

KANURI DEVELOPMENT ASSOCIATION

Communication on Engagement (COE)

Maiduguri-Nigeria April 28, 2018

Statement of continued support:

I wish to confirm that Kanuri Development Association –KDA reaffirms its support for the United Nations Global Compact and its ten principles. The protection and advancement of human rights, supporting the precautionary approach to environmental challenges and in the areas of fight against corruption in all its forms are critical in making the world a better place for everybody and remains among the main pillars supporting the mission and objectives of KDA.

The KDA focused on Global Compact Principles 1, 7 and 10 to support the works of the UNGC since joining the UN Global Compact:

The works of the KDA in these regards were mainly through advocacy works enabling raising awareness amongst stakeholders leading to environmental conservation and sustainability, building of global partnership with stakeholders as well as promoting human and indigenous rights issues in addition to reduction in corruption in our environment. The network and the atmosphere created by the UN Global Compact made all these works possible for us in this direction.

However, the currently ongoing social unrest in our Lands/catchment areas is presently affecting our level of ability to be able to deliver effectively our works in this aspect, but we do hope that our works the year 2018 will be better than those of the previous years as the social unrest currently affecting our city of location and our works too is fast diminishing and expected to end soon.

Thanks

B. Abubakar

President
