■ The Board of Directors' Report and financial statements

The Annual and Sustainability Report 2018 for Essity Aktiebolag (publ) has been submitted by the Board of Directors and describes the company's overall objectives and strategies and earnings for the year. The aim is to describe the business from an economic, social and environmental perspective. The Board of Directors' Report and financial statements are presented on pages 6–8 and 20–126 and include the auditor's report. Pages 33–45 and 114–121 encompass Essity's statutory sustainability report according to the requirements stated in the Annual Accounts Act. The company's business model can be found on page 11. The report was prepared in accordance with GRI Reporting Standards: Core. It also constitutes Essity's Communication on Progress (COP) to the UN Global Compact.

This is Essity

Essity is a leading global hygiene and health company. We improve people's well-being through our products and services.

Sales are conducted in approximately 150 countries under the globally leading brands TENA and Tork, and other strong brands, such as JOBST, Leukoplast, Libero, Libresse, Lotus, Nosotras, Saba, Tempo, Vinda and Zewa.

Essity is listed on Nasdaq Stockholm.

Our business areas

Personal Care

Essity is a leading global player in personal care. Our offering includes Incontinence Products, Baby Care, Feminine Care and Medical Solutions. In the market for incontinence products, Essity is the global market leader and the Group holds strong market positions in baby care, feminine care and medical solutions. Read more on pages 22–23.

Consumer Tissue

Essity is the world's second largest supplier of consumer tissue. Our offering includes toilet paper, household towels, handkerchiefs, facial tissues, wet wipes and napkins. Read more on pages 24–25.

Professional Hygiene

Essity is the world's largest supplier of products and services in the market for professional hygiene. Our offering comprises complete hygiene solutions, including toilet paper, paper hand towels, napkins, hand soap and dispensers. Read more on pages 26–27.

Our strengths

Leading market positions in an attractive and growing hygiene and health market

Essity is a leading global hygiene and health company. We have sales in approximately 150 countries and hold the number one or number two position within at least one product category in approximately 90 countries.

Shifts in global demographics such as population growth and increased longevity as well as higher disposable income point to continued good growth for hygiene and health products. An aging population and increased prevalence of chronic diseases, such as obesity and diabetes, and greater life expectancy of people with chronic diseases, are expected to increase demand for incontinence products and medical solutions. Market growth for hygiene and health products is also positively impacted by increased awareness of the importance of hygiene to avoid diseases and improve health.

Essity holds a strong position in several key emerging markets, such as China, Latin America and Russia. We are the majority shareholder in Vinda, one of China's largest hygiene companies. Emerging markets accounted for 35% of Essity's net sales in 2018. The growth potential for hygiene and health products is high in emerging markets where market penetration is significantly lower than in mature markets and where urbanization, higher disposable income, the development of the retail trade and improved access to health care are resulting in increased demand for hygiene and health products.

Strong brands and successful innovations

Essity is the global market leader in incontinence products with the TENA brand and in Professional Hygiene with the Tork brand. We also have strong brands and market positions in the markets for baby care, feminine care, medical solutions and consumer tissue. Essity's offerings simplify everyday life for hundreds of millions of people worldwide every day. In 2018, we launched important innovations that offer greater value for customers and consumers while also reducing resource consumption. As an important element in our innovation work, we develop market-leading digital products and services in hygiene and health.

Focus on efficiency improvements and cost savings

Essity continuously works to improve efficiency in order to strengthen competitiveness, cut costs and improve earnings. By streamlining the supply chain and leveraging digitalization and economies of scale, a more efficient value chain is achieved. Improved capital efficiency, lower costs and strengthened cash flow are made possible through efficiency improvements and savings measures, as well as the optimization of capital employed.

To improve profitability and strengthen the company's long-term cost efficiency, Essity introduced a Group-wide cost-savings program in September 2018. The program is in addition to the efficiency initiatives already in progress in the company. Changes were also made to the company's organizational structure and Executive Management Team.

Sustainable business model with profitable growth and strong cash flow

Essity's sustainable business model creates value for both people and nature. Essity's objective is to develop products and services that contribute toward a sustainable and circular society where we strive to reduce resource consumption and to offer efficient recycling or composting of our products. In 2018, Essity was included in Dow Jones Sustainability Index and named industry leader in the Household Products sector.

Through continuous work to grow profitable market positions, improve or exit underperforming positions, and successful innovations and efficiency improvements, Essity has demonstrated profitable growth and strong cash flow. Between 2014 and 2018, Essity's net sales increased 34.7%. Organic net sales increased 13.3%, corresponding to an annual increase of 3.2%. During the same period, adjusted EBITA¹⁾ increased 36% and the adjusted EBITA margin¹⁾ increased from 10.8% to 10.9%. The company has generated strong cash flow and in 2018, operating cash flow amounted to SEK 12,324m.

2018 at a glance

Key events

- **Successful innovations**

In all product categories innovations were launched that strengthened Essity's customer and consumer offering.

- **Essity industry leader in Dow Jones Sustainability Index**

Essity qualified for inclusion in the Dow Jones Sustainability World Index and the Dow Jones Sustainability Europe Index, and was named industry leader in the Household Products sector.

- **Restructuring measures in tissue production**

To further improve cost and capital efficiency in Consumer Tissue and Professional Hygiene, decisions were taken on restructuring measures in tissue production in Europe, North America and Latin America.

- **Group-wide cost-savings program**

To improve profitability and strengthen long-term cost efficiency, a Group-wide cost-savings program was introduced. The program is expected to generate annual cost savings of approximately SEK 900m, with full effect at the end of 2019.

- **New organization**

To strengthen competitiveness and increase efficiency, changes were made to the organizational structure and Executive Management Team.

Key figures

2018 compared with 2017

- Organic net sales, which exclude exchange rate effects, acquisitions and divestments, increased 2.6%, of which volume accounted for 0.5% and price/mix for 2.1%. Organic net sales increased 0.9% in mature markets and increased 5.9% in emerging markets. Emerging markets accounted for 35% of net sales.
- Adjusted operating profit before amortization of acquisition-related intangible assets (adjusted EBITA) declined 4% (11% excluding currency translation effects and acquisitions) to SEK 12,935m (13,405). Higher prices, better mix, higher volumes, cost savings and the acquisition of BSN medical had a positive impact on earnings.

¹⁾ Net sales excluding exchange rate effects, acquisitions and divestments.

Operating cash flow

Progress in many areas during a challenging year

In 2018, we strengthened our brands through successful innovations, improved our product mix, implemented price increases and intensified efficiency improvements and restructuring measures. We took actions in all parts of the business to increase profitability and offset the negative impact on earnings of the significantly higher raw material and energy costs. The work to contribute to a sustainable and circular society was rewarded. We qualified for inclusion in the Dow Jones Sustainability Index and were named industry leader in the Household Products sector. External factors made 2018 a challenging year, but with a strong customer focus and hard work we strengthened the business for the future.

Earnings trend

In 2018, organic net sales increased 2.6%. In emerging markets, which accounted for 35% of net sales, the increase was 5.9%. The adjusted EBITA margin¹⁾ declined 1.4 percentage points to 10.9%. Price increases, improved product mix, volume growth and cost savings enabled us to offset a large share of the higher raw material and energy costs, which had a negative impact on the margin of 4.2 percentage points.

Measures to increase profitability

We continued to invest in our strong brands and improved our product mix through innovations. During the year, we implemented price increases in all business areas and further price increases are anticipated in 2019. We intensified our efficiency improvements and restructuring of the business and achieved SEK 1,040m in cost savings during the year. These cost savings were primarily a result of measures as part of Tissue Roadmap, operational efficiency improvements, material rationalizations and sourcing savings. To improve profitability and strengthen long-term cost efficiency, a Group-wide cost-savings program was launched in 2018. We also made changes to the company's organizational structure and Executive Management Team.

Innovation for increased customer and consumer value

With a focus on our customers and consumers, we launched successful innovations in all product categories, which strengthened our brands and market positions. Within Incontinence Products, with our globally leading TENA brand we, for example, improved our offering with TENA Complete™, a high-quality and cost-efficient incontinence product that represents an improvement

“Poor hygiene and sanitation constitute a barrier for the health, livelihood, well-being, and development of millions of people. Our vision is: Dedicated to improving well-being through leading hygiene and health solutions.”

¹⁾ Excluding items affecting comparability.

for both users and caregivers. In the retail trade, we launched TENA Men and lights by TENA with higher absorption, better fit and discretion. Within Medical Solutions, we launched Cutimed® Siltec® Sorbact®, a dressing for chronic wounds. With our globally leading Tork brand, we launched in Professional Hygiene our new Tork Reflex® paper dispenser. Within Consumer Tissue, we launched Lotus Moltonel Sans Tube, our first coreless toilet paper.

Digitalization in all parts of the business

For Essity, digitalization offers many opportunities to optimize and develop all parts of our value chain. In 2018, we robotized and automated processes to improve product quality and efficiency in production, administration and logistics. We are working to develop digital solutions that improve our offering to customers and consumers. Our online sales increased in 2018. Together with the retail trade and e-commerce, we are developing and strengthening our presence in this channel. The target is to have at least the same market share online as offline in all markets and for all product categories.

With a vision of improving well-being

Poor hygiene and sanitation constitute a barrier for the health, livelihood, well-being, and development of millions of people. Our vision is: Dedicated to improving well-being through leading hygiene and health solutions. In 2018, hundreds of millions of people across the world used our products every day and we educated approximately 2.5 million people in hygiene and health during the year. Knowledge is the key to improved hygiene and health, at the same time as this creates business opportunities for us. Through our business model, we also contribute toward the UN Sustainable Development Goals (SDGs) and we were the convening partner for the United Nations Foundation Global Dialogue concerning these goals. Essity supports the UN Global Compact.

Sustainable development

We develop products and services that contribute toward a sustainable and circular society in order to be relevant both today and in the future. One important aspect of this is to offer products and services that help customers and consumers reduce their environmental impact. We endeavor to reduce resource consumption and enable efficient recycling of our products. To achieve this, we need innovation and collaboration. Our Tork PaperCircle™ innovation, the world's first recycling service for paper hand towels, is one example. In 2018, our new targets to reduce greenhouse gas emissions were approved by the Science Based Targets initiative. This means that our climate commitment supports the Paris Agreement's target to keep global warming below 2 degrees Celsius.

With the TENA brand, Essity is the global market leader in incontinence products.

Developing our employees and corporate culture

Health and safety is a top priority for Essity. Essity's aim is zero workplace accidents and we are working continuously to nurture a culture where safety is a top priority and where unsafe working conditions and behaviors are immediately reported and resolved. During the year, we updated our Code of Conduct, which describes how we conduct our operations in a responsible manner and helps our employees make correct decisions in their day-to-day work. We conducted our first employee survey as Essity. The survey shows strong employee engagement with particularly high scores in areas such as collaboration, results orientation, team spirit, health and safety.

Looking ahead

We prioritize growth in product categories where we have the highest margins, meaning that Incontinence Products, Medical Solutions, Feminine Care and Professional Hygiene are to account for an increasing share of Essity's net sales in the future. In Consumer Tissue and Baby Care, our priority is to improve margins. In addition to organic growth, our ambition is to grow through

acquisitions. One prioritized area for acquisitions is Medical Solutions, a product category with favorable growth opportunities and high margins, where we – through the acquisition of BSN medical – have created a growth platform that we aim to grow both organically and through acquisitions.

Our ambition is to improve the well-being of 2 billion people every day by 2030. We plan to achieve this through our unique knowledge and insight about the needs of customers and consumers and our ability to transform this into innovative offerings that increase well-being and simplify everyday life for people, regardless of where you live in the world.

Magnus Groth
President and CEO

The Essity share

Essity shares are quoted and traded on Nasdaq Stockholm. Essity's market capitalization was SEK 153bn at December 31, 2018.

Share price performance

In 2018, the price of Essity's B share declined 7%. During the same period, the OMX Stockholm 30 Index fell 11% and MSCI Household Products Index fell 6%. The closing price of Essity's B share at year-end was SEK 217.60. The highest closing price for Essity's B share during the year was SEK 240.50, which was noted on January 26, 2018. The lowest closing price was SEK 204.70 on October 29, 2018.

The total shareholder return for Essity's B share for the year was -4%. The total shareholder return for the OMX Stockholm 30 Index was -7% and for MSCI Household Products Index -3%.

Dividend and dividend policy

Essity aims to provide long-term stable and rising dividends to its shareholders. When cash flow from current operations exceeds what the company can invest in profitable expansion over the long term, and under the condition that the capital structure target is met, the surplus shall be distributed to the shareholders.

The Board of Directors proposes a dividend of SEK 5.75 per share for the 2018 fiscal year. The 2018 dividend represents a dividend yield of 2.6%, based on Essity's share price at the end of the year.

Index

On Nasdaq Stockholm, Essity is included in the OMX Stockholm 30 Index, OMX Nordic 40 Index and in the Personal & Household Goods sector within Consumer Goods. In addition to indexes directly linked to Nasdaq Stockholm, Essity is included in other indexes, such as the FTSE Eurofirst Index and FTSE All World Index.

Within MSCI, Essity is included in Household Products Index within Consumer Staples. Essity is also represented in sustainability indexes including the Dow Jones Sustainability Index and the FTSE4Good Global Index.

Shareholders structure

46% of the share capital is owned by investors registered in Sweden and 54% by foreign investors. The US and the UK account for the highest percentage of shareholders registered outside Sweden. Of Essity's shareholders, at least 22% perform sustainability assessments.

Beta coefficient

The beta coefficient for Essity's B share was 0.55 in 2018. A beta coefficient of less than 1 indicates that the share is less sensitive to market fluctuations than the average.

Liquidity

In 2018, the volume of Essity shares traded on Nasdaq Stockholm was about 341 million, corresponding to a value of approximately SEK 77bn. Average daily trading for Essity on Nasdaq Stockholm amounted to approximately 1.4 million shares, corresponding to a value of approximately SEK 307m.

¹⁾ At the Annual General Meeting, held on April 5, 2017, shareholders resolved on a bonus issue. The purpose of the bonus issue was to increase the share capital and number of shares so they would correspond to the number of shares in SCA ahead of SCAs distribution of Essity.

Information to shareholders

Annual General Meeting

The Annual General Meeting of Essity Aktiebolag (publ) will be held on Thursday, April 4, 2019 at 3:00 p.m. at the Stockholm Waterfront Congress Centre, Nils Ericsons Plan 4, Stockholm, Sweden. Registration for the Annual General Meeting will start at 1:30 p.m.

Notification of attendance

Shareholders who wish to attend the Annual General Meeting must be listed in the shareholders' register maintained by Euroclear Sweden AB on Friday, March 29, 2019, and give notice of their intention to attend the meeting no later than Friday, March 29, 2019.

Notification may be given in any of the following manners:

- by telephone +46 8 402 90 80, weekdays between 8 a.m. and 5 p.m.
- on the company website www.essity.com
- by mail to Essity Aktiebolag (publ), Group Function Legal Affairs, P.O. Box 200, SE-101 23 Stockholm, Sweden

The following applies to shareholders who have their shares registered through a bank or other nominee in order to be entitled to attend the meeting. Apart from giving notice of attendance, such shareholders must have their shares registered in their own names. Such registration in the shareholders' register must have been completed with Euroclear Sweden AB at the latest on Friday, March 29, 2019. Shareholders should in such case inform their bank or nominee of this in due time before Friday, March 29, 2019. Such registration can be temporary.

Name, personal identity number/corporate registration number, address and telephone number, and number of accompanying persons, if any, should be stated when notification is given. Shareholders represented by proxy should deliver a proxy in the original to the company prior to the annual general meeting. Proxy forms are available upon request and on the company website www.essity.com. Anyone representing a corporate entity must also present a copy of the registration certificate, not older than one year, or equivalent authorisation document, listing the authorised signatories.

The Notice convening the Annual General Meeting can be found on the company website www.essity.com.

Nomination Committee

- Helena Stjernholm, AB Industrivärden, Chairman of the Nomination Committee
- Petter Johnsen, Norges Bank Investment Management
- Stefan Nilsson, Handelsbanken Pension Funds and others
- Marianne Nilsson, Swedbank Robur Funds
- Pär Boman, Chairman of the Board, Essity

The Nomination Committee prepares, among other things, the proposal for election of Board members. In addition, refer to the Corporate Governance Report on page 46.

Dividend

The Board of Directors proposes a dividend of SEK 5.75 per share and that the record date for the dividend be Monday, April 8, 2019. Payment through Euroclear Sweden AB is expected to be made on Thursday, April 11, 2019.

Our external environment

Drawing up Essity’s business strategy, we analyze the external trends and changes that are continuously ongoing. We identify the macro-economic drivers that we believe are most relevant to our business in order to leverage the opportunities and to manage the associated risks. We analyze how trends can impact Essity and how the company can benefit from these.

We maintain continuous dialogue with customers and consumers to develop products and services that meet needs and solve the challenges that many are facing in their everyday lives. The foundation of Essity’s strategy is a materiality analysis where Essity and company’s stakeholders prioritize the issues and areas that are deemed important for the company. Through this process, Essity creates a strategy for profitable and sustainable growth.

External trends and drivers

Growing and aging population

The world’s population is growing and living longer. This growing population is resulting in an increased demand for hygiene and health products and thus creating favorable growth opportunities for Essity. The greatest global population increase is expected to occur in Asia, Latin America and Africa. Essity is prioritizing growth in selected emerging markets, such as China, Southeast Asia, Latin America, Eastern Europe and Russia. An aging population is increasing demand for incontinence and health products, both in mature and emerging markets. For example, the occurrence of incontinence among people over the age of 65 is estimated to be between 15 and 20%.

Higher standard of living

At the same time as the population is growing, the level of poverty in the world is decreasing. Once people’s most basic needs for food and shelter are met, hygiene becomes a top priority. Increased disposable income and higher living standards are expected to drive demand for hygiene and health products.

Global insight into hygiene and health

Limited access to hygiene and sanitation is a major global challenge. There is a growing awareness of the relationship between good hygiene and health, and how this improves well-being in the world, as indicated by the UN’s 17 Sustainable Development Goals. Essity continuously develops new hygiene and health solutions and is educating, for example, healthcare and medical staff in incontinence and good hand hygiene. Young women are educated about menstruation and puberty, and children and preschool teachers are taught about the importance of good hand hygiene.

Increased prevalence of chronic conditions

Increased prevalence of chronic diseases and greater life expectancy of people with chronic conditions are expected to increase demand for such items as incontinence and health products.

Digitalization

The digitalization of our society entails substantial changes and opportunities. For Essity, digitalization offers a variety of opportunities to improve and evolve all parts of our value chain. We are digitalizing production, administration and logistics to achieve efficiency and quality improvements. In product development, we are working to create digital solutions that improve our offering to customers and consumers. Each year, Essity’s products are increasingly sold and marketed online.

Sustainable consumption and the circular economy

Conscious customers and consumers are increasing expectations on, and demand for, sustainable solutions. Essity’s objective is to develop products and services that are compatible with a sustainable and circular society.

Risks

The annual strategy process includes an analysis phase and assessment of the risks present in the business units.

The responsibility for long-term and overall management of strategic risks follows the company’s delegation scheme, from the Board of Directors to the President, and from the President to the Business Unit Presidents. A description of the most significant risks that impact Essity’s opportunities to achieve its established targets, and how these risks are managed, is presented on pages 33–38.

External dialogue and materiality analysis

An active stakeholder dialogue is one way of ensuring that Essity’s priorities and ways of working are relevant in today’s society. Millions of people across the globe have an impact on, and an interest in, Essity’s business. Through dialogue with our various stakeholders, we understand the expectations on us as a company and how we can develop and improve. We also conduct materiality analyses to identify the issues that are significant to us at Essity and to our stakeholders. These also form the basis of Essity’s strategy and sustainability work. The latest analysis was conducted in 2017 of about 1,000 stakeholders including customers, consumers, suppliers, investors, analysts and employees.

UN’s 17 Sustainable Development Goals

At Essity, we believe that the work to fulfill the sustainability goals will make the world a better place while offering favorable business opportunities for companies around the world, not least in the areas of health, hygiene and sanitation, where we possess substantial expertise. We are working to overcome global challenges together with like-minded partners. Essity has chosen to prioritize goals 3, 5, 6, 12, 13 and 15, which are most relevant to our business. For a number of years, Essity has been the convening partner for the United Nations Foundation Global Dialogue concerning these goals.

Essity's strategic framework

Essity's vision is: Dedicated to improving well-being through leading hygiene and health solutions. **Our strategy is designed to generate value for all of the company's stakeholders with a focus on profitable growth. Operations are based on a sustainable business model, focused on value creation for customers and consumers. Essity's vision has been broken down into four objectives and four strategies with clear connections to stakeholder groups, such as shareholders, customers and consumers, society and employees.**

Essity’s business model

Our customers and consumers are at the center of Essity’s business model. We begin by building knowledge and understanding of their daily needs and challenges. This unique insight allows us to develop products and services to help simplify everyday life for hundreds of millions of people worldwide.

Innovations and product launches are a top priority when it comes to delivering increased customer and consumer value and strengthening Essity’s brands and market positions. To contribute to a sustainable and circular society, there is a need for new business solutions and innovations that close the loop.

Input goods, such as pulp, recovered fiber and oil-based raw materials are sourced through a centralized purchasing function to achieve economies of scale and a stronger negotiating position. Essity works throughout the supply chain

to guarantee responsible sourcing and we subject our suppliers to stringent demands.

Essity has approximately 90 production facilities worldwide for manufacturing Personal Care, Consumer Tissue and Professional Hygiene products. Efficiency work at our facilities is a continuous process, and includes digitalization and automation, in order to achieve sustainable, efficient, world-class production.

Essity is the global market leader in incontinence products with the TENA brand and in professional hygiene with the

Tork brand. Essity also has strong brands in other product categories. Essity has sales in approximately 150 countries and a well-developed and efficient “go-to-market” model. Our products are distributed in a number of ways, from small convenience stores in rural areas to supermarkets, hospitals, healthcare centers, restaurants, pharmacies and e-commerce. In 2018, the retail trade accounted for 58% of Essity’s net sales, business-to-business for 24% and the healthcare sector for 18%.

Objectives, targets and outcomes

Generate increased shareholder value through profitable growth

Essity works to generate long-term value for its shareholders and that the Essity share is to have a higher total shareholder return than competitors.

Essity focuses on profitable growth in order to increase the Group’s value creation and the total shareholder return. We prioritize growth in our product categories

with the highest margins and our ambition is that these will account for an increasing share of Essity’s net sales. In addition to organic sales growth, Essity sees an opportunity to also grow through acquisitions. With respect to underperforming market positions, we are primarily focusing on improving profitability. To strengthen competitiveness and improve profitability,

Essity is also constantly working to reduce the cost base related to cost of goods sold as well as costs for sales and administration.

Shareholder value is achieved through a positive share price trend and dividends.

Read more about the Essity share on pages 6–7.

	Target	Outcome 2018
Organic sales growth¹⁾	Annual organic sales growth of above 3%. >3%	2.6%
Adjusted return on capital employed²⁾	Adjusted return on capital employed of above 15%. >15%	12.0%

Policy and outcomes 2018

Dividend Policy: Essity aims to provide long-term stable and rising dividends to its shareholders. When cash flow from current operations exceeds what the company can invest in profitable expansion over the long term, and under the condition that the capital structure target is met, the surplus shall be distributed to the shareholders. The Board of Directors proposes a dividend of SEK 5.75 per share for the 2018 fiscal year.

Capital Structure Policy: Essity’s target is to have an effective capital structure at the same time that the long-term access to debt financing is ensured. Cash flow in relation to net debt shall take into account the target to maintain a solid investment grade rating. In 2018, Essity had a solid investment grade rating.

¹⁾ Net sales excluding exchange rate effects, acquisitions and divestments.

²⁾ Excluding items affecting comparability.

Tork PeakServe®

A new paper hand towel system specifically tailored for high-traffic areas. Tork PeakServe® was launched in Europe in 2017 and in North America in 2018.

