# UNGC COMMUNICATION ON PROGRESS REPORT

---

2018

MAY 23, 2019

S&D CHEMICALS (PVT) LTD.

Block A, Biyagama Export Processing Zone (BEPZ), Walgama, Malwana, Sri Lanka

## STATEMENT BY CEO

23<sup>rd</sup> May 2019

To our stakeholders,

Our company, S&D CHEMICALS (PVT) LTD. is the first in Sri Lanka to manufacture the full range of products needed for textile processing and wet processing of garments. This greatly benefits the local textile industry and contributes to Sri Lankan garments to be more competitive. The company exports to Bangladesh, Indonesia and Vietnam and also to buyers in India, Oman and Dubai. We are also excited about the possibility of exporting our products to other countries in the region and our target is to become a leading manufacturer of textile auxiliaries and wet processing aids in the region. Our latest additions include the opening of branch offices in Pakistan and Egypt.

S&D Chemicals is a very professional and highly customer focused organization, developing innovative value-added products tailor made to a variety of customers' end-use. Almost all products manufactured by us are biodegradable and therefore environment friendly. Our focus is for a sustainable future and we always consider process optimization and the use of sustainable energy.

In the process of making profits in the business, it has not forgotten the commitment that it has for the environment and the society. Since its beginning in 2013, one vision of the company has been to be a sustainable business. In each and every step of designing and developing our product profiles we always make sure to avoid restricted substances in our building blocks, which complies with our internally developed S&D Material Restricted Substance List (S&D-MRSL). Therefore, we were able to obtain approval for our products from some of the world's leading standards for textiles such as bluesign®, GOTS and ZDHC.

As recognition of our highest level of commitment and endeavor to operate our business as a greener industry we were awarded the Bronze Award at the Presidential Green Awards ceremony in the year 2016. Moreover, as a result of our continuous marketing efforts, we were rewarded with the Highest Foreign Exchange Earner Award for Chemical and Paint Sector, at the Presidential Export Awards ceremony in 2018.

We are a signatory for United Nations Global Compact (UNGC) and also a member of the Lanka Responsible Care Council. Registering and taking part in the National Green Reporting System (NGRS) and the UNGC Communication on Progress (COP) Reporting System spells out the company's commitment to human rights, occupational health and safety (OHS), resource productivity and environmental and social sustainability.

I am pleased to confirm that S&D CHEMICALS (PVT) LTD. reaffirms its support to the Sustainable Development Goals (SDGs) as well as the Ten Principles of the United Nations Global Compact in the areas of Human Rights, Labour, Environment and Anti-Corruption.

S&D CHEMICALS (PVT) LTD.

For a sustainable future ....

In this, our second annual Communication on Progress report, we describe our actions to continually improve the integration of the Global Compact and its principles into our business strategy, culture and daily operations. We also commit to sharing this information with our stakeholders using our primary channels of communication.

Yours sincerely,

**Dayantha De Silva**  
**Managing Director**

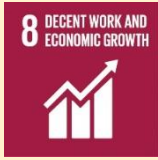

## DESCRIPTION OF ACTIONS

A summary of the actions that were undertaken and are to be taken, thereby reaffirming our support to the SDGs and correspondingly the Ten Principles under the UNGC in the areas of Human Rights, Labour, Environment and Anti-Corruption are shown below in Table 1:

**Table 1:** Summary of the commitments made and plans that are to be made by S&D Chemicals.

CATEGORY	CONTRIBUTING SDG	COMMITMENTS	FUTURE PLANS
<b>HUMAN RIGHTS</b>	 <p><b>SDG 3: GOOD HEALTH AND WELL-BEING</b></p> <p>Ensure healthy lives and promote well-being for all at all ages</p>	<ul style="list-style-type: none"> <li>✓ A 100% healthy workforce and a safer environment were ensured to be maintained. Appropriate training programs and health checkups for each personnel were conducted. This was to promote the awareness amongst the employees on OHS as well as to monitor the health and well-being of all employees.</li> <li>✓ A 100% fire safe environment was ensured to be maintained by improving electrical safety through the earthing of unearthed machineries present in the facility and by ensuring a 24x7 security surveillance system through CCTV cameras.</li> </ul>	<ul style="list-style-type: none"> <li>✓ A 100% healthy workforce and a safer environment is further ensured to be maintained. More appropriate training programs as well as appropriate health checkups for each of the respective personnel are to be conducted on an annual basis.</li> <li>✓ Implementation of standard industrial practices such as the colour coding of pipelines are to be considered.</li> <li>✓ A 100% fire safe environment is further ensured to be maintained.</li> <li>✓ An earth pit monitoring system is to be implemented.</li> </ul>

CATEGORY	CONTRIBUTING SDG	COMMITMENTS	FUTURE PLANS
		<ul style="list-style-type: none"> <li>✓ Accidents and near misses were ensured to be minimized.</li> <li>✓ Factory layouts were updated incorporating all new locations, pathways, emergency exits and evacuation pathways.</li> <li>✓ 100% performance on OHS compliance within both the facility and the surroundings was ensured.</li> </ul>	<ul style="list-style-type: none"> <li>✓ Continue to meet 100% performance on OHS compliance within both the facility and the surroundings.</li> </ul>
<p><b>HUMAN RIGHTS</b></p>	 <p><b>SDG 6: CLEAN WATER AND SANITATION</b> Ensure availability and sustainable management of water and sanitation for all</p>	<ul style="list-style-type: none"> <li>✓ Numerous amenities were provided to employees such as all necessary sanitary conveniences, which includes the supply of fresh drinking water.</li> </ul>	

