1 CRITERIA AND SCOPE OF THE REPORT

This Appendix includes supplementary content to the Integrated Corporate Report 2017 CaixaBank. This 7th annual report provides an overall view of the Bank's performance during the year, in accordance with its objectives, management model and strategic lines. Further information may be obtained on the Bank's website www.CaixaBank.com, in the 2017 Socio-economic Impact Report and in the Management Report accompanying the 2017 Consolidated Financial Statements, which are also available on the corporate website.

Criteria and principles used in its preparation

- Global Reporting Initiative (GRI) under the GRI Standards comprehensive option, applying the criteria and principles set out in that guide and especially as regards stakeholder participation, sustainability context, materiality and completeness. The GRI principles recommended were also applied to ensure the quality of the report: balance, comparability, accuracy, timeliness, clarity and reliability.
- Guidelines of the Integrated Reporting Framework of the International Integrated Reporting Council (IIRC), integrating the strategic approach and future direction, connectivity of information, capacity to respond to stakeholders, materiality, conciseness, reliability, comprehensiveness, consistency and comparability.
- Principles established in the Accountability AA1000 – APS 2008 standard on inclusivity, materiality and responsiveness to stakeholders.

Scope and coverage

This report includes CaixaBank and its financial subsidiaries (including BPI), when the information on insurance and support companies is available. The economic and financial information disclosed has been taken from the consolidated financial statements of the CaixaBank Group and subsidiaries*. This scope covers approximately 99.2% of the CaixaBank Group's workforce. The remaining 0.8% mainly correspond to the subsidiaries incorporated into the Group through the merger with Banca Cívica. Only economic and financial information is provided on these companies. Where deemed appropriate, information on other entities in the supply chain was included if available. In the GRI indicators, express indication is given regarding the specific entities to which the information relates.

Definition of content

This report aims to address those aspects influencing CaixaBank's ability to create value in the short, medium and long term, which are also of interest to the bank's stakeholder groups. In order to determine these aspects, a materiality study was performed through a process of consulting CaixaBank's stakeholders in Spain and numerous direct and indirect sources of information were analysed.

* The consolidated financial statements and management report for 2017, together with the auditors' report dated 23 February 2018, which contains an unqualified opinion, may be consulted on the website of the Spanish National Securities Market Commission (www.cnmv.es).

2 ANALYSIS OF RELEVANT CONTENT FOR STAKEHOLDERS

The **materiality study** identifies those aspects that are relevant for CaixaBank and its stakeholders with regard to what the bank must report and being accountable. Those aspects that reflect the bank's economic, environmental and social impact, both on the business and on the assessments and decisions of its stakeholders are considered relevant.

In 2017, CaixaBank consolidated the analysis process, standardising the tools and queries from the previous year. For the first time, it worked on bringing the materiality study in line with corporate values, the Corporate Social Responsibility Master Plan and the Sustainable Development Goals (SDG) to optimise their integration in responsible business management.

To define these material matters in 2017, CaixaBank took into account its own activity and how it contributes to sustainable development, its strategic values and objectives, its stakeholders' interests and expectations, key trends and issues for the banking sector, global challenges (Sustainable Development Goals), criteria of sustainability agents (DJSI, FTSE4Good and MSCI ESG), applicable rules and regulations and the relevance of the identified issues in the media.

Methodology of the materiality study

3 COMMITMENT TO THE SUSTAINABLE DEVELOPMENT GOALS

Sustainable Development Goals (SDG) are 17 global challenges established in the 2030 Agenda for Sustainable Development, adopted in 2015 by the United Nations.

CaixaBank, through its financial activity and social initiatives, plays an active role in fulfilling its SDG and directly or indirectly contributes to fulfilling them. In 2017, the bank prioritised its impact to identify where it could provide the greatest value, taking into account:

- The connection between the SDGs and CaixaBank's business model and strategy.
- Bringing the SDGs into line with the social welfare initiatives and programmes developed and implemented by the bank.
- The importance given by CaixaBank employees to the various SDGs.
- The vision and position of the sector regarding the SDGs.

