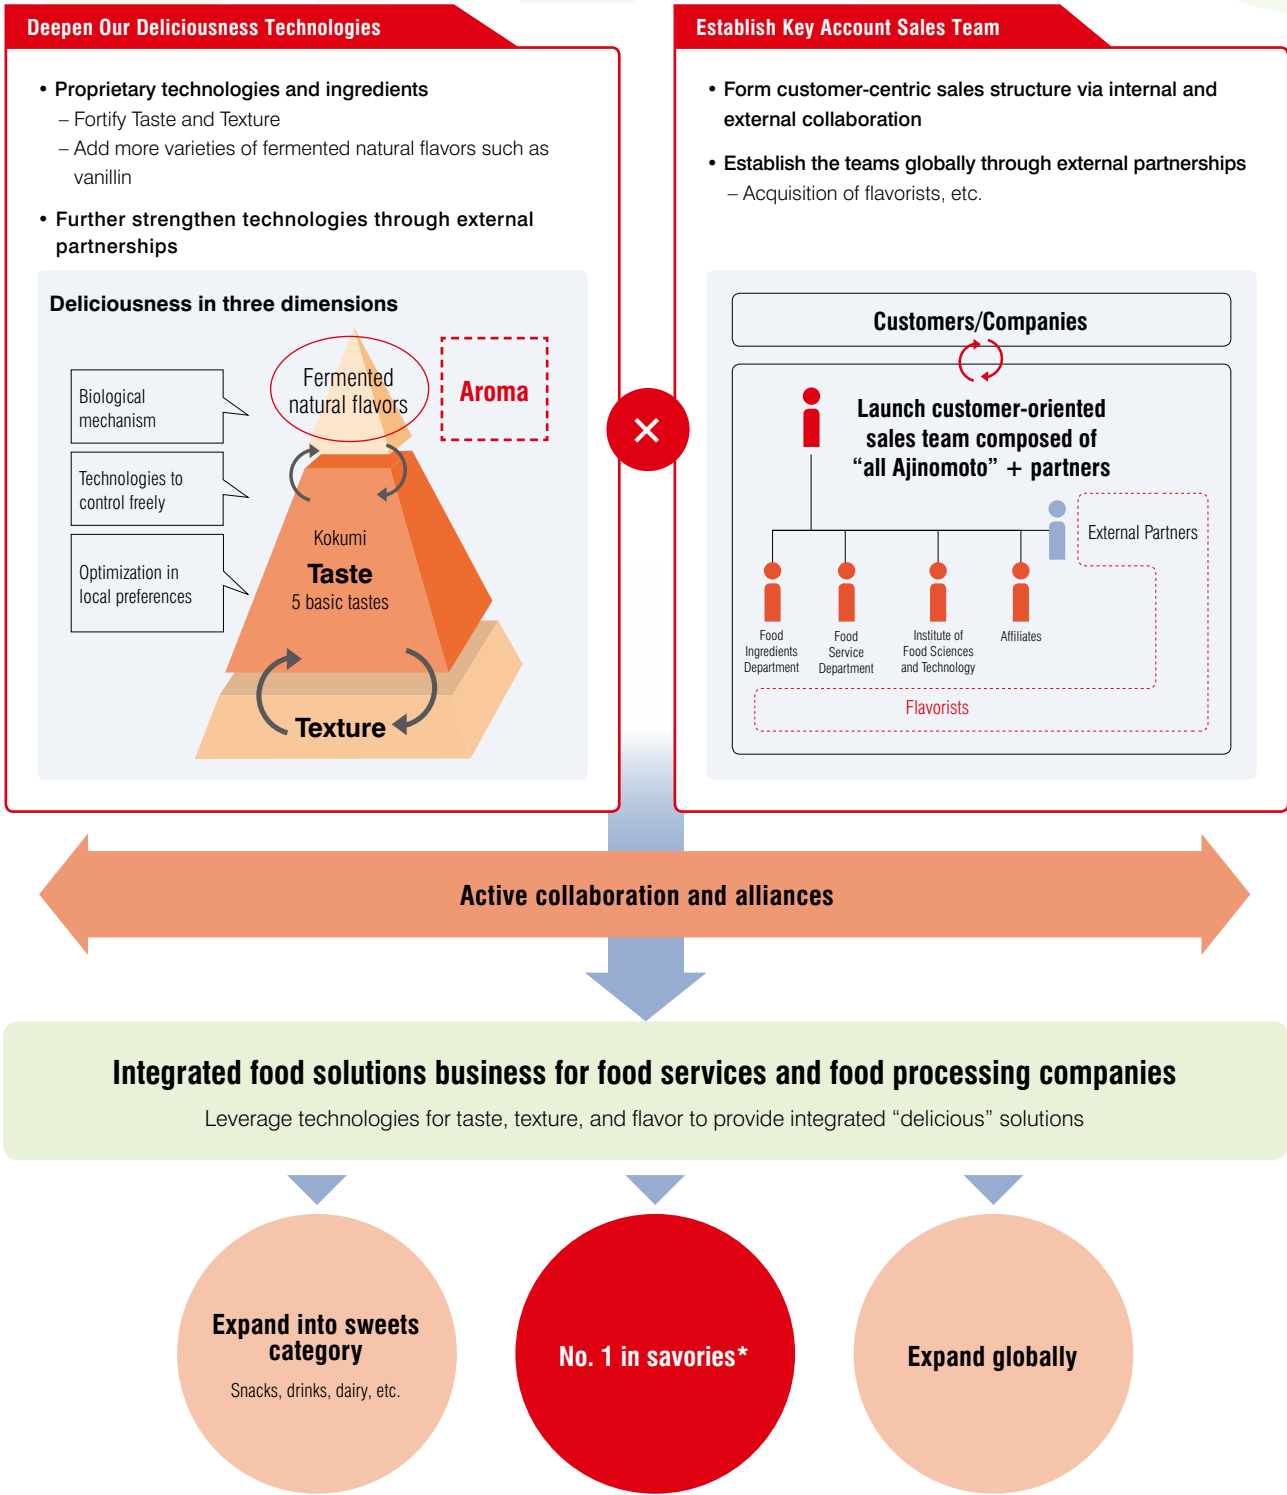

- Accelerate regional expansion through partnerships with local industry leaders

Africa	Leverage the sales network of Promasidor Holdings Limited to expand into African countries (5 keys + 31 others)
Turkey, Middle East	Leverage the business foundations of Örgen Gıda Sanayi ve Ticaret A.Ş. and Kükre A.Ş. to develop businesses in Turkey and Middle Eastern countries (including Iran)
Pakistan	Leverage the sales network of the Lakson Group to promptly develop a flavor seasonings product category
Myanmar	Draw on business development know-how earned in Thailand to accelerate the establishment of a solid business foundation
India	Expand sales of MARUCHAN AJINOMOTO INDIA PRIVATE LIMITED’S A&M Twisty Noodles