CATEGORY	CONTRIBUTING SDG	COMMITMENTS	FUTURE PLANS
LABOUR	 <p><b>SDG 5: GENDER EQUALITY</b> Achieve gender equality and empower all women and girls</p>	<ul style="list-style-type: none"> <li>✓ All employees are secured and shielded from discrimination based on gender.</li> <li>✓ All amenities provided are for all employees may they be men or women.</li> </ul>	
	 <p><b>SDG 8: DECENT WORK AND ECONOMIC GROWTH</b> Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all</p>	<ul style="list-style-type: none"> <li>✓ Through company written policies, employee rights of individuals are ensured to be respected and protected in the highest possible way.</li> <li>✓ We protect the rights of freedom of association and employee interests including negotiating salaries, benefits and other conditions of work.</li> <li>✓ We are committed to eliminating child labour exploitation and we ensure there is no use of forced labour including forms of slavery, debt bondage and human trafficking.</li> </ul>	<ul style="list-style-type: none"> <li>✓ Measures will be taken to continuously monitor our compliance with existing laws and regulations. Moreover, newly laid laws and regulations that should be complied with in relation to employee rights will be investigated and implemented.</li> </ul>

ENVIRON- MENT	 <p><b>SDG 12: RESPONSIBLE CONSUMPTION AND PRODUCTION</b></p> <p>Ensure sustainable consumption and production patterns</p>	<ul style="list-style-type: none"> <li>✓ Several measures were taken to reduce the cost of electricity consumption at the facility.</li> <li>✓ Various measures were also taken to control and monitor air emissions to the environment and within the facility.</li> <li>✓ Several measures were taken to reduce hazardous waste produced at the facility.</li> <li>✓ 100% performance on environmental compliance within both the facility and the surroundings was ensured.</li> </ul>	<ul style="list-style-type: none"> <li>✓ Several measures are to be taken to further reduce the cost of electricity consumption and also to control and monitor air emissions to the environment and within the facility.</li> <li>✓ Continue to meet 100% performance on environmental compliance within both the facility and the surroundings.</li> </ul>
	 <p><b>SDG 14: LIFE BELOW WATER</b></p> <p>Conserve and sustainably use the oceans, seas and marine resources for sustainable development</p>	<ul style="list-style-type: none"> <li>✓ 100% performance on environmental compliance within both the facility and the surroundings was ensured.</li> </ul>	<ul style="list-style-type: none"> <li>✓ Continue to meet 100% performance on environmental compliance within both the facility and the surroundings.</li> </ul>

CATEGORY	CONTRIBUTING SDG	COMMITMENTS	FUTURE PLANS
<p><b>ANTI-CORRUPTION</b></p>	 <p><b>SDG 16: PEACE, JUSTICE AND STRONG INSTITUTIONS</b>                      Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels</p>	<p>✓ Through company written policies, procedures and continuous monitoring systems, which comply with applicable local and international anti-corruption laws, corruption in any form including bribery was ensured to be avoided.</p>	<p>✓ We will ensure that all our employees are committed to observe and uphold the zero-tolerance position on bribery and corruption.</p>

## HUMAN RIGHTS

## UNGC PRINCIPLES

### Principle 1:

Businesses should support and respect the protection of internationally proclaimed human rights

### Principle 2:

Businesses should make sure that they are not complicit in human rights abuses

## OUR SDG CONTRIBUTIONS

### SDG 3: GOOD HEALTH AND WELL-BEING

Ensure healthy lives and promote well-being for all at all ages

### SDG 6: CLEAN WATER AND SANITATION

Ensure availability and sustainable management of water and sanitation for all

## OUR COMMITMENTS

We maintain a 100% healthy workforce and a safer environment without violating any locally and internationally proclaimed human rights.

Appropriate training programs were conducted for respective personnel to promote awareness amongst the employees on OHS. These include:

- Usage of Personal Protective Equipment (PPE)
- Proper Handling of Chemicals and Chemical Spillage and Evacuation
- Chemical spillage Mock Drill
- Firefighting
- First-aid
- Introducing category and GHS, NFPA
- Health and Safety Management
- Industrial Safety
- Safe Operation and Maintenance of Fork Lift Trucks
- Road Safety
- Awareness on the Integrated Management System (IMS)

Moreover, to monitor the health and well-being of all, appropriate health checkups for each personnel were conducted.

A 100% fire safe environment was ensured to be maintained by installing a fire pump coupled hydrant system in the facility. Moreover, an additional 10,000 litres tank to store water, is to be connected to the existing interconnected tank system to enhance in-house fire protection. This would then increase the existing onsite water storage capacity of 70,000 litres to a total of 80,000 litres. The fire certification is also renewed on an annual basis by the Board of Investment (BOI) of Sri Lanka.

All unearthed key machineries present in the facility were earthed, so as to improve the electrical safety of the machineries. Moreover, it also safeguards the employees from getting electrocuted by machineries, due to earth leakages. Furthermore, a lightning protection system and a surge protection system were also installed, to enhance protection of the facility from lightning hazards and surges coming through the grid.

In addition, 24x7 CCTV cameras were installed to further enhance the security of the employees working within the facility. Therefore, this will enhance the internet-based security surveillance of the facility.

Accidents and near misses were ensured to be minimized or prevented by recording, analyzing and taking appropriate corrective measures for past incidents.

Factory layouts were updated by incorporating all new locations, pathways, emergency exits and evacuation pathways. The factory layouts that were updated include:

- Evacuation Plan
- Drainage Layout Plan
- Landscape Layout Plan
- Placement of Firefighting Equipment
- Placement of First-aid Kits
- Placement of Spill Clean-up Kits

Through company written policies, procedures and continuous monitoring systems, which comply with applicable local and international laws and regulations, we ensure that 100% performance on OHS compliance within both the facility and the surroundings are met with.

100% performance on OHS compliance within both the facility and the surroundings were ensured to be maintained by:

1. Commissioning an accredited third-party organization on an annual basis to measure and analyze occupational exposure levels, which include:
  - thermal discomfort (based on humidity and temperature),
  - light intensity,
  - noise levels,
  - respirable dust levels and
  - Volatile Organic Compound (VOC) emissions.
2. Providing the following amenities as appropriate to the employees, which complies with Factory Ordinance No. 45 of 1942:
  - a hygienic working environment,
  - ample cubical spacing, which prevents overcrowding,
  - acceptable temperature, ventilation and lighting,
  - adequate sanitary conveniences that includes:
    - adequate number of washrooms and changing rooms separately for men and women,
    - a hygienic canteen area,
    - supply of fresh drinking water and
    - supply of all essential PPE at all times.
  - medical supervision which includes supply of all essential first-aid by a responsible trained person and
  - supply of safety provisions in case of a fire.
3. Maintaining certification of the company in accordance with globally approved standards such as OHSAS 18001.

