**Date** June 18th, 2019  
**Subject** UNGC: Management Statement 2018

Dear Mr. Secretary-General,

To all stakeholders,

With this statement we inform you that Koninklijke VolkerWessels N.V. supports the ten principles of the United Nations Global Compact concerning human rights, labour, environment and anti-corruption.

Koninklijke VolkerWessels N.V. has the ambition to organise her activities in such a way that they contribute to the quality of life of people. In order to achieve this, we collaborate with all our stakeholders. We pay special attention to the end users of the built environment to which we are contributing every day. Our core values safety, sustainability and integrity are leading in the execution of our activities. Our sustainability policy focuses on material use, on promotion and retention of employment, on reduction of greenhouse gasses and on promotion of integrity and safety, within our sphere of influence.

To speed up our transition to a fully sustainable organisation and society, we still have a way to go. In this light, we decided to speed up our transition to a fully sustainable organisation and society. To further boost our performance, we have identified six focal points for our sustainability efforts in 2019. The six focal points are divided into two categories. For our own sustainable performance we choose to focus on: improving our waste separation rate (1), making our fleet of vehicles more sustainable (2) and offer opportunities to people at a disadvantage on the labour market (3). In order to increase our positive impact on society we chose to focus on circular design strategies (4), sustainable concrete and asphalt (5) and sustainable equipment services (6).

Yours sincerely,  
Chairman of the Management Board Koninklijke VolkerWessels N.V.