Expand Business Portfolio with New Business Pillars

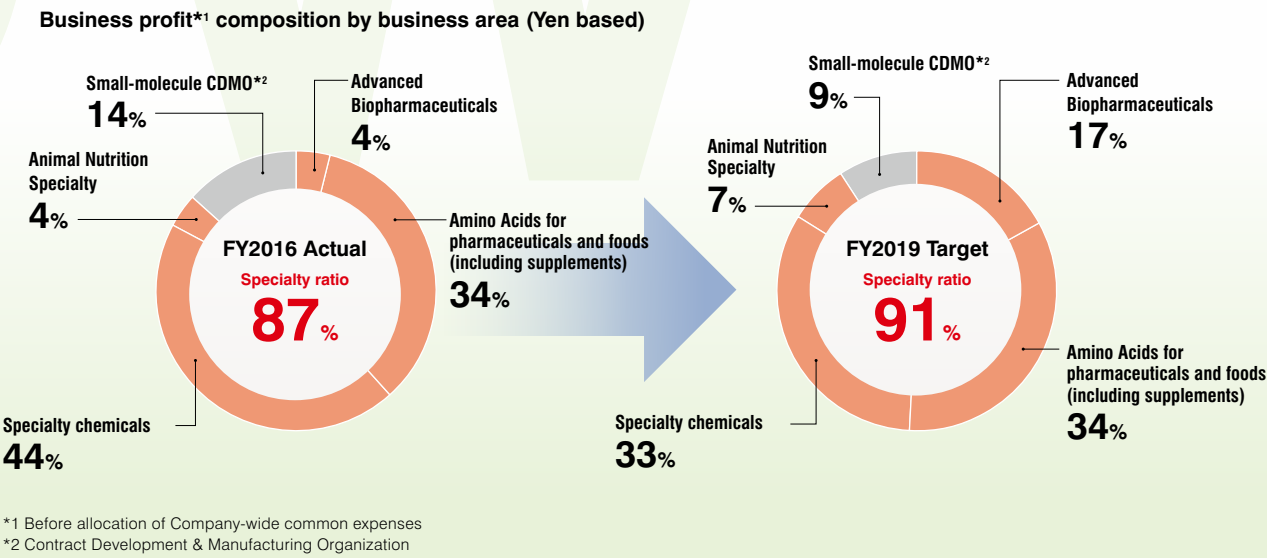

Under the FY17–19 MTP, we will expand our business portfolio by developing the seeds of new businesses, which we have long cultivated, into full-scale business pillars. To this end, we will promote the global expansion of integrated food solutions under a new food business model. Also, for AminoScience, we will promote a shift to a stronger business structure comprising specialty businesses such as advanced biopharmaceuticals. In doing so, we will reinforce a business portfolio that allows for more stable growth.

Launch the Integrated Food Solutions Business

Accelerate Growth of the Advanced Biopharmaceuticals Business

Strengthen structure of business portfolio, supported by multiple specialty businesses

Business Category	Initiative	FY2017	FY2018	FY2019
Large-molecule biologics <small>(antibodies, recombinant proteins,*³ ADC)</small>	Fill & Finish business	Steady growth (earnings foundation)		
	ADC business	Early investment		Make contribution to profits
Medium-molecule biologics <small>(morpholino*⁴/oligonucleotides*⁵)</small>	Enhance pipeline	Make GeneDesign, Inc. a consolidated subsidiary		
	Establish production framework toward becoming No. 2 globally	Establish production framework		
Cell culture medium/ingredients	Global rollout	Roll out to Europe in addition to the U.S. and Korea	Accelerate overseas rollout (make contribution to profits)	
	Cell culture medium for regenerative medicine	Expand varieties for growth and differentiation		
	Cell culture ingredients (scaffold proteins, growth factors, etc.)	Continue R&D Launch new products in stages from FY2017		

R&D leadership that supports new businesses

Highly bioactive ingredients* ⁶	Solubility control technology	Compounding technology	Metabolic analysis technology
Protein expression	Oligochemistry* ⁷	Formulation technology	Nutrition design technology

*³ Proteins in which the sequence of amino acids has been modified *⁴ Type of nucleotide that overcomes issues of nucleotide therapy (e.g., stability and toxicity)
*⁵ Molecule of several to one hundred several tens of the four bases of the nucleic acids *⁶ Ingredients that are highly effective in small doses
*⁷ Mass production technology of peptides and nucleic acids

* Seasonings for snacks, soups, frozen foods, pouched retort foods, etc.

Reinforcement of Management Foundation (Management Innovation) //

To establish a management foundation befitting of a “Genuine Global Specialty Company,” the Ajinomoto Group will drive business growth through improvements in quality and efficiency. With the aim of strengthening our Global Corporate, enhancing our expertise, and making our Group-wide support functions more efficient, we will carry out organizational restructuring, secure a solid base of diverse talent, and establish better work styles.

Organization

The Ajinomoto Group carried out organizational restructuring in April 2017 in order to advance the “Governing HQ” and the “Delegated Front” established under the Global Governance Policy, which was introduced in April 2016; sharpen strategic corporate organizations that oversee global strategies; and optimize Group-wide support functions. Going forward, the Group will continue to examine the most appropriate organizational structure for further enhancing its expertise and efficiency.