## OUR FUTURE SDG CONTRIBUTION PLANS

### SDG 3: GOOD HEALTH AND WELL-BEING

Ensure healthy lives and promote well-being for all at all ages

## OUR FUTURE PLANS

We further aim to maintain a 100% healthy workforce and a safer environment without violating any locally and internationally proclaimed human rights.

More appropriate training programs are to be conducted for respective personnel to further promote awareness amongst the employees on OHS. These include:

- Proper Usage of a Chemical Spill Clean-up Kit
- Emergency Evacuation Drill
- Advance Firefighting
- Safe Housekeeping and Accident Prevention
- Hazard Communication and Safety Management
- Workplace Safety
- Food Safety and Personal Hygiene
- Boiler Safety Operation and Maintenance
- Awareness on ISO and OHSAS

Moreover, to ensure the well-being of all, appropriate health checkups for each personnel is to be carried out on an annual basis.

The need for Self-Contained Breathing Apparatus (SCBA) and for the implementation of standard industrial practices such as the colour coding of pipelines are to be evaluated.

A 100% fire safe environment is further ensured to be maintained by the installation of a water sprinkle system, in the flammable material storage section of the facility.

An earth pit monitoring system is to be implemented, to monitor lightning protection and whether the earth systems work in accordance with the specifications.

100% performance on OHS compliance within both the facility and the surroundings will be ensured to be continuously met with.

## LABOUR

## UNGC PRINCIPLES

### Principle 3:

Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining

### Principle 4:

Businesses should uphold the elimination of all forms of forced and compulsory labour

### Principle 5:

Businesses should uphold the effective abolition of child labour

### Principle 6:

Businesses should uphold the elimination of discrimination in respect of employment and occupation

## OUR SDG CONTRIBUTIONS

### SDG 5: GENDER EQUALITY

Achieve gender equality and empower all women and girls

### SDG 8: DECENT WORK AND ECONOMIC GROWTH

Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

## OUR COMMITMENTS

Through company written policies, procedures and continuous monitoring systems, employee rights of individuals are ensured to be respected and protected in the highest possible way. To begin with, employees are secured and shielded from discrimination based on race, caste, gender, religion, sexual orientation and age. We protect the rights of freedom of association and employee interests including negotiating salaries, benefits and other conditions of work. We are committed to eliminating child labour exploitation and ensuring there is no use of forced labour including forms of slavery, debt bondage and human trafficking.

The following amenities are ensured to be provided as appropriate to all employees, which complies with Wage Board Ordinance No. 27 of 1941:

- Payment of wages, which are well above the minimum wage standards that complies with the National Minimum Wage of Workers Act, No. 3 of 2016 and the Budgetary Relief Allowance of Workers Act, No. 4 of 2016.
- Payment of Employees' Provident Fund (EPF) and Employees' Trust Fund (ETF) which complies with the EPF Act, No. 15 of 1958 and the ETF Act, No. 46 of 1980 respectively.
- Standard hours of employment.
- Payment of attractive remunerations for overtime employment and those carried out on holidays.
- Standard leave entitlements (annual, casual, medical and maternity).
- All mercantile holidays.

## OUR FUTURE SDG CONTRIBUTION PLANS

### **SDG 8: DECENT WORK AND ECONOMIC GROWTH**

Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

## OUR FUTURE PLANS

Measures will be taken to continuously monitor our compliance with existing laws and regulations. Moreover, newly laid laws and regulations that should be complied with in relation to employee rights will be investigated and implemented.

## ENVIRONMENT

## UNGC PRINCIPLES

### **Principle 7:**

Businesses should support a precautionary approach to environmental challenges

### **Principle 8:**

Businesses should undertake initiatives to promote greater environmental responsibility

### **Principle 9:**

Businesses should encourage the development and diffusion of environmentally friendly technologies

## OUR SDG CONTRIBUTIONS

**SDG 3: GOOD HEALTH AND WELL-BEING**

Ensure healthy lives and promote well-being for all at all ages

**SDG 6: CLEAN WATER AND SANITATION**

Ensure availability and sustainable management of water and sanitation for all

**SDG 7: AFFORDABLE AND CLEAN ENERGY**

Ensure access to affordable, reliable, sustainable and modern energy for all

**SDG 9: INDUSTRY, INNOVATION AND INFRASTRUCTURE**

Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

**SDG 12: RESPONSIBLE CONSUMPTION AND PRODUCTION**

Ensure sustainable consumption and production patterns

**SDG 14: LIFE BELOW WATER**

Conserve and sustainably use the oceans, seas and marine resources for sustainable development

## OUR COMMITMENTS

The actions that were undertaken in this category are further divided into subcategories namely, energy, water, emissions, general and innovations. The details of the actions undertaken are described in detail in each of these individual subcategories.

## ENERGY

To begin with several measures were taken to reduce the cost of electricity consumption by:

1. Reducing the total number of energy units used by the installation of solar garden lights.
2. Reducing peak demands by proposing and developing administrative instructions to precisely schedule the usage of the general electrical units such as lights, fans, air conditioning units and photocopiers in the facility according to a predetermined time interval.

---

**WATER**

---

Measures were taken to reduce the total volume of fresh water consumption such as the recycling of treated wastewater for flushing and gardening purposes. Moreover, administrative controls were proposed and developed on the proper usage of fresh water.

---

## EMISSIONS

---

Various measures were undertaken to carefully control and monitor air emissions to the environment and within the facility, which is mandatory to maintain a clean and pollution-free environment, thereby ensuring the sustainable operation of the facility. An exhaust system was setup in the laboratory to prevent the employees from being exposed to noxious emissions at the workplace.

Several measures were taken to reduce the hazardous waste produced at the facility by:

1. Installing a second filter press to minimize the amount of chemical sludge generated at the facility.
2. Minimizing the amount of PPE waste generated at the facility through promoting awareness amongst the employees by conducting appropriate training programs, to educate them on the re-use of relevant materials that could be re-used over an extended period of time.

