Dear Mr. Secretary General,

ELIX Polymers, S.L. adhered to the initiative of the Global Compact, an international reference in support of Human Rights, Labor Rights, the Environment and the fight against corruption, last year 2017. For this reason, I am pleased to share our 2017 sustainability report, prepared from compliance with the GRI Standard Guide of the Global Reporting Initiative (GRI), and that meets the requirements for the preparation of the Progress Report (COP), an annual requirement for all organizations that subscribe to this initiative.

The sustainability report describes the efforts of our company to develop our activity in line with the ten principles of the Global Compact and the Sustainable Development Goals, both initiatives of the United Nations. In this our first annual communication on progress, we put special emphasis on describing our actions to integrate the principles of the Global Compact into our business strategy, culture and daily operations.

Likewise, we are pleased to reaffirm our commitment to the Global Compact initiative one more year. We are also committed to share our progress in terms of sustainability with our stakeholders, through our main communication channels, and through the preparation of relevant Progress Reports.

*Sincerely,*

*Wolfgang Döring*

*CEO ELIX Polymers*