Talent

The Ajinomoto Group will further advance the formation of a solid base of diverse talent while working to bring about innovation grounded in customer adaptability.

Details on Non-Financial Targets (Group-wide Targets): Governance

Organization		Ratio of net sales to Group shared expenses (steady-state basis)			
		FY2016 Actual 3.2%			FY2020 Target 2.5%
Talent	Diversity	Ratio of female managers		Ratio of locally hired overseas executives	
		FY2016 Actual 16%	 FY2020 Target 20%	FY2016 Actual 43%	 FY2020 Target 50%
Work styles	Employee engagement	Percentage of employees with high engagement* ^{1, 2} 80%			
	Work style innovation (Japan)	Average annual working hours (Japan) FY2016 Actual (Ajinomoto Co., Inc.) 1,890 hours  FY2018 Target (Ajinomoto Co., Inc.) 1,800 hours  FY2020 – Expand Group companies 1,800 hours (Two years ahead of schedule)			
	Employee health and well-being	Percentage of employees who feel that they are in good mental and physical health* ² Targets and action plans will be determined based on the results of the upcoming survey.			

*1 Percentage of employees who feel that their respective company is creating value toward solving social issues, and who feel that they are contributing to that value creation
*2 To be assessed by the Ajinomoto Global Engagement Survey, starting in fiscal 2017. All full-time employees will be surveyed, including those at Group companies in Japan and overseas.

Corporate Governance Basic Philosophy

Basic Philosophy concerning Corporate Governance

Ajinomoto Co., Inc. recognizes that corporate governance represents one of the most important aspects of its management foundation for accelerating its ASV efforts and achieving its vision of becoming a "Genuine Global Specialty Company." To this end, the entire Ajinomoto Group works as one under the Ajinomoto Group Principles to reinforce and enhance corporate governance through engagement and collaboration with stakeholders and through continual efforts in developing and properly implementing its internal control system.

Corporate Governance Policies
https://www.ajinomoto.com/en/ir/strategy/corp_gov.html

Initiatives to Reinforce Governance

- 2003**
 - Introduction of executive officer system
 - Decrease in the number of directors (from 30 to 12)
 - Appointment of an outside director (one director out of 12 directors)
- 2004**
 - Appointment of outside corporate auditors (three)
- 2005**
 - Establishment of Nominating Advisory Committee
 - Establishment of Compensation Advisory Committee
- 2009**
 - Increase in the number of outside directors (two out of 15 directors)
- 2011**
 - Appointment of female outside director (one out of 15 directors)
- 2015**
 - Increase in the number of outside directors (three out of 14 directors)
- 2016**
 - Introduction of evaluation of the Board of Directors' effectiveness
 - Introduction of the Global Governance Policy
- 2017**
 - Decrease in the number of inside directors (from 10 to 6)
 - Establishment of Corporate Governance Committee
 - Introduction of a medium-term company performance-linked stock compensation system

Overview of the Corporate Governance Structure

Main Items	Current Status
Type of system	Company with Audit & Supervisory Board
Number of directors (including outside directors)	9 (3)
Number of Audit & Supervisory Board members (including Audit & Supervisory Board members [external])	5 (3)
Number of Board of Directors' meetings held (FY2016) (Average attendance rate of outside directors) (Average attendance rate of Audit & Supervisory Board members [external])	18 (92%) (100%)
Number of Audit & Supervisory Board meetings held (FY2016) (Average attendance rate of Audit & Supervisory Board members [external])	15 (100%)
Directors' term of office	2 years
Adoption of corporate executive officer system	Yes
Voluntary committees of the Board of Directors	Nominating Advisory Committee, Compensation Advisory Committee, Corporate Governance Committee
Compensation systems for officers, etc.	(1) Monthly compensation, (2) Short-term company performance-linked compensation, (3) Medium-term company performance-linked stock compensation (see p. 55)
Accounting auditor	Ernst & Young ShinNihon LLC

By continuing efforts to strengthen governance and realizing value creation unique to the Ajinomoto Group, we will achieve sustainable growth as a truly global company.

Masatoshi Ito

Representative Director,
Chairman of the Board

Initiatives to Strengthen Governance under the FY2014–2016 Medium-Term Management Plan

Under the FY2014–2016 Medium-Term Management Plan, we undertook initiatives to strengthen our corporate governance as a foundation for becoming a “Genuine Global Specialty Company.”

To enhance the effectiveness of the Board of Directors, we increased the total number of outside directors to three in 2015. Furthermore, in 2016 we carried out a survey to evaluate the effectiveness of the Board of Directors, which was the first of its kind for the Ajinomoto Group. As a result of this survey, we were able to clarify a certain number of issues, including insufficient discussion on the Company’s medium- to long-term direction, inadequate emphasis put on such discussions, and a lack of opportunities for outside directors to collect internal information. In light of these issues, when formulating the FY2017–2019 (for FY2020) Medium-Term Management Plan, we incorporated opportunities for discussion between a small group of outside and inside directors into the plan-creation process and exchanged opinions regarding the plan’s direction and approach. In doing so, we were able to establish an even more robust plan.

In April 2016, we introduced the Global Governance Policy (GGP), which clarifies the roles and responsibilities of a “Governing HQ” (i.e., our headquarters) and a “Delegated Front” (i.e., the worksite level). The GGP has been effective in enhancing the mobility and efficiency of the “Delegated Front” and improving our decision-making speed. As such, we believe the introduction of the GGP is an example of successful efforts in strengthening governance. Going forward, we will establish a well-balanced structure for governance by creating an environment in which the “Delegated Front” can execute its duties more easily while the “Governing HQ” demonstrates solid leadership.