Enable more people every day to enjoy a fuller life

Essity aims to enable more people every day to enjoy a fuller life. To do so, we are working on sharing our knowledge with customers and consumers through education in hygiene and health and by pursuing a global dialogue about hygiene, health and well-being. At the same time, we are also creating business opportunities.

What makes Essity successful is the knowledge and insight about the needs of customers and consumers and the ability to transform this into innovative offerings that increase quality of life and make everyday life easier for people. Essity wants to offer customers and consumers value-added hygiene and health solutions.

We adapt our offering to local and regional market conditions to increase hygiene and health standards worldwide.

Essity's ambition is to improve well-being of 2 billion people every day by 2030.

	Target	Outcome 2018
<p>People and nature innovations</p> <p>We will deliver better, safe and environmentally sound solutions to our customers. We strive to continuously improve resource efficiency and reduce our environmental impact by considering the whole life cycle for new innovations.</p>	<p>At least 33% of Essity's innovations will yield social and/or environmental improvements.</p> <p>33%</p>	<p>59%</p>
<p>Hygiene solutions</p> <p>We will make our knowledge about hygiene and health available to customers and consumers and ensure access to affordable, sustainable solutions to help them lead a healthy and dignified life. In markets in which we operate, we will:</p> <ul style="list-style-type: none"> • Provide information and implement education programs on hygiene and health • Strive to raise hygiene and health standards 		<p>Worldwide, around 2.5 million people were reached by hygiene and health training arranged by Essity.</p> <p>Hundreds of millions of people used Essity's products every day.</p> <p>Essity held the number one or two position in at least one product category in approximately 90 countries.</p>

Our contribution to the UN Sustainable Development Goals

3 GOOD HEALTH AND WELL-BEING
Goal 3 Good health and well-being
 Our contribution toward Goal 3 includes developing sustainable products and services for hygiene and health, educating consumers and care professionals, and preventing the spread of diseases and other health risks. Business value is also created by meeting societal needs. This offers more people an opportunity to work, better conditions to provide for their families and increased well-being.

5 GENDER EQUALITY
Goal 5 Gender equality
 Essity works to break the silence around issues such as menstruation and incontinence. We want a society where everyone can fully participate. Essity's contribution toward Goal 5 includes pursuing a global dialogue, making our knowledge about hygiene and health available to customers and consumers and ensuring access to affordable, sustainable hygiene and health solutions to contribute to a dignified life on equal terms.

6 CLEAN WATER AND SANITATION
Goal 6 Clean water and sanitation
 Our contribution toward Goal 6 covers our work to achieve efficient water usage throughout the entire life cycle of our products and improve access to sustainable sanitation and hygiene solutions. Essity works independently as well as with partners to contribute to sustainable water use and sanitation.

Contribute to a sustainable and circular society

Essity's objective is to develop products and services for a sustainable and circular society. Circularity is a business model that involves striving to reduce resource consumption and an efficient recycling or composting of our hygiene and health products. This means we must include this in our innovation work and develop new business models that create new business opportunities for Essity.

Our ambition is that our environmental footprint will be reduced by 33% in 2030. In December 2018, Essity's expanded climate targets for carbon emissions were

approved by the Science Based Targets initiative. The initiative is a collaboration between for example CDP, the UN Global Compact and the WWF and includes a scientific method to ensure that companies' targets for the reduction of carbon emissions are aligned with the global climate target set by the Paris Agreement to keep global warming below 2 degrees Celsius. We are committed to reducing our climate impact linked to energy use and purchased electricity (Scope 1 and 2), and our indirect climate impact from material use, transportation and waste management, which includes emissions from suppliers and consumers (Scope 3).

Essity is working to promote sustainable and responsible business by choosing suppliers who share our values and comply with our Code of Conduct and Global Supplier Standard. In 2018, we strengthened our target for sourcing of fresh fiber. This means all fresh wood based fiber raw material in our products and packaging will be FSC® or PEFC™ certified.

	Target	Outcome 2018		Target	Outcome 2018
Science-Based Targets Essity has undertaken by 2030, with 2016 as reference year, to reduce the climate impact of:					
– Scope 1 and Scope 2	-25%	-5%		100%	76%¹⁾
– Scope 3	-18%	-5%	The outcome will be reported as of 2019	100%	60%
Suppliers: We will evaluate all of our supply streams from a total risk perspective. By 2020, we will source all of our procurement spend from suppliers committed to the criteria specified in Essity's Global Supplier Standard.					
	100%	71%			
Fiber: All fresh wood based fiber raw material in our products and packaging will be FSC® or PEFC™ certified.				100%	76%¹⁾
Waste: All waste from all production units will be subject to material and energy recovery by 2030.				100%	60%
Water: By 2020, with 2014 as reference year, our plants will:					
• reduce levels of suspended solids	-10%	-19%			
• reduce water usage	-10%	-3%			
• reduce organic waste (BOD)	-10%	-25%			

¹⁾ As of 2018, material that fulfills FSC's criteria for Controlled Wood is not included in the fiber target, which explains the decrease compared with 2017. All fiber must fulfill these criteria as a basic requirement.

Our contribution to the UN Sustainable Development Goals

Goal 12 Responsible consumption and production
 Essity's contribution toward Goal 12 consists of establishing collaboration for customers and consumers within consumption and circularity. This could involve highlighting sustainability criteria in public procurements and changing behavior through the use of new business models, technology and education of customers and consumers.

Goal 13 Climate action
 Essity's contribution toward Goal 13 involves improving resource efficiency in manufacturing, achieving Science-Based Targets to reduce greenhouse gas emissions and supporting relevant external initiatives and agreements.

Goal 15 Life on land
 We work to promote responsible forest operations throughout our supply chain and require our suppliers to fulfill very strict criteria stipulated in our Global Supplier Standard and in our fiber policy. Essity's contribution toward Goal 15 consists of the certification of suppliers and our own production, ensuring the use of certified fiber in Essity's products and packaging and the responsible use of other input goods.

Enable our employees to realize their full potential, as part of one winning team

We offer career opportunities in a leading global hygiene and health company that is working to increase well-being in the world through leading hygiene and health solutions. Improved hygiene and health are basic conditions for a better life and play a vital role in well-being.

The health and safety of our employees is a top priority. We are striving to continuously improve the work environment to make it safe and healthy. Everyone should feel safe when they work for Essity. Managers, employees and partners receive training on a regular basis and all Essity plants have plans to improve safety at their facilities.

Essity's success is dependent upon motivated, competent and performance-

oriented employees. Our ambition is that all employees will reach their full potential, and assume responsibility for driving their own development. To achieve the objective, we work to continuously develop our corporate culture, our leadership and to provide a number of programs and initiatives to build capabilities.

Essity offers a strong corporate culture based on our "Beliefs & Behaviors": we are committed, we care, we collaborate, and we have courage. These express, in different ways, what is required of all employees to successfully develop Essity. Our "Beliefs & Behaviors" are supplemented by Essity's Code of Conduct, which was updated in 2018. The Code of Conduct instructs

employees in how we conduct our business in a responsible manner to benefit our company, society and the environment. The Code helps employees to make correct decisions in daily work.

In 2018, Essity conducted a global employee survey. This was completely digital and the response rate was 80%. The survey shows strong employee engagement with particularly high scores in areas such as collaboration, results orientation, team spirit, health and safety.

Target

Outcome 2018

Employee Health and Safety

Our aim is zero workplace accidents, and we will decrease our accident frequency rate by 50% between 2014 and 2020.

-50%

-39%

Business ethics and human rights

We will maintain compliance with our Essity Code of Conduct. All employees will receive regular training in the Code.

100%

90% of new employees received training in the Code.

Strategies

Saba® buenas noches® panties

Provides a close fit and more pleasant experience for users compared to a pad thanks to its unique 360° protection system™, which perfectly adapts to the body to protect against stains.

Win in chosen geographies and categories

We aim to hold a number one or number two position in the geographies and product categories where Essity chooses to operate. We compare ourselves with the best competitors in each product category in each geographic market and aim to perform better or in line with the best competitor.

Prioritized markets

Essity has a clear priority for which geographic markets it wants to operate in, and which product categories it will offer in these markets. Sales are conducted in approximately 150 countries. In approximately 90 of these, Essity holds the number one or two position in at least one product category. Essity aims to increase the emerging markets' percentage of net sales and earnings, since these markets' potential for growth is higher because market penetration of hygiene and health

products is lower than in the mature markets. We are prioritizing growth in selected emerging markets such as China, South-east Asia, Latin America, Eastern Europe and Russia, where we already have strong market positions. In emerging markets, which accounted for 35% of net sales, organic net sales increased 5.9% in 2018.

Profitable growth

Essity creates value through profitable growth. Every product category in each market must generate a certain level of profitability if growth is to create value. In 2018, we continued work with Cure or Kill, a plan to improve profitability for underperforming market positions. We prioritize growth in product categories with the highest margins and our ambition is that these will account for an increasing share of Essity's net sales. This means we are focusing on growth in Incontinence Prod-

ucts, Medical Solutions, Feminine Care and Professional Hygiene while prioritizing improved margins in Consumer Tissue and Baby Care. In addition to organic growth, Essity has the ambition to grow through acquisitions.

Expanding the customer offering

To grow our product categories and strengthen market positions, we work continuously to improve and expand our customer and consumer offering. For example, Essity offers wet wipes, skincare products and soap. Expanding the customer offering is also about providing service and solutions to customers and consumers and developing digital solutions.

Focus on customers and consumers

Essity's products and services help to simplify everyday life for hundreds of millions of people. To succeed, we have to understand the needs, challenges and expectations of our customers and consumers. Customer understanding and consumer insight determine the innovations we develop and how we deliver finished products or services to the market.

Continuous customer and consumer dialogue

Important competitive advantages for Essity are our understanding, knowledge and insight into the needs and purchasing behavior of customers and consumers as well as our global expertise, strong customer relations and knowledge of local and regional market conditions. To understand the needs and expectations, we engage in a continuous dialogue with customers, consumers and patients. We study the world around us to identify trends and new needs. Our sales representatives provide us with insight about our customers

and we conduct regular customer satisfaction surveys. We engage in a dialogue with consumers through focus groups and in-depth interviews. We observe consumer and customer behavior, for example, through home visits. We also gain insight into the needs of consumers and their perceptions of our products by following the discussions on our websites, such as www.libero.com, www.libresse.com and www.tena.com, and on social media.

Digital sales and marketing

By developing market-leading digital solutions in hygiene and health, we improve our offering to customers and consumers. One example is our webshops for incontinence products. The TENA Webshop for consumers is available in 21 countries. The webshop is a strategic sales channel to increase knowledge about incontinence, drive market penetration and provide us with further consumer insight. In 2018, the webshop was further developed and adapted for mobile phones.

Examples of awards in 2018

“Innovation Award”

from Sodexo Supply Management for Tork EasyCube®

“Supplier of the Year”

from Network, an organization with 75 independent distributors in North America

“Cornerstone Partner Award”

from Gordon Food Service (GFS) in North America

“Guldnyckeln”

to Libresse's digital marketing campaign The Period Challenge

“Best Brands 2018”

awarded by the German newspaper Lebensmittel Zeitung to Tempo and Zewa

“Best Toilet Paper – Zewa Just1”

“Best Daily Feminine Liners – Libresse Dailyfresh”

from A.S. Watson Group at the “Consumers’ Choice” ceremony in Russia

TENA Complete™ is a high-quality and cost-efficient incontinence product that improves for users and caregivers.

Innovate bigger brands

Successful innovations and strong brands go hand in hand. During 2018, Essity launched 29 innovations that simplify everyday life for people and strengthen Essity’s brands and market positions. Essity’s innovation strategy is to consistently deliver better, safer and more environmentally sound products and services to our customers and consumers. We intend to increase the pace and impact of our innovations as well as capitalize on global economies of scale and ensure that we have a competitive portfolio of innovations.

Innovation for a sustainable and circular society

During the year, Essity’s unit with global responsibility for customer and consumer brands and innovation was given a new name: Global Brand, Innovation and Sustainability. The unit now also covers sustainability and public affairs, since innovation and product development are crucial for pursuing and improving our sustainability efforts. We are developing offerings and business models that promote a sustainable and circular society, both to meet the needs of our customers and consumers and to reduce our envi-

ronmental impact. We strive to develop better solutions for efficient recycling or composting of our products.

Digital applications

To increase customer and consumer benefit and to strengthen Essity’s brands, digital offerings are developed in the various product categories. In Baby Care, for example, with the Libero brand, Essity developed a new app in 2018 that includes a pregnancy calendar, tips and facts from the Libero Club’s own midwife, a parenting forum and the opportunity to create a photo album for the family.

Effective taboo-breaking marketing

Essity’s marketing is often about breaking taboos and stigma surrounding menstruation and incontinence. In 2018, Essity received more than 50 awards, including

Cannes Lions Titanium, Grand Prix Glass Lion for Change and Grand Prix of Excellence at the Marketing Society, for the #bloodnormal advertising campaign. This marketing was a joint initiative for our various Feminine Care brands and had one mission: to break the taboos surrounding menstruation and that are holding back women. We are running the campaign in Mexico under the Saba brand, in the UK under Bodyform and in Malaysia under Libresse.

Awards and initiatives

In 2018, Essity won the “Technological Innovation of the Year” award for the Tork EasyCube® and the “Best Practice: Sustainability” award for Tork PaperCircle™ at the European Cleaning & Hygiene Awards. These are examples of how Essity’s innovation efforts drive increased customer benefit and reduced environmental impact.

Essity joined the Ellen MacArthur Foundation’s New Plastic Economy Global Commitment “A line in the sand” in 2018, where we are working toward 100% recyclability of the company’s packaging by 2025.

Ideal healing conditions
— due to moisture-balancing, highly breathable PU film

Protects wound edges
— with vertical absorption through polyurethane foam

Increased flexibility of absorption capacity
— due to super-absorbent hot melt stripes

Gentle fixation
— due to silicone border

Manages and prevent infections — thanks to the highly effective Sorbact wound contact layer

Cutimed® Siltec® Sorbact® should be the first choice for chronic wounds that require a combination of infection control and exudate management. Cutimed® Siltec® Sorbact® has no known side effects and is therefore a safe alternative to silver dressings. The effect is clinically proven and the product can also be used to prevent infection.

Drive efficiency

Essity is working to leverage global economies of scale and expertise to continuously increase efficiency in all parts of the business, from the supply chain to sales and administration. We are working to establish a world-class supply chain. By improving productivity, reducing material, energy and logistics costs and minimizing waste, we reduce our costs and improve our earnings at the same time as we reduce the environmental impact.

Safety first

Essity is working to nurture a culture where safety is top of mind and unsafe working conditions and behaviors are immediately reported and rectified in order to prevent accidents. Essity's aim is zero workplace accidents. Our employees continuously receive training so that everyone in the organization will be able to detect and eliminate hazards. In 2018, the theme of Essity's annual global safety week was "Everyone is a safety leader — so are you." During 2018, the accident frequency rate decreased by 1% and in 2014–2018 it fell by 39%. The target is to reduce the accident frequency rate by 50% between 2014 and 2020.

Digitalization for world-class production

During the year, we continued to implement digital solutions including self-regulating processes, smart sensors, data analyses and robotization and automation to improve product quality and efficiency.

Cost savings

We have intensified our efficiency improvements and restructuring of the business and achieved SEK 1,040m in cost savings during the year.

To improve efficiency and increase value creation in the Consumer Tissue and Professional Hygiene business areas, Tissue Roadmap was launched in 2016. The aim is to achieve the lowest cost position combined with the best quality in each market in which we choose to operate. As part of the Tissue Roadmap, we took decisions during the year on restructuring measures in Europe, North America and Latin America.

To improve profitability and strengthen long-term cost efficiency, Essity introduced a Group-wide cost-savings program in September 2018. The program is expected to generate annual cost savings of approximately SEK 900m, with full effect at the end of 2019. The cost-savings

Digital quality controls

In 2018, our Personal Care facility in Hoogezand, the Netherlands, has worked to replace the manual quality control of production lines with digital controls to improve both product quality and efficiency.

program is being implemented in all parts of the Group to reduce the cost base related to cost of goods sold and costs for sales, general and administration. The program includes headcount reductions of approximately 1,000 positions and is in addition to the efficiency initiatives already in progress in the company, for example Tissue Roadmap.

Reduced resource consumption

To achieve increased cost savings while contributing to a sustainable and circular society, Essity continued its work during the year on reducing material and energy use. The accumulated energy savings in the 2010–2018 period amounted to 8%.

New organization for increased efficiency

Changes were implemented to the company's organizational structure and

Executive Management Team in 2018. For example, the two units Global Hygiene Supply Tissue and Global Hygiene Supply Personal Care were merged into one unit, Global Manufacturing, with responsibility for production and technology. A new unit, Global Operational Services, was created in order to further strengthen the Group's overall work related to operational and cost efficiency. The unit encompasses sourcing, logistics, business services, IT and digitalization. The number of Group functions was reduced from six to four.

The hygiene and health market

In 2018, the global hygiene and health market amounted to approximately SEK 1,210bn, of which the global market for personal care accounted for approximately SEK 620bn and the global market for tissue accounted for approximately SEK 590bn.

The global market for personal care is divided into baby care (approximately SEK 250bn), feminine care (approximately SEK 140bn), incontinence products (approximately SEK 100bn) and medical solutions (approximately SEK 130bn). The global market for tissue is broken down into consumer tissue (approximately SEK 440bn) and professional hygiene (approximately SEK 150bn).

Market growth is positively impacted by global hygiene and health trends and increased awareness of the importance of hygiene to avoid diseases and improve health.

Personal care market

Growth in consumption of personal care products is supported by favorable demographic trends in emerging and mature markets. Shifts in global demographics such as population growth and increased longevity as well as higher disposable income point to continued good growth for personal care. The effect of higher disposable income is that more people prioritize hygiene when food and housing needs have been, or are in the process of being, satisfied. The growth potential for personal

care is greatest in emerging markets where market penetration is significantly lower than in mature markets and where urbanization, improved infrastructure and the retail trade are evolving rapidly. One example of the lower market penetration in emerging markets is that the consumption rates for incontinence products in Asia are only about one-sixth of those in Western Europe. In mature markets, baby care and feminine care have attained high market penetration. However, market penetration for incontinence products in mature markets is still relatively low for certain product segments, particularly among men, which Essity believes is due to lack of awareness and the stigma associated with incontinence.

Use of feminine care

Source: The information has been compiled by Essity for presentation purposes based on statistics taken from external market sources, including IRI, Price Hanna Consultants and National Macro Economics.

Incontinence, which is classified as a disease by the World Health Organization (WHO), affects 4–8% of the world’s population, corresponding to approximately 400 million people. Many indicators point to the proportion of people affected increasing on a global scale as a result of an aging population. By 2020, the population of the world over the age of 60 is expected to have increased to over one billion. The occurrence of incontinence among people over the age of 65 is expected to be between 15 and 20%.

An aging population and increased prevalence of chronic conditions are expected to increase demand for incontinence products and medical solutions.

Essity’s competitors in personal care include Kimberly-Clark, Procter & Gamble, Unicharm and 3M.

Tissue market

Shifts in global demographics such as population growth and increased longevity as well as higher disposable income point to continued good growth for tissue. The effect of higher disposable income is that more people prioritize hygiene when food and housing needs have been, or are in the process of being, satisfied. The growth potential for tissue is considered greatest in emerging markets where market penetration is significantly lower than in mature markets and where urbanization, improved infrastructure and the retail trade are evolving rapidly. One example of the lower market penetration in emerging markets is that tissue consumption per capita per year in Eastern Europe is only about one-third of that in Western Europe. Growth is also occurring in mature markets

owing to lifestyle changes and innovations that lead to increased use.

Essity’s competitors in tissue include Georgia-Pacific, Hengan, Kimberly-Clark and Sofidel.

Essity is a leading global player in personal care

Offering

Essity's offering includes Incontinence Products, Medical Solutions, Baby Care and Feminine Care. Products are sold under brands such as TENA, JOBST, Leukoplast, Libero, Libresse, Nosotras and Saba, and as retailer brands.

In Incontinence Products, with the globally leading brand TENA, Essity offers a broad range of incontinence products that also includes skincare products, wet wipes and wash gloves. In Baby Care, Essity offers open baby diapers and pant diapers as well as baby care products such as wet wipes, shampoo, lotion and baby oil. In Europe, Essity offers baby diapers under its own Libero and Lotus brands and as retailer brands. In Feminine Care, Essity offers a broad product portfolio that includes pads, panty liners, tampons, intimate soaps and intimate wipes. In Medical Solutions, Essity offers products and services in wound care, vascular and orthopedics.

Distribution channels are the retail trade, online sales, pharmacies, hospitals, distributors and care institutions.

Market positions

Essity is the global market leader in the market for incontinence products with the TENA brand, holding a global market share that is about twice the size of the second largest player. Essity is the market leader in Europe, Asia (excluding Japan) and Latin America. Essity is the third largest player in Asia (including Japan) and the fourth largest in North America.

In Baby Care, Essity is the world's fifth largest player in the area and the second largest in Europe. Essity's strongest market is the Nordic region, where the Libero brand is the market leader. Examples of other strong regional brands are Drypers in South East Asia and Pequeñin in South America.

In Feminine Care, Essity is the world's sixth largest player, the third largest in Europe and the market leader in Latin America. Examples of regional brands supported by Essity's global brand platform in Feminine Care include Libresse in the Nordic region, Russia, Eastern Europe, the Netherlands and Malaysia, Bodyform in the UK, Nana in France, the Middle East and North Africa, and Saba and Nosotras in Latin America.

In Medical Solutions, in the product categories in which the company is active, Essity is the world's fourth largest player. Essity is the market leader in Europe and Latin America. Essity is the largest global player in vascular and the third largest player in orthopedics. In wound care, which includes acute and advanced

wound care, Essity is the sixth largest player. Essity holds the number two position within acute wound care. Examples of strong brands include JOBST, Leukoplast, Cutimed, Delta-Cast and Actimove.

Production facilities

At the end of 2018, Personal Care had production at 37 sites in 24 countries.

Operations in 2018

Net sales increased 11.7% to SEK 45,342m (40,586). Organic net sales, which exclude exchange rate effects, acquisitions and divestments, increased 3.0%, of which volume accounted for 2.4% and price/mix for 0.6%. Organic net sales in mature markets increased 2.3%. In emerging markets, which accounted for 36% of net sales, organic net sales increased 4.4%. Acquisitions increased net sales by 5.8%, of which the acquisition of BSN medical accounted for 4.8% and acquisitions relating to the increase in the shareholding in associates in Latin America accounted for 1.0%. Exchange rate effects increased net sales by 2.9%.

For Incontinence Products, with the globally leading TENA brand, organic net sales increased 4.2%. For Baby Care, organic net sales decreased 2.3%. For Feminine Care, organic net sales increased 9.3%.

Adjusted operating profit before amortization of acquisition-related intangible assets (adjusted EBITA), increased 7% (declined 6% excluding currency translation effects and acquisitions) to SEK 6,354m (5,937). The increase was mainly related to a better price/mix, higher volumes, cost savings and the acquisition of BSN medical. Higher raw material and energy costs and higher distribution costs negatively impacted earnings. Acquisitions increased profit by 7%, of which the acquisition of BSN medical accounted for 6% and acquisitions relating to the increase in the shareholding in associates in Latin America accounted for 1%.

Consumer Tissue

Lotus Moltone! Sans Tube/Zewa Smart
 Our first coreless toilet paper: no empty core to be discarded and thus less waste, and because it holds more paper it lasts longer.

Net sales by region

- Europe, 62%
- Latin America, 12%
- Asia, 26%

For Consumer Tissue, 34% of total net sales was related to retailer brands.

Emerging markets accounted for

of the business area's net sales in 2018. In emerging markets, organic net sales increased by 5.0% in 2018.