---

## GENERAL

---

Appropriate training programs were conducted for respective personnel to promote awareness amongst the employees on Environment. These include:

- Proper Handling of Chemicals
- Sustainability
- Awareness on the Integrated Management System (IMS)

Through company written policies, procedures and continuous monitoring systems, which comply with applicable local and international laws and regulations, we ensure that 100% performance on EHS compliance within both the facility and the surroundings are met with.

100% performance on EHS compliance within both the facility and the surroundings was ensured to be maintained by:

1. Commissioning an accredited third-party organization on an annual basis to measure and analyze emissions to the environment, which include:
  - wastewater quality,
  - ambient air quality,
  - stack emissions and
  - boundary noise levels.
2. Complying to the regulations enforced by the National Environmental Act, No. 47 of 1980 and the BOI.
3. An ICP-OES was set up at the in-house laboratory, which aids in the testing of heavy metals, thereby enabling analysis of product quality and the detection of the presence of any hazardous substances or impurities in the desired, finished products, which also complies with our S&D-MRSL. Hence, the ultimate objective of producing non-hazardous finished products are met with.
4. Maintaining certification of the company in accordance with globally approved standards such as ISO 14001. We were also able to achieve bluesign® approval for 60 identified individual products and GOTS approval for 37 identified individual products, manufactured at S&D Chemicals.

OUR INNOVATIONS

S&D is a proven partner for customers involved in the textile value chain and is constantly developing sustainable solutions for the future that are flexible, cost-efficient and eco-friendly. We always take care of both the regulatory requirements in their target markets and also the prevailing trends relating to health, safety and sustainability, through process optimization, eco-efficient products and solutions, quality assurance and by the introduction of innovative effects and functions.

Though conventional processes are extremely used nowadays, they pose a measurable negative impact on the environment due to the increased consumption of water and energy. Therefore, it is clear that these processes need to be improved considerably in order to meet today's energy and environmental demands. Therefore, we, S&D Chemicals (Pvt) Ltd. innovate specially developed formulations, which are listed below in Table 2 that emerges as the best alternatives to the otherwise lesser ecofriendly conventional processes.

**Table 2:** Specially developed eco-friendly formulations.

<b>Product Name</b>	<b>Application</b>
<b>Scourzyme TXP</b>	Biological Enzymatic Scouring Process
<b>Lanzene Cellucross N</b>	Sustainable Enzyme Process
<b>Biozep Combi L</b>	Sustainable Dyebath Enzyme Process
<b>Lanzene Maxi OV2</b>	Stone Free Enzyme Process
<b>Turbo Bleach H5</b>	Sustainable Bleaching Process
<b>Sapanol LP 7</b>	Low Temperature Soaping Process
<b>Biopolimer PC1</b>	Hazard Free Neutralizer

## SCOURZYME TXP – BIOLOGICAL ENZYMATIC SCOURING PROCESS

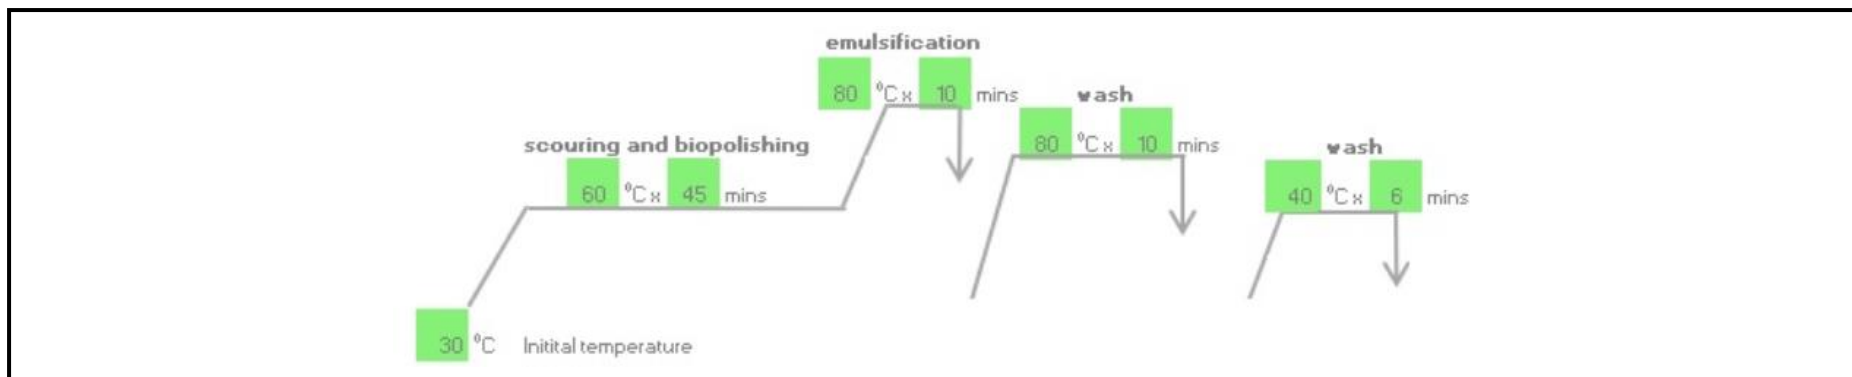

The bioscouring process emerges as the best ecofriendly alternative to the conventional, polluting caustic scouring process.

Scourzyme TXP, a product formulated by S&D, is a bioscouring system that uses a specially developed enzyme formulation, based on pectinase to remove waxes, pectins, sizes and other impurities on the surface of the fabric. Pectate lyase degrades the pectin from the primary cell wall of cotton without degrading the cotton itself. Research has shown that pectin acts like glue between the fibre core and the waxes, but that it can be removed by an alkaline pectate lyase, making the residual waxes easy to eradicate in the subsequent hot rinse.