Aiming to Become a “Genuine Global Specialty Company”

We recognize that the continuous enhancement of Board of Director efficiency is the most important theme for becoming a “Genuine Global Specialty Company.” Accordingly, we reduced the number of inside directors on the Board from ten to six and raised the ratio of outside directors on the Board to one-third. In doing so, we have set up a structure that enables more open discussion and allows us to more easily reflect the opinions of the outside directors, who act as stakeholder representatives. As the

most appropriate structure for the Board of Directors changes with the passage of time, we will continue to examine what kind of structure best suits the Company going forward. Furthermore, to make the Board of Directors even more effective and efficient, we will endeavor to strengthen communication in such ways as creating opportunities for the free exchange of opinions other than at Board meetings and having outside directors attend important internal meetings. I believe that if the outside directors have a better understanding of the executive officers, this knowledge will have a positive effect on the decisions made by the Nominating Advisory Committee as well. In addition to these efforts to further enhance our governance, we have implemented measures such as the enactment of Rules on Board of Directors’ Meetings, the enactment of deliberation guidelines, and the establishment of the Corporate Governance Committee, which will carry out deliberation of basic policies of corporate governance and other important matters related to governance structures and their operation.

To become a truly global company, we not only need to possess specialties that are unlike any other company, we also need to make sure that the global society recognizes these specialties. Although the Ajinomoto Group comprises mainly food companies, we are expanding our business across a wide range

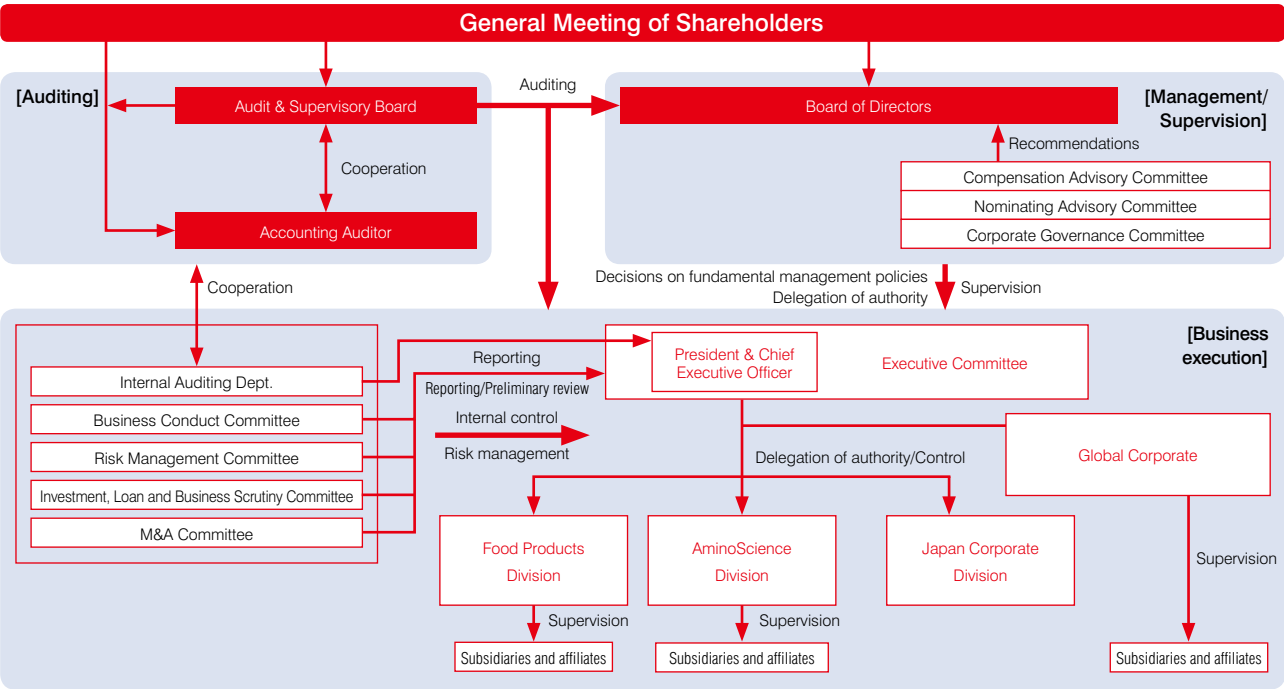

of fields through the pursuit of deliciousness that is underpinned by technologies and science, as well as through the application of such technologies in fields other than food, with a particular focus on amino acids. We also aim to realize sustainable growth by resolving social issues through our business. Guided by this aim, we will become a corporate group that makes concerted efforts to resolve social issues, establishing integrated targets that combine both financial and non-financial perspectives. To continue to create value unique to the Ajinomoto Group, we will maintain our focus on strengthening corporate governance.

Going forward, I would like to ask our shareholders and other investors for their continued support as we pursue these endeavors.

July 2017

Masatoshi Ito
Representative Director,
Chairman of the Board

Corporate Governance Framework

Audit & Supervisory Board

The Audit & Supervisory Board members work together with the accounting auditor and Internal Auditing Department to conduct audits on the execution of duties by directors.

Nominating Advisory Committee

The Nominating Advisory Committee consists of four directors, including three outside directors. The Committee receives inquiries from the Board of Directors and deliberates on such matters as director nominees and proposals for the election of directors with titles and representative directors. The results of these deliberations are reported to the Board of Directors.

Board of Directors

The Board of Directors makes decisions on important business matters and supervises the execution of duties by directors and corporate executive officers.

Compensation Advisory Committee

The Compensation Advisory Committee consists of four directors, including three outside directors, and one corporate vice president. The Committee receives inquiries from the Board of Directors and deliberates on proposals for director and corporate executive officer, etc. compensation. The results of these deliberations are reported to the Board of Directors.

Executive Committee

The Executive Committee deliberates on basic company management policies and makes important decisions concerning business execution.

Corporate Governance Committee

The Corporate Governance Committee consists of five directors, including three outside directors, and one Audit & Supervisory Board member (external). The Committee receives inquiries from the Board of Directors and holds discussions on matters related to governance. The results of these discussions are reported to the Board of Directors.

Outside Directors and Audit & Supervisory Board Members (External)

Ajinomoto Co., Inc.'s outside directors and Audit & Supervisory Board members (external) have been registered as independent directors/auditors with the Tokyo Stock Exchange.