Essity is the world's second largest supplier of consumer tissue

Offering

Essity's offering includes toilet paper, household towels, handkerchiefs, facial tissues, wet wipes and napkins. Products are sold under brands such as Edet, Lotus, Regio, Tempo, Vinda and Zewa. In Europe, Essity also sells products under retailer brands. Products sold under Essity's own brands account for about 66% of net sales, while the remaining 34% are sold under retailer brands.

Distribution channels are the retail trade and online sales.

Market positions

Essity is the world's second largest supplier of consumer tissue. Essity's brand portfolio comprises many strong brands.

In Europe, Essity is the market leader and holds a market share that is approximately twice the size of the second largest player. Lotus, Tempo and Zewa are the leading brands in, for example, France, Germany and Russia, while Cushelle, Velvet and Plenty are strong brands in the UK and Ireland, and Edet in the Nordic region and the Netherlands.

Essity is the market leader in China through its majority shareholding in Vinda. Vinda is the leading brand in China.

In Latin America, Essity is the market leader in Colombia and holds the number two position in Mexico. Familia and Regio are leading brands in Colombia and Mexico respectively.

Production facilities

At the end of 2018, Consumer Tissue had production at 47 sites in 19 countries.

Operations in 2018

Net sales increased 7.4% to SEK 45,125m (42,014). Organic net sales, which exclude exchange rate effects, acquisitions and divestments, increased 2.6%, of which volume accounted for -1.1% and price/mix for 3.7%. The increase was mainly attributable to Asia and Europe. Organic net sales increased 0.7% in mature markets. In emerging markets, which accounted for 44% of net sales, organic net sales increased by 5.0%. Acquisitions relating to the increase in the shareholding in associates in Latin America increased net sales by 0.5%. Exchange rate effects increased net sales by 4.3%.

Adjusted operating profit before amortization of acquisition-related intangible assets (adjusted EBITA) decreased 18% (22% excluding currency translation effects and acquisitions) to SEK 3,331m (4,084). Higher prices and a better mix as well as cost savings positively impacted earnings. Higher raw material and energy costs as well as higher distribution costs negatively impacted earnings. The significantly higher raw material costs were mainly the result of higher pulp prices.

of the business area's net sales in 2018. In emerging markets, organic net sales increased by 13.7% in 2018.

Essity is the leading global player in professional hygiene

Offering

Essity's offering comprises complete hygiene solutions, including toilet paper, paper hand towels, napkins, hand soap, hand lotion, hand sanitizers, dispensers, cleaning and wiping products as well as service and maintenance. Essity also offers digital solutions, such as Internet of Things sensor technology.

Customers consist of companies and office buildings, universities, healthcare facilities, industries, restaurants, hotels, stadiums and other public venues. Distribution channels consist of distributors and online sales.

Market positions

Essity is the world's largest supplier of products and services in the market for professional hygiene with the globally leading Tork brand. We are the market leader in Europe and hold a market share that is approximately twice the size of the second largest player. Essity is the second largest supplier in North America and holds a particularly strong market position in the foodservice segment, where we estimate that the company supplies approximately every second napkin. Essity also has strong positions in emerging markets, such as Russia and Colombia, where we are the market leader.

Production facilities

At the end of 2018, Professional Hygiene had production at 45 sites in 18 countries.

Operations in 2018

Net sales increased 4.9% to SEK 28,017m (26,700). Organic net sales, which exclude exchange rate effects, acquisitions and divestments, increased 1.9%, of which volume accounted for -0.3% and price/mix for 2.2%. The increase was primarily related to Europe, Asia and Latin America. Organic net sales decreased 0.6% in mature markets. Organic net sales increased in Western Europe while it decreased in North America. In emerging markets, which accounted for 19% of net sales, organic net sales increased 13.7%. Acquisitions relating to the increase in the shareholding in associates in Latin America increased net sales by 0.1%. Exchange rate effects increased net sales by 2.9%.

Adjusted operating profit before amortization of acquisition-related intangible assets (adjusted EBITA) decreased 4% (8% excluding currency translation effects and acquisitions) to SEK 3,841m (4,004). Earnings were impacted positively by higher prices, a better mix and cost savings. Higher raw material and energy costs as well as higher distribution costs had a negative impact on earnings.

Operations and structure

Essity reports its operations according to three business areas: Personal Care, Consumer Tissue and Professional Hygiene. Personal Care includes the Incontinence Products, Medical Solutions, Baby Care and Feminine Care product categories. Consumer Tissue includes toilet paper, household towels, handkerchiefs, facial tissues, wet wipes and napkins. Professional Hygiene includes complete hygiene solutions, including toilet paper, paper hand towels, napkins, hand soap and dispensers.

Europe is Essity's largest market. The Group also holds strong positions in North America, Latin America and Asia. Expansion takes place through organic growth and acquisitions.

Organization

Essity has the following four business units:

- Consumer Goods, which offers consumer tissue, baby care and feminine care in Europe, the Middle East and Africa.
- Health and Medical Solutions, which offers incontinence products in Europe, North America, the Middle East and Africa and medical solutions in Asia, Europe, North America, the Middle East and Africa.

- Latin America, which offers consumer tissue, baby care, incontinence products, medical solutions, feminine care and professional hygiene in Latin America.
- Professional Hygiene, which offers professional hygiene in Europe, North America, the Middle East and Africa.

In addition to the business units, Essity has established three global units:

- Global Brand, Innovation and Sustainability has global responsibility for customer and consumer brands, innovation and sustainability and public affairs.
- Global Manufacturing has global responsibility for production and technology concerning all product categories with the exception of Medical Solutions.
- Global Operational Services has global responsibility for sourcing, logistics, business services, IT and digitalization.

The organization has four Group functions:

- Communications
- Finance
- Human Resources
- Legal Affairs

Essity exerts an influence on the subsidiary Vinda, a listed Asian hygiene company in which Essity is a majority shareholder, through board representation.

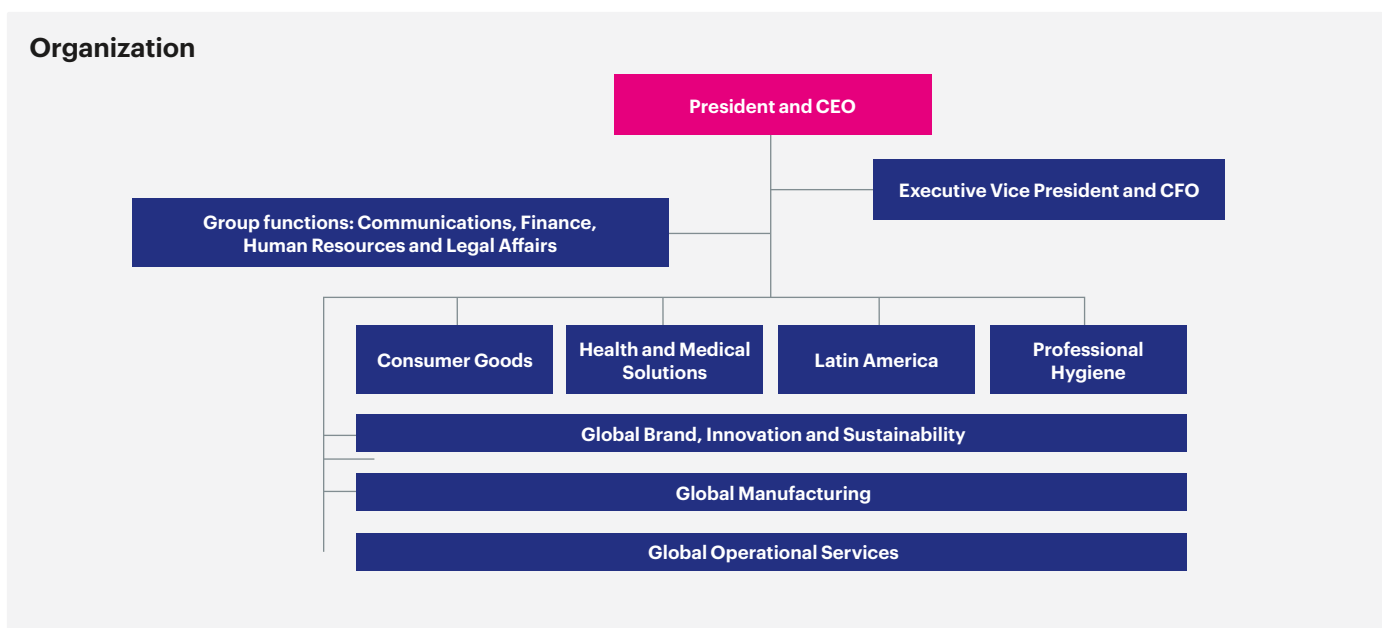

Events during the year

During the year, decisions were taken on restructuring measures in tissue production in Europe, North America and Latin America.

On September 28, 2018, Essity announced that the company was launching a Group-wide cost-savings program. The program is expected to generate annual cost savings of approximately SEK 900m, with full effect at the end of 2019.

On October 29, 2018, Essity announced that the company was making changes to its organizational structure and Executive Management Team.

On December 28, 2018, the Supreme Administrative Court announced its decision in a tax case in Sweden. The decision reduced Essity's reported tax expense by approximately SEK 1.1bn in the fourth quarter of 2018. Taxes paid will be refunded to Essity in the first quarter of 2019.

Acquisitions, investments and divestments

Company acquisition in Peru and Bolivia

On February 16, 2018, Familia, in which Essity has a 50% stake, acquired the remaining 50% of the company Productos Sancela del Peru with operations in Peru and Bolivia. The consideration transferred amounted to SEK 310m. Essity has consolidated Productos Sancela del Peru as a subsidiary with a non-controlling interest. Prior to the acquisition, the company was consolidated as an associate according to the equity method. The previously owned share of equity was remeasured at fair value in the amount of SEK 225m and rec-

ognized as an item affecting comparability in the income statement.

Company acquisition in Ecuador

On April 3, 2018, Familia, in which Essity has a 50% stake, acquired the company Industrial Papelera S.A. (INPAECSA) with operations in Ecuador. The consideration transferred amounted to SEK 68m.

Essity strengthens Professional Hygiene in Europe

On February 22, 2018, Essity announced the company's decision to invest in

creating a center for napkin production at the existing production facility in Altopascio, Italy. The investment will further strengthen the competitiveness of Professional Hygiene in Europe. The investment will lead to restructuring measures at multiple production facilities across Europe in the coming years. The total investments will amount to approximately SEK 590m, of which the majority is related to investments in Altopascio, Italy.

Other Group information

Parent Company

The Group's Parent Company, Essity Aktiebolag (publ), is a holding company with the main task of owning and managing shares in a number of business group companies and performing Group-wide management and administrative functions. The company's corporate registration number is 556325-5511 and it is domiciled in Stockholm, Sweden. The company's address is PO Box 200, SE-101 23 Stockholm. In 2018, the Parent Company recognized operating income of SEK 192m (367) and profit before appropriations and tax of SEK 17,102m (1,681). Investments in non-current assets totaled SEK 1m (0) during the year. Cash and cash equivalents at year-end amounted to SEK 0m (0).

Research and development (R&D)

Research and development (R&D) costs during the year amounted to SEK -1,320m (-1,239), corresponding to about 1.1% of consolidated net sales. R&D is coordinated and conducted from a global perspective. Product development is carried out in close cooperation with the local units, as well as through direct collaboration with customers.

Holdings of treasury shares

Essity Aktiebolag (publ) holds no treasury shares.

Share distribution

In 2018, 147,667 Class A shares were converted into Class B shares. The proportion of Class A shares was 9.1% at year-end.

Dividend

The Board of Directors proposes a dividend of SEK 5.75 (5.75) per share or SEK 4,038m (4,038). The record date for entitlement to receive dividends is proposed as April 8, 2019.

Environmental impact in Sweden

Essity Aktiebolag (publ) is conducting one operation in Sweden for which a permit is required relating to tissue manufacturing. This operation impacts the environment through emissions to air and water, solid waste and noise.

Sustainability report

Essity's statutory sustainability report, in accordance with the requirements of the Swedish Annual Accounts Act, can be found on pages 33–45 and 114–121 in the Board of Directors' Report. The company's business model can be found on page 11. This sustainability report for Essity Aktiebolag (publ) encompasses the entire Group. More information on non-financial accounting principles can be found in Note H1, page 114.

Guidelines for remuneration of senior executives

The Board of Directors has decided to propose to the AGM 2019 the following guidelines for determining salaries and other remuneration for senior executives to apply for the period following the AGM.

"Remuneration of senior executives will be a fixed salary, variable remuneration, additional benefits and pension.

Senior executives include the President, Executive Vice President, Business Unit President and equivalent, as well as Group Function Senior Vice President. The total remuneration is to correspond to market practice and be competitive in the senior executive's field of profession and linked to the executive's responsibility and authority. The variable remuneration is to be limited and linked to the fixed remuneration, based on performance results in relation to the annual and long-term established targets. In the event of termination of employment, the notice period should normally be up to two years if termination is initiated by the company, and up to one year, when initiated by the senior executive. Severance pay should not exist. Pension benefits should, to the extent possible, only contain defined contribution pension benefits and entitle the executive to receive a pension from the age of 65. Variable remuneration is not part of pensionable income. The board of directors shall be entitled to deviate from the adopted guidelines if, in an individual case, there are special reasons for doing so. The guidelines shall not prevail over mandatory conditions under labour law or collective agreements. Neither do they apply to existing agreements."

For information concerning the company's application of previously agreed guidelines and information on the company's calculated expenses for remuneration of senior executives, see Note C3 on pages 80–82.

Net sales and earnings

Net sales

Essity's net sales for 2018 increased 8.5% compared with the corresponding period a year ago to SEK 118,500m (109,265). Organic net sales, which exclude exchange rate effects, acquisitions and divestments, increased 2.6%, of which volume accounted for 0.5% and price/mix for 2.1%. Organic net sales increased 0.9% in mature markets and increased 5.9% in emerging markets. Emerging markets accounted for 35% of net sales. Exchange rate effects increased net sales by 3.5%. Acquisitions increased net sales by 2.4%, of which the acquisition of BSN medical accounted for 1.8% and acquisitions relating to the increase in the shareholding in associates in Latin America accounted for 0.6%.

Earnings

Essity's adjusted operating profit before amortization of acquisition-related intangible assets (adjusted EBITA)¹⁾ for 2018 declined 4% (11% excluding currency translation effects and acquisitions) to SEK 12,935m (13,405). Higher prices, a better mix, higher volumes, cost savings and the acquisition of BSN medical had a positive impact on earnings. Cost savings amounted to SEK 1,040m, of which SEK 18m was related to the Group-wide cost-savings program. Higher raw material and energy costs had a negative earnings effect of SEK -4,705m, which corresponds to a negative impact on the adjusted EBITA margin of -4.2 percentage points. Furthermore, higher distribution costs had a negative impact on earnings. The acquisition of BSN medical increased profit by 2%. Acquisitions relating to the increase

in the shareholding in associates in Latin America increased profit by 1%.

Items affecting comparability amounted to SEK -1,444m (-940) and include costs of approximately SEK -1,230m related to restructuring measures at production facilities in Professional Hygiene and Consumer Tissue. Impairments in the associate Asaleo Care had an impact of SEK -280m on items affecting comparability. Restructuring costs related to the Group-wide cost-savings program had a negative impact of SEK -130m on items affecting comparability. Acquisitions relating to the increase in the shareholding in associates in Latin America positively impacted items affecting comparability by SEK 165m. A reversal of a provision for foreign tax of a non-recurring nature on non-current assets outside Sweden had a positive impact of SEK 290m on items affecting comparability. Other costs negatively impacted items affecting comparability by SEK -259m.

Financial items decreased to SEK -1,157m (-1,182). The decrease is primarily due to lower interest. Higher average net debt had a negative impact on financial items during the period.

Adjusted profit before tax¹⁾ decreased 5% (12% excluding currency translation effects and acquisitions) to SEK 11,046m (11,663).

The tax expense, excluding effects of items affecting comparability, was SEK 1,490m (2,191). The reported tax expense was reduced by about SEK 1.1bn due to a decision in a tax case in Sweden.

Adjusted profit for the period¹⁾ increased 1% (decreased 6% excluding currency

translation effects and acquisitions) to SEK 9,556m (9,472).

Profit for the period decreased 3% (10% excluding currency translation effects and acquisitions) to SEK 8,552m (8,785). Earnings per share were SEK 11.23 (11.56). The adjusted earnings per share³⁾ were SEK 13.32 (13.09).

Key figures

The Group's adjusted gross margin¹⁾ amounted to 28.2% (29.6) and the adjusted EBITA margin¹⁾ was 10.9% (12.3). Adjusted return on capital employed¹⁾ was 12.0% (14.9). Adjusted return on equity¹⁾ was 18.0% (21.3). The interest coverage ratio was 9.3 (10.1).

Summary income statement

¹⁾ Excluding items affecting comparability and amortization of acquisition-related intangible assets.

²⁾ Indicative earnings per share on the assumption that the number of issued shares in Essity as of December 31, 2016, 2015 and 2014 corresponded to the number of issued shares in Essity on December 31, 2017 (702.3 million).

Cash flow and financing

The operating cash surplus amounted to SEK 18,570m (18,465). The cash flow effect of changes in working capital was SEK -971m (-740). Current capital expenditures amounted to SEK -4,357m (-3,911). Operating cash flow was SEK 12,324m (12,723).

Financial items decreased to SEK -1,157m (-1,182). The decrease is primarily due to lower interest. Higher average net debt had a negative impact on financial items during the period. Income tax payments totaled SEK 2,466m (2,971). Cash flow from current operations amounted to SEK 8,787m (8,745).

Strategic capital expenditures amounted to SEK -2,424m (-2,101). The net sum of acquisitions and divestments was SEK -626m (-26,016). Dividends to shareholders impacted cash flow by SEK -4,435m (-285). Net cash flow totaled SEK 1,307m (-18,791).

Net debt increased by SEK 1,937m compared with the same point in time last year and amounted to SEK 54,404m. Excluding pension liabilities, net debt amounted to SEK 50,263m. Net cash flow reduced net debt by SEK 1,307m. Fair value measurement of pension assets and updated

assumptions and assessments that affect measurement of the net pension liability, together with fair value measurement of financial instruments, increased net debt by SEK 1,042m. Exchange rate movements increased net debt by SEK 2,202m.

The debt/equity ratio was 0.99 (1.06). Excluding pension liabilities, the debt/equity ratio was 0.92 (0.99). The debt payment capacity was 25% (26). Net debt in relation to adjusted EBITDA amounted to 2.96 (2.83).

Assets and capital employed

The Group's total assets increased 5% compared with the preceding year, amounting to SEK 154,266m (147,016). Non-current assets increased SEK 5,023m compared with the preceding year to SEK 112,121m (107,098), of which property, plant and equipment amounted to SEK 51,673m (48,482) and intangible assets to SEK 55,028m (53,121). Current and strategic capital expenditures in non-current assets amounted to SEK 6,781m. Total depreciation and amortization for the year was SEK 6,175m, of which amortization of acquisition-related intangible assets amounted to SEK 732m.

Current assets increased SEK 2,227m to SEK 42,145m (39,918). Working capital amounted to SEK 7,568m (5,901). Capital employed was 7% higher and totaled SEK 109,303m (102,037). The distribution of capital employed per currency is shown in the table below.

The value denominated in SEK of the Group's foreign net assets amounted to SEK 65,679m at year-end. In 2017, the Group's foreign net assets totaled SEK 65,389m.

Equity

The Group's equity increased by SEK 5,329m during the period, to SEK 54,899m (49,570). Net profit for the period increased equity by SEK 8,552m. Equity decreased by SEK 4,435m on account of the dividend to shareholders. Equity decreased net after tax by SEK 861m as a result of fair value measurement of pension assets and updated assumptions and assessments that affect the valuation of the pension liability. Fair value measurement of financial instruments increased equity by SEK 77m after tax. Exchange rate movements, including the effect of hedges of net foreign investments, after tax, increased equity by SEK 1,976m. Other items increased equity by SEK 20m.

Financing

The Group's interest-bearing gross debt amounted to SEK 54,326m (54,838) at year-end. The maturity period was 3.5 (4.3) years.

Net debt increased by SEK 1,937m compared with the same point in time last year and amounted to SEK 54,404m. Excluding pension liabilities, net debt amounted

to SEK 50,263m. Net cash flow reduced net debt by SEK 1,307m. Fair value measurement of pension assets and updated assumptions and assessments that affect measurement of the net pension liability, together with fair value measurement of financial instruments, increased net debt by SEK 1,042m. Exchange rate movements increased net debt by SEK 2,202m.

Key figures

The debt/equity ratio was 0.99 (1.06). Excluding pension liabilities, the debt/equity ratio was 0.92 (0.99). The visible equity/assets ratio was 31% (29). The adjusted return on capital employed was 12.0% (14.9). The adjusted return on equity was 18.0% (21.3). The capital turnover rate was 1.1 (1.2). At year-end, working capital amounted to 6% (5) of net sales.

Risks and risk management

Essity is an international group with sales in approximately 150 countries and manufacturing at about 90 production facilities in some 30 countries. The geographic structure means that operations are conducted in countries and in markets with different cultures and varying degrees of maturity. Essity is exposed to a number of strategic, operational and financial risks, which could exert a negative impact on the Group's operations. Accordingly, it is of major importance to have a systematic and effective process to identify, manage and mitigate the effects of these risks in a controlled manner.

Processes for risk management

The responsibility for the management of risks follows the company's delegation scheme, from the Board of Directors to the President, and from the President to the Business Unit Presidents. The delegation scheme entails that risks are primarily managed by Essity's business units at local level, but with central coordination and follow-up. The latter is mainly achieved through the business units' continuous reporting and in the annual strategy process. Risk identification and risk management are a key part of the latter. Identified risks are classified in this process according to the likelihood of the risk becoming a reality and the potential impact it

could have on the group. The model also includes how risks shall be mitigate and followed up.

Essity's financial risk management is centralized. The Group's internal bank handles the Group's financial transactions and energy risks. The financial risks are managed in accordance with the Group's finance policy, which is decided by Essity's Board of Directors. Together with Essity's energy risk policy, the finance policy comprises a framework for financial risk management. The risks are compiled and followed up continuously.

Essity has a corporate internal audit unit, which follow up that Essity's organization complies with the set policies.

