HOW DO  
WE DO IT?

ABOUT US

TESTIMONIES

**We are an organization that supports children with low resources that are sick with cancer, autism and diabetes, between other illnesses to give them medical treatment, chemotherapy, lab analysis, medicine or prosthesis and upgrade their life quality and their probability of survival.**

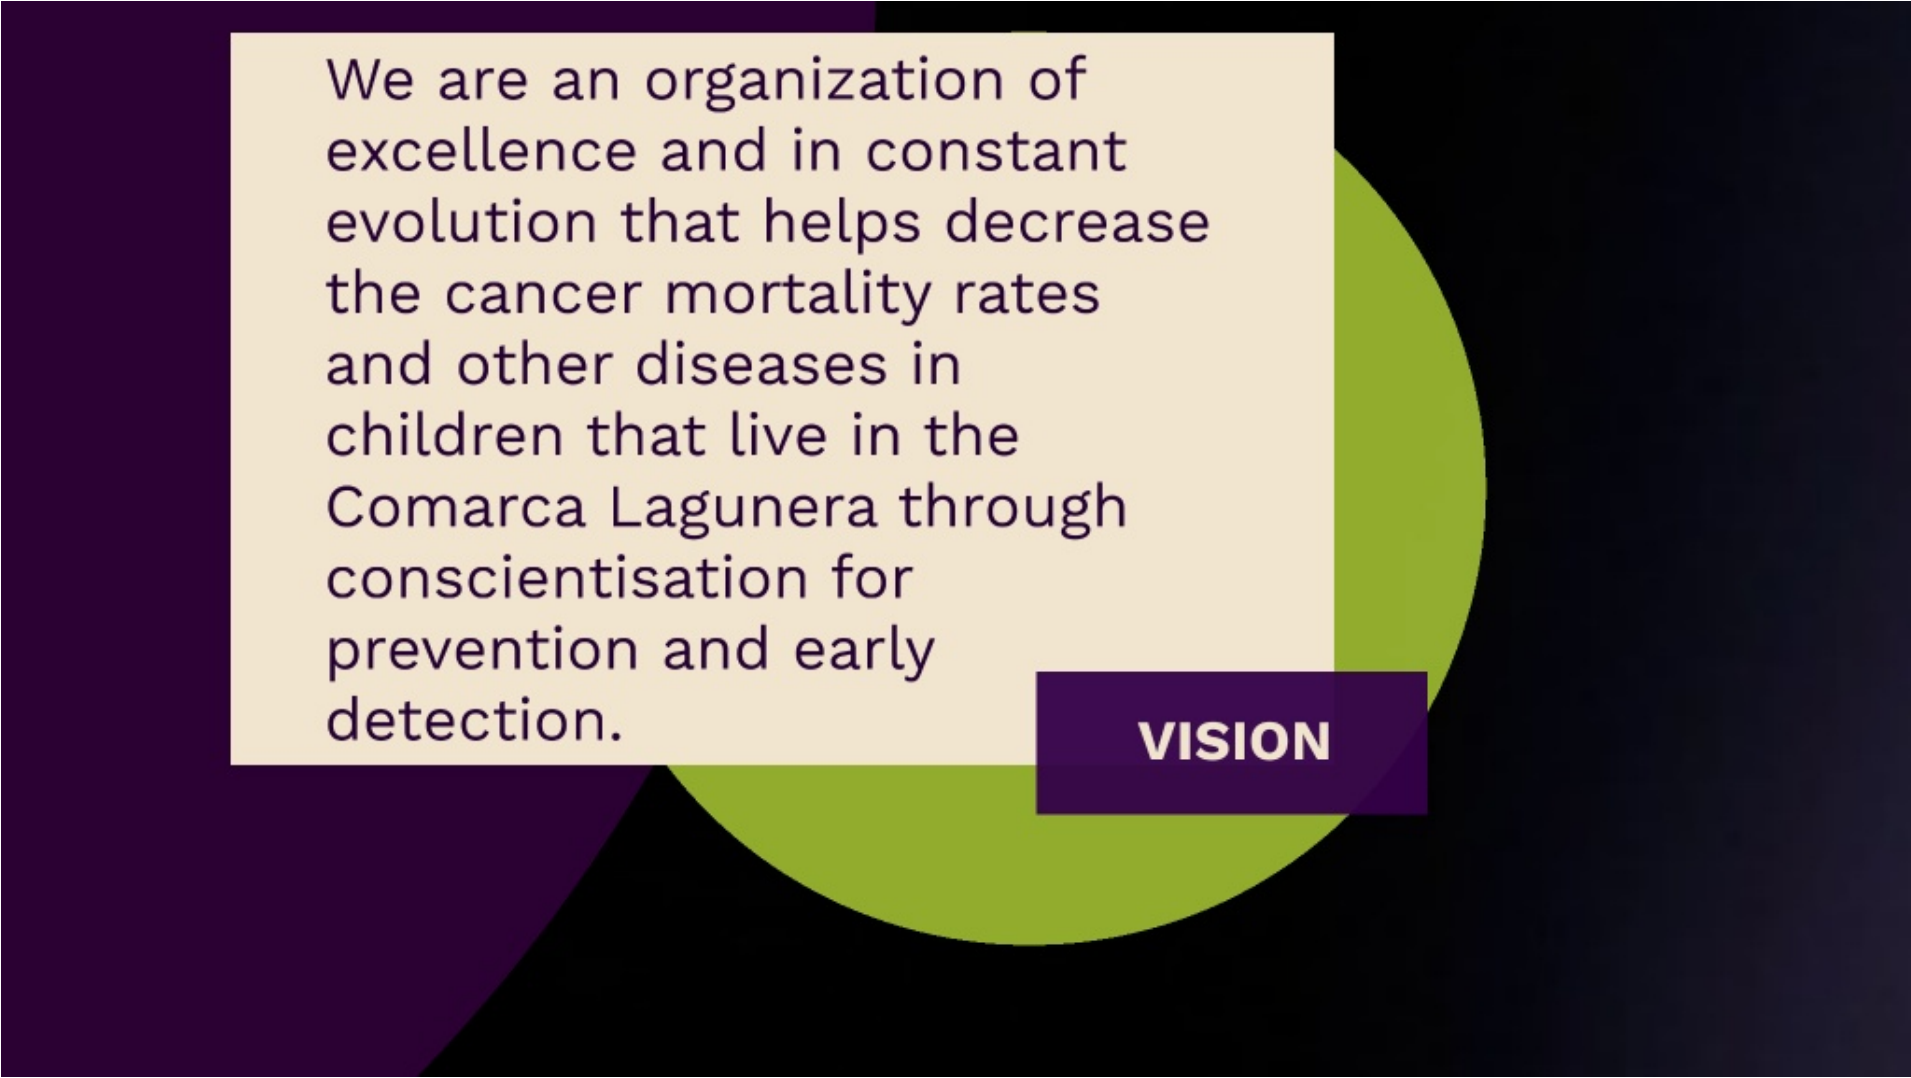

**MISSION**

**VISION**

**IMPACT**

## MISSION

Work in benefit of the children and contribute in their fight against cancer and other illnesses, providing them with access to appropriate diagnosis, the best possible treatments to improve their life quality and raise their possibilities to fight against their illness.

We are an organization of excellence and in constant evolution that helps decrease the cancer mortality rates and other diseases in children that live in the Comarca Lagunera through conscientisation for prevention and early detection.