As a result of this analysis, CaixaBank established the 3 priority SDGs that have the greatest impact:

SDG Direct impact	Description	Initiatives	SDGs indirect impact
	Promote the right to financial resources and services through microfinancing to therefore reduce people's vulnerability and exposure.	<ul style="list-style-type: none"> • Micro-finance activities – MicroBank • "la Caixa" Corporate Volunteering Programme • Social Initiatives Weeks at CaixaBank • Collaboration with the "la Caixa" Banking Foundation • Financial education • Accessibility 	SDG 8: Decent work and economic growth SDG 10: Reduced inequalities

	405-2 Ratio of the base salary and the remuneration of women compared to men	The CaixaBank's employees are paid in accordance with their professional status and the functions performed, regardless of their gender or origins. In equal categories and seniority, the basic wage is the same for all employment categories. While remuneration is increasingly performance-based, changes in employee category due to seniority, and the three-year wage rises laid down in the collective labour agreement lead to salary differences by gender (average number of years at CaixaBank: men, 16 years; women, 15 years). Thus, the average ratio of total remuneration of men with respect to that of women at senior management level is 132%, at middle-management level, 112%, and for the rest of the workforce, 109%. This ratio is 104% for those under 30 years old. Information is provided exclusively on CaixaBank's own personnel. At BPI, the average ratio of total remuneration of men with respect to that of women at senior management level (Branch manager or higher) is 192%, at middle-management level, 123%, and for the rest of the workforce, 117%. This ratio is 105% for those under 30 years old.		✓ Information verified for CaixaBank, S.A.

Report on Independent Review of the Corporate Responsibility information included in the 2017 Integrated Corporate Report of the CaixaBank Group

To the Board of Directors of CaixaBank, S.A.,

Scope of our engagement

We have performed the review -with a scope of reasonable assurance- of the Corporate Responsibility (CR) information included in the 2017 Integrated Corporate Report ("ICR" or "Report") of CaixaBank, S.A. and Subsidiaries ("the CaixaBank Group"), the scope of which is defined in the "Criteria and scope of the Report" section of the "Analysis of relevant content for stakeholders and GRI content" Appendix to the ICR. Our engagement consisted of reviewing:

- The adherence of the CR information in the ICR to the Global Reporting Initiative Sustainability Reporting Standards ("GRI-SRSs"), including the reliability and suitability of the content relating to the CaixaBank Group's activities in Spain.
- The information provided in the ICR relating to the application of the principles of inclusivity, materiality and responsiveness set out in AccountAbility's AA1000 AccountAbility Principles Standard (AA1000APS).

Verification standards and procedures

We conducted our work in accordance with the requirements established in International Standard on Assurance Engagements (ISAE) 3000, Assurance Engagements Other than Audits or Reviews of Historical Financial Information issued by the International Auditing and Assurance Standards Board (IAASB) of the International Federation of Accountants (IFAC) for the issuance of reasonable assurance reports. Also, we applied AccountAbility's AA1000 Assurance Standard (AA1000AS) to provide high assurance on the application of the principles established in AA1000 APS and on the sustainability performance indicators (type 2 high assurance).

Our work consisted of applying the procedures considered necessary to provide a basis for our conclusions and reduce the risk of a material error to an acceptable level. The main procedures applied were as follows:

- Meetings with staff of CaixaBank and the subsidiaries that participated in the preparation of the ICR to ascertain the management principles, systems and approaches applied.
- Analysis of the processes to gather and validate the CR information presented in the ICR, including the review and performance of tests on the controls implemented in the information collection, uploading and processing systems.
- Review of the security of the CR information gathering system used by CaixaBank for the ICR.
- Review of the steps taken in relation to the identification and consideration of stakeholders during the year and of the stakeholder participation processes, based on the analysis of the internal information and third-party reports available.
- Analysis of the coverage, materiality and completeness of the CR information included in the ICR on the basis of CaixaBank's understanding of the requirements of its stakeholders in relation to the material issues identified by the organisation and described in the "Analysis of relevant content for stakeholders and GRI content" Appendix.
- Review of the information relating to the management approaches applied to CR.
- Review of the minutes of the meetings of the Board of Directors, its Committees and the Corporate Responsibility and Reputation Committee held in 2017.
- Analysis of the adherence of the CR content of the ICR to the GRI Sustainability Reporting Standards and verification that such content was prepared in accordance with GRI-SRSs.
- Verification, by means of specific review tests, of the quantitative and qualitative information relating to the content detailed in the "Analysis of relevant content for stakeholders and GRI content" table of the Appendix to the ICR and the adequate compilation thereof based on the data furnished by the information sources of CaixaBank.