Based on current knowledge, the following are deemed to be the main factors that risk having a materially negative impact on the operations:

Risks that impact Essity's ability to achieve established targets

Risk	Action
<p>GDP trend and economic conditions</p> <p>Demand for Essity's products is affected by general macroeconomic trends and the resulting fluctuations in its customers' purchasing power and consumption patterns. Professional Hygiene is the area of Essity's operations that is most sensitive to economic movements. The healthcare sector for Incontinence Products and Medical Solutions also risks being negatively impacted by the public sector's budget situation. Sales to the retail sector, which accounts for the bulk of sales of hygiene products, may also be adversely affected by reduced purchasing power among the company's consumers.</p>	<p>In all operations, it is important that Essity implements a number of measures to try to manage the effects of economic movements that take place. Examples of this include measures to reduce costs, reviewing the capacity and production structure, and creating higher customer value through product innovations. Essity also works on differentiation to move toward product areas that are less sensitive to economic fluctuations. An example of solutions that can create value for Essity and its customers is Tork PeakServe in Professional Hygiene, a high-capacity dispenser for towels that is labor-saving for the customer. Sensors in public toilets, which facilitate in optimizing the work to empty waste baskets and to refill paper and soap, are another example of solutions that can create value.</p>

Risk	Action	
Environmental impact and climate change		
<p>Essity's operations and the products used in the manufacturing process have an impact on air, water and land. Essity is subject to extensive environmental regulations in all of the countries where the company conducts operations. More stringent environmental requirements, remediation of the environment in connection with plant closures or breaches of permits could incur higher costs for the Group.</p> <p>Risks related to climate change and the financial implications of this have attracted increased attention. Not least as a result of the 2015 Paris Agreement and new guidelines from the TCFD (Task Force on Climate-related Financial Disclosure).</p>	<p>Essity's strategic framework and sustainability policy stipulate guidelines for the Group's measures within the environmental area. Environmental impact and the impact of climate change are part of the annual strategy process, which includes the identification, assessment and actions for managing these types of risks. Risks are managed, for example, through preventive work in the form of certified environmental management systems, environmental risk inspections in conjunction with acquisitions, and remediation projects in connection with plant closures. The use of energy, water, transport, production waste and raw materials is</p>	<p>controlled using the company's Resource Management System (RMS). The data is used for internal control and follow-up of established targets. Essity also works to reduce the volume of production waste.</p> <p>Essity has adopted the SBTi¹⁾-approved Science-Based Targets to reduce the company's climate impact and to support the 2015 Paris Agreement. Essity works to reduce carbon emissions by, for example, making investments in renewable energy and energy-saving programs.</p> <p>¹⁾ SBTi: Science Based Targets initiative</p>
Political decisions and regulatory measures		
<p>Essity conducts operations in a large number of different countries. In some countries, the institutional structures are more established and developed, while the political, financial, legal and regulatory systems in others are less predictable. In both cases, political changes and decisions, as well as amended legislation and regulations could have a negative impact on Essity's operations in the form of higher costs or some other obstruction. In general, the regulatory requirements imposed on Essity's operations and products are intensifying.</p> <p>One example of risks associated with political decisions is if the UK were to leave the EU without an agreement.</p>	<p>Essity works continuously to monitor, evaluate and anticipate changes in its business environment in the form of political decisions and amended regulations in the areas that are of particular importance for our operations.</p> <p>Essity participates in various national and international industry organizations, as well as in other types of partnerships. The aim is to gain early knowledge of and contribute actively to the development of areas that are significant to our operations. Environmental and energy issues are of particular importance to Essity. The circular economy, use of resources and more specifically, issues relating to waste, plastics, chemicals, and emissions to water and air are examples of other key areas.</p> <p>The public sector is both a significant customer and an important stakeholder group for Essity. The company is therefore working actively on matters</p>	<p>relating to health and medical care, as well as care for the elderly. By complying with and contributing to the development of relevant regulations, Essity shares its experience garnered from existing systems to decision-makers in countries where new structures are being built or existing systems reformed. An example of this is the development of systems for subsidized prescription of incontinence aids in countries where such benefits were not offered in the past. Similarly, Essity monitors developments in regulations covering medical solutions.</p> <p>Measures adopted by the company to limit the effects if the UK leaving the EU without an agreement include an increase in inventory levels and transport capacity in the UK.</p>
Competition		
<p>Essity is subject to considerable competition from other producers of similar products. Essity is also exposed to the risk that alternative products and solutions with the same or similar function (substitutes) could replace the products included in Essity's range. Substitutes exist for virtually all Essity products. This may involve such products as cloth diapers or cloth rags for household or industrial cleaning, or completely different solutions to meet the needs of consumers, such as menstrual cups or electric hand dryers. Competition and the occurrence of substitutes presents the risk of a negative effect on sales and pricing of Essity's products and jeopardizes the company's market position.</p>	<p>Essity's focus on customer and consumer insight guides its innovation activities, ensuring that new products and services are competitive. Essity develops the company's offering to meet the needs of customers and consumers in terms of the products themselves, but also in providing these in the relevant sales channels. New solutions are developed through the company's own research and development activities in cooperation with customers, consumers, suppliers or partners. Through its processes for monitoring the business environment, Essity follows up on new players and substitutes in the market and their impact on the company. Read more about innovation on page 18.</p>	

Risk	Action	
Dependence on major customers and sales channels		
<p>Essity's success is attributable to its ability to offer attractive products, services and brands and to make these available to customers and consumers. Essity's products are sold through retailers, pharmacies, online sales, distributors and resellers, with retail representing the single largest customer category. If these players are not successful in selling Essity's products, this could have a negative impact on Essity's earnings. In general, there is a consolidation trend in several of Essity's sales channels and markets – particularly in the retail trade – through mergers and purchasing alliances, which could increase dependence on individual, large customers. Digitalization is also changing customer and consumer behavior, preferences and demand.</p>	<p>Essity's customer structure is relatively dispersed, with customers in many different areas of business. In 2018, Essity's ten largest customers, most of them retail companies and distributors, accounted for 24% of net sales. The company works to maintain strong and long-term customer relationships in strategic customer segments, as well as building relationships with new customers. Essity is participating in the increasing digitalization trend and its impact on customers, consumers and channels, for example, through online sales. Essity also places great importance on developing processes, products and information to ensure customer satisfaction.</p>	
Production facilities		
<p>Essity has around 90 production facilities in some 30 countries. Fires, machinery breakdowns and other types of harmful incidents in plants could lead to considerable value destruction, loss of production and income, which ultimately, could have a negative impact on Essity's market position.</p>	<p>From this perspective, the aim of Essity's risk management is to effectively and cost efficiently protect its employees, the environment, the company's assets and the business. Essity strives to create and retain a balance between loss-prevention activities and insurance coverage.</p> <p>The loss-prevention work is conducted in accordance with established guidelines that include repeated inspections by external risk engineers. Other important elements of loss-prevention activities are maintenance of production plants</p>	<p>and machinery, staff training, and good orderliness. Essity invests continuously in loss-prevention activities to reduce its risk of damage in various ways. For example, the sites are usually protected by sprinkler systems. All wholly owned facilities are insured to replacement cost and for the loss of income. Within the EU, insurance is primarily conducted within the company's own insurance company, with external reinsurance for major damages. Outside the EU, Essity cooperates with market-leading insurance companies.</p>
Unethical business practices		
<p>Essity works in a large number of countries and in environments where unethical business practices and violations of human rights may occur. The risk of such business methods is deemed to be very serious. The financial consequences of violations may be very severe in the form of various sanctions and fines. Violations also risk having a negative impact on the company's reputation in the market.</p>	<p>Essity has a program for regulatory compliance, which aims to minimize the risk that Essity participates in or is associated with unlawful or unethical business practices or commits violations of human rights. The program is based on a Code of Conduct adopted by the Board of Directors. The Code contains policies for how the company and its employees are to behave in the workplace, in the community and in the market. Training of Essity's</p>	<p>employees regarding the Code of Conduct takes place continuously. Within certain areas, corruption and competition regulations, Essity has an in-depth program for risk evaluation and various training courses for employees. The implementation of the regulatory compliance program is reported continuously to a committee, which includes the internal audit function and parts of the Essity management.</p>
Employees		
<p>To meet its targets, Essity is dependent on being able to recruit, retain and develop qualified and motivated employees.</p>	<p>Essity ensures access to employees with relevant competence through strategic staffing and succession planning. Essity is focusing on making the company known as an attractive employer in the markets in which it operates. Internal recruitment and rotation is facilitated through a "Job Portal", where vacant positions are advertised internally and externally. The company's ambition is that all</p>	<p>employees should have a personal development plan focusing on both training and new challenges. Essity strives to ensure that salaries and other benefits are adapted to the market and competitive in the labor market in which the employee works. Essity is working actively to build good relationships with union organizations.</p>

Risk	Action																								
Legal risks																									
<p>Legal risks comprise a number of risks in, to some extent, diverse areas. Amended legislation, violations of laws in the operations or errors in any agreements signed by Essity, are some examples of legal risks that could have negative financial implications for Essity. In certain instances, they may also result in protracted and costly legal processes.</p>	<p>Essity constantly monitors developments in a number of areas and addresses any legal risks that arise in cooperation with external advisers. By their nature, legal issues are often national, which means that local experts are also often engaged by Essity in various issues.</p>																								
Suppliers																									
<p>Essity is dependent on a large number of suppliers. The unplanned or sudden loss of key suppliers could result in costs and disruptions to the company's production. Suppliers could also cause problems for Essity through non-compliance with applicable legislation and guidelines or by otherwise acting in an unethical manner.</p>	<p>Essity enters into supply contracts of various durations with a large number of different suppliers. The agreements ensure the supply of key input goods. The Group has several suppliers for essentially all important input goods. In-depth collaboration also occurs with particularly selected suppliers in the development of materials and processes. Essity continuously evaluates suppliers to ensure compliance with agreements entered into. Particular importance is placed on suppliers with operations in countries and industries deemed to be exposed to risks. The assessment of key suppliers may take the form of a questionnaire, an on-site visit or independent audit.</p>																								
Information and IT																									
<p>Essity relies on IT systems for its operations. Disruptions or faults in critical systems risk having a direct impact on production and other important business processes. Errors in financial systems risk affecting the company's reporting of results.</p>	<p>Essity has a management model for IT that contains governance, standardized IT processes and an organization for information security. The latter works with continuous risk assessment, preventive measures and the use of security technologies. Standardized processes are in place for the implementation and change of systems and IT services and for daily operations.</p>																								
Cost of input goods																									
<p>Input goods account for a considerable part of Essity's total operating expenses. The market price of input goods fluctuates over time and could influence Essity's earnings positively or negatively over time. The price trend for a number of input goods over the past ten years is presented in the diagram below.</p> <p>Highest/lowest market prices (annual average) 2008–2018 per product</p> <table border="1"> <caption>Highest/lowest market prices (annual average) 2008–2018 per product</caption> <thead> <tr> <th>Product</th> <th>Lowest Price (Index)</th> <th>Highest Price (Index)</th> <th>Average Price (Index)</th> </tr> </thead> <tbody> <tr> <td>Recovered paper – SOP (EUR)</td> <td>~75</td> <td>~135</td> <td>~110</td> </tr> <tr> <td>Recovered paper – SOP (USD)</td> <td>~75</td> <td>~125</td> <td>~100</td> </tr> <tr> <td>Pulp – NBSK (USD)</td> <td>~75</td> <td>~135</td> <td>~110</td> </tr> <tr> <td>Pulp – EUCA (USD)</td> <td>~75</td> <td>~135</td> <td>~110</td> </tr> <tr> <td>Oil-based material – Propylene (SAP) (EUR)</td> <td>~75</td> <td>~125</td> <td>~100</td> </tr> </tbody> </table>	Product	Lowest Price (Index)	Highest Price (Index)	Average Price (Index)	Recovered paper – SOP (EUR)	~75	~135	~110	Recovered paper – SOP (USD)	~75	~125	~100	Pulp – NBSK (USD)	~75	~135	~110	Pulp – EUCA (USD)	~75	~135	~110	Oil-based material – Propylene (SAP) (EUR)	~75	~125	~100	<p>Fiber (pulp and recovered paper) is a significant cost item, mainly in Consumer Tissue and Professional Hygiene. Price fluctuations for fiber are mainly managed through long-term relationships with suppliers and by optimizing purchasing from different regions and of varying qualities. The cost of oil-based materials is driven by the oil price trend and represents a major cost item in Personal Care and for diverse packaging materials. The oil price trend also impacts transport costs. The impact of price movements on input goods can be delayed through purchasing agreements with fixed durations. Efficiency improvements in the company's operations, changed product specifications and price increases are examples of measures to dampen the effect of rising costs for input goods. Essity's costs for input goods are described on page 130.</p>
Product	Lowest Price (Index)	Highest Price (Index)	Average Price (Index)																						
Recovered paper – SOP (EUR)	~75	~135	~110

Pulp – EUCA (USD)	~75	~135	~110																						
Oil-based material – Propylene (SAP) (EUR)	~75	~125	~100																						

Risk	Action																																																																																	
Energy price	Action																																																																																	
<p>Energy price risk is the risk that increased energy prices could adversely impact Essity's operating profit. Essity is exposed to price movements of electricity and natural gas, but the price of other energy commodities also directly and indirectly impacts Essity's operating profit.</p>	<p>Essity centrally manages the energy price risk related to electricity and natural gas. According to Essity's energy risk policy, these price risks can be hedged for a period of up to 36 months. Energy price hedging is effected through financial instruments and fixed pricing in existing supply agreements.</p> <p>Essity safeguards the supply of electricity and natural gas through centrally negotiated supply agreements. The portfolio of supply agreements and financial hedges shall be effectively spread to minimize Essity's counterparty risk.</p> <p>In 2018, Essity purchased about 5 TWh (5; 5) of electricity and about 8 TWh (8; 8) of natural gas.</p> <p>The graph displays Essity's price hedges in relation to forecast consumption of electricity and natural gas for the next three years. The graph includes financial hedges and hedging effected via supply agreements. For further information concerning</p>																																																																																	
<p>financial price hedges, see Note E6 Derivatives and hedge accounting on page 93.</p> <p>Energy price hedges in relation to forecast consumption, December 31, 2018</p> <table border="1"> <caption>Energy price hedges in relation to forecast consumption, December 31, 2018</caption> <thead> <tr> <th>Year</th> <th>Electricity (%)</th> <th>Natural gas (%)</th> </tr> </thead> <tbody> <tr> <td>2019</td> <td>35</td> <td>55</td> </tr> <tr> <td>2020</td> <td>15</td> <td>30</td> </tr> <tr> <td>2021</td> <td>0</td> <td>0</td> </tr> </tbody> </table>	Year	Electricity (%)	Natural gas (%)	2019	35	55	2020	15	30	2021	0	0	<p>exposure comprises a purchase requirement for USD and a selling requirement for CNY and GBP. The significant USD exposure is a consequence of the Group's purchase of pulp that is invoiced in USD.</p> <p>During the year, there was continuous hedging of, primarily, trade receivables and payables, as well as future payments of non-current assets. The majority of hedges mature during the first quarter of 2019. For further information relating to hedging of transaction exposure, see Note E6 Derivatives and hedge accounting on page 93.</p>

<p>Translation exposure</p> <p>Essity manages translation exposure by distributing the liability across various currencies where the Group owns assets so that key figures that are material for the company's credit rating are protected in the long term against exchange rate effects. Translation exposure in the income statements of foreign subsidiaries is not currency-hedged. As at December 31, 2018, net debt amounted to SEK 54,404m (52,467; 35,173). Distribution by currency is shown in the table to the right.</p> <p>For further information relating to hedging of translation exposure, see Note E6 Derivatives and hedge accounting on page 93.</p>	<p>Net debt distributed by currency</p> <table border="1"> <thead> <tr> <th rowspan="2">Currency</th> <th rowspan="2">Net debt SEKm</th> <th colspan="3">Percentage of net debt</th> </tr> <tr> <th>2018 %</th> <th>2017 %</th> <th>2016 %</th> </tr> </thead> <tbody> <tr> <td>EUR</td> <td>24,917</td> <td>46</td> <td>46</td> <td>13</td> </tr> <tr> <td>GBP</td> <td>8,216</td> <td>15</td> <td>6</td> <td>3</td> </tr> <tr> <td>USD</td> <td>7,059</td> <td>13</td> <td>15</td> <td>15</td> </tr> <tr> <td>SEK</td> <td>6,150</td> <td>11</td> <td>19</td> <td>45</td> </tr> <tr> <td>CNY</td> <td>3,735</td> <td>7</td> <td>8</td> <td>11</td> </tr> <tr> <td>MXN</td> <td>2,334</td> <td>4</td> <td>3</td> <td>3</td> </tr> <tr> <td>HKD</td> <td>1,476</td> <td>3</td> <td>2</td> <td>4</td> </tr> <tr> <td>Other</td> <td>517</td> <td>1</td> <td>1</td> <td>6</td> </tr> <tr> <td>Total</td> <td>54,404</td> <td>100</td> <td>100</td> <td>100</td> </tr> </tbody> </table>	Currency	Net debt SEKm	Percentage of net debt			2018 %	2017 %	2016 %	EUR	24,917	46	46	13	GBP	8,216	15	6	3	USD	7,059	13	15	15	SEK	6,150	11	19	45	CNY	3,735	7	8	11	MXN	2,334	4	3	3	HKD	1,476	3	2	4	Other	517	1	1	6	Total	54,404	100	100	100

Risk	Action																																							
Credit																																								
<p>Credit risk refers to the risk of losses due to a failure to meet payment obligations by Essity's counterparties in financial agreements or by customers.</p>	<p>Credit risk in trade receivables Credit risk in trade receivables is managed through credit checks of customers using credit rating companies. The credit limit is set and regularly monitored. Trade receivables are recognized at the amount that is expected to be paid based on an assessment of the anticipated credit losses for the remaining lifetime of all trade receivables at the balance sheet date. For further information concerning trade receivables and recognition of anticipated credit losses, see Note E3 Trade receivables on page 91.</p> <p>Financial credit risk The objective is that counterparties must have a minimum credit rating of A-/A3 from at least two of the rating institutes Standard & Poor's, Fitch and Moody's. Essity strives to enter into agreements that allow net calculation of receivables and liabilities. In certain cases, there are also supplementary terms to these agreements regarding the exchange of collateral. Credit exposure in derivative instruments is calculated as the market value of the instrument on the balance sheet date. Credit exposure in derivative instruments amounted to SEK 1,255m (1,555; 1,259), gross. Taking net calculation agreements per counterparty into consideration, credit</p>	<p>exposure of derivatives amounted to SEK 810m (1,084; 971). At year-end, the total credit exposure was SEK 4,028m (4,964; 5,214). This exposure includes credit risk of SEK 3,081m (4,107; 4,244) for financial investments. Refer to the table below for the distribution of credit risk by category.</p> <p>Financial credit exposure</p> <table border="1"> <thead> <tr> <th rowspan="2">SEKm</th> <th colspan="3">Category¹⁾</th> <th rowspan="2">Total</th> </tr> <tr> <th>A</th> <th>B</th> <th>C</th> </tr> </thead> <tbody> <tr> <td>Financial assets measured at fair value through other comprehensive income.</td> <td></td> <td></td> <td>87</td> <td>87</td> </tr> <tr> <td>Financial assets measured at amortized cost</td> <td></td> <td>50</td> <td></td> <td>50</td> </tr> <tr> <td>Cash and bank balances</td> <td>2,268</td> <td>224</td> <td>516</td> <td>3,008</td> </tr> <tr> <td>Derivate assets, net</td> <td>810</td> <td></td> <td></td> <td>810</td> </tr> <tr> <td>Current investments < 3 months</td> <td></td> <td></td> <td>73</td> <td>73</td> </tr> <tr> <td>Total</td> <td>3,078</td> <td>224</td> <td>726</td> <td>4,028</td> </tr> </tbody> </table> <p>¹⁾ A: Investment grade, a long-term credit rating from one or more of the institutes of at least: Moody's (Baa3), Standard & Poor's (BBB-) and Fitch (BBB-) B: Non-investment grade, a long-term credit rating lower than: Moody's (Baa3), Standard & Poor's (BBB-) and Fitch (BBB-) C: No credit rating (mainly assets that lack a separate credit rating and cash and cash equivalents in regulated markets)</p>	SEKm	Category ¹⁾			Total	A	B	C	Financial assets measured at fair value through other comprehensive income.			87	87	Financial assets measured at amortized cost		50		50	Cash and bank balances	2,268	224	516	3,008	Derivate assets, net	810			810	Current investments < 3 months			73	73	Total	3,078	224	726	4,028

Liquidity and refinancing																																								
<p>Liquidity and refinancing risk is the risk that Essity is unable to meet its payment obligations as a result of insufficient liquidity or difficulty in raising new loans.</p>	<p>To ensure good access to loan financing, regardless of the economy and at attractive terms, Essity strives to maintain a solid investment grade rating. Essity is to maintain financial flexibility in the form of a liquidity reserve consisting of cash and cash equivalents and unutilized credit facilities totaling at least 10% of the Group's forecast annual sales. Essity limits its refinancing risk by having a good distribution in the maturity profile of its gross debt. The gross debt must have an average maturity in excess of three years, considering unutilized credit facilities that are not liquidity reserves. Surplus liquidity should primarily be used to amortize external liabilities. Essity's policy is to not agree to terms that entitle the lender to withdraw loans or adjust interest rates as a direct consequence of movements in Essity's financial key figures or credit rating. The Group's financing is mainly secured by bank loans, bond issues and through issuance of commercial papers. The refinancing risk in short-term borrowing is limited through long-term credit facilities from bank syndicates and individual banks with favorable creditworthiness.</p>	<p>Essity's net debt increased SEK 1,937m in 2018. At year-end, the average maturity of gross debt was 3.5 years (4.3; 4.0). If short-term loans were replaced with drawings under long-term unutilized credit facilities, the maturity would amount to 4.2 years. Unutilized credit facilities amounted to SEK 20,554m at year-end. In addition, cash and cash equivalents totaled SEK 3,008m. For further information, see Note E2 Financial assets, cash and cash equivalents on page 90, and Note E4 Financial liabilities on page 92.</p> <p>Liquidity reserve</p> <table border="1"> <thead> <tr> <th>SEKm</th> <th>2018</th> <th>2017</th> <th>2016</th> </tr> </thead> <tbody> <tr> <td>Unutilized credit facilities</td> <td>20,554</td> <td>19,680</td> <td>19,164</td> </tr> <tr> <td>Cash and cash equivalents</td> <td>3,008</td> <td>4,107</td> <td>4,244</td> </tr> <tr> <td>Total</td> <td>23,562</td> <td>23,787</td> <td>23,408</td> </tr> </tbody> </table> <table border="1"> <thead> <tr> <th>SEKm</th> <th>2018</th> <th>2017</th> <th>2016</th> </tr> </thead> <tbody> <tr> <td>Net sales</td> <td>118,500</td> <td>109,265</td> <td>101,238</td> </tr> <tr> <td>Liquidity reserve¹⁾</td> <td>20%</td> <td>22%</td> <td>23%</td> </tr> </tbody> </table> <p>¹⁾ Liquidity reserve as a percentage of net sales.</p>	SEKm	2018	2017	2016	Unutilized credit facilities	20,554	19,680	19,164	Cash and cash equivalents	3,008	4,107	4,244	Total	23,562	23,787	23,408	SEKm	2018	2017	2016	Net sales	118,500	109,265	101,238	Liquidity reserve ¹⁾	20%	22%	23%

Interest rate																																								
<p>Interest rate risk relates to the risk that movements in the interest rates could have a negative impact on Essity. Essity is affected by interest rate movements through its net financial income and expenses.</p>	<p>Essity strives to achieve a good distribution of its interest maturity dates to avoid large debt volumes of renewals occurring at the same time. Essity's policy is to raise loans with floating rates, since it is Essity's understanding that this leads to lower interest expense over time. The interest rate risk and interest period are measured by currency and the average interest term shall be within the interval 3 to 36 months. Essity's financial items decreased in 2018. The decrease is primarily due to lower interest rates. Higher average net debt had a negative impact on financial items during the period. Essity's largest funding currencies are EUR, GBP and USD, refer to the graph. To achieve the desired fixed interest period and currency balance, Essity uses financial derivatives. The average interest period for the gross debt, including derivatives, was 26.7 months (30.1; 8.5) at year-end.</p>	<p>The average interest rate for the total outstanding net debt including derivatives, amounted to 2.55% (1.83; 2.26) at year-end.</p> <p>Gross debt distributed by currency</p>																																						

Materiality analysis

Essity conducts a materiality analysis among its stakeholders every second year. The analysis provides insight into the subject areas that are significant to the company's various stakeholders and forms the basis of the strategy and operations.

The most recent materiality analysis was conducted in 2017, when about 1,000 customers, consumers, suppliers, investors, media representatives, representatives of the community and employees responded to the online survey.

The selection of subject areas to be included in the materiality analysis was guided by such frameworks and governing documents as the Global Reporting Initiative, the UN Global Compact, Essity's Code

of Conduct and other subjects considered to be material based on Essity's strategy. The survey covered a total of 21 areas.

The respondents were able to select the ten areas they considered to be most important for Essity. The order of priority the respondents assigned to the areas was weighed against Essity's own assessment of how important the areas are to the company's business strategy and were then placed in the materiality analysis as coordinates. The stakeholder groups' results were weighted to provide a balanced view of the results. Essity's own assessment was based on the evaluation of the top 100 senior executives.

Both stakeholders and Essity believe that business ethics, innovation, customer and consumer satisfaction, health and

safety, and strong brands are the most material areas.

