CA

Lisbon, June 21, 2019

Dear Mr. Secretary-General,

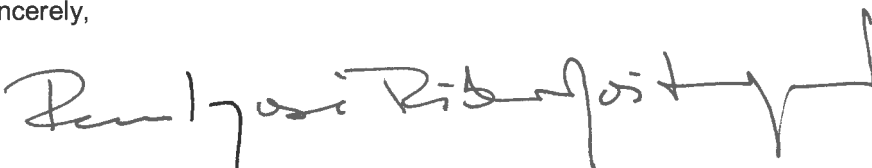

I would like to take this opportunity to confirm that Caixa Geral de Depósitos reaffirms its support of the Ten Principles stated in the United Nations Global Compact (UNGC), in respect, above all, for Human Rights, Labour, Climate Change and Environmental Protection, committed as well to fight against Corruption and fraud in all its forms. Thus, I hereby express CGD's intention to continuously support and disseminate such principles within its sphere of influence.

In our annual Communication on Progress (COP) I believe you will acknowledge our ambition to integrate the UNGC Principles into our day-to-day activities, promoting their adoption on behalf of the companies that are part of CGD Group worldwide, and assembly to publicize such pledges among our stakeholders and the general public. Furthermore, we remain committed to responsible business areas, complying with the 17 Sustainable Development Goals (SGDs) and engaging in multistakeholder projects to promote and deliver solutions, at a local level, to help solving some of the global challenges we face.

In this sense, we strongly believe that CGD corporate sustainability strategy embraces both our values and our journey, pursuing impact in a medium to long term vision, stretching the significance of our investments, as we take into account the main role we aim to play in the future of all generations.

We recognize COP as an essential requirement to deliver information and evidence regarding the accountability and transparency of our performance and contribution to the sustainable development and, therefore, undertake to present our report on progress made over the period of one year (2018) in accordance with the *Global Compact COP policy*.

Sincerely,

Paulo Moita de Macedo