Responsibilities of CaixaBank and of Deloitte

- The preparation and content of the ICR is the responsibility of the Communication, Institutional Relations, Brand and CSR of CaixaBank, which is also responsible for defining, adapting and maintaining the management and internal control systems from which the information is reported.
- Our responsibility is to issue an independent reasonable assurance review report based on the work performed.
- This report has been prepared solely for CaixaBank in accordance with the terms and conditions of our engagement letter.
- We conducted our work in accordance with the independence standards required by the Code of Ethics issued by the International Ethics Standards Board for Accountants (IESBA), based on the fundamental principles of integrity, objectivity, professional competence, due care, confidentiality and professional behaviour.
- In accordance with International Standard on Quality Control (ISQC) 1, Deloitte has in place a global system of quality control which includes documented policies and procedures in relation to compliance with ethical requirements, professional standards and applicable legislation.
- Our engagement team consisted of professionals who are experts in CR Report reviews and, specifically, in economic, social and environmental performance and in stakeholder participation processes.

Conclusion

In our opinion, based on the work performed, except for the observations and limitations in the scope of the ICR or in the scope of the review which are described in the "Analysis of relevant content for stakeholders and GRI content" Appendix to the ICR:

- The CR information included in the ICR was prepared, in all material respects (including the reliability and suitability of the reviewed information), in accordance with GRI-SRSs.
- The CR information in the ICR was prepared, in all material respects, in accordance with the principles of inclusivity, materiality and responsiveness set out in AccountAbility's AA1000 AccountAbility Principles Standard (AA1000APS):
 - Inclusivity: CaixaBank has developed a stakeholder participation process, enabling stakeholders to be involved in the development of a responsible approach, as indicated in the "Analysis of relevant content for stakeholders and GRI content" Appendix to the ICR.
 - Materiality: the materiality determination process is geared towards identifying and understanding the issues that are material or significant for CaixaBank and its stakeholders, as indicated in the "Analysis of relevant content for stakeholders and GRI content" Appendix to the ICR.
 - Responsiveness: CaixaBank has defined commitments in relation to the main material aspects identified, which have been specified in a new Corporate Responsibility Master Plan, also known as the Socially Responsible Banking Master Plan.

Observations and recommendations

In addition, we presented to management of CaixaBank our recommendations relating to the areas for improvement in CR management and reporting and, specifically, to the application of the principles of inclusivity, materiality and responsiveness. Following is a summary of the most significant observations and recommendations, which do not modify the conclusion expressed in this report.

Inclusivity and materiality

In 2017 CaixaBank updated the materiality study following a methodology based on the initial identification of relevant matters for CaixaBank, the relevance of which has subsequently been evaluated by personnel, customers, shareholders and CSR experts through specific consultations. The obtainment of control of Banco BPI, S.A. in 2017 requires the scope of the materiality analysis to be extended to Portugal in order to consider its impact on the Group's material issues. Also, an analysis should be conducted of how to align BPI's CR plans with the Group's CR Plan, and how to include them in the CaixaBank Group's CR information systems in order to facilitate the consolidation of the information.

Responsiveness

CaixaBank responds to its stakeholders' information needs in relation to social, environmental and corporate governance issues mainly by means of the ICR and its Appendices, the "Socio-economic Impact Report" and "Analysis of relevant content for stakeholders and GRI content", which present numerous performance indicators in accordance with recognised international standards. To continue to increase the usefulness of the information, and considering the objectives set for the coming year, it would be advisable to include in the aforementioned report the degree of achievement of those targets and their impact on the Plan for the coming years.

In 2017 CaixaBank analysed the United Nations Sustainable Development Goals (SDGs) in order to identify those goals to which it could contribute most value, and of these goals it prioritised the following three: no poverty, decent work and economic growth and partnerships for the goals. Also, it identified the initiatives of the Group that are aligned with those goals. In order to perform ongoing monitoring of the CaixaBank Group's contribution to the attainment of the SDGs and be able to report on its achievements, it would be advisable to specify the impact indicators to be used and the objective contribution that CaixaBank aspires to.