The diagram below shows how the 21 areas were ranked in the survey: the horizontal X axis shows the responses of all respondents except Essity's senior executives, whose responses are shown on the Y axis. The areas are numbered according to how high they were ranked in the survey and next to the subject area, there is also a reference to where you can read more in this year's Annual and Sustainability Report.

A comprehensive account of all 21 areas included in the survey can be found at www.essity.com/sustainability.

Sustainability governance

The purpose of Essity’s sustainability governance is to ensure the Group’s commitments to its stakeholder groups, including customers, employees, shareholders, suppliers, creditors, decision-makers and representatives of the community. The company’s commitments are expressed in the strategic framework, in objectives and in strategies. To ensure that the company’s priorities and methods are relevant over time, Essity maintains an active and continuous dialogue with its stakeholders.

Essity’s objective is to generate maximum economic value and at the same time, live up to environmental and social expectations. Economic strength and stability is a prerequisite for environmental investments and socially responsibility

that generate long-term financial growth. Accordingly, Essity has established a number of policies and management systems to achieve and maintain the company’s economic value creation with respect to environmental and social value creation.

Essity’s overall social management approach is to assess how the company, through its operations, impacts and interacts with people and to develop strategies for establishing good relations with relevant stakeholders. Essity’s Code of Conduct is the main steering document concerning social responsibility. This defines areas where the company can successfully contribute to social sustainable development in the Group’s operations, and for various stakeholders along the

value chain. In the markets where Essity operates, social value is generated for individuals and society through the company’s products and services for hygiene and health. In addition, the company creates jobs and pays the right tax and fees in the countries where the company operates. Essity’s overall environmental management approach is to enhance the operations’ positive contribution to the environment, while minimizing negative environmental impact.

Essity’s Executive Management Team bears the overall responsibility for the control of Essity’s business in the field of sustainability. Changes were implemented to the company’s organizational structure during the year. Essity’s unit

Summary of strategic components of Essity’s sustainability governance

Strategic components	Generate increased shareholder value through profitable growth	Enable more people every day to enjoy a fuller life	Contribute to a sustainable and circular society	Enable our employees to realize their full potential, as part of one winning team

with global responsibility for customer and consumer brands and innovation was given greater responsibility and now also includes sustainability and public affairs. The unit is called Global Brand, Innovation and Sustainability. The head of the unit reports to the CEO and is included in the Executive Management Team. Innovation and product development are crucial for pursuing and further strengthening Essity's sustainability efforts. The sustainability reporting department has been transferred to the Group function Finance and the Compliance & Ethics department reports to the Group function Legal Affairs. In close collaboration with the business unit presidents, the approved strategy and objectives are broken down into specific targets and activities to ensure delivery on the Group's objectives and business plans. Responsibility for implementation rests with the business units.

The purposes of Essity's Compliance Council include monitoring compliance with Essity's Code of Conduct.

A number of committees and networks operate horizontally across the Group's different business units to guarantee a consistent approach. Read more about this at www.essity.com/sustainability.

Regulatory frameworks and assurance

Assurance

In addition to Essity being reviewed by external auditors, its operations are subject to external reviews and monitoring by, among others, the Swedish Financial Supervisory Authority and Nasdaq Stockholm. Third-party assurance is conducted in conjunction with, for example, life cycle assessments. Essity's own control systems include segregation of duties in critical processes and defined management responsibilities with regard to internal control. In addition to this, Essity has a separate internal audit function that continuously works to evaluate and improve the effectiveness of governance processes, risk management and internal reporting. The unit contributes to the maintenance of high standards of business ethics and is involved in the monitoring of Code of Conduct compliance, including through audits. To support its work, the internal audit unit has a number of steering documents and policies.

External regulations and internal steering documents

The regulations most relevant to Essity's sustainability governance concern emission rights trading, energy efficiency, waste management, the Industry Emission Directive (IED), general product safety, medical devices, materials for food contact, chemical substances, cosmetics, biocide products and electronics. Essity monitors the development of all relevant regulations and ensures the environmental and human safety of all its products.

Essity's Code of Conduct is the Group's steering document for responsible business operations. All of the Group's employees are subject to the Code of Conduct, which is based on international standards, including the UN Declaration of Human Rights, the ILO Core Conventions, the OECD Guidelines for Multinational Enterprises, the UN Global Compact Principles and related legislation. Systematic activities, such as risk analyses, regular training, audits and other monitoring processes are in place to ensure compliance with the Code. Essity also uses the Supplier Ethical Data Exchange (Sedex) tool to make risk assessments of its production units. Sedex is a global database, in which companies share information about their production units with their customers. The information applies to the areas of labor standards, health and safety, the environment and business ethics.

All employees are regularly trained in the Code of Conduct, including human rights. In addition to this, the Code of Conduct is included in all onboarding programs across the company. Essity offers its employees a number of internal channels to report violations of legislation or the Code of Conduct. Employees also have the opportunity to use a whistleblower system managed by an external party. There is also, wherever the law permits, a possibility to report breaches anonymously. The external whistleblower system is currently available for use in some 30 countries. Essity expects its joint-venture companies to implement a Code of Conduct and guidelines equivalent to those stipulated in Essity's Code of Conduct.

The company's Code of Conduct and anticorruption policy represent the most important steering documents in the area of anticorruption. An evaluation and risk analysis of the company's anticorruption program is conducted each year. Employ-

ees in particularly vulnerable positions, as buyers and sellers, must undergo special anticorruption training, both online and through classroom instruction.

Essity's approach for ensuring respect for human rights in conjunction with the company's operations is based on the UN's Guiding Principles on Business and Human Rights (UNGPs). In accordance with this framework, due diligence audits are conducted regarding the management of the company's impact on human rights. Essity has assessed the risks and impact regarding human rights using a Group-wide risk assessment that identified three main risk areas:

- Labor-related risks, including occupational health and safety, discrimination, forced labor and right to equal pay for equal work in Essity's direct and indirect operation (supply chain).
- Land and water-related risks attributable to the sourcing of timber, fiber and pulp – indigenous communities' rights should be given particular consideration where appropriate.
- Risks attributable to the waste generated in conjunction with the use of Essity's products and how that affect people and their environment.

Essity has a program for compliance with competition rules. The training program is mandatory for employees who encounter these issues during the course of their work. The program includes risk analysis, e-learning, guidelines and recurring training sessions.

Essity has established a position paper, in which the company explains its view on the following areas: animal testing, flushable products, genetically modified organisms (GMO), palm oil, tissue fiber and triclosan (biocide). The position papers are available at www.essity.com/sustainability.

Compliance and monitoring

Essity's Compliance & Ethics unit is responsible for ensuring that applicable steering documents, training and systems are in place to ensure that the company meets internal and external Code of Conduct requirements. The function also manages the company's whistleblower service.

Essity's internal audit unit monitors compliance with the Code of Conduct through audits. The operations to be audited are determined by such factors as the social and environmental risks in

the country of operation or whether there are any indications of non-compliance with Essity's policies. The content of the audits emanates from Essity's Code of Conduct, while the approach and methods are based on the SA8000 standard. The audits are conducted by cross-disciplinary teams from Essity, and include representatives from the Internal Audit, Human Resources and Sourcing functions. The audits involve a review of documentation, inspection of the facility with a focus on health and safety, and interviews with managers, employees and union representatives. Every audit results in a report and action plan for the audited unit, which are followed up. The results of the audits are reported to Essity's Board via the Audit Committee.

Essity's business practice audits are conducted by the Internal Audit unit. The audits focus on business ethics and Essity's relationships with customers, suppliers and authorities. A large number of interviews are performed with managers and employees to ensure the effectiveness of the control environment and challenges in the local environment.

Enable more people every day to enjoy a fuller life

Sustainable solutions for customers and consumers

Essity has a system for handling complaints from customers and consumers. Essity always seeks to compensate dissatisfied customers directly and determine whether a need exists for further measures beyond the individual case. For example, production personnel receive feedback to determine whether a production fault was the underlying cause. User complaints and opinions provide valuable customer and consumer insight and the knowledge gathered is transferred to the organization.

Essity's innovation process originates in an understanding of a customer or consumer need. The process is divided into four phases: feasibility, development, capacity and launch. Read more at www.essity.com/sustainability.

Essity has a portal for open innovation. Inventors, entrepreneurs and small companies are invited to submit solutions in response to various challenges from Essity. The solutions should be patented so that there are no outstanding issues regarding intellectual property rights should the proposal result in a licensing agreement

or other type of business arrangement. A number of proposals have been submitted this way that have led to further collaboration or product launches.

Essity follows a life cycle approach to understand the environmental, social and societal impact of the company's products, packaging and services. This makes it possible to meet customers' needs and exceed their expectations. The company promotes life cycle thinking in its sourcing, production and development of innovations.

Responsible sourcing involves seeking high-quality raw materials that are safe from both an environmental and social perspective. Essity's suppliers adhere to strict standards, including criteria for quality, product safety, environment, chemicals and business responsibility.

Resource-efficient production focuses on an efficient use of resources and on reducing energy consumption and waste. The production units apply management systems such as ISO 9001, ISO 14001 and OHSAS 18001.

Sustainable products and services are defined as innovative, safe, environmentally and socially sound products, packaging and services. Essity's innovations are developed based on the company's three sustainability platforms of "well-being", "more from less" and "circularity". It is essential to optimize products, packaging and services during use to reduce consumption and waste.

The company has used life cycle assessments (LCAs) since the early 1990s. An LCA illustrates the complete environmental impact of a product based on the ISO 14040 and 14044 standards. The company supplements these ISO standards with product-specific rules in place for hygiene products. It is a standardized measurement of environmental impact in every phase of the product, from raw materials, product development, production and use to disposal of waste. For each activity in the life cycle, an LCA calculates the impact of resources, energy and transportation and the output of, for example, emissions to air and water. The result of an LCA is expressed in environmental impact categories. The LCAs conducted by Essity cover the main impact categories that describe the potential impact on the environment, meaning the product's carbon footprint, acidification of rivers and lakes, and eutrophication of land or water systems.

Essity follows strict requirements and procedures to ensure that all materials in the company's products are safe for consumers, employees and the environment. The company has global product guidelines in place for all products to ensure that they are safe for their intended purpose. Product safety requirements are a key component of Essity's Global Supplier Standard, and the company works closely with its suppliers to ensure these are met. Only chemicals that meet Essity's stringent safety requirements are used. Their potential impact on employees, customers, consumers and the environment is evaluated continuously.

Essity complies with all prevailing laws and regulations that apply to the company's products.

Community relations

Essity strives to be a dedicated partner in the local communities in which it operates. In accordance with Essity's guidelines for community relations, the company prioritizes initiatives with a clear link to Essity's operations, expertise, culture and geographic presence. Much of the company's efforts are related to hygiene and health, and are often directed at women and children. Examples of Essity's community relations are available at www.essity.com/sustainability.

Contribute to a sustainable and circular society

Essity's objective is to develop products and services for a sustainable and circular society. This is achieved by reducing inefficient volume consumption, developing products with smarter design and quality material and by continuously optimizing resource efficiency in the value chain. Increasing the use of renewable and recycled material is part of the strategy. Renewable fresh or recycled fiber is used today in Essity's tissue products. The proportion of renewable and recycled plastics in the company's packaging will increase over the coming years. The goal is that all packaging is recyclable by 2025.

Waste management of products is a common responsibility for Essity and customers and consumers. Tissue products comprise renewable fibers that contribute to renewable energy through combustion. Thanks to their biodegradability, they are well suited to composting and digestions. Compostability is based on tests accord-

ing to existing composting standards to ensure that all requirements are met. In the Tork PaperCircle pilot project, Essity is working to recycle used paper hand towels that are returned to the tissue plant and used to make new products.

For Essity's products in the Personal Care business area, energy recovery through combustion is a good alternative to landfill. There is currently no infrastructure and no established business models for collecting and recycling used products. Essity is working proactively with external partners to assess alternatives for recycling, including a pilot project in the Netherlands where Essity, together with an external party, is developing methods for recycling baby diapers and incontinence products.

Climate and energy

Essity has adopted Science-Based Targets for the reduction of greenhouse gas emissions. These targets encompasses energy, electricity, suppliers, transportation and waste. The Science Based Targets initiative is a collaboration between CDP (formerly known as the Carbon Disclosure Project), the UN Global Compact, the WRI (World Resources Institute) and the WWF (World Wide Fund for Nature). Science-Based Targets helps companies determine which emission reductions they need to achieve to keep the global temperature rise below 2 degrees Celsius, as agreed by world leaders at the UN climate change conference (COP 21) in Paris in 2015.

ESAVE, which the company initiated back in 2003, is a program that encompasses investments in energy-efficient technical solutions, the involvement of employees in daily improvement activities and a general change in attitude toward the use of energy at Essity. Knowledge sharing is leveraged across the Group through training and various networks, and ESAVE is part of several onboarding programs for young engineers. Best practices are shared digitally to achieve energy-efficiency excellence by learning from others. Essity also cooperates with external stakeholders, such as machinery suppliers, to ensure continued leadership in energy efficiency and continuous improvements. All new equipment is resource efficient by design and ESAVE is part of the planning criteria.

Essity has also introduced a material savings program, MSAVE, using the same philosophy and methodology as ESAVE.

The program aims to achieve the best cost while minimizing the environmental impact from raw materials and waste. Best practice is shared across the sites worldwide.

Water

Essity works continuously to enhance its water treatment and thus the quality of the effluent water discharged from its plants. Mechanical treatment removes suspended solids, sand and particles, while biological treatment extracts dissolved solids and organic impurities that affect biological oxygen demand (BOD) and chemical oxygen demand (COD).

Waste management

Essity follows a life cycle approach that includes purchasing, production, use and waste management. This means the company use life cycle assessments (LCAs) to identify resource-efficient solutions and minimize waste, all the way from the product design stage to manufacturing and after use.

Supply chain management

Essity has applied a Global Supplier Standard (GSS) for many years. The standard includes requirements concerning quality, product safety, the environment, energy and chemicals. The GSS also contains a specific section concerning Essity's expectations of its suppliers with regard to human rights, employee relations, and health and safety – Essity's Supplier Code of Conduct.

As with its own production units, Essity requires suppliers to perform a self-assessment of health and safety, labor standards, the environment and business ethics in the global Sedex database and to share their status. The answers are used for risk assessments. This is part of Essity's process with supplier risk assessment to ensure compliance with social and ethical sustainability criteria, including respect for human rights and working conditions. Sustainability matters are taken into consideration both when evaluating potential suppliers and in the continuous risk assessment of suppliers and purchased

materials, products and services. Alongside Sedex, other sources are used to support the risk assessment.

Purchases from suppliers in countries classified as high-risk countries according to the Maplecroft Human Rights Index are audited with a specific focus on parameters such as health and safety, human rights and employment conditions. An ethical audit of a supplier can also be triggered by other indicators, such as a low rating in Sedex, a low health and safety score in Essity's supplier qualification audit or the outcome from Essity's risk assessments. The goal is to audit all high-risk suppliers, based on Essity's risk assessment procedure. Essity works with the global auditing company SGS to perform the audits. Essity also accepts independent audits or audits performed on behalf of other clients if the topics covered match Essity's audit requirements and information about corrective and preventive action is shared.

Essity requires documented Chain of Custody from suppliers of products that

may contain potential conflict minerals. This mainly applies to paper dispensers for public bathrooms with electronic components containing metals whose origins are to be reported using the Conflict Minerals Reporting Template from the Responsible Minerals Initiative.

Some of Essity's products contain cotton fiber. The volumes are limited but since cotton agriculture in certain countries is associated with social risks, Essity pays particular attention to its cotton suppliers. Essity's ambition is that all purchased cotton is to be part of a recognized program for sustainable cotton. Essity is a member of the Better Cotton Initiative (BCI), one of the world's largest sustainability programs for cotton, which is the preferred program for sustainable cotton, though other programs, for example, organic cotton programs, are accepted.

Fiber sourcing

Essity's target is that all raw materials based on fresh wood fiber in the company's products are to be certified either in

accordance with the Forest Stewardship Council (FSC®) or the Programme for the Endorsement of Forest Certification (PEFC™). The target includes all deliveries of fresh wood fiber, meaning timber, pulp, packaging, mother reels and finished products supplied by external parties to Essity's own production sites.

All fiber material containing fresh wood fiber must be accompanied by an FSC Controlled Wood Chain of Custody certification regardless of whether the material is PEFC certified or certified by a forest certification other than FSC.

Essity has a global fiber sourcing policy in place and a shared business system – Essity's Global Fiber Database (GFDB) – for the assessment and purchase of fiber in compliance with Essity's targets for purchasing fresh wood fiber. The database includes all of the Group's pulp, recovered fiber and alternative fiber suppliers. This database provides the purchasing function, environmental department, R&D department and production facilities with fast and easy access to important information about suppliers: certification status, region of supply, wood species, pulp specifications and bleaching methods. Essity can thereby ensure the legal requirements for traceability. The company's R&D department can check the availability of a certain raw material and the sales organization can show customers exactly what has been purchased.

Essity requires fresh fiber suppliers to guarantee that they have robust systems and documented procedures in place to ensure traceability and compliance throughout the supply chain. Essity's fresh fiber sourcing policy includes support to other potential non-certified suppliers in their transition to third-party certification. Essity also conducts its own audits of suppliers' systems and sometimes employs external parties to perform additional surveys of suppliers. The audits are based on Essity's global fiber sourcing policy and Essity's Global Supplier Standard, which play a key role in contracts with suppliers. The supplier standard requires all suppliers to work with quality, environment, product safety, the Code of Conduct and social sustainability.

Distribution and transportation

Essity is working to reduce emissions and the environmental impact of transportation and has implemented a new Transport Management System to enhance the

efficiency of transportation by further increasing the fill ratio, reducing distances driven and prioritizing transport means with less environmental impact. Essity is continuously reviewing its distribution network in order to reduce transport distances and strengthening purchasing procedures with a focus on using the most modern and environmentally friendly transport means. The company is testing new technologies that can reduce fuel consumption together with its freight forwarders. The company is taking part in local collaboration projects, such as Lean & Green and FREIGHT21 to cut transport emissions. Essity is also test driving trucks with a larger cargo volume to reduce the number of trips needed to transport tissue.

Shipping is mainly used for pulp fiber. Essity continuously monitors shipping companies to ensure that they comply with applicable environmental standards. For transportation between the port and plant, Essity uses barges and rail transport wherever possible. Since rail transport is a carbon-efficient alternative, it is a prioritized transport means for Essity. Restrictions in the rail network and lead times mean Essity requests that its suppliers use rail to the greatest possible extent, supplemented by truck transport. For distances exceeding 500 km, Essity prioritizes that suppliers use several different modes of transport to minimize the environmental impact.

Enable our employees to realize their full potential, as part of one winning team

Essity offers its employees development opportunities and remuneration based on market rates comprising salary, pension and other benefits. The company follows local remuneration structures, provided they do not conflict with internationally established rules for minimum wages and reasonable compensation.

Essity's global human resource strategy aims to secure long-term capabilities and ensure that Essity is a safe and healthy workplace based on ethical business practices and is perceived as a great place to work. Essity recruits and develops employees in line with its strategic workforce plan. The plan is based on the company's strategy, access to expertise and demographics, and determines which measures the company needs to implement to meet future requirements for expertise and resources.

The ambition is that all employees are to have an individual development plan that is defined and followed up during annual performance reviews. The reviews identify the capabilities necessary for employees to achieve stated targets. The employees and managers agree on the manner in which these skills should be secured, primarily through internal development opportunities. Essity works proactively with employee health and well-being that addresses both the physical and social work environment. Employee commitment and satisfaction are measured every second year through a global employee survey that is followed by systematic work to identify and implement measures.

Essity endeavors to provide its employees with efficient and flexible opportunities to perform their duties. Through the company's working from home policy, Essity is leveraging modern technology and new working methods that allow employees, whenever necessary, to perform their duties outside the ordinary workplace. This offers increased flexibility for both employees and employer. Periodically working from home could be one approach to achieve a better balance between work and private life and strengthen the company's position as an attractive employer.

With an aging workforce in some markets, Essity is facing new challenges since absence related to musculoskeletal disorders increases with age. This has resulted in Essity creating a workplace program containing technical improvements and attitude changes to create a more ergonomic work environment and production lines.

Transparent communication is fundamental to the trust between Essity and its employees, as well as their representatives. Essity recognizes the right of each employee to join unions and to partake in union activities. The European Works Council (EWC) represents about 18,000 of Essity's employees. Essity meets the EWC and other employee representatives on a regular basis to inform them of and discuss matters such as the Group's performance and earnings, as well as health and safety and employment terms and conditions. The aim is to communicate changes well ahead of time. Essity also has an agreement with IndustriALL Global Union that represents 50 million workers in 140 countries in the mining, energy and manufacturing sectors. In parallel with Essity's

expansion, the Group encounters new circumstances and challenges, including challenges pertaining to its employee dialogue. When there is no union representation, Essity establishes other channels where possible, such as workers' councils.

Essity supports Global Deal, a global partnership with parties in the private and public sector. The aim of Global Deal is to improve the dialogue between parties in the labor market and national governments to improve employment conditions and productivity.

In connection with organizational changes, Essity works to support the employees affected. This is done through discussions with labor unions at an early stage and by preparing a social action plan that is adjusted to local conditions. The action plan normally includes assistance in seeking other employment and/or education, opportunities for early retirement or other financial incentives.

Health and safety

Essity implements the international OHSAS 18001 (Occupational Health and Safety Assessment Series) standard to ensure that uniform processes are deployed across the Group, and that Essity units continuously improve their workplace health and safety. OHSAS specifies requirements for an organization's occupational health and safety management systems.

Essity has a Group Health and Safety Instruction. The Group's governance system encompasses risk assessment, training, targets and monitoring. All Essity's facilities have procedures in place to increase workplace safety.

Reliable near miss and accident reporting is key; it is vital that Essity analyzes both serious and less serious occurrences to ensure that they are not repeated. Essity has a reporting system that employees use to report accidents and near misses, meaning events that could have led to an accident. The system offers the company good opportunities to perform risk assessments, analyze and improve working methods, and continuously monitor performance.

In the event of a critical incident, information is communicated within the entire Group, enabling all units to gain access to the conclusions and learn from the occurrence.

Corporate governance

The task of corporate governance is to ensure the company's commitments to all of its stakeholders: shareholders, customers, suppliers, creditors, society and employees. It must be structured in a way that supports the company's long-term strategy, market presence and competitiveness. Corporate governance shall be reliable, clear, simple and business-oriented. This Corporate Governance Report forms part of the Board of Directors' Report for Essity's 2018 Annual Report. The report has been reviewed by the company's auditors.

Corporate governance, including remuneration, pages 46–55.

This section describes applicable regulatory rules and regulations for the Group's corporate governance and the company's management structure and organization. It also details the Board of Directors' responsibilities and its work during the year. Information regarding remuneration and remuneration issues and Essity's internal control are also included here. Essity applies the

Swedish Code of Corporate Governance without any deviations (www.corporategovernanceboard.se).

Risk management, pages 33–38

Essity's processes to identify and manage risks are part of the Group's strategy work and are pursued at a local and Group-wide level. The section dealing with risk management describes the most significant risks and procedures used to eliminate or limit these risks.

Sustainability

Essity's sustainability work is an integral part of the company's business model. The company's sustainability report forms part of the Board of Directors' Report. The sustainability work helps reduce risks and costs, strengthen competitiveness, attract new employees and investors, and contributes toward a more sustainable world.

Governance at Essity

1. General shareholder meeting

The general shareholder meeting is Essity's highest decision-making body, which all shareholders are entitled to attend, to have a matter considered and to vote for all shares held by the shareholder. The company's Board of Directors and auditor are elected at the Annual General Meeting (AGM). The AGM also resolves on the remuneration of the Board members and determines guidelines for the remuneration of senior executives. Essity has two listed classes of shares: Class A and Class B shares. Every Class A share represents ten votes while every Class B share represents one vote. There are no other restrictions on voting rights in respect of shares used by shareholders at the general shareholders meeting.

