LETTER TO OUR STAKEHOLDERS

We are pleased to confirm that MONDIALE Niugini reaffirms its support of the Ten Principles of the United Nation Global Compact in the areas of Human Rights, Labour, Environment and Anti-Corruption.

In this annual Communication on Progress, we describe our actions to continually improve the integration of the Global Compact and its principles into our business strategy, culture and daily operations. We also commit to sharing this information with our stakeholders using our primary channels of communication.

MONDIALE Niugini embraces the 17 UN Sustainable Development Goals as an inspiring platform to continue our work to create better living environments for all and to be a responsible business in every aspect.

We have initiated a journey where we will continually improve our performance through our target settings and concrete actions.

- Recycle papers, glasses, plastics and cans
- Provide project specific Environmental Management Plans for our site activities.
- Conduct environmental awareness training and waste sorting training through out waste sorting program.

UNITED NATION GLOBAL COMPACT ENVIRONMENT PRINCIPLES

MEASUREMENT OF OUTCOME

WASTE MINIMIZATION

Reducing waste in the workplace through recycling effort has a positive impact on the environment. MONDIALE encourage staffs in the office to separate the waste into five different elements, which are general waste, paper, metal, plastic and glass. The volume of wastes produced will be measured and recorded for analysis.

The same practice has been adapted on site, where MONDIALE reducing the quantity of material sent to landfill during the construction process through effective waste management. Each waste being categories and labeled accordingly before been measured and record for analysis purposes.

The pie chart showed the percentage of recycled waste in office and construction site. Percentage in the office is slightly higher since most of waste at the office is easier to sort and construction waste is more difficult to recycle due to high level of contamination.

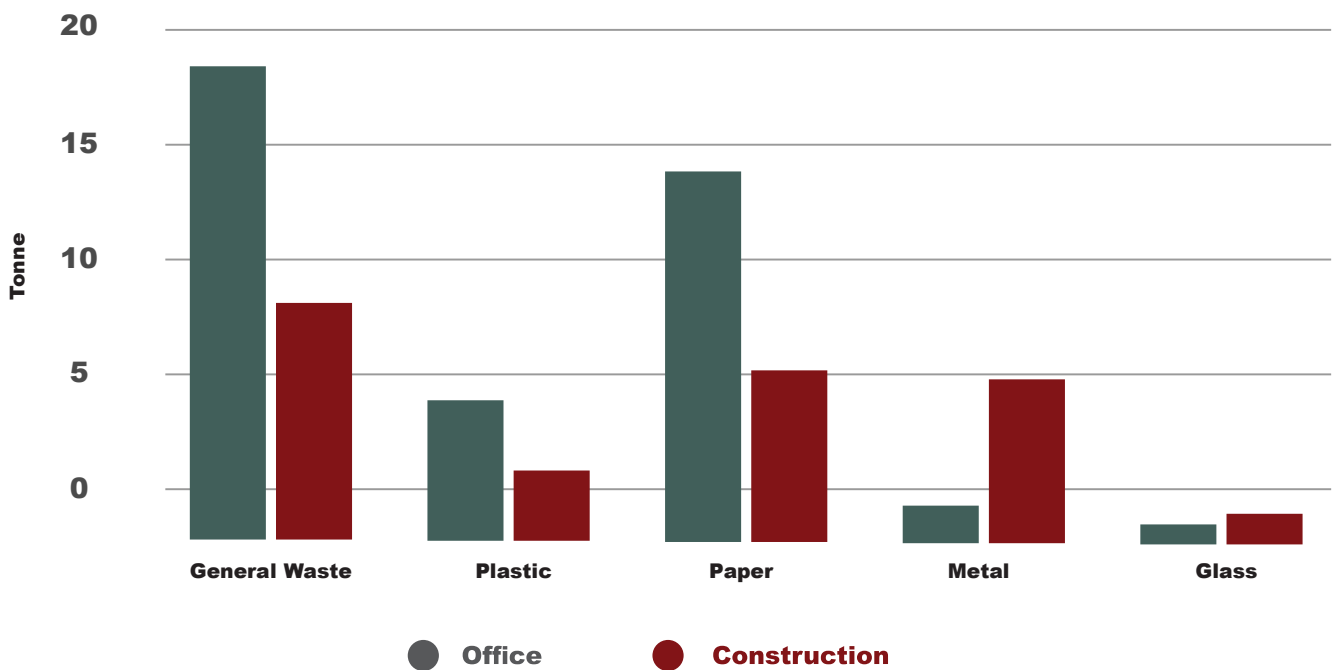

UNITED NATION GLOBAL COMPACT ENVIRONMENT PRINCIPLES

MEASUREMENT OF OUTCOME

OUR ENVIRONMENTAL FOOTPRINT

MONDIALE practiced waste sorting at the point source where wastes were identified and characterized before sorting. Wastes were eventually be collected by licensed contractor.

The graph show total wastes' weight produced in the offices and on site for year 2017.

From the figures, the number of recycling rate in the offices are higher compared to the site since waste.