As shown below in Figure 1, the conventional process is a 6-stage process where the scouring and the acid biopolishing process take place separately in 2 stages. However, as shown below in Figure 2, the bioscouring process is a 4-stage process, where the scouring and the acid biopolishing process is now combined into one single stage. Alkaline scouring is a process that uses high concentrations of NaOH and also requires the neutralization of wastewater. Even though alkaline scouring is effective and the costs of NaOH are low, this conventional scouring process is rather inefficient as it consumes large quantities of water and energy.

**Figure 1:** Working mechanism of the conventional process.

**Figure 2:** Working mechanism of the bioscouring process.

The Scourzyme TXP system has many advantages in comparison to the conventional alkaline scouring method and these are shown below in Table 3 and Figure 3.

**Table 3:** Comparison of features between the conventional process and the Scourzyme TXP bioscouring process.

Parameter	Conventional Alkaline Scouring Process	Scourzyme TXP Bioscouring Process	Saving (%)
<b>BOD, COD and TDS of Effluent</b>	High (due to use of many harsh chemicals)	Low	30 – 45
<b>Loss of Fabric Strength</b>	High (due to use of many harsh chemicals)	Significantly Less	
<b>Weight Loss</b>	Significantly High	Less	atleast 2
<b>Surface</b>	Less Smooth	Smooth due to presence of pectin in fibres	
<b>Addition of Final Softener</b>	High	Low	25 – 40
<b>Running Temperature (°C)</b>	95 - 100	60	
<b>Water Consumption (m<sup>3</sup>)</b>	0.05	0.01	80
<b>Energy Consumption (kWh)</b>	2.78	1.64	41
<b>Labour (h)</b>	2.78	1.64	41
<b>Chemicals (kg)</b>	6.57	1.85	72
<b>Process Time (min)</b>	180	50	72

**Figure 3:** Graphical comparison of features between the conventional process and the bioscouring process.

# Lanzene Cellucross N

*Sustainable enzyme process*

### LANZENE CELLUCROSS N - SUSTAINABLE ENZYME PROCESS

This combination process is a sustainable enzyme process that emerges as the best ecofriendly alternative to the conventional process.

Lanzene Cellucross N, a product formulated by S&D, is a combination process, which is a sustainable enzyme system that uses a specially developed enzyme formulation.

As shown below in Figure 4, the conventional process is a 4-stage process where the desizing and the enzyme processes take place separately in 2 stages followed by rinsing in both these individual stages. However, as shown below in Figure 5, the combination process is a 2-stage process, where the desizing and the enzyme process is now combined into one single stage followed by rinsing. Even though the conventional process is effective, it is rather inefficient as it consumes large quantities of water and energy.

**Figure 4:** Working mechanism of the conventional process.

**Figure 5:** Working mechanism of the combination process.

The Lanzene Cellucross N enzyme system has many advantages in comparison to the conventional process and these are shown below in Table 4 and Figure 6.

**Table 4:** Comparison of features between the conventional process and the combination process.

Parameter	Conventional Process	Lanzene Cellucross N Combination Process	Saving	%
Time (min)	83	55	28	33.73
Water (m <sup>3</sup> )	2.9	1.4	1.5	51.72
Electricity (kWh)	63.63	42.17	21.47	33.73
Steam (ton)	0.085	0.032	0.052	61.74

**Figure 6:** Graphical comparison of features between the conventional process and the combination process.

## BIOZEP COMBI L - SUSTAINABLE DYEBATH ENZYME PROCESS

This combination process is a sustainable dyebath enzyme process that emerges as the best ecofriendly alternative to the conventional process.

Biozep Combi L, a product formulated by S&D, is a combination process, which is a sustainable dyebath enzyme system that uses a specially developed enzyme formulation.

As shown below in Figure 7, the conventional process is a 5-stage process. However, as shown below in Figure 8 the combination process is a single stage process, where the dyeing and the biopolishing processes are now combined into a single stage. Even though the conventional process is effective, it is rather inefficient as it consumes large quantities of water and energy.

**Figure 7:** Working mechanism of the conventional dyebath enzyme process.

**Figure 8:** Working mechanism of the combination process.

The Biozep Combi L dyebath enzyme system has many advantages in comparison to the conventional process and these are shown below in Table 5 and Figure 9.

**Table 5:** Comparison of features between the conventional process and the combination process.

Parameter	Conventional Process	Biozep Combi L Combination Process	Saving	%
Water (m <sup>3</sup> )	4.0	1.0	3.0	75
Electricity (kWh)	2.92	1.75	1.17	40
Steam (ton)	0.77	0.29	0.48	62
Catalase (kg)	0.50	0.00	0.50	100

**Figure 9:** Graphical comparison of features between the conventional process and the combination process.

LANZENE MAXI OVT 2 – STONE FREE ENZYME PROCESS

This combination process is a stone free enzyme process that emerges as the best ecofriendly alternative to the conventional process.

Lanzene Maxi OVT 2, a product formulated by S&D, is a sustainable stone free enzyme system that uses a specially developed enzyme formulation.

The Lanzene Maxi OVT 2 stone free enzyme system has many advantages in comparison to the conventional process and the differences are shown below in Figure 10 and Figure 11.

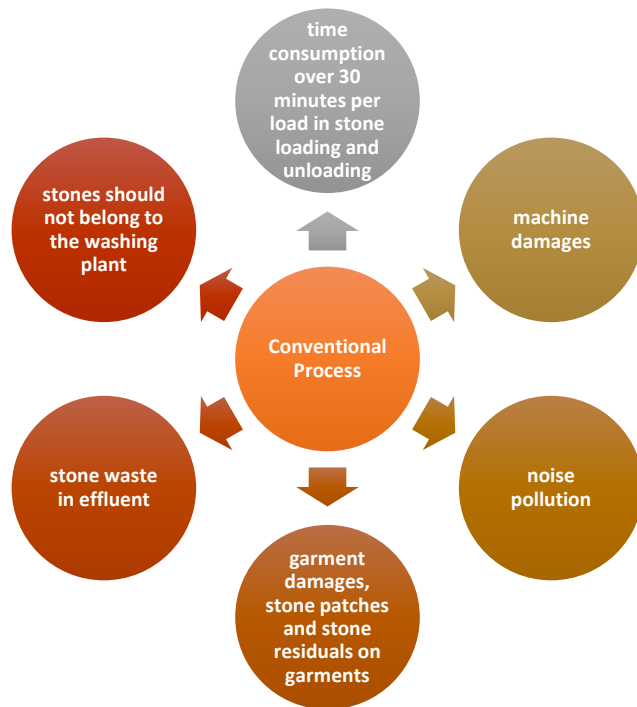

Figure 10: Drawbacks of the conventional process.