2. Nomination Committee

Shareholders appoint members of the Nomination Committee at the AGM, or stipulate how the members shall be appointed. The Nomination Committee represents the company's shareholders. A majority of the members shall be independent of the company and corporate management. The President and other members of corporate management may not be a member of the Nomination Committee. The main duty of the Nomination Committee is to prepare and present proposals for the AGM's resolutions with respect to election and remuneration matters.

3. External auditors

The Company's auditor is elected at the Annual General Meeting and is responsible for reviewing Essity's annual report and consolidated financial statements and the

Board's and President's administration. The auditor submits an audit report from this review.

The audit is performed in accordance with the Swedish Companies Act, International Standards on Auditing (ISA) and generally accepted auditing principles in Sweden.

4. Board of Directors

The Board of Directors has overall responsibility for the Company's organization and administration. This responsibility is fulfilled, inter alia, through regular monitoring of the business and by ensuring the appropriateness of the organization, including the management team, and by issuing guidelines and reporting from internal control. The Board approves strategies and targets, and decides on major investments, acquisitions and divestments of operations, among other matters.

The Board of Directors comprises nine members elected by the shareholders at the 2018 AGM. According to the Articles of Association, the Board of Directors is to consist of not less than three and not more than twelve members elected by the AGM.

The Board of Directors also includes three employee representatives with deputies, who are appointed by the respective employee organizations under Swedish law.

Essity's Articles of Association contain no provisions regarding appointment or dismissal of Board members or amendments to the Articles. The general shareholder meeting has not delegated to the Board to resolve to issue new shares or to repurchase own shares.

Chairman of the Board

The Chairman of the Board leads the work of the Board and is responsible for ensuring that it is effectively organized and that work is efficiently conducted. This includes continuous monitoring by the Chairman of the company's operations in close dialogue with the President and ensuring that other Board members receive information and decision data that will enable high-quality discussion and decisions by the Board. The Chairman leads the assessment of the Board's and the President's work. The Chairman also represents the company in ownership matters.

5. Audit Committee

The role of the Audit Committee, without prejudice to the Board of Directors' responsibility and other duties, is to monitor the company's financial reporting and provide recommendations and proposals to ensure the reliability of reporting. With regard to the financial reporting, the Committee oversees the effectiveness of the company's internal control, internal audit and risk management. The Audit Committee keeps itself continuously informed about the audit of the annual report and consolidated financial statements and where applicable about the conclusions of the quality control by the Swedish Inspectorate of Auditors concerning the company's external auditor. The Committee receives and addresses the supplementary report to the audit report concerning the conducted audit that the auditor submits in accordance with the EU Audit Regulation and Directive. The Audit Committee informs the Board of its observations and the results of the audit. The Audit Committee also examines and monitors the impartiality and independence of the auditor. In respect to this, particular attention is paid to whether the auditor is providing the company with services other than auditing services. The Committee also assesses the work of the auditor and provides proposals to the company's Nomination Committee concerning the appointment of auditor for the following mandate period.

Members of the Audit Committee are not employed by the company and at least one member has accounting or auditing expertise.

6. Remuneration Committee

The Remuneration Committee drafts the Board's motions on issues relating to remuneration principles, remuneration and other terms and conditions of employment for the President and is authorized to make decisions in these matters for the company's other senior executives. The Committee monitors and assesses programs for variable remuneration, the application of the AGM's resolution on guidelines for remuneration of senior executives and the applicable remuneration structure and remuneration levels in the Group.

7. Internal audit

The internal audit assesses and improves the effectiveness of Essity's internal governance and control as well as risk management. The internal audit reports to the Audit Committee and the Board in relation to internal audit issues. The internal auditors are geographically located throughout the world where Essity conducts operations. The internal audit examines, among other aspects, Essity's internal processes for

sales, sourcing, financial reporting, IT systems, HR issues, various types of projects and compliance with Essity's internal rules, including the company's Code of Conduct. The internal audit also offers internal consultancy services in connection with internal control matters and risk management.

8. President and Executive Management Team

Essity's President and CEO is responsible for and manages the day-to-day administration of the Group and follows the Board's guidelines and instructions. The President and CEO is supported by the Executive Management Team, see pages 54–55, the work of which is led by the President. The Executive Management Team comprises the President, four Group Function Senior Vice Presidents, four Business Unit Presidents and the Presidents of the three global units. The working procedures for the Board of Directors and terms of reference issued by the Board of Directors to the President detail, for example, the division of work between the Board and President. In consultation with the Chairman and Secretary of the Board, the President prepares documentation and decision data for the Board's work.

9. Business units and global units:

Business units:

- Consumer Goods, which offers consumer tissue, baby care and feminine care in Europe, the Middle East and Africa.
- Health and Medical Solutions, which offers incontinence products in Europe, North America, the Middle East and Africa and medical solutions in Asia, Europe, North America, the Middle East and Africa.
- Latin America, which offers consumer tissue, baby care, incontinence products, medical solutions, feminine care and professional hygiene in Latin America.
- Professional Hygiene, which offers professional hygiene in Europe, North America, the Middle East and Africa.

Global units:

- Global Brand, Innovation and Sustainability has global responsibility for customer and consumer brands, innovation and sustainability and public affairs.
- Global Manufacturing has global responsibility for production and technology concerning all product categories with the exception of medical solutions.
- Global Operational Services has global responsibility for sourcing, logistics, business services, IT and digitalization.

Essity's business units adhere to the principle of distinct decentralization of responsibility and authority. The business units are fully responsible for managing and developing their respective operations through

established objectives and strategies, a process that is also centrally coordinated. The business units are responsible for their operating results, capital and cash flow. The business and earnings position is followed up by the entire Executive Management Team on a monthly basis. Each quarter, business review meetings are conducted during which the management of each business unit personally meets with the President and the CFO. These meetings function as a complement to the daily monitoring of operations. Through working procedures and terms of reference, a number of issues of material significance are placed under the control of the CEO and the company's Board of Directors. Essity reports its operations according to three business areas: Personal Care, Consumer Tissue and Professional Hygiene.

Rules and regulations

Certain internal rules and regulations

- Articles of Association
- Working procedures of the Board of Directors, including instructions for the Audit Committee and the Remuneration Committee
- Terms of reference issued by the Board to the President
- Code of Conduct
- Policy documents and instructions (in areas such as finance, human resources, sustainability, internal control, communication, pension and risk management as well as for specific issues, such as the processing of personal data, insider issues, conflicts of interest, competition law, corruption and diversity)

Certain external rules and regulations

- The Swedish Companies Act
- The Swedish Annual Accounts Act
- International Financial Reporting Standards (IFRS)
- EU Market Abuse Regulation (MAR)
- Nasdaq Stockholm's rules for issuers
- Swedish Code of Corporate Governance

Compliance with stock market regulations

- Essity complies with rules that apply in Sweden for listed companies and was not sanctioned by Finansinspektionen, the stock exchange's disciplinary board or any other authority or self-regulating body for violations of the rules concerning the stock market.

More detailed information about Essity's corporate governance is available on www.essity.com

- Articles of Association
- Swedish Code of Corporate Governance
- Information from the Nomination Committee ahead of the 2019 Annual General Meeting (composition, proposals and work)
- Other information ahead of the 2019 Annual General Meeting (notice, Board proposal for principles for remuneration of senior executives, information about routines for notifying attendance at the Meeting, etc.).

Activities during the year

Annual General Meeting

Essity held its AGM in Stockholm on Thursday, April 12, 2018.

The AGM elected the company's Board of Directors. Moreover, guidelines for determining the salary and other remuneration of the President and other senior executives were adopted, see page 50 and Note C3 on pages 80–82.

Nomination Committee

Under the Swedish Corporate Governance Code, a company listed on Nasdaq Stockholm shall have a nomination committee, the purpose of which is to make proposals to the AGM in respect of the election of the Chairman of the Meeting, Board of Directors, Chairman of the Board and auditor, remuneration of each Board Member (divided between the Chairman of the Board and other Board Members), remuneration of the auditor, and where applicable, proposals for amendments to the instruction for the Nomination Committee. At the 2017 AGM, the following instructions to the Nomination Committee were adopted to apply until further notice:

“The Nomination Committee is to comprise representatives of the four largest shareholders in terms of voting rights as per the shareholders' register maintained by the company on the final banking day of August, as well as the Chairman of the Board, who also convenes the first meeting of the Nomination Committee. The member representing the largest shareholder in terms of votes is to be appointed as Chairman of the Nomination Committee. The Chairman of the Board shall not be Chairman of the Nomination Committee. If necessary, due to subsequent ownership changes, the Nomination Committee is entitled to call on one or two additional

members from among the next largest shareholders in terms of voting rights. The total number of members shall be not more than seven. In the event that a member steps down from the Nomination Committee before the task is completed and the Nomination Committee decides it would be beneficial for a replacement to be appointed, such a replacement is to be appointed by the same shareholder or, if this shareholder is no longer among the largest shareholders in terms of voting rights, by the next largest shareholder in terms of voting rights. Changes to the composition of the Nomination Committee are to be disclosed immediately.

The composition of the Nomination Committee is to be announced by Essity no later than six months prior to the AGM. No remuneration is to be paid to the members of the Nomination Committee. Any expenses incurred during the work of the Nomination Committee are to be paid by Essity. The mandate period of the Nomination Committee extends until the composition of the next Nomination Committee is disclosed. The Nomination Committee is to submit proposals relating to the Chairman of the Meeting, the Board of Directors, the Chairman of the Board, Board fees for the Chairman of the Board and each of the other Board members, including remuneration for committee work, the company's auditor and auditor's fees, and to the extent deemed necessary, proposals for amendments to this instruction.”

In its work, the Nomination Committee is to consider the rules that apply to the independence of Board members, as well as the requirement of diversity and breadth with the endeavor to achieve an even gender distribution and that the selection shall be based on expertise and experience relevant to Essity.

Composition of the Nomination Committee for the 2019 AGM

The composition of the Nomination Committee for the 2019 AGM is as follows:

- Helena Stjernholm, AB Industrivärden, Chairman of the Nomination Committee
- Petter Johnsen, Norges Bank Investment Management
- Stefan Nilsson, Handelsbanken Pension Funds and others
- Marianne Nilsson, Swedbank Robur Funds
- Pär Boman, Chairman of the Board, Essity

All shareholders have had an opportunity to submit proposals to the Nomination Committee. The Nomination Committee's proposal for the 2019 AGM is presented in the notice convening the AGM available on Essity's website www.essity.com. The 2019 AGM will be held on Thursday, April 4, see page 8.

The Nomination Committee was convened on four occasions prior to the 2019 AGM. The Chairman of the Board presented the Board evaluation and provided the Nomination Committee with information regarding Board and committee work during the year. When preparing proposals for the Board for the 2019 AGM, particular attention has been paid to the issues of diversity and an even gender distribution, and the Nomination Committee thus applied Item 4.1 of the Swedish Corporate Governance Code as its diversity policy. The aim was to retain gender balance on both the Board and the Board's committees. When preparing its proposal for the election of auditors, the Nomination Committee also gave consideration to the recommendation of the Audit Committee.

Board of Directors

Essity's Board of Directors comprises nine members elected by the AGM.

Ewa Björling, Pär Boman, Maija-Liisa Friman, Annemarie Gardshol, Magnus Groth, Bert Nordberg, Louise Svanberg, Lars Rebien Sørensen and Barbara Milian Thoralfsson were elected as Board members in 2018. Pär Boman was elected as the Chairman of the Board.

The independence of Board members is presented in the table on page 48. Essity complies with the requirements of the Swedish Corporate Governance Code that stipulate that not more than one member elected by the AGM shall be a member of company management, that the majority of the members elected by the AGM shall be independent of the company and company management, and that not fewer than two of these shall also be independent of the company's major shareholders. All of the AGM-elected Board members have experience of the requirements incumbent upon a listed company. Five of the Board members are women, corresponding to 55% of the total number of AGM-elected Board members. The employees have appointed Tina Elvingsson Engfors, Örjan Svensson and Niclas Thulin as representatives to the Board for the period until the 2019 AGM, and their deputies Niklas Engdahl, Martin Ericsson and Andreas Larsson.

Board activities

In 2018, the Board was convened 11 times. The Board has fixed working procedures that describe in detail which ordinary agenda items are to be addressed at the various Board meetings of the year. Recurring agenda items are finances, the market situation, investments and adoption of the financial reports. The Board also establishes and evaluates the company's overall targets and strategy and decides on significant internal rules. Another key task is to continuously monitor the internal control of the compliance of the company and its employees with relevant internal and external rules, and that the company has well-functioning procedures for market disclosures. On a regular basis throughout the year, the Board has also dealt with reports from the Audit and Remuneration Committees and reports on strategy, market, internal audit, internal control and financial operations. The company's auditor regularly present a report on its audit work and these issues are discussed by the Board. The Business Unit Presidents present their respective operations and current issues affecting them.

In 2018, the Board of Directors has — in addition to the customary work of the Board — focused on the integration of BSN medical and on issues within the scope of ongoing efficiency improvement and profitability programs, such as Cure or Kill and Tissue Roadmap. During the autumn, the Board of Directors also focused on strategy work and issues in connection with the cost-savings program presented by the company on September 28, in light of the market situation, raised raw material and energy costs and events in the business environment.

Evaluation of the Board's work

The work of the Board, like that of the President and the Chairman, is evaluated annually using a systematic and structured process. The purpose of this work is to obtain a sound basis for the Board's own development work and to provide the Nomination Committee with decision data for its nomination work. External expertise was used. The evaluation took the form of an anonymous questionnaire and interviews as well as group and individual discussions. The evaluation covers such areas as the Board's methods of work, effectiveness, expertise and the year's work. The Board was provided with feedback after the results were compiled. The Nomination Committee was also informed of the results of the evaluation.

Audit Committee

The Audit Committee comprises Chairman Barbara Milian Thoralfsson, Pär Boman and Bert Nordberg. The Audit Committee held six meetings during the year. In addition, members have also held meetings with internal audit, the auditors and the CFO, and held meetings with the auditors and CFOs of large partly-owned companies. In its monitoring of the financial reporting, the Committee dealt with relevant accounting issues, internal auditors' reviews, auditing work, a review of various measurement issues, such as testing of impairment requirements for goodwill, and the pre-conditions for the year's pension liability calculations. The Audit Committee also prepared a recommendation to be used by the Nomination Committee when deciding on its proposal to the AGM regarding the election of auditors.

Remuneration Committee

The Remuneration Committee comprises Chairman Pär Boman, Bert Nordberg and Louise Svanberg. The Remuneration Committee held four meetings in 2018. Activities

mainly concerned remuneration and other employment terms and conditions for senior executives, and current remuneration structures and remuneration levels in the Group.

Internal audit

The basis of the work of the internal audit is a risk analysis conducted in cooperation with Essity's management team. The risk analysis concludes in an audit plan, which is presented to the Audit Committee. In 2018, 117 audit projects were performed and reported at meetings with the Audit Committee.

Work in 2018 involved follow-up of the units' progress with process-based control, follow-up of the efficiency in internal governance and control, and follow-up of compliance with Essity's policies.

External auditor

The 2018 Annual General Meeting appointed the accounting firm of Ernst & Young AB as the company's auditor for a mandate period of one year. The accounting firm notified the company that Hamish Mabon, Authorized Public Accountant, would be the auditor in charge. Hamish Mabon is also the auditor for Svenska Cellulosa Aktiebolaget SCA, Skanska AB, AB Tetra Pak and Husqvarna AB, among other companies. He owns no shares in the company.

In accordance with its formal work plan, the Board met with the auditors at two scheduled Board meetings in 2018. The auditor also attended each meeting of the Audit Committee. At these meetings, the auditor presented and received opinions on the focus and scope of the planned audit and delivered verbal audit and review reports. Furthermore, at the Board's third scheduled autumn meeting, the auditor delivered an in-depth verbal report on the audit for the year. The working procedures specify a number of mandatory issues that must be addressed. These include matters of importance that have been a cause for concern or discussion during the audit, business routines and transactions where differences of opinion may exist regarding the choice of accounting methods. The auditor shall also disclose consultancy work conducted for Essity as well as other dependencies in relation to the company and its management. On each occasion, Board members have had an opportunity to ask the auditors questions. Certain parts of the detailed discussion on the accounts take place without representatives of company management being present.

Remuneration, Management and Board of Directors

Guidelines

The 2018 AGM adopted guidelines for remuneration of senior executives that are based on a total remuneration package comprising a fixed salary, variable salary and other benefits, and a pension; see Note C3 on pages 80-82. Corresponding guidelines have been proposed to the 2019 AGM, see page 29.

Remuneration of the President and other senior executives

Remuneration of the President and other senior executives is presented in Note C3 on pages 80–82. Variable remuneration for the President, CFO and Business Unit Presidents was maximized to a total of 100% of the fixed salary for 2018. For two Business Unit Presidents, stationed in Latin America and the US, the maximum outcome is 110–130%. The corresponding limit for other senior executives was 90% in 2018.

Variable remuneration and strategic targets

Programs for variable remuneration are formulated to support the Group's strategic targets. The short-term program is individually adapted and based mainly on cash flow, EBITA margin and organic sales growth. The long-term program is based on the Essity share's long-term total shareholder return.

Remuneration of the Board

The total remuneration of the AGM-elected Board members amounted to SEK 8,642,000 in accordance with the AGM's resolution. See Note C4 on page 82 for further information.

Internal control and financial reporting

The Board's responsibility for internal governance and control is regulated in the Swedish Companies Act, the Annual Accounts Act and the Swedish Corporate Governance Code. The Annual Accounts Act requires that the company, each year, describes its system for internal control and risk management with respect to financial reporting. The Board bears the overall responsibility for financial reporting and its working procedures regulate the internal division of work between the Board and its committees.

The Audit Committee has the important task of preparing the Board's work to assure the quality of financial reporting. This preparation work includes issues relating to internal control and regulation compliance, control of recognized values, estimations, assessments and other activities that may impact the quality of the financial reports. The Committee has charged the company's auditor with the task of specifically examining the degree of compliance in the company with the rules for internal control, both general and detailed.

Financial reporting to the Board

The Board's working procedures stipulate which reports and information of a financial nature are to be submitted to the Board at each scheduled meeting. The President, together with the Chairman, ensures that the Board receives the reports required to enable the Board to continuously assess the company's and Group's financial position. Detailed instructions specifically outline the types of reports that the Board is to receive at each meeting.

Internal reporting

For a number of years now, Essity has used a shared reporting system for financial reports. An increasing number of units within Essity are also introducing the same accounting system based on a common IT platform.

Accounting and reporting for several units are, to a certain extent, conducted in Shared Service Centers. Reporting is therefore more efficient and uniform.

External financial reporting

The quality of external financial reporting is guaranteed via a number of actions and procedures. The President is responsible for ensuring that all information issued, such as press releases with financial content, presentation material for meetings with the media, owners and financial institutions, is correct and of a high quality. The responsibilities of the company's auditors include reviewing accounting issues that are critical for the financial reporting and reporting their observations to the Audit Committee and the Board of Directors. In addition to the audit of the annual accounts, a review of the half-year report and of the company's administration and internal control is carried out.

Risk management

With regard to financial reporting, the risk that material errors may be made when reporting the company's financial position and results is considered the primary risk. To minimize this risk, control documents have been established pertaining to accounting, procedures for annual accounts and follow-up of reported annual accounts. There is also a joint system for reporting annual accounts. Essity's Board of Directors and management assess the financial reporting from a risk perspective on an ongoing basis. To provide support for this assessment, the company's income statement and balance sheet items are compared with earlier reports, budgets and other planned figures. Control activities that are significant to financial reporting are carried out using the company's IT system. For further information, see the Risk and risk management section on pages 33–38.

Control activities and follow-up

Significant instructions and guidelines related to financial reporting are prepared and updated regularly by the Group Function Finance and are easily accessible on the Group's intranet. The Group Function Finance is responsible for ensuring compliance with instructions and guidelines. Process managers at various levels within Essity are responsible for carrying out the

necessary control measures with respect to financial reporting. An important role is played by the business unit's controller organizations, which are responsible for ensuring that financial reporting from each unit is correct, complete and delivered in a timely manner. In addition, each business unit has a Finance Manager with responsibility for the individual business unit's financial statements. The company's control activities are supported by the budgets prepared by each business unit and updated during the year through continuous forecasts.

Essity has a standardized system of control measures involving processes that are significant to the company's financial reporting. The controls are adapted to the operational process and system structure of each unit. Accordingly, each unit prepares a record of the actual controls to be carried out in the unit in question. Control of these processes is assessed through self-evaluation followed up by an internal audit. In some cases, Essity has enlisted external help to validate these controls.

Financial results are reported and examined regularly within the management teams of the operating units and communicated to Essity's management at monthly and quarterly meetings. Before reports are issued, results are analyzed to identify and eliminate any mistakes in the process until the year-end closing. For additional information, see the Internal audit section on page 49.

The Board follows up to ensure that the internal control and reporting to the Board functions through continuous reporting from the President and CFO and through reporting from the internal audit unit in the scope of the audit plan set annually. Internal audit also continuously reports its observations in this respect to the Audit Committee. Internal audit's tasks include following up compliance with the company's internal rules, and the results of this follow-up are reported to the Board through the Audit Committee.

Board of Directors and Auditors

Elected by the Annual General Meeting

Pär Boman (1961)

Engineering and Business Administration degrees

Chairman of the Board since 2016.

Chairman of the Board of Svenska Handelsbanken AB and Svenska Cellulosa Aktiebolaget SCA, Deputy Chairman of the Board of AB Industrivärden and member of the Board of Skanska AB.

2006–2015 President of Handelsbanken

Elected: 2016 (elected in SCA 2010)

Independent of the company and corporate management.

Class B shares: 3,000

Ewa Björling (1961)

Med. Dr. Sci. and Associate Professor from Karolinska Institutet.

Chairman of the Board of The Swedish Petroleum & Biofuels Institute (SPBI). Member of the boards of Biogaia AB and Mobilaris AB. Former member of the Boards of the Swedish National Insurance Office and the Swedish International Development Cooperation Agency (SIDA).

A. ACCOUNTING PRINCIPLES AND USE OF ALTERNATIVE PERFORMANCE MEASURES (APM)

A1. GENERAL ACCOUNTING PRINCIPLES, NEW ACCOUNTING RULES AND BASIS OF PREPARATION

READING INSTRUCTIONS

General accounting principles **AP** and new accounting rules are presented below. Other accounting principles considered material by Essity are presented in conjunction with the respective notes. The same principles are usually applied in both the Parent Company and the Group. In some cases, the Parent Company applies principles other than those used by the Group and, in such cases, these principles are specified under the respective note in the section about the Parent Company.

Key assessments and assumptions **KAA** are presented under the respective notes; see application of assessments on page 64.

Amounts that are reconcilable to the balance sheet, income statement, cash flow statement and the operating cash flow statement are marked with the following symbols:

BS	Balance sheet
IS	Income statement
CF	Cash flow statement
OCF	Operating cash flow statement
Txx	Reference to table in note

BASIS FOR PREPARATION

Essity's financial statements are prepared in accordance with the Annual Accounts Act and International Financial Reporting Standards (IFRS)/International Accounting Standards (IAS), as adopted within the EU, and the Swedish Financial Reporting Board, Recommendation RFR 1 Supplementary Accounting Rules for Groups. The Parent Company's financial statements are prepared in accordance with the Swedish Financial Reporting Board's recommendation RFR 2, Reporting by Legal Entities, and the Annual Accounts Act. The accounts for both the Group and the Parent Company relate to the fiscal year that ended on December 31, 2018. Essity applies the historical cost method for measurement of assets and liabilities except for financial assets and liabilities, including derivative instruments, measured at fair value through profit or loss, which are measured at fair value either in profit or loss or in other comprehensive income.

New or amended accounting standards 2018

In this Annual Report, the Group and Parent Company apply the new and amended standards that came into effect from January 1, 2018.