**VISION**

## 45 Children

Have been supported with chemotherapy, prosthesis, medical analysis, wheel chairs, medicine and transfer to the place where they receive their treatment.

ABOUT US

TESTIMONIES

## **Our Programs**

**TAPATON**

**ZONA  
VERDE**

**ALLIES**

## TAPATON

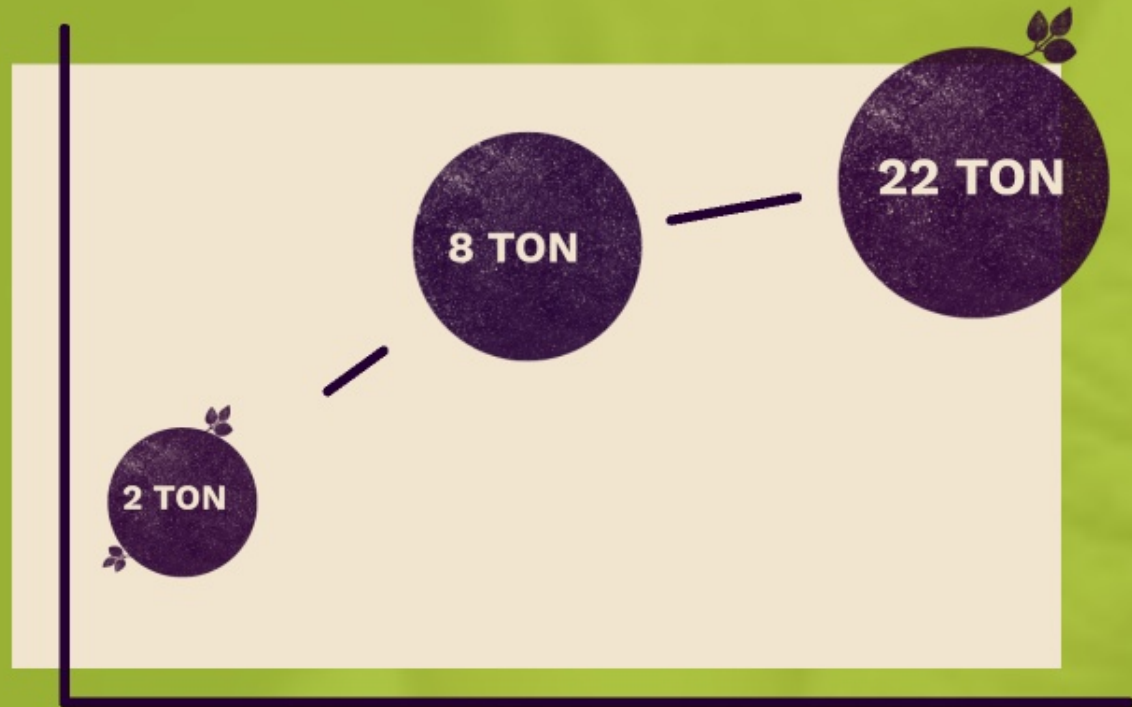

10 Tapatones are realized in one year, in which all the community helps bringing their plastic lids. We are in charge of selling them to the recycling companies and that is how we get resources.

**RESULTS**

# RESULTS

How much do we get?  
We have collected in only one Tapatón up to 2 trailers with 11 tons of plastic lids each, that we sell to \$5 Pesos the kg.

## ZONA VERDE (GREEN ZONE)

With the support of the soccer team, Club Santos Laguna, we collect money during the matches at the stadium and sell hats with plumes.

## GATHERING CENTERS

The businesses, schools and particulars help us by receiving the plastic lids and bringing them to us the day of the Tapatón.
