In addition to current provisions facilitating sorting in offices, KDS waste collection is provided by connection to the pneumatic system of transport of waste operated by the municipality of Issy-Les-Moulineaux, within the context of its ISSEO environmental charter.

Reducing paper consumption is a priority that KDS has acted on by setting practical guidelines: the company induces its employees and business associates to make positive efforts to consume less but better and recycle more (ex. a certificate of destruction is delivered monthly indicating the number of saved trees thanks to shredded and recycled paper). Selective sorting is set up in each office of the company.

Rainwater treatment is optimized in the building occupied by other tenants and KDS: retention ponds, storing and draining areas allow to reuse the resource for the needs of the building and to reduce discharges to sewer. Reducing the consumption of drinking water (58% approx. compared to the reference) is provided by a low flow distribution and performant taps with occupancy sensors.