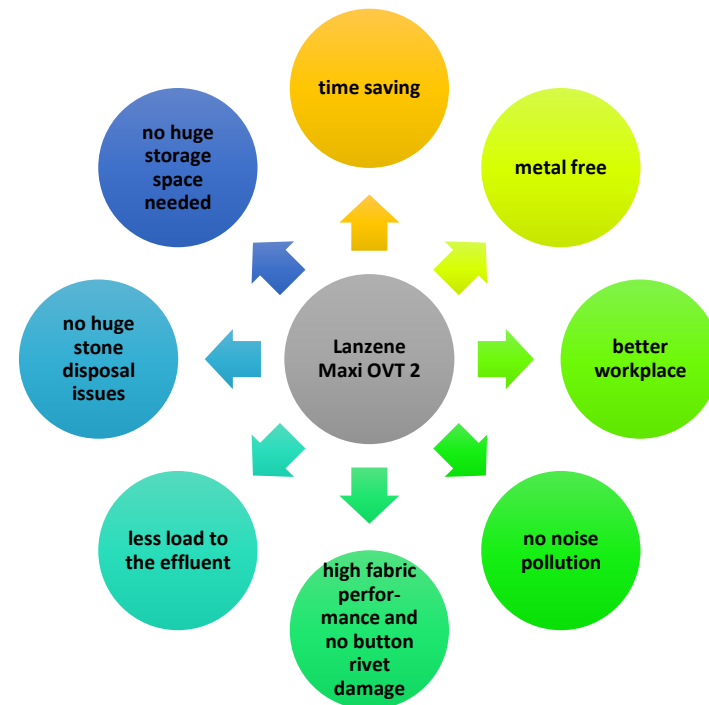

Figure 11: Advantages of the Lanzene Maxi OVT 2 process.

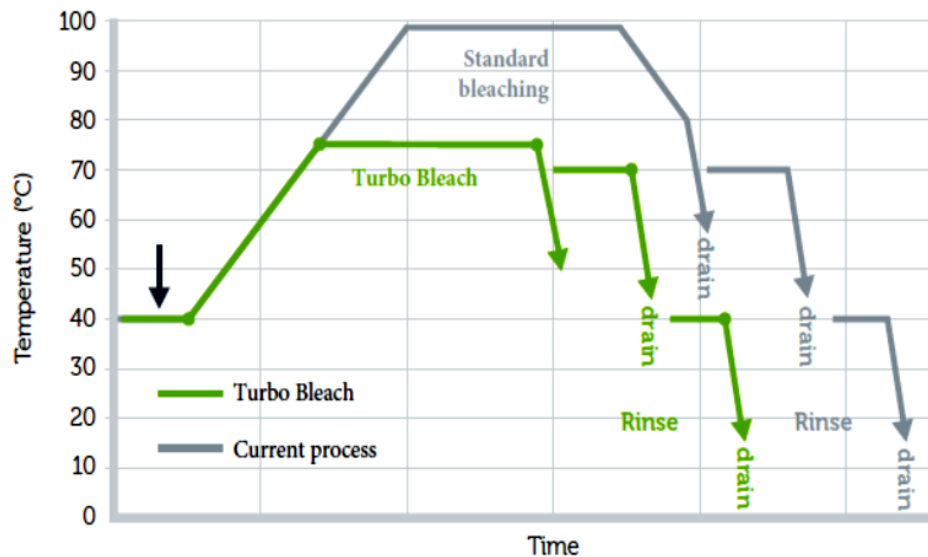

## TURBO BLEACH H5 - SUSTAINABLE BLEACHING PROCESS

This is a sustainable bleaching process that emerges as the best ecofriendly alternative to the conventional process.

Turbo Bleach H5, a product formulated by S&D, is a sustainable bleaching system that uses a specially developed formulation.

As shown below in Figure 12, the conventional process is compared to the turbo bleach process. Even though the conventional process is effective, it is rather inefficient as it consumes large quantities of energy and caustic.

The Turbo Bleach H5 bleaching system has many advantages in comparison to the conventional process and these are shown below in Figure 13.

**Figure 12:** Working mechanism of the conventional and the sustainable bleaching processes

**Figure 13:** Advantages of the Turbo Bleach H5 sustainable bleaching process.

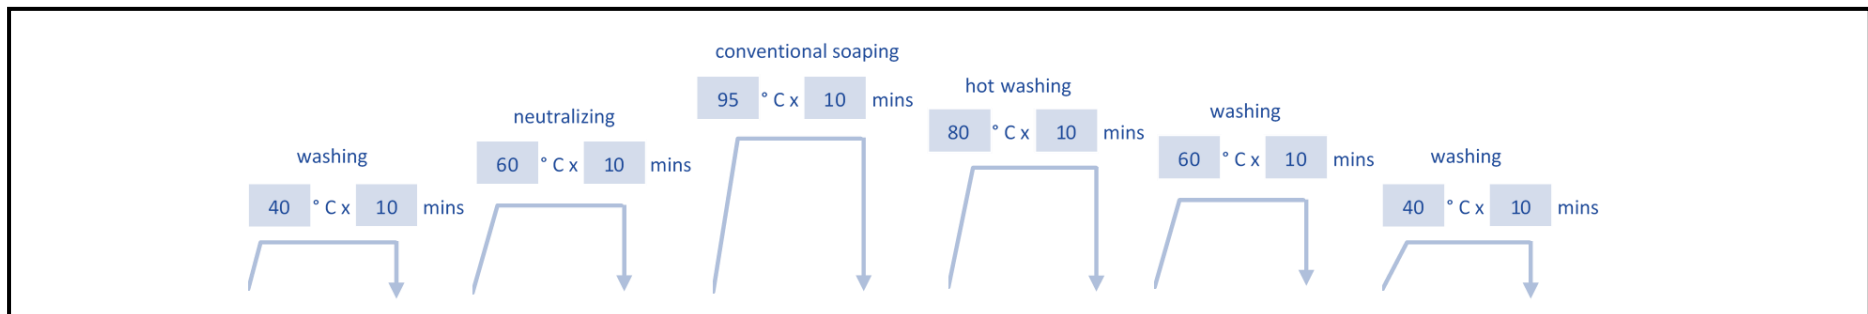

### SAPANOL LP7 – LOW TEMPERATURE SOAPING PROCESS

This is a sustainable low temperature soaping process that emerges as the best ecofriendly alternative to the conventional process.

