REPORTING TEAM

**United Nations Global Compact
New York City, United States**

Dear UN Global Compact Reporting Team,

We recognize that a key requirement for participation in the UN Global Compact is the annual preparation and posting of a Communication on Engagement (COE) that comprises of a chief executive statement of continued support for the UN Global Compact, a description of practical actions in support of the UN Global Compact, and a measurement of outcomes or expected outcomes.

We are late in creating, sharing and posting our COE report due to a careful analysis regarding the 2010 submitted project "Bicycle Mobility Strategy of Mexico City" and the Global Compact scheme characteristics where we concluded that the project does not align to the Global Compact purposes.

The Bicycle Mobility Strategy of Mexico City is a policy instrument created by the City's Ministry of Environment in order to promote the use of bicycle through infrastructure, education and a public bicycle system. It is not a corporation or a government body. It is a policy instrument. Instead, we have found that the public bicycle sharing system of Mexico City's Government, ECOBICI, would fit properly into the expectations and defined purposes of the Global Compact, thus, we would like to propose submitting ECOBICI's to the compact in place of the previously submitted project "Bicycle Mobility Strategy of Mexico City".

Hoping that we can keep participating in the UN Global Compact with the proposed changes, I send you my best regards.

Yours Sincerely,

MARTHA PATRICIA NARVÁEZ GARCÍA
Coordinator of Foreign Affairs
Ministry of Environment