The standards of independence used by Ajinomoto Co., Inc. for outside officers (listed in the Corporate Governance Policies)
https://www.ajinomoto.com/en/ir/strategy/corp_gov.html

	Name	Reasons for Appointment	Attendance	
			Board of Directors	Audit & Supervisory Board
Outside Directors	Sakie T. Fukushima	To capitalize on her in-depth knowledge and experience concerning international corporate management and advanced understanding of human resources with a global mindset, and her experience as an outside director at other prominent listed companies	17 out of 18 times (94%)	—
	Yasuo Saito	To capitalize on his in-depth knowledge and experience internationally as a diplomat for the management of Ajinomoto Co., Inc.	18 out of 18 times (100%)	—
	Takashi Nawa	To capitalize on his advanced understanding of international business management developed from his wealth of real-world experience in consulting for non-Japanese companies, etc., and in-depth knowledge as a professor with the Graduate School of International Corporate Strategy at Hitotsubashi University	15 out of 18 times (83%)	—
Audit & Supervisory Board members (external)	Masami Hashimoto	To capitalize on his professional knowledge and wealth of experience as a certified public accountant both in Japan and internationally, and his expertise in finance and accounting in the execution of his duties	13 out of 13 times (100%)	10 out of 10 times (100%)
	Atsushi Toki	To capitalize on his professional knowledge and wealth of experience as an attorney, and his particularly in-depth knowledge of the Companies Act, which can be utilized in the execution of his duties	13 out of 13 times (100%)	10 out of 10 times (100%)
	Hiroshi Murakami	To capitalize on his extensive experience in corporate management both in Japan and internationally, and his knowledge as the head of a legal department, both of which can be utilized in the execution of his duties	13 out of 13 times (100%)	10 out of 10 times (100%)

Evaluation of Board of Directors' Effectiveness

The Company aims to have a Board of Directors that can execute appropriate and agile decision making as well as carry out its role of supervising the execution of duties in a way that befits a "Genuine Global Specialty Company." Since fiscal 2015, directors and audit & supervisory board members have been asked to take self-evaluation surveys, while analysis by outside lawyers is also conducted, with the results being examined at a Board of Directors' meeting. In the self-evaluation survey carried out in fiscal 2016, the Board of Directors' effectiveness was evaluated highly overall, and substantial improvement was seen in the following three items.

1. Discussion of the direction of corporate strategy and medium- to long-term policies increased
2. The effectiveness of discussions improved
3. Opportunities for outside directors to obtain Company information increased

On the other hand, the following items were recognized as improvements to be made, and the Company will continue to examine the most appropriate model for the Board of Directors going forward.

1. Sufficient provision of information on deliberations by the advisory committees to the Board of Directors
2. Increase in the number of remarks by directors
3. Further review of matters to be resolved and matters reported
4. Follow-up and feedback on past matters resolved by the Board of Directors
5. Earlier distribution of materials
6. Improvement of the content of materials

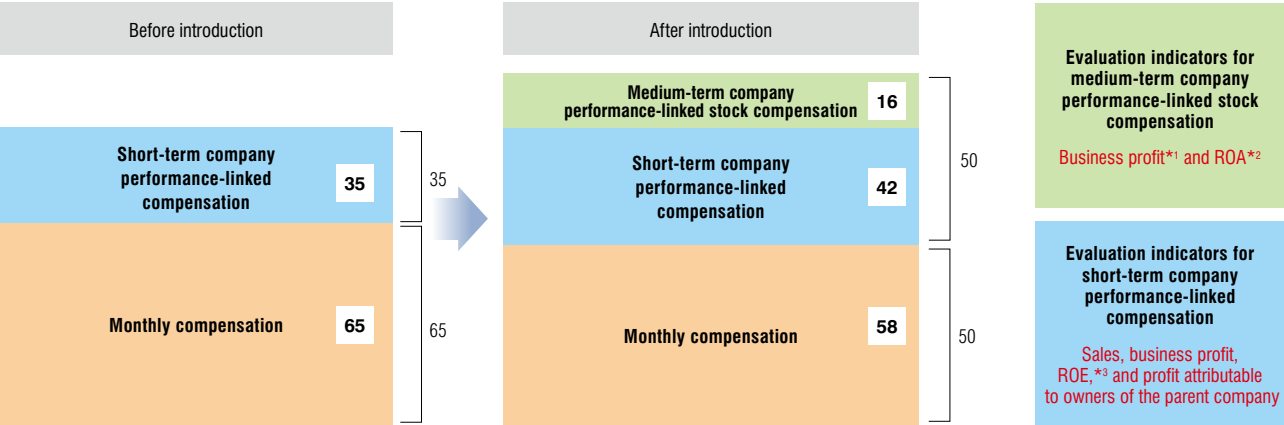

Overview of Evaluation of Effectiveness of the Board of Directors of Ajinomoto Co., Inc.
https://www.ajinomoto.com/en/ir/strategy/corp_gov/main/00/teaserItems1/0/linkList/01/link/2016_evaluation_E.pdf

Compensation Systems for Officers, etc.

For the purpose of boosting officer motivation to contribute toward the fulfillment of the FY2017-2019 (for FY2020) Medium-Term Management Plan (hereinafter, FY17-19 MTP) as well as the improvement of the Ajinomoto Group's medium- to long-term business performance and enhancement of its corporate value, the Company introduced a medium-term company performance-linked stock compensation system targeted at directors (excluding outside directors), corporate executive officers, and corporate fellows (excluding nonresidents of Japan) (hereinafter, the officers, etc.). Going forward, compensation of officers, etc. will comprise (1) monthly compensation, (2) short-term company performance-linked compensation, and (3) medium-term company performance-linked stock compensation. In addition, the annual ratio of company performance-linked compensation, including short-term and medium-term, to overall compensation has been increased from approximately 35% in fiscal 2016 to approximately 50%.

