

Warsaw, Poland, 23.02.2018 (due)

H.E. António Guterres
Secretary-General
United Nations
New York, NY 10017
USA

Dear Mr. Secretary General,

I am pleased to confirm the ongoing commitment and continued support from EPSEC Foundation for the UN Global Compact and its principles with respect to human rights, labour, environment and anti-corruption.

EPSEC - European Partnership for Science and Economic Competitiveness is a nonprofit independent think-and-do tank specializing in research in the field of social and economic policies, the research-based, high quality advice to decision makers and the public, as well as initiating social and civic actions. The organization's main area of interest is stimulating the sustainable social and economic development of countries, regions and local communities. Based in Warsaw, Poland, EPSEC focuses its activities at promoting sustainable socio-economic development and economic competitiveness of Poland and the European Union. Our expertise has been confirmed in execution over the recent years of significant knowledge-based projects for such recipients as the European Commission, the European Parliament, the European Investment Bank, the European Committee of the Regions, Poland's Ministry of Economic Development, the Capital City of Warsaw, and other public, private and academic stakeholders. In all of our involvements, we respect and support the UN Global Compact principles of sustainable and socially responsible activity.

Since our joining the UN Global Compact, we have also taken practical actions dedicated to supporting the initiative. In the communication with our stakeholders we have been informing about our support to the UN Global Compact and commitment to its principles. Moreover, we have also been supporting the UN Global Compact special initiatives and work streams. We have promoted knowledge created within those initiatives and work streams in our undertakings to our stakeholders. For example, we promoted the outputs of the UN Global Compact Local Network for Poland Program on Innovations – Business and Science in our 2016 research and advisory projects related to innovation policy in Poland and the EU. As a result, the recipients of our activities from public, private and social sectors could learn about the UN Global Compact special initiative – the abovementioned Program and its contents. Also, our representative participated in the Congress of Innovative Economy co-organized under the Program.

I express our dedication to continue supporting the UN Global Compact, its principles and initiatives in the future.

Sincerely yours,

Mr. Jacek Kotrasiński
President, EPSEC Foundation