IFRS 9 Financial Instruments

IFRS 9 replaces IFRS 39 and includes rules governing how financial instruments are to be classified and measured, introduces a new model for impairment of financial assets based on expected credit losses and provides clarification of the rules for hedge accounting. Information regarding the effects of the changed rules for Essity is provided in the Capital structure and financing section on page 89, in Note E1, E2, E3, E6 and in the Risks and risk management section on page 33. The effects of the transition to IFRS 9 are described in Note G5 Changes due to new accounting rules on page 107.

IFRS 15 Revenue from Contracts with Customers

IFRS 15 replaces IAS 11 Construction Contracts, IAS 18 Revenue, IFRIC (International Financial Reporting Interpretations Committee) 13 Customer Loyalty Programmes, IFRIC 15 Agreements for the Construction of Real Estate, IFRIC 18 Transfers of Assets from Customers and SIC (Standing Interpretation Committee of the IASC, predecessor to the IFRIC) 31 Revenue – Barter Transactions Involving Advertising Services. The standard establishes a new regulatory framework for the manner in which a company should recognize revenue relating to commercial agreements (contracts) with customers in which the delivery of goods/services is divided up into separate identifiable performance obligations that are reported independently. Information regarding the effects of the changed rules for Essity is provided in Note B1 – Net sales – Revenue from contracts with customers on page 70. The effects

of the transition to IFRS 15 are described in Note G5 Changes due to new accounting rules on page 107.

The above amendments did not have any material impact on the Group's or Parent Company's results or financial position.

New or amended accounting standards after 2018

A number of new and amended IFRS have not yet come into effect and have not been applied in advance in preparing the Group's and the Parent Company's financial statements. The IFRS that may affect the financial statements of the Group or the Parent Company are described below. Other new or amended standards or interpretations published by IASB are not expected to have any impact on the Group's or the Parent Company's financial statements.

IFRS 16 Leases

In 2018, Essity continued its preparations for the transition to the new standard IFRS 16 Leases. Leases have been analyzed and evaluated, system support for managing leases has been implemented and the organization has received training in the new standard and the new system support. When the standard becomes effective on January 1, 2019, Essity will apply the modified retrospective approach, entailing an adjustment of the opening balance with the cumulative effect of initially applying the standard on the first date of initial application and that comparative years will not be restated.

The lease liability is measured at the present value of the outstanding lease payments and the right-of-use asset for all leases totals an amount corresponding to the lease liability, adjusted for any prepaid lease payments and accrued lease payments recognized on December 31, 2018. For onerous leases, Essity has chosen to adjust the value of the right-of-use asset downward in an amount that in the 2018 year-end accounts was recognized as non-current and current provision. Only marginal reclassifications of accrued and prepaid lease payments and adjustments of provisions have taken place. An incremental borrowing rate has been set by currency. The average incremental borrowing rate on January 1, 2019 was approximately 3%. The transition does not have any impact on equity.

Essity has decided to apply the exemption rules for short-term leases and leases where the underlying asset has a low value. These leases are not included in the right-of-use asset or the liability. In its application of the standard, Essity has determined that a time horizon of five years can generally be applied to leases of offices and distribution centers with no fixed end date even if the formal lease term is shorter.

The following preliminary adjustments are recognized in Essity's balance sheet on January 1, 2019 when the standard became effective. The right-of-use assets largely comprise leases for offices and distribution centers:

SEKm	
Right-of-use asset	3,694
Non-current financial lease liabilities	2,990
Current financial lease liabilities	694
Provisions (reclassification to right-of-use asset)	26
Prepaid and accrued lease payments (reclassification to right-of-use asset)	36

Essity assesses that IFRS 16 will have a slightly positive impact on EBITA and a slightly negative impact on financial items. Total assets will increase as a result of an increase in non-current assets and net debt.

Reconciliation of minimum lease payments according to IAS 17 and recognized lease liability according to IFRS 16

SEKm	
Operating future minimum lease payments, December 31, 2018, according to Note G2 on page 105	3,967
Present-value calculated with the Group's incremental borrowing rate at January 1, 2019	-486
Excluding short-term leases and leases with a low value	-10
Renewal options that are expected to be utilized	213
Lease liabilities at January 1, 2019	3,684

IFRIC 23 Uncertainty over Income Tax Treatments

In 2017, a new interpretation was issued regarding the recognition of taxes, IFRIC 23. The interpretation clarifies how the recognition and measurement

A1. GENERAL ACCOUNTING PRINCIPLES, NEW ACCOUNTING RULES AND BASIS OF PREPARATION, CONT.

of uncertain tax positions is to be conducted. The new interpretation will apply from January 1, 2019. A retrospective approach or a modified retrospective approach is permitted. Essity has chosen the modified retrospective approach, meaning that comparative figures are not restated. In conjunction with the 2018 annual accounts, the Group evaluated the effects of the interpretation and determined that no material changes are expected, with the exception of the reclassification of Essity's current and non-current provisions to tax liabilities in an amount of SEK 713m in the opening balance for 2019.

USE OF ASSESSMENTS KAA

The preparation of financial statements in conformity with IFRS and generally accepted Swedish accounting principles requires assessments and assumptions to be made that affect recognized asset and liability items and income and expense items, respectively, as well as other information disclosed.

These assumptions and estimates are often based on historical experience, but also on other factors, including expectations of future events. With other assumptions and estimates, the result may be different and the actual result will seldom fully concur with the estimated result.

In Essity's opinion, the areas that are impacted the most by assumptions and estimates are:

Goodwill, D1 Intangible assets, page 85

Pensions, C5 Remuneration after employment, page 82

Taxes, B5 Income taxes, page 78

Provisions, D6 Other provisions, page 88

Essity's assessments and assumptions are presented in the respective notes.

PRINCIPLES OF CONSOLIDATION

Group companies are consolidated from the date the Group exercises control or influence over the company according to the definitions provided under the respective category of Group company below. Divested Group companies are included in the consolidated accounts until the date the Group ceases to control or exercise influence over the companies. Intra-Group transactions have been eliminated.

Parent Company

The Parent Company recognizes all holdings in Group companies at cost after deduction for any accumulated impairment losses.

Subsidiaries

All companies over which Essity Aktiebolag (publ) has control are included as subsidiaries. The definition of control is that Essity has the ability to control the subsidiary, is entitled to a return and has the power to influence the activities that impact this return. The consolidated financial statements are prepared in accordance with the purchase method.

Joint arrangements

Essity classifies its joint arrangements as joint venture or joint operation. A joint venture entitles the joint owners to the net assets of the investment and is therefore recognized according to the equity method. In joint operations, parties to the agreement have rights to the assets and obligations for the liabilities associated with the investment, meaning that the operator must account for its share of the assets, liabilities, revenues and costs according to the proportional method.

Associates

Associates are companies in which the Group exercises a significant influence without the partly owned company being a subsidiary or a joint arrangement. Normally, this means that the Group owns between 20% and 50% of

the votes. Accounting for associates is carried out according to the equity method and they are initially measured at cost.

For further information, see note F3 Joint ventures and associates on page 100.

TRANSLATION OF FOREIGN CURRENCY

Functional currency and translation of foreign Group companies to the presentation currency

Essity's Parent Company has Swedish kronor (SEK) as its functional currency. The functional currency of each Essity Group company is determined on the basis of the primary economic environment in which the respective company is active which, with a few exceptions, is the country in which the individual company operates. The financial statements of Group companies are translated to the Group's presentation currency, which is SEK in the case of Essity. Assets and liabilities are translated at the closing rate, while income and expenses are translated at the average rate for the respective period. Translation differences during the period on the Group's net assets are recognized in other comprehensive income in the translation reserve as a component of equity.

Exchange rate effects arising from financial instruments used to hedge foreign subsidiaries' net assets are recognized in the same manner in other comprehensive income in the translation reserve as a component of equity. On divestment, the accumulated translation differences on the foreign subsidiary and accumulated exchange rate effects on the financial instrument used to currency hedge the net assets in the company are recognized as part of the gain or loss on disposal.

Goodwill and fair value adjustments arising in connection with the acquisition of a foreign subsidiary are to be translated, in a manner corresponding to the net assets in the company, from their functional currency to the presentation currency.

TRANSACTIONS AND BALANCE SHEET ITEMS IN FOREIGN CURRENCY

Transactions in foreign currency are translated to a functional currency using the rate prevailing on the transaction date. At the balance sheet date, monetary assets and liabilities in foreign currency are translated at the closing rate and any exchange rate effects are recognized in profit or loss. In cases where the exchange rate effect is related to the operations, the effect is recognized net in operating profit. Exchange rate effects pertaining to borrowing and financial investments are recognized as other financial items.

If hedge accounting has been applied, for example, for cash flow hedges or hedging of net investments, the exchange rate effect is recognized in total equity in other comprehensive income.

If a financial instrument has been classified as financial assets measured at fair value through comprehensive income, the portion of the value change pertaining to currency is recognized in profit or loss, while any other unrealized change is recognized in equity under other comprehensive income.

GOVERNMENT GRANTS

Government grants are measured at fair value when there is reasonable assurance the grants will be received and that Essity will comply with the conditions attached to them. Government grants related to acquisition of assets are recognized in the balance sheet by the grant reducing the carrying amount of the asset. Government grants received as compensation for costs are accrued and recognized in profit or loss during the same period as the costs. If the government grant or assistance is neither related to the acquisition of assets nor to compensation for costs, the grant is recognized as other income.

A2. USE OF NON-INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS) PERFORMANCE MEASURES

Guidelines concerning non-IFRS performance measures for companies with securities listed on a regulated market in the EU have been issued by the ESMA (The European Securities and Markets Authority). These guidelines are to be applied to alternative performance measures not supported under IFRS.

The Annual Report refers to a number of performance measures not defined in IFRS. These performance measures are used to assist investors

and company management to analyze the company's operations and objectives. These non-IFRS measures may differ from similar terms used by other companies.

A description of the various non-IFRS performance measures used as a complement to the financial information reported according to IFRS is presented below.

CALCULATION OF PERFORMANCE MEASURES NOT INCLUDED IN IFRS FRAMEWORK

RETURN MEASURES		
Return is a financial term that describes how much the value of an asset changes from an earlier point in time		
Non-IFRS performance measure	Description	Reason for use of the measure
Return on capital employed, ROCE	Accumulated return on capital employed is calculated as 12-month rolling operating profit before amortization of acquisition-related intangible assets/ EBITA as a percentage of an average of capital employed during the five most recent quarters. The corresponding key figure for a single quarter is calculated as EBITA for the quarter multiplied by four as a percentage of capital employed for the two most recent quarters.	A central ratio for measuring return on capital tied up in operations.
Adjusted return on capital employed, ROCE	Accumulated return on capital employed is calculated as 12-month rolling operating profit before amortization of acquisition-related intangible assets/ EBITA, excluding items affecting comparability, as a percentage of an average of capital employed during the five most recent quarters. The corresponding key figure for a single quarter is calculated as EBITA for the quarter, excluding items affecting comparability, multiplied by four as a percentage of capital employed for the two most recent quarters.	A central ratio for measuring return on capital tied up in operations, excluding items affecting comparability.
SEKm		
	2018	2017
ADJUSTED RETURN ON CAPITAL EMPLOYED, ROCE		2016
EBITA	11,560	12,550
Items affecting comparability	1,375	855
Adjusted EBITA	12,935	13,405
Average capital employed	107,575	90,167
Adjusted return on capital employed, ROCE	12.0%	14.9%
		16.4%
CAPITAL MEASURES		
Shows how capital is utilized and the company's financial strength		
Non-IFRS performance measure	Description	Reason for use of the measure
Return on equity	For the Group, return on equity is calculated as profit for the period as a percentage of average equity.	Shows, from a shareholder perspective, the return that is generated on the owners' capital that is invested in the company.
Adjusted return on equity	For the Group, adjusted return on equity is calculated as profit for the period, excluding items affecting comparability, as a percentage of average equity.	Shows, from a shareholder perspective, the return excluding items affecting comparability that is generated on the owners' capital that is invested in the company.
Equity	The equity reported in the consolidated balance sheet consists of taxed equity increased by the equity portion of the Group's untaxed reserves and non-controlling interests. The deferred tax liability in untaxed reserves has been calculated on the basis of the corporate tax rate that has been approved and will take effect given that the reserves are expected to be realized.	Equity is the difference between the Group's assets and liabilities, which corresponds to the Group's equity contributed by owners and the Group's accumulated profits.
Equity per share	Equity in relation to the average number of shares outstanding that exist in Essity Aktiebolag (publ).	A measure of the amount of equity that exists per share and is used for measuring the share against the share price.
Equity/assets ratio	Equity expressed as a percentage of total assets.	A traditional measure for showing financial risk, expressing the percentage of total assets that is financed by the owners.
Capital employed	The Group's and business areas' capital employed is calculated as the balance sheet's total assets, excluding interest-bearing assets and pension assets, less total liabilities, excluding interest-bearing liabilities and pension liabilities.	This measure shows the amount of total capital that is used in the operations and is thus one of the components for measuring the return from operations.

Non-IFRS performance measure	Description	Reason for use of the measure
Capital turnover	Net sales for the year divided by average capital employed.	Shows in a clear manner how effectively capital is employed. Together with sales growth and the operating margin, the capital turnover ratio is a key measure for monitoring value creation.
Working capital	The Group's and business areas' working capital is calculated as current operating receivables less current operating liabilities.	This measure shows how much working capital that is tied up in the operations and can be put in relation to sales to understand how effectively tied-up working capital is used.

Financial liabilities	59,585	59,379	42,146
Net debt	54,404	52,467	35,173
Non-IFRS performance measure	Description	Reason for use of the measure	
Debt/equity ratio	Expressed as net debt in relation to equity.	Helps show financial risk and is the most useful measure for management to monitor the level of the company's indebtedness.	
Debt payment capacity	Expressed as cash surplus in relation to closing net debt.	A financial measure that shows the company's capacity to repay its debt.	
Net debt/EBITDA	Calculated as the closing balance of net debt in relation to 12 months rolling EBITDA.	A financial measure that shows the company's capacity to repay its debt.	
Net debt/Adjusted EBITDA	Calculated as the closing balance of net debt in relation to 12 months rolling EBITDA, excluding items affecting comparability.	A financial measure that shows the company's capacity to repay its debt, adjusted for the impact of items affecting comparability.	
Interest coverage ratio	Calculated according to the net method where operating profit is divided by financial items.	This ratio indicates a company's ability to cover its interest expenses.	
PERFORMANCE MEASURES			
Various types of performance measures and margin measures expressed as a percentage of sales			
Non-IFRS performance measure	Description	Reason for use of the measure	
Organic net sales	The change in total organic sales for the period compared with the preceding period excluding exchange rate effects and effects from acquisitions and disposals.	This measure is of major importance for management in its monitoring of underlying net sales driven by changes in volume, price and product mix for comparable units between different periods.	
SEKm		2018	2017

Non-IFRS performance measure	Description	Reason for use of the measure
Adjusted gross profit	Net sales minus cost of goods sold excluding items affecting comparability.	Gross profit shows the company's earnings before the effects of selling and administrative costs. Adjusted gross profit excludes items affecting comparability.
Operating surplus margin	Operating surplus as a percentage of net sales for the year.	This measure is a complement to operating margin, as it shows the cash surplus in relation to net sales.
Operating profit before depreciation, amortization and impairment of property, plant and equipment and intangible assets/EBITDA.	Calculated as operating profit before depreciation, amortization and impairment of property, plant and equipment and intangible assets.	This measure is a complement to operating profit, as it shows the cash surplus from operations.
Adjusted operating profit before depreciation, amortization and impairment of property, plant and equipment and intangible assets/EBITDA.	Calculated as operating profit before depreciation, amortization and impairment of property, plant and equipment and intangible assets excluding items affecting comparability.	This measure is a complement to operating profit, as it shows the cash surplus from operations adjusted for the impact of items affecting comparability.
Operating profit before amortization of acquisition-related intangible assets/EBITA	Calculated as operating profit after depreciation/amortization of tangible and intangible assets but before amortization of acquisition-related intangible assets.	The measure is a good complement to enable earnings comparisons with other companies, regardless of whether business activities are based on acquisitions or organic growth.
Adjusted operating profit before amortization of acquisition-related intangible assets/EBITA	Calculated as operating profit after depreciation/amortization of tangible and intangible assets but before amortization of acquisition-related intangible assets, excluding items affecting comparability.	The measure is a good complement to enable earnings comparisons with other companies, regardless of whether business activities were based on acquisitions or organic growth, and even adjusted for the impact of items affecting comparability.

Items affecting comparability, sales, general and administration	-62	346	2,113
Adjusted operating profit before amortization of acquisition-related intangible assets/EBITA	12,935	13,405	11,992
Adjusted EBITA margin	10.9%	12.3%	11.8%

Non-IFRS performance measure	Description	Reason for use of the measure	
Items affecting comparability	Under items affecting comparability, Essity includes costs in connection with acquisitions, restructuring, impairment and other specific events. The latter item includes items not covered by acquisitions, restructuring and impairment but which are relevant when comparing earnings for one period with those of another. The item "Other specific events" is specified in Note B3 Operating expenses on page 77.	Separate reporting of items affecting comparability between periods provides a better understanding of the company's underlying operating activities.	
Restructuring costs	Costs for impairment together with headcount reductions in connection with restructuring.	This measure shows the specific costs that have arisen in connection with restructuring of a specific operation, which contributes to a better understanding of the underlying cost level in the continuing operations.	
Adjusted gross margin	Relates to adjusted gross profit as a percentage of net sales for the period.	Adjusted gross margin is stripped of items affecting comparability and is thus a better measure than gross margin for showing the company's margins before the effect of costs such as selling and administrative costs.	
EBITA margin	Operating profit before amortization of acquisition-related intangible assets as a percentage of net sales for the period.	The measure is a good complement to enable margin comparisons with other companies, regardless of whether business activities are based on acquisitions or organic growth.	
Adjusted EBITA margin	Operating profit before amortization of acquisition-related intangible assets, excluding items affecting comparability, as a percentage of net sales for the year.	The measure is a good complement to enable margin comparisons with other companies, regardless of whether business activities are based on acquisitions or organic growth.	
Operating margin	Operating profit as a percentage of net sales for the year.	The operating margin is a key measure together with sales growth and capital turnover ratio for monitoring value creation.	
Adjusted operating margin	Operating profit, excluding items affecting comparability, as a percentage of net sales for the year.	Adjusted operating margin is key measure together with sales growth and capital turnover ratio for monitoring value creation.	
Adjusted operating profit	Calculated as operating profit before financial items and tax, excluding items affecting comparability.	Adjusted operating profit is a key ratio for control of the Group's profit centers and provides a better understanding of earnings performance of the operations than the non-adjusted operating profit.	
SEKm			
ADJUSTED OPERATING PROFIT			
Operating profit	10,759	11,905	9,008
Items affecting comparability	1,444	940	2,825
Adjusted operating profit	12,203	12,845	11,833
Adjusted operating margin	10.3%	11.8%	11.7%
Financial net margin	Net financial items divided by net sales.	This measure shows the relationship between net financial items and net sales.	
Adjusted profit before tax	Calculated as operating profit before tax, excluding items affecting comparability.	This is a useful measure for showing total profit for the company including financing, but not affected by taxes and items that affect comparability with previous periods.	
Non-IFRS performance measure	Description	Reason for use of the measure	
Adjusted tax	Tax expenses for the period adjusted for tax expenses relating to items affecting comparability.	A useful measure to show the total tax expense for the period, adjusted for taxes related to items affecting comparability.	
SEKm			
ADJUSTED TAX			
Tax	-1,050	-1,938	-3,931
Tax relating to items affecting comparability	-440	-253	-424
Adjusted tax	-1,490	-2,191	-4,355
Adjusted profit for the period	Profit for the period after deducting items affecting comparability.	Shows the period's total underlying earnings capacity excluding items affecting comparability.	
Net margin	Profit for the period as a percentage of net sales for the year.	The net margin shows the remaining share of net sales after all of the company's costs, including income tax, have been deducted.	
Earnings per share	Profit for the period attributable to owners of the Parent divided by the number of shares outstanding.	Earnings per share is a good measure of the company's profitability and is used to determine the value of a company's outstanding shares.	
Adjusted earnings per share	Adjusted earnings for the period attributable to owners of the Parent, excluding amortization of acquisition-related intangible assets after tax divided by number of shares.	Adjusted earnings per share is a good measure of the company's profitability and is used to determine the value of a company's outstanding shares. The measure is a good complement to enable comparison of earnings per share with other companies, regardless of whether business activities are based on acquisitions or organic growth.	

CASH FLOW PERFORMANCE MEASURES		Various performance measures and costs that have impacted the company's cash flow		
Non-IFRS performance measure	Description	Reason for use of the measure		
Operating cash surplus	Calculated as operating profit with a reversal of depreciation, amortization and impairment of tangible and intangible assets. Share of profits of associates and joint ventures, items affecting comparability and capital gains/losses are excluded.	This measure shows the cash flow generated by profit and is part of the follow-up of cash flow.		
Operating cash flow	Consists of the sum of operating cash surplus and change in working capital, with deductions for current capital expenditures in non-current assets and restructuring costs.	This is an important control measure used internally within the organization that shows the combined cash flow from operating activities including all parts that the units have control over themselves.		
SEKm		2018	2017	2016

Operating cash surplus		5,630	5,649	5,515
Change in working capital		-565	73	-30
Current capital expenditures		-1,022	-719	-1,267
Restructuring costs, etc.		-365	-592	-83
Operating cash flow		3,678	4,411	4,135
Non-IFRS performance measure	Description	Reason for use of the measure		
Cash flow from current operations	Operating cash flow less net financial items and tax payments and taking into account other financial cash flow.	This measure illustrates the cash flow generated by operations and that can potentially be used for strategic initiatives such as strategic capital expenditures or acquisitions.		
Strategic capital expenditures in non-current assets	Strategic capital expenditures increase the company's future cash flow through capital expenditures to expand facilities, or new technologies that boost competitiveness.	Shows the size of the capital expenditures that are made in expansion and other growth measures.		
Current capital expenditures	Investments to maintain competitiveness, such as maintenance, rationalization and replacement measures or investments of an environmental nature.	Shows the size of the capital expenditures required to maintain existing manufacturing capacity.		

B. SALES AND EARNINGS

B1. NET SALES – REVENUES FROM CONTRACTS WITH CUSTOMERS

AP ACCOUNTING POLICIES AND KEY ESTIMATES AND ASSESSMENTS

From January 1, 2018, Essity applies IFRS 15 Revenue from Contracts with Customers that regulates revenue recognition and disclosure requirements for commercial agreements (contracts) with customers. The standard is applied retrospectively from the date of initial application (modified retrospective method) and pertains to commercial agreements with customers in which delivery of goods/services is divided into separately identifiable performance obligations that are recognized independently. No transitional effects arose in connection with the transition to IFRS 15, which is why equity did not need to be adjusted when the new standard was introduced and also no reclassifications were made.

Revenue recognition

Essity primarily generates revenue from the sale of finished products to, for example, the retail sector, companies, industries and the healthcare sector. Revenue from sales of services occurs to a certain extent but nevertheless accounts for a small portion of the Group's sales. Essity's operations and sales are divided into various segments that sell different products in several regions. The product portfolio is diversified but the principles for revenue recognition are the same for all segments. For a description of the products, see the section on Essity's three business areas, Personal Care, Consumer Tissue and Professional Hygiene on pages 20–27. Essity's contracts with customers primarily comprise framework agreements without established minimum volumes, which means that a binding contract according to IFRS 15 criteria does not arise until the customer places an order.

Performance obligations and timing of revenue recognition

Essity's performance obligations in the contracts involve providing the goods specified in the contracts. The performance obligations are satisfied and the revenue recognized when control of the products is passed to the customer. The timing of when control is passed to the customer is determined by the delivery terms (Incoterms) applied in the contract. For most supply contracts, control is passed when the goods have been delivered to the customer's warehouse and the customer thereby can control the use and receive the benefits of the goods. Delivery of goods and services is normally invoiced in connection with, or directly after, delivery and recognized at a specific point in time. No revenue is recognized over time. Disclosures regarding remaining performance obligations on the balance sheet date are not provided in accordance with the exemption in IFRS 15 for contracts with customers that have a term of less than one year.