Ratio of Company Performance-Linked Compensation to Monthly Compensation When Performance Targets Are Reached (Annualized)

*1 An original profit KPI adopted by the Group following the voluntary application of International Financial Reporting Standards (IFRS) for management purposes. The KPI is defined as follows: Sales – Cost of sales – Selling expenses, Research & development expenses, and General & administrative expenses, and Share of profit of associates and joint ventures
*2 Business profit basis *3 Profit attributable to owners of the parent company basis

Also, for the medium-term company performance-linked stock compensation, the Company has created a stock-granting trust (hereinafter, the Trust) with a trust period of roughly three years. The maximum amount the Company can contribute to the Trust is set at ¥2.2 billion. The Trust will use the contributed money to acquire a maximum of 1.1 million Company shares. Upon completion of the FY17–19 MTP, Company shares acquired by the Trust and the amount of cash equivalent to the conversion value of Company shares will be delivered to the officers, etc. in accordance with the amount of business profit in the FY17-19 MTP's final year and their respective job positions.

Global Policy Matrix

To enhance its global governance, the Ajinomoto Group has established the Global Policy Matrix, thereby putting into place important policies and procedures. In July 2017, the Group newly formulated the Nutrition Policy, the Food Safety Policy, and the Package Description Policy.

Business Code of Conduct	Legal	Fiscal, Trade & Purchasing	General & Administration	Accounting & Treasury	Others
Compliance with Antitrust and Other Laws Bribery Prevention Policy	Prevention of Insider Trading	Global Tax Policy Basic Purchasing Policy	Risk Management Basic Policy Business Continuity	Accounting Policy Financing Policy Foreign Exchange Risk Management Policy Basic Policy on Fund Procurement	Nutrition Policy See P20
	Trade Secret Management				Food Safety Policy See below
	Group Intellectual Property Exploitation Policy				Package Description Policy See below
	Corporate Brand Logotype				Security Policy Environmental Policy Quality Policy Occupational Safety and Health Policy Internal Audit Investment Profitability Assessment Criteria

Food Safety Policy

Since the Ajinomoto Group's establishment, while putting our customer first, we have continued our efforts for food safety.

In so doing, we have earned recognition as a conscientious enterprise carrying out thorough initiatives for food safety by our customers, and "Ajinomoto Brand" has gained the faith for safety of the products.

We will continue with our efforts in contributing to the better lives of our customers all over the world.

- 1

We pay full attention to the requests of our customers, and provide safe products and services meeting with their satisfaction.
- 2

We actively provide appropriate information on food safety to our customers and continue to improve our trustworthiness.
- 3

We make no compromise with regard to safety, conducting surveys and research as thoroughly as possible and faithfully complying with applicable laws and regulations.
- 4

We assure food safety through the Ajinomoto System of Quality Assurance (ASQUA), based on the concepts outlined in the international ISO standard.
- 5

Under the leadership of our management, each one of our company's employees makes the greatest effort to provide safe products and services through work at all levels, from research and development to production, distribution, sales and services.

Package Description Policy

The Ajinomoto Group is committed to deliver accurate and responsible information on descriptions in the product package, in order to contribute to the world's food and wellness, and to better lives for the future.

This policy is applied to all product package descriptions which directly and indirectly states, suggests or implies that a product produced and sold by the Ajinomoto Group or sold under the brand names of the Ajinomoto Group has particular characteristics.

To fulfill the above commitment, the Ajinomoto Group ensures that:

- 1

Package descriptions comply with applicable laws and regulations in the countries where the Ajinomoto Group makes the product available for sale.
- 2

Information on the product package is accurate.
- 3

Package descriptions are not misleading, are easily understood, and gives valuable information to consumers.
- 4

We are responsible for package descriptions, and that package descriptions have a sound basis.

Message from an Outside Director

Drawing on my experience as a diplomat, I will contribute to realizing the Ajinomoto Group's aim of becoming a "global top 10 class food company."

Yasuo Saito
Outside Director

Further Enhancing the Effectiveness of the Board of Directors

I have accumulated a wealth of international experience working as a diplomat for over 40 years. As a member of the Board of Directors, I recognize that the Company expects me to voice opinions and make judgments based on my knowledge and experience. The Company's Board of Directors has an atmosphere that makes it easy to hold discussions thanks to the consideration given by Chairman Ito. Additionally, the Company makes sure to provide the outside directors with explanations on agenda items in advance, which allows us to actively participate in Board meetings. While I do not have experience in corporate management, I provide proposals and opinions from a global perspective based on my experience as a diplomat. In doing so, I am making concerted efforts to oversee the management of the Ajinomoto Group amid its aim to become a global top 10 class food company. Also, significant progress has been made over the past few years in such areas as in-house information gathering by the outside directors. With that said, to further enhance the understanding and decision-making capabilities of the outside directors going forward, I would like to promote initiatives to strengthen the pipeline, such as creating opportunities to candidly exchange opinions with various divisions on a regular basis.

Aiming for an Environment in Which a Diverse Group of Talent Can Play an Active Role

Based on its Global Governance Policy, the Ajinomoto Group has clearly defined the roles of the "Governing HQ" (its headquarters) and the "Delegated Front" (the worksite level), and I believe that the Group's governance is excellent in that regard. However, the issue of cultivating a global, diverse group

of talent to allow the "Governing HQ" to be active on a global scale still remains. While the Company is working to establish an environment in which a diverse group of talent can play an active role globally, there is still a need to secure that kind of talent through such an environment and enhance communication capabilities that transcend age, race, and gender. Communication is a basic part of one's profession, and the importance of communication will not change no matter how far technological innovations progress. I am convinced that it is difficult for a company to grow if it is not leveraging its communication functions effectively.

Promoting ASV by Appropriately Responding to Risks

To realize the goals adopted under the FY2017-2019 Medium-Term Management Plan, it is essential to ascertain where risks lie and to appropriately respond to them should they occur. Through food and health, the Ajinomoto Group is a company that is concerned with the lives of people and the existence of humankind itself. As such a company, we naturally take close precautions even within the minutiae of our day-to-day activities. However, amid international demands for sustainability showcased by the Sustainable Development Goals (SDGs) and other initiatives as well as heightened social expectations for the resolution of nutrition-related issues, the Company will actively take risks while promoting ASV going forward. As such, I believe that the mission of the outside directors is to gather as much relevant information as we can on a routine basis and use such information to minimize risks to the greatest extent possible.