Sapanol LP7, a product formulated by S&D, is a sustainable low temperature soaping system that uses a specially developed formulation.

As shown below in Figure 14, the conventional process is a 6-stage process in comparison to the sustainable low temperature soaping process shown in Figure 15, which is a 4-stage process.

**Figure 14:** Working mechanism of the conventional soaping process.

**Figure 15:** Working mechanism of the Sapanol LP7 sustainable low temperature soaping process.

The Sapanol LP7 low temperature soaping system has many advantages in comparison to the conventional process and these are shown below in Figure 16.

**Figure 16:** Advantages of the Sapanol LP7 sustainable low temperature soaping process.

## BIOPOLIMER PC1 – HAZARD FREE NEUTRALIZER

Biopolimer PC1 has many advantages in comparison to the conventional neutralizers and these are shown below in Table 6.

**Table 6:** Comparison of features between the conventional neutralizers and Biopolimer PC1.

	Metabisulfite	Hydroxyl Amine	Biopolimer PC1
<b>Hazards</b>			Non-Hazardous
<b>Biodegradability</b>	Readily biodegradable	Not readily biodegradable	100% biodegradable
<b>Odour</b>	Pungent	Odourless	Odourless
<b>PP Neutralization</b>	✓	✓	✓
<b>Chlorite Bleach Neutralization</b>	✓	✓	✓
<b>Surface Cleanliness</b>	++	+++	+++

## OUR FUTURE SDG CONTRIBUTION PLANS

**SDG 3: GOOD HEALTH AND WELL-BEING**

Ensure healthy lives and promote well-being for all at all ages

**SDG 6: CLEAN WATER AND SANITATION**

Ensure availability and sustainable management of water and sanitation for all

**SDG 9: INDUSTRY, INNOVATION AND INFRASTRUCTURE**

Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

**SDG 12: RESPONSIBLE CONSUMPTION AND PRODUCTION**

Ensure sustainable consumption and production patterns

**SDG 14: LIFE BELOW WATER**

Conserve and sustainably use the oceans, seas and marine resources for sustainable development

## OUR FUTURE PLANS

Several measures are to be taken to further reduce the cost of electricity consumption. Peak demands are to be further reduced through promoting awareness amongst the employees, by conducting appropriate training programs on energy conservation.

Measures are also to be taken to further reduce the total volume of fresh water consumption through promoting awareness amongst the employees by conducting appropriate training programs on water conservation.

More appropriate training programs are to be conducted for respective personnel to further promote awareness amongst the employees on Environment. These include:

- Operation of the Effluent Treatment Plant (ETP) for a Sustainable Environment

An exhaust air scrubbing mechanism is to be implemented in the laboratory to further aid in the prevention of the release of noxious emissions to the environment (ground level).

100% performance on environmental compliance within both the facility and the surroundings will be ensured to be continuously met with.

Preparations are to be continued for implementation and certification of the in-house laboratory in accordance with globally approved standards such as ISO 17025.

Sustainable solutions will be constantly developed, which are flexible, cost-efficient and eco-friendly for customers involved in the textile value chain.

By the end of next year, we aim to obtain bluesign® approval for a total of 150 identified individual products and GOTS approval for a total of 40 identified individual products, manufactured at S&D Chemicals.

## ANTI-CORRUPTION

## UNGC PRINCIPLES

### Principle 10:

Businesses should work against corruption in all its forms, including extortion and bribery

## OUR SDG CONTRIBUTIONS

### SDG 16: PEACE, JUSTICE AND STRONG INSTITUTIONS

Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

## OUR COMMITMENTS

Through company written policies, procedures and continuous monitoring systems, which comply with applicable local and international anti-corruption laws, we ensure that corruption in any form including bribery is avoided.

S&D Chemicals is committed to conduct its businesses professionally, honestly and with accountability, trustworthiness and integrity in all dealings wherever we operate. Our policy exists to set out the responsibilities of S&D Chemicals and those who work for us to observe and uphold the zero-tolerance position on bribery and corruption. S&D Chemicals ensures that bribery and corruption in any form (offering, giving, promising, asking, agreeing, receiving, accepting, or soliciting something of value or of an advantage so as to induce or influence an action or decision) is eradicated. In addition, we ensure to keep records of all payments to reflect transparency in all transactions.

This policy applies equally to employees at all levels. S&D Chemicals will take proper legal and disciplinary action against all employees and third parties who violate the anti-bribery and anti-corruption policy.

## OUR FUTURE SDG CONTRIBUTION PLANS

### SDG 16: PEACE, JUSTICE AND STRONG INSTITUTIONS

Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

## OUR FUTURE PLANS

We will ensure that all our employees are committed to observe and uphold the zero-tolerance position on bribery and corruption.

The anti-bribery and anti-corruption clause will be incorporated into our latest Employment Letter format for all new recruits.

For existing employees, a written declaration letter will be signed by each of the respective personnel, agreeing that they are committed to abide to our anti-bribery and anti-corruption policy.

## MEASUREMENT OF OUTCOMES

## HUMAN RIGHTS

The training programs that were conducted for respective personnel to promote awareness amongst the employees on OHS are shown below in Table 7.

