

1st June 2018

Dear Stakeholders,

Arm is pleased to submit its communication on progress for 2018 reporting at the Advanced Level and to renew its commitment to the UN Global Compact and implementing its ten Principles as a member of LEAD. We are proud to be an active member of the LEAD programme working with an exclusive group of UN Global Compact participants to achieve higher levels of corporate sustainability performance as outlined by the Blueprint for Corporate Sustainability Leadership.

As a member of LEAD we also look forward to contributing to the work and aspirations of other UN Agencies, Funds and Programmes by inspiring action in support of broader UN goals and issues including the Global Goals for Sustainable Development over the next year and beyond.

Last year, in partnership with the UN system and NGOs, Arm founded 2030Vision. We believe that emerging connected technologies will play a big part in delivering the Sustainable Development Goals. Humanity is at the threshold of an exciting new era. Ongoing breakthroughs in connected technology, data, AI and low-cost computing will soon transform how we live and do business. Applying these new technologies to help solve the world's biggest issues: poverty; hunger; women's rights and access to education will transform our world for the better. We look forward to working with the Global Compact on 2030Vision and invite other Global Compact members to join at www.2030vision.com.

Yours faithfully,

A handwritten signature in black ink, appearing to read 'S. Segars', followed by a period.