Performance Data
Fiscal 2016 Consolidated Operating Highlights

Sales

¥1,091.1 billion

Business Profit*

¥96.8 billion

* An original profit KPI adopted by the Group following the voluntary application of International Financial Reporting Standards (IFRS) for management purposes. The KPI is defined as follows: Sales – Cost of sales – Selling expenses, Research & development expenses, and General & administrative expenses + Share of profit of associates and joint ventures

Japan Food Products

Sales
¥390.4 billion
(98.3% vs. FY2015)

Business profit
¥40.8 billion
(128.9% vs. FY2015)

- Business Strengths
- Brand power backed by over 100 years of history
 - Product development and marketing capabilities

Performance Overview for Fiscal 2016

Seasonings and processed foods
In home-use products, the Company was able to raise overall demand for *Knorr® Cup Soup* by increasing opportunities for sales promotions and carrying out new forms of advertising that leveraged the Internet and social media. In addition, sales of *Cook Do® Kokumi Paste* gradually increased through successful digital initiatives.
Sales of restaurant and industrial-use products declined overall, despite a year-on-year increase in sales of savory seasonings.

Frozen foods
Sales of home-use frozen foods increased year on year, driven by growth in sales of mainstay products such as *Gyoza*, which were boosted by strengthened sales campaigns, *THE★CHA-HAN* (fried rice), and *Yawaraka Wakadori Kara-Age* (fried chicken). The launch of the new product *THE★SHUMAI* (dumpling) also contributed to increased sales.
Sales of restaurant and industrial-use products increased year on year, thanks to strong sales of processed chicken and dessert product offerings as well as sales efforts carried out in collaboration with major customers.

Coffee products
In home-use coffee products, sales increased for stick products thanks to such efforts as sales promotions carried out in conjunction with television commercials for *Blendy®*, which encouraged the consumption of these products with breakfast. Sales of instant coffee products were on a par with last year's levels.
Sales of restaurant and industrial-use coffee products declined, owing to lower sales to major customers.
We also communicated information on the culture of coffee in Japan at the G7 2016 ISE-SHIMA Summit, with a particular focus on the “*Sen*” coffee brand.

International Food Products

Sales
¥428.9 billion
(92.5% vs. FY2015)

Business profit
¥41.7 billion
(88.2% vs. FY2015)

- Business Strengths
- Well-established global systems for development, production, and sales
 - Product development and marketing capabilities
 - Overseas business infrastructure

Performance Overview for Fiscal 2016

Seasonings and processed foods
Sales in the overseas seasonings and processed food products business grew steadily on a local-currency basis, allowing the business to realize overall increases in both sales and profits.
By product category, sales of the umami seasoning *AJI-NO-MOTO®* rose steadily in Southeast Asia, in addition to *RosDee®* flavor seasonings in Thailand, *Masako®* flavor seasonings in Indonesia, and the flavor seasoning *Sazón®* in Brazil. Furthermore, sales of menu-specific seasonings increased substantially.
By region, we realized double-digit sales in Indonesia and Brazil, which helped to drive overall growth in the International Food Products segment.

Frozen foods
The overseas frozen foods business recorded a solid performance, centered on Ajinomoto Windsor, Inc., thereby achieving increases in both sales and profits on a local-currency basis. In addition, we commenced full-scale operations of Ajinomoto Toyo Frozen Noodles Inc. in North America.

Umami seasonings for processed food manufacturers and sweeteners
Sales of MSG to food processing manufacturers declined year on year, as higher average sales prices in Japan were offset by lower domestic and overseas sales volumes and the negative impact of foreign exchange rates on overseas sales expressed in yen.
Sales of nucleotides were around the same level as a year earlier, as strong increases in sales volumes in Japan and overseas were offset by unfavorable foreign exchange rates.
Sales of sweeteners fell year on year, adversely affected by lower sales volumes of aspartame for the processing industry and the negative impact of foreign exchange rates. Sales of aspartame for consumers increased year on year.

Life Support

Sales
¥124.0 billion
(87.1% vs. FY2015)

Business profit
¥5.8 billion
(48.7% vs. FY2015)

- Business Strengths
- World-class fermentation technologies
 - World's largest global network for animal nutrition
 - Extremely safe material development capabilities and compound evaluation technologies

Performance Overview for Fiscal 2016

Animal nutrition
Profits from sales of commodity products fell sharply due in part to lower sales volumes and sales prices. Meanwhile, sales of specialty products increased. By leveraging the Ajinomoto Group's expertise and technological capabilities related to amino acids, we will promote the shift to specialties through efforts to develop and launch new products that contribute to the resolution of issues facing customers in each region of operations.

Specialty chemicals
Sales in the personal care ingredients business were on a par with the previous fiscal year's level, supported by the growing use of naturally derived materials and the strong performance of the OEM business. In addition, sales increased in the electronic materials business—a business that deals with such products as build-up film for providing electrical insulation of complex circuit substrates for high-performance central processing units (CPUs)—thanks to the shift toward developing products in other fields such as servers and smartphones, which support the evolution of the IoT society and make people's lives more convenient. This shift helped offset the persistent stagnant conditions in the computer market. Also, centered on our North American data center, which recently commenced full-scale operations, we are gathering information on the creation of further value through specialty chemicals.

Healthcare

Sales
¥89.5 billion
(97.8% vs. FY2015)

Business profit
¥8.1 billion
(114.6% vs. FY2015)

- Business Strengths
- Stable supply capacity as the world's largest manufacturer of amino acids
 - Abundant amount of expertise and technology related to the manufacture and function of world-class bio-materials, including amino acids, nucleic acids, peptides, oligonucleotides, and proteins
 - Administrative networks that cover medical and food products around the world

Performance Overview for Fiscal 2016

Amino acids
Sales of amino acids for pharmaceuticals and foods declined year on year in both Japan and overseas. Revenues from the pharmaceutical custom manufacturing service also declined as foreign exchange rates negatively affected sales in Europe.
We are working to resolve social issues, including the most prominent social issue—the aging society. With a foundation of long-cultivated expertise related to the various functions of amino acids, we are contributing to the healthy lifestyles of people through the continued provision of a wide variety of products.
Going forward, we will make significant contributions to medical treatment for patients while leveraging our leading-edge bioscience and fine chemical technologies to provide materials for next-generation biopharmaceuticals, oligonucleotides, and regenerative medicine.