**Table 7:** List of training programs participated by respective personnel in 2018.

Type of Training	Employee Category	Duration	Conducted on	Conducted by
<b>Usage of Personal Protective Equipment (PPE)</b>	All staff	3 hours	4 <sup>th</sup> June	External
<b>Proper Handling of Chemicals and Chemical Spillage and Evacuation</b>	Production staff and operators	1 hour	23 <sup>rd</sup> July	External
<b>Chemical spillage Mock Drill</b>	Production staff and operators	1 hour	28 <sup>th</sup> August	Internal
<b>Firefighting</b>	Production staff and operators	3 hours	27 <sup>th</sup> November	External
<b>First-aid</b>	All staff	1 day	8 <sup>th</sup> September	External
<b>Introducing category and GHS, NFPA</b>	Production staff and operators	1 hour	6 <sup>th</sup> October	Internal
<b>Health and Safety Management</b>	All staff	1.5 hours	26 <sup>th</sup> November	Internal
<b>Industrial Safety</b>	Maintenance staff	1 day	7 <sup>th</sup> February	External
<b>Safe Operation and Maintenance of Fork Lift Trucks</b>	Drivers	1 day	3 <sup>rd</sup> June	External
<b>Road Safety</b>	Drivers	1.5 hours	1 <sup>st</sup> September	External
<b>Sustainability</b>	All staff	1 hour	1 <sup>st</sup> August	Internal
<b>Awareness on Integrated Management System (IMS)</b>	Staff representing all departments relating to ISO and all production staff.	1 hour	23 <sup>rd</sup> July	External

## LABOUR

The total workforce in accordance with age is shown below in Table 8:

**Table 8:** Staff breakdown by age (as at 31<sup>st</sup> December 2018).

Section	Gender	Total No. of Employees	Age Group			
			18 < 25	25 < 40	40 < 55	> 55
Directors	Male	1	-	-	-	1
	Female	1	-	-	-	1
	Total	2	-	-	-	2
Marketing	Male	4	-	3	1	-
	Female	-	-	-	-	-
	Total	4	-	3	1	-
Administration	Male	-	-	-	-	-
	Female	1	-	1	-	-
	Total	1	-	1	-	-
Accounts	Male	7	1	6	-	-
	Female	5	1	4	-	-
	Total	12	2	10	-	-
EHS	Male	-	-	-	-	-
	Female	2	-	2	-	-
	Total	2	-	2	-	-
Production	Male	52	19	28	5	-
	Female	3	-	-	3	-
	Total	55	19	28	8	-
Laboratory	Male	5	1	4	-	-
	Female	2	1	1	-	-
	Total	7	2	5	-	-
Stores	Male	2	-	1	1	-
	Female	-	-	-	-	-
	Total	2	-	1	1	-
Maintenance	Male	4	1	3	-	-
	Female	-	-	-	-	-
	Total	4	1	3	-	-
Transport	Male	10	-	5	5	-
	Female	-	-	-	-	-
	Total	10	-	5	5	-
Total	Male	85	22	50	12	1
	Female	14	2	8	3	1
	Total	99	24	58	15	2

## ENVIRONMENT

The test results of treated wastewater, which are obtained from an accredited laboratory of a third-party organization are shown below in Table 9:

**Table 9:** Test results of treated wastewater in 2018.

Test		Unit	Treated Wastewater		Maximum Tolerance Limits
<b>Colour (Spectral Absorption Coefficient), wavelength range</b>	436 nm (Yellow Range)	per m	0.3	-	7
	525 nm (Red Range)	per m	0.1	-	5
	620 nm (Blue Range)	per m	0.1	-	3
<b>Chemical Oxygen Demand (COD)</b>		mg/L	459	-	600
<b>Oil &amp; Grease</b>		mg/L	7	-	30
<b>pH</b>			7.6	at 25 °C	6.5 - 8.5
<b>Total Dissolved Solids (TDS)</b>		mg/L	488	-	2100
<b>Total Suspended Solids (TSS)</b>		mg/L	14	-	500
<b>Total Phosphorus (as P)</b>		mg/L	0.09	-	-
<b>Total Nitrogen (as N)</b>		mg/L	7	-	-
	Kjeldhal Nitrogen (as N)	mg/L	n.d.	LOD: 5	-
	Nitrate (as N)	mg/L	2	-	-
	Nitrite (as N)	mg/L	0.01	-	-
<b>Ammoniacal Nitrogen (as N)</b>		mg/L	n.d.	LOD: 5	50
<b>Biochemical Oxygen Demand (BOD)</b>		mg/L	142	5 days	200
<b>Chloride (as Cl)</b>		mg/L	173	-	900

Test	Unit	Treated Wastewater		Maximum Tolerance Limits
Phenolic Compounds (as phenolic OH)	mg/L	n.d.	LOQ: 0.05	5.0
Free Residual Chlorine (as Cl <sub>2</sub> )	mg/L	n.d.	LOQ: 0.07	Nil
Sulphate (as SO <sub>4</sub> )	mg/L	14.4	-	1000
Sulphide (as S)	mg/L	1	-	2
Temperature	°C	25	-	40
Cyanide (as CN)	mg/L	n.d.	LOD: 0.04	0.2
Copper (as Cu)	mg/L	n.d.	LOQ: 0.01	3.0
Lead (as Pb)	mg/L	n.d.	LOQ: 0.04	1.0
Arsenic (as As)	mg/L	n.d.	LOQ: 0.02	0.2
Boron (as B)	mg/L	0.09	-	2.0
Cadmium (as Cd)	mg/L	n.d.	LOQ: 0.005	-
Chromium, Total (as Cr)	mg/L	n.d.	LOQ: 0.01	2.0
Mercury (as Hg)	mg/L	n.d.	LOQ: 0.001	0.001
Nickel (as Ni)	mg/L	n.d.	LOQ: 0.01	3.0
Tin (as Sn)	mg/L	n.d.	LOQ: 0.05	-
Zinc (as Zn)	mg/L	n.d.	LOQ: 0.01	10
Hexavalent Chromium (as Cr <sup>6+</sup> )	mg/L	n.d.	LOQ: 0.09	0.5