Others
Sales of supplements grew significantly as a result of launching *Amino Aile®* as a “Food with Functional Claims” in April 2016, which was preceded by the launch of *Glyna®* in August 2015, as well as proactive marketing activities.
In addition, in January 2017 the Company launched *Mai Asa Histidine*, a “Food with Functional Claims” that leverages the fatigue-reducing effects of the essential amino acid histidine to support mental clarity. These fatigue-reducing effects were verified through the Company's original research.

*1 For the coffee and edible oils business and some other businesses, the gross figures for sales and cost of goods sales were recorded in the accounts, but from fiscal 2013 this method changed to netting off sales and cost of goods sold and recording the net figure in the accounts. Post-reclassification basis from the year ended March 31, 2011. The following changes in accounting policies were conducted in fiscal 2014. Sales promotion discounts paid to customers to expand sales were deducted from net sales. Figures for fiscal 2011 and subsequent fiscal years have been restated.

*2 Debt = Net debt-equity ratio = Interest-bearing debt/Shareholders' equity (Net debt = Interest-bearing debt - Cash on hand and in banks x 75%)

*3 ROA = Net income (or loss)/Average total assets

*4 ROE = Net income (or loss)/Average total shareholders' equity

*1 Business profit = Sales – Cost of sales – Selling expenses, Research & development expenses, and General & administrative expenses + Share of profit of associates and joint ventures

*2 Net debt-equity attributable to owners of the parent company ratio (%) = Interest-bearing debt/Equity attributable to owners of the parent company (Net debt = Interest-bearing debt - Cash on hand and in banks × 75%)

*3 ROA = Business profit/Total assets

*4 ROE = Profit attributable to owners of the parent company/Average equity attributable to owners of the parent company

Performance Data

30 Priority ESG Items

ESG items*		Commitment	
Social S	Social capital	Human rights and community relations	We join the international community in respecting human rights, fulfill our international human rights obligations and comply with related laws in the countries where we operate our business. During FY2017, we will formulate and disclose our Human Rights Policy.
		Product access and affordability	We provide opportunities for people to enjoy food with high nutritional value through products with affordable prices and in appropriate styles to meet customer needs in each country. During FY2017, we will formulate and disclose our Product Accessibility Policy.
		Customer welfare (health and nutrition, etc.)	We contribute to both emotional and physical nourishment by not only optimizing quality and quantity of nutrients, but also by providing consumers with more delicious, various, fun, and smarter experiences to eat and cook (Nutrition Policy: refer to page 20).
		Data security and customer privacy	We work to prevent leaks and inappropriate use of confidential information, handle private information in a highly appropriate manner, and realize the effective utilization of information (Security Policy: https://www.ajinomoto.com/en/activity/policy).
		Fair disclosure and labeling	We deliver accurate and responsible information on descriptions in the product package (Package Description Policy: refer to page 56).
		Fair marketing and advertising	We provide appropriate information regarding our products and services when communicating with customers. We also work rigorously to uphold this responsibility in marketing to children. During FY2017, we will formulate and disclose our Marketing Policy.
	Human capital	Labor relations	We respect the basic rights of our employees regarding the freedom of association and collective bargaining (Ajinomoto Group Principles: https://www.ajinomoto.com/en/aboutus/vision/group/). We continuously hold appropriate and sound labor-related discussions with labor unions or worker representatives at each Group company in Japan.
		Fair labor practices	We will create an environment and establish human resource systems and development programs (talent management, position management systems, the Ajinomoto Group Academy, etc.) in FY2018 in which a diverse group of talent can play an even more active role. During FY2017, we will formulate and disclose our Human Resource Policy.
		Employee health, safety, and well-being	We will establish the Health Management Declaration in FY2018, which creates the position of Chief Health Officer in six areas of the world in which we operate and calls for initiatives to be undertaken toward improving the health of employees as a management strategy. We will commence health management based on global guidelines formulated in accordance with the global health indicators determined by the World Health Organization by FY2020.
		Diversity and inclusion	We aim to establish a vibrant work place in which employees respect each other's humanity without discrimination or harassment through open communication. (FY2020) Ratio of female managers: 20%; Ratio of locally hired overseas executives: 50%
		Compensation and benefits	We work to improve our standards for working conditions on a global level, including compensation, amid our corporate development. As for welfare programs, we are enhancing programs that respond to the issue of the declining birthrate and aging population and are promoting the further standardization of Company-owned housing, allowances, and other programs within the Group companies in Japan.
		Recruitment, development, and retention	We work to secure and develop high potential talent through work style innovation that meets global standards and improved employee engagement through ASV. (FY2020) Percentage of employees with high engagement: 80%; Average annual working hours (Japan): 1,800 hours
	Business model and innovation	Lifecycle impacts of products and services	We constantly aim to put the customer first and, through advanced technology and creativity, develop and provide highly safe, high-quality products and services (Quality Policy: https://www.ajinomoto.com/en/activity/policy ; Food Safety Policy: refer to page 56).
		Environment, social impacts on assets, and operations	We reflect global climate change as a Group-wide risk and are responding to this issue on a Group-wide level (refer to page 27). Also, we are working to strengthen mutual understanding with each stakeholder through active dialogue and are establishing various means for stakeholder engagement (refer to page 25).
		Product packaging	We minimize the use of packaging and container materials and implement the reduction of our environmental burden (using recycled materials and biomass plastics, etc.) without damaging the quality (Environmental Policy: https://www.ajinomoto.com/en/activity/policy).
		Product quality and safety	We constantly aim to put the customer first and, through advanced technology and creativity, develop and provide highly safe, high-quality products and services (Quality Policy: https://www.ajinomoto.com/en/activity/policy ; Food Safety Policy: refer to page 56).