Determination of transaction price

The transaction price primarily comprises the fixed price of the quantity sold less estimated volume discounts. Marketing subsidies and discount coupons exist to only a highly limited extent that reduce Essity's recognized revenue.

Volume discounts are calculated by assessing the probable discount outcome and making provisions continuously throughout the year every time

the accounts are closed and are determined at year-end in accordance with the sales volume to each customer. The provision recognized as a liability is reduced in the subsequent year when the discount is credited to the customer. Marketing subsidies entail that the customer receives a discount for carrying out marketing activities. In certain cases, Essity reimburses customers in the retail sector in accordance with contracts for loss of income due to discount coupons used by consumers. The probable outcome of used discount vouchers and thus discounts provided during the reporting period is assessed and revised every time the accounts are closed. Customers have only limited rights to return products and past volumes of return products are low. Essity essential grants customers no right of return except when the products are faulty. When products are returned, a liability is recognized for the repayment that is expected to be made and an asset is recognized for the right to recover the goods from the customer when the goods are returned. Past experience is used to estimate the share of returns at the time of sale and revenue is only recognized for products that are not expected to be returned. The total transaction price is estimated at the amount that Essity deems will accrue to the company when the contract is signed with respect to volume discounts and any marketing subsidies, discount vouchers and returns. The transaction price is updated if the conditions forming the basis of the estimate have significantly changed.

Trade receivables

Once the goods and services have been delivered and control has been passed to the customer, a trade receivable is recognized since this is the point in time when the consideration becomes unconditional (only the passage of time is required for payment to be made).

Contract liabilities

Contract liabilities pertain to liabilities for volume discounts and advance payments from customers. Both items are recognized under Other current liabilities. Advance payments from customers are normally recognized as revenue in the subsequent fiscal year.

Assets that have arisen from expenses to fulfill contracts with customers

In the Professional Hygiene business area, Essity supplies dispensers to customers to fulfill contracts for delivery of the business area's other products (refer to page 27). Expenses for these dispensers are recognized as prepaid expenses under Other non-current assets under non-current assets since Essity expects to cover these expenses through the sale of the business area's other products. The dispensers are depreciated over three years according to the average term of the contract with customers. Recognition takes place in accordance with the rules in IFRS 15 since the expense is directly linked to securing contracts with customers. The rules on Property, Plant and Equipment in IAS 16 and IAS 2 Inventories are not deemed to be applicable since there are no economic benefits associated with the dispenser after it has been delivered to the customer.

The tables below show consolidated net sales broken down by operating segment: Personal Care, Consumer Tissue and Professional Hygiene. Net sales – sold to, is based on sales to the countries where Essity has its customers, known as its "footprint."

B2. SEGMENT REPORTING

AP ACCOUNTING PRINCIPLES

Operating segments are recognized in a manner that complies with the internal reporting submitted to the chief operating decision maker. The chief operating decision maker is the function that is responsible for allocating resources and assessing the result of the operating segments. At Essity, this function has been identified as the company's President, who is responsible for and manages the day-to-day administration of the Group in accordance with the Board's guidelines and terms of reference. One Executive Vice President and the Executive Management Team support him in his work. Essity's three business areas, Personal Care, Consumer Tissue and Professional Hygiene, comprise the operating segments. For management purposes, the Group is organized into business areas based on their products.

Personal Care's offering includes Incontinence Products, Baby Care, Feminine Care and Medical Solutions. Products are sold under brands including Jobst, Leukoplast, Libero, Libresse, Nosotras, Saba and the globally leading brand TENA, and as retailer brands. Distribution channels for the products are the retail trade, online sales, pharmacies and care institutions.

Consumer Tissue's offering includes toilet paper, household towels, handkerchiefs, facial tissues, wet wipes and napkins. Products are sold under brands including Edet, Lotus, Regio, Tempo, Vinda and Zewa, and as retailer brands. Distribution channels for the products are the retail trade and online sales.

Professional Hygiene's offering, with the globally leading brand Tork, comprises complete hygiene solutions, including toilet paper, paper hand towels,

napkins, hand soap, hand lotion, hand sanitizers, dispensers, cleaning and wiping products, IoT sensor technology as well as service and maintenance. Professional hygiene customers consist of companies and office buildings, universities, healthcare facilities, industries, restaurants, hotels, stadiums and other public venues. Distribution channels for the products consist of distributors and online sales.

Other operations comprise Group-wide functions and non-allocated tax.

Essity's business is an integrated operation in the form of a matrix organization with four business units (Health and Medical Solutions, Consumer Goods, Latin America and Professional Hygiene) and three global units (Global Manufacturing, Global Operational Services and Global Brand, Innovation and Sustainability). The business units have limited responsibility to impact operational costs, since the global units are responsible for production, planning, technology development, purchasing and product development. Accordingly, the business unit manager's main tasks are to address the markets from a sales perspective.

No business segments were aggregated to form the aforementioned segments.

The President monitors the operating profit for the business areas separately in order to make decisions regarding the allocation of resources and how performance targets were achieved. The segments are evaluated based on the income statement and are measured in the corresponding manner as for the income statement in the consolidated accounts.

The tables below show parts of the consolidated balance sheet and income statement broken down by operating segment: Personal Care, Consumer Tissue and Professional Hygiene.

Assets and liabilities: The assets included in each operating segment comprise all operating assets used in the operating segment, primarily trade receivables, inventories and non-current assets after deduction for operating liabilities and provisions. Most of the assets are directly attributable to each operating segment. Assets that are common to two or more operating segments are allocated among the operating segments.

Internal sales: No internal sales are carried out between the segments. Production in shared facilities is allocated among the segments already at the operational reporting stage.

Customers: Essity had no customers in 2018, 2017 or 2016 from which it generated income that accounted for more than 10% of the company's net sales. Essity's ten largest customers account for 23.6% (22.9; 26.6) of the company's sales.

¹⁾ Net sales have been recognized from two perspectives. The first column "Net sales – sold to" is based on sales to the countries where Essity has its customers, or Essity's "footprint". The second column "Net sales – sold by" takes the perspective of IFRS 8, meaning revenue from external customers where the company is domiciled and in all other countries from which the company receives revenues.

B5. INCOME TAXES

AP ACCOUNTING PRINCIPLES

The Group's tax expense comprises current tax and deferred tax.

Current tax is calculated on the taxable profit for the period based on the tax rules prevailing in the countries where the Group operates. Since taxable profit excludes costs that are not tax deductible and income that is not taxable, this is differentiated from profit before tax in profit or loss. Current tax also includes adjustments relating to recognized current tax from prior periods. Interest attributable to income tax and withholding taxes deducted at source on intra-Group transactions are also recognized as current income tax.

Deferred tax is calculated based on temporary differences between the carrying amounts and the taxable values of assets and liabilities and for tax loss carryforwards and other unutilized tax deductions in so far as it is probable that these can be utilized against future taxable profits. Deferred taxes are measured in the balance sheet at their nominal amount and based on the tax rates enacted or substantively enacted on the balance sheet date. Deferred

tax is not calculated on the initial recognition of goodwill or when an asset or liability is recognized for the first time, provided that the asset or liability is not attributable to a business combination. Essity does not recognize any deferred tax liability regarding temporary differences on undistributed earnings in holding in subsidiaries, joint ventures or associates, since Essity can control the reversal of the temporary differences and it is probable that such a reversal will not take place in the foreseeable future.

The recognition of tax effects is determined by the manner in which the underlying transaction is recognized. For items in profit or loss, the tax effect is recognized in profit or loss, with the same applying for transactions in other comprehensive income within equity, whereby the tax effect is subsequently recognized in other comprehensive income within equity.

Tax liabilities and tax assets are recognized net when Essity has a legal right to offset.

KAA KEY ASSESSMENTS AND ASSUMPTIONS

For companies that operate globally and thus apply significantly different taxation legislation, determining deferred tax asset and tax liability is very complicated. This requires that assessments and assumptions are made to determine the value of the deferred tax asset and deferred tax liability on the balance sheet date. Future changes to taxation legislation and trends in the business climate will impact the company's future taxable profits and thus its possibility to utilize deferred tax assets on loss carryforwards or other

temporary differences. Accordingly, a changed assessment of the probability of future taxable profits could have a positive or negative effect.

Key assessments and assumptions are also made regarding recognition of provisions and contingent liabilities relating to tax risks. For further information, see Note D6 Other provisions on page 88 and Note G3 Contingent liabilities and pledged assets on page 106.

Tax expense

Tax expense (+), tax income (-)						
SEKm	2018	%	2017	%	2016	%
Current tax

IS Tax expense	1,050	10.9	1,938	18.1	3,931	48.1

Explanation of tax expense

The difference between the recognized tax expense and expected tax expense is explained below. The expected tax expense is calculated based on profit before tax in each country multiplied by the tax rate in effect in the country.

Tax expense						
SEKm	2018	%	2017	%	2016	%
IS Profit before tax	9,602		10,723		8,173	
IS Tax expense	1,050	10.9	1,938	18.1	3,931	48.1
Expected tax expense	2,144	22.3	2,381	22.2	1,790	21.9
Difference	-1,094	-11.4	-443	-4.1	2,141	26.2
The difference is explained by:						
Permanent differences between accounting and taxable result						
Effects of subsidiary financing ¹⁾	-35	-0.4	-303	-2.8	-152	-1.9
Effects of acquisitions and divestments ²⁾	-106	-0.9	2	0.0	53	0.6
Taxes relating to profit-taking	42	0.4	35	0.3	37	0.5
Other permanent effects ³⁾	272	2.3	147	1.4	372	4.6
Taxes related to prior periods ⁴⁾	-1,287	-14.5	-35	-0.3	1,267	15.5
Changes in the value of deferred tax assets ⁵⁾	60	2.1	311	2.9	670	8.2
Changes in tax rates ⁶⁾	-40	-0.4	-600	-5.6	-106	-1.3
Total	-1,094	-11.4	-443	-4.1	2,141	26.2

¹⁾ The effects are principally attributable to financing of the operations in the US, Germany, France and Belgium. For 2017, the effects relate to financing of the US business and include non-recurring effects of the restructuring of debt from the Netherlands to the US.

²⁾ The effects of acquisitions and divestments relate essentially to acquisitions and the revaluation of existing holdings in operations pertaining to Peru and Bolivia.

³⁾ Other permanent effects include, in addition to a number of items of low value, a non-deductible share in profit in Asaleo Care of SEK 97m primarily attributable to an impairment of assets, and dissolution effects of tax on non-current assets of SEK -57m. For 2017, the item includes non-deductible costs for tax on non-current assets of SEK 67m that arose in connection with the split of the SCA Group. The year 2016 relates primarily to non-deductible costs for ongoing competition cases.

⁴⁾ Taxes attributable to prior periods relate mainly to the effect of a tax dispute in Sweden totaling SEK -1,110m and a tax dispute in Denmark totaling SEK -417m in which the final rulings were in Essity's favor. In 2016, a provision of SEK 1,223m was recognized for costs related to the tax dispute in Sweden.

⁵⁾ The change in value of deferred tax assets relates mainly to uncapitalized tax loss carryforwards in Brazil of SEK 98m and in Mexico of SEK 41m, as well as the increase in a tax credit in Poland of SEK -109m. The change in 2017 relates mainly to the revaluation of loss carryforwards in the US of SEK 139m and in Brazil of SEK 156m. The change in 2016 relates mainly to the revaluation of loss carryforwards in Spain of SEK 227m, in Brazil of SEK 185m and in India of SEK 213m.

⁶⁾ Effects relating to changed tax rates are attributable to the revaluation of deferred taxes, especially in Sweden, France and the UK. For 2017, the effects are primarily attributable to the revaluation of deferred taxes in the US.

C. EMPLOYEES

C1. PERSONNEL COSTS

No remuneration was paid to senior executives in Essity for work in this company during 2016. In conjunction with the distribution of Essity Aktiebolag (publ), costs for senior executives were allocated from SCA to Essity for 2016. Remuneration of senior executives in Essity for 2017 and 2018 was paid in its entirety from Essity.

Age distribution 2018

C3. REMUNERATION OF SENIOR EXECUTIVES

AP ACCOUNTING PRINCIPLES

Recognition of variable remuneration

Essity has two variable remuneration programs: Short-term incentive (STI) and Long-term incentive (LTI). Variable remuneration is capped at a specific percentage of fixed salary.

The structure of the STI targets is related to the financial targets, or goals that contribute to the achievement of financial targets, such as operating cash flow, cost efficiency, EBITA margin, organic sales growth and consolidated profit before tax, as well as innovation goals.

For the LTI target, the outcome and size of the remuneration is based on the performance of the company's B share, measured as the TSR (Total Shareholder Return) index compared with the MSCI Household Products Index, Consumer Staples. The latter index contains competitors' and consumer companies' TSR over a three-year period. Essity's performance target is higher TSR for the company than the benchmark index (maximum outcome requires the outcome to be 5% better than the benchmark index).

All variable remuneration under STI and LTI is paid in cash to employees. Accordingly, the programs do not have any dilutive effect. Participants in the LTI program undertake to personally acquire shares in Essity for half of the LTI outcome paid after tax and to refrain from divesting these shares for a period of three years.

The outcome of the STI and LTI targets is evaluated during the year and expanded or recognized as liabilities on an ongoing basis until payment is made in the following year.

Essity's assessment is that the variable remuneration falls under the application area for IAS 19.

Senior executives refer to the President, who is also the CEO, the Executive Vice President, Business Unit Presidents in Essity and equivalents, and the Central Staff Managers.

Annual General Meeting guidelines for remuneration of senior executives

The 2018 Annual General Meeting (AGM) adopted the following guidelines for remuneration of senior executives.

"Remuneration of senior executives will be a fixed salary, variable remuneration, additional benefits and pension. The total remuneration is to correspond to market practice and be competitive in the senior executive's field of profession and linked to the executive's responsibility and authority.

The variable remuneration is to be limited and linked to the fixed remuneration, based on performance results in relation to the annual and long-term established targets.

In the event of termination of employment, the notice period should normally be up to two years if termination is initiated by the company, and up to one year, when initiated by the senior executive. Severance pay should not exist.

Pension benefits should, to the extent possible, only contain defined contribution pension benefits and entitle the executive to receive a pension from the age of 65. Variable remuneration is not part of pensionable income.

The board of directors shall be entitled to deviate from the adopted guidelines if, in an individual case, there are special reasons for doing so. The guidelines shall not prevail over mandatory conditions under labour law or collective agreements. Neither do they apply to existing agreements."

C3. REMUNERATION OF SENIOR EXECUTIVES, CONT.

Company's application of guidelines

The company applied the guidelines approved by the AGM in the following manner.

Fixed salary

The fixed salary is to be in proportion to the individual's position and the authority and responsibilities this entails. It is set individually at a level that, combined with other remuneration, is assessed as a market rate and competitive in the labor market in which the executive works.

Variable remuneration

Variable remuneration of the CEO, Executive Vice President and Business Unit Presidents and equivalents is maximized to a total of 100% of the fixed salary. For two Business Unit Presidents, stationed in the Americas, the maximum outcome is 110–130%, while the corresponding limit for other senior executives is 90%. The program for variable remuneration is divided into short-term and long-term portions. The short-term portion ("Short-term Incentive", or STI) for the CEO, Executive Vice President and Business Unit Presidents and equivalents may amount to a maximum of 50% of fixed salary. For the Business Unit Presidents, stationed in the Americas, the maximum outcome is 60–80% of the fixed salary, while the corresponding limit for other senior executives is 40%. The STI goals set for the Business Unit Presidents are mainly based on operating cash flow, capital efficiency, EBITA margin and organic sales growth for each business unit. The goal for the CEO and others reporting directly to him is based primarily on the Group's profit before tax, EBITA margin, operating cash flow and organic sales growth. Furthermore, for certain senior executives, goals for cost efficiency and innovation also apply, accounting for 20–30% of the variable remuneration. The long-term portion ("Long-Term Incentive", or LTI) may amount to a maximum of 50% of the fixed salary. The senior executive is to invest half of the variable LTI compensation, after tax withholdings, in Essity shares. The shares may then not be sold before the end of the third year after the purchase of shares in the relevant LTI program. The established LTI goal is based on the performance of the company's B share, measured as the TSR (Total Shareholder Return) index compared with the MSCI Household Products Index, Consumer Staples, which contains a weighted index of competitors' and consumer companies' shares performance (TSR) over a three-year period, where the performance target is higher TSR for the company than the benchmark index (maximum outcome requires a 5% better outcome than the benchmark index).

Outcome, variable remuneration

For the CEO, Executive Vice President and Central Staff Managers, STI resulted in 5–17% of fixed salary for 2018. STI resulted in variable remuneration corresponding to 9–30% of fixed salary for the Business Unit Presidents. The LTI target was achieved for 2016–2018, resulting in a maximum outcome for the CEO and other senior executives.

Other benefits

Other benefits pertain, in some cases, to a company car, commuter reimbursement and health insurance.

TC3:1 Remuneration and other benefits during the year 2018

SEK	Fixed salary	Variable remuneration ¹⁾	Other benefits	Total salaries and remuneration
President and CEO Magnus Groth	13,000,000	7,345,000 ²⁾	98,383	20,443,383

¹⁾ Variable remuneration covers the 2018 fiscal year but is paid in 2019.

²⁾ Of which LTI program SEK 6,500,000.

³⁾ Includes remuneration to the former Head of Sustainability and Public Affairs, who as a result of the restructuring of the Group is no longer a member of the Executive Management Team.

⁴⁾ Of which LTI program SEK 36,502,537.

Pension costs 2018¹⁾

SEK	
President and CEO Magnus Groth ²⁾	5,443,050
Other senior executives (13 people) ³⁾	18,115,299
Total	23,558,349

¹⁾ The pension costs pertain to the costs that affected profit for 2018, excluding special payroll tax.

²⁾ Outstanding pension obligations amount to SEK 19,933,280.

³⁾ Outstanding pension obligations amount to SEK 80,261,840.

Pension

The CEO has a defined contribution pension based on an annual payment, to be paid by the company, amounting to 40% of the employee's fixed salary, in addition to the agreed contribution for the basic pension benefits in the ITP plan, with retirement pension benefits limited to a maximum salary income of 7.5 income base amounts. The retirement age for the CEO is 65. Five other executives are covered by corresponding defined contribution pension benefits with an annual premium of approximately 30–40% and pension age of 65. One senior executive in Sweden has a combined defined benefit and defined contribution plan. Five senior executives that are employed in companies outside Sweden are encompassed by defined contribution pension plans on local market-based terms.

Remuneration of senior executives

No remuneration was paid to senior executives in Essity for work in this company during 2016. In conjunction with the distribution of Essity Aktiebolag (publ), costs for senior executives were allocated from SCA to Essity for 2016. Remuneration of senior executives in Essity for 2017 and 2018 was paid in its entirety from Essity.

Notice period and severance pay

The agreement with the CEO stipulates a period of notice of termination of two years if such notice is given by the company. The CEO has a corresponding right with a period of termination of one year. If notice is given by the company, the CEO is not obligated to serve during the notice period. The agreement has no stipulations with regard to severance pay. Between the company and other senior executives, a period of notice of termination of one to two years normally applies, if such notice is given by the company. The executive has a corresponding right with a period of notice of termination of six months to one year. The executive is normally expected to be available to the company during the notice period. The agreements have no stipulations with regard to severance pay.

Preparation and decision process for remuneration

During the year, the Remuneration Committee submitted recommendations to the Board regarding the principles for remuneration of senior executives. The recommendations encompassed the ratio between fixed and variable remuneration and the size of any salary increases. In addition, the Remuneration Committee expressed an opinion on the criteria for assessing variable remuneration and pension terms. The Board discussed the Remuneration Committee's proposal and decided on the basis of the Committee's recommendations. The remuneration of senior executives for the fiscal year was based on the Remuneration Committee's recommendation and, with regard to the CEO, decided by the Board. The executives concerned did not participate in remuneration matters pertaining to themselves. When it was deemed appropriate, the work of the Remuneration Committee was carried out with the support of external expertise.

The Board's proposal for new guidelines

The Board proposes that the 2019 Annual General Meeting adopt unchanged guidelines for remuneration of senior executives of Essity. With the salary situation prevailing in 2019 with 12 senior executives, the maximum outcome of variable remuneration could entail a cost for the Group, excluding social security costs, of approximately SEK 71m.

TC3:1 Remuneration and other benefits during the year 2017

C5. REMUNERATION AFTER EMPLOYMENT

AP ACCOUNTING PRINCIPLES

Defined benefit pension plans

Defined benefit pension plans are characterized by the fact that payment is based on the period of employment and the employee's salary at, or just prior to, retirement. The actuarial and investment-related risks associated with defined benefit pension plans are carried by the company.

The defined benefit obligations are calculated annually by independent actuaries using the Projected Unit Credit Method. Calculations are based on actuarial assumptions. Actuarial assumptions comprise the company's best assessment of the variables that determine the final cost for providing the benefits. The obligation is measured at the present value of the anticipated future cash flows using a discount rate (see Key assessments and assumptions on page 83). Actuarial gains and losses (remeasurements) are recognized directly in equity under other comprehensive income in the period in which they arise. The recognized cost for the defined benefit plans includes personnel costs, as well as net interest items. Net interest items comprise the discount rate calculated on the average net pension liability for the period, taking fee and remuneration payments into consideration. The difference between the calculated interest income (discount rate) on the plan assets and Essity's actual return on the plan assets is included in the remeasurement of the defined benefit net liability or net asset recognized in equity under other comprehensive income. Past service costs are recognized in profit or loss in the period in which they arise.

The liability recognized in the balance sheet for defined benefit pension plans is the present value of the obligation on the balance sheet date minus the fair value of the plan assets. Funded plans with net assets, meaning plans with assets exceeding obligations, are recognized as a financial non-current

asset provided they are not limited by the "asset ceiling" under IAS 19. Other pension plans, which are not fully funded or unfunded, are recognized as Provisions for pensions.

In certain countries, pension payments are subject to taxes or fees. In such cases, these are included in the calculation of the obligation for the defined benefit pension plans. These taxes or fees are recognized as an expense in profit or loss, except in cases where they are attributable to actuarial gains or losses, in which case they are recognized directly in equity under other comprehensive income, as are the actuarial gains or losses.

Defined contribution pension plans

Plans where the employer's obligation is limited to the premiums the company has undertaken to pay are classified as defined contribution plans. In these plans, it is the employee who bears the investment risk, meaning the risk that the invested assets could be insufficient to generate the anticipated compensation. The Group's payments relating to defined contribution plans are recognized as an expense during the period the employees carry out the service to which the payment relates.

Other post-retirement benefits

Some Group companies provide post-retirement healthcare benefits. The obligation and anticipated costs for these benefits has been calculated and recognized in a similar manner to that applying to defined benefit pension plans.

Severance pay

Severance pay is recognized as a payroll expense when the Group has an obligation to compensate employees whose employment was terminated early.

C5. REMUNERATION AFTER EMPLOYMENT, CONT.

KAA KEY ASSESSMENTS AND ASSUMPTIONS

The calculation of recognized expenses and provisions for defined benefit pension plans, where the size of the future compensation is unknown and payment will occur far in the future, is dependent on assumptions and assessments. Key assumptions and assessments include the discount rate, future salary increases, inflation and life expectancy. Essity determines the discount rate based primarily on AA-rated corporate bonds issued in the currency in which the payments will be made that match the duration of the

obligations. If no such corporate bonds are available, government bonds or mortgage bonds are used. Inflation assumptions are based on a combination of central bank targets, implicit market expectations and long-term analyst forecasts. Assumptions regarding salary increases are based on market expectations and market research forecasts. Key actuarial assumptions are presented in **TC5:5**. The sensitivity of the recognized provision with respect to key actuarial assumptions is described in **TC5:6**.

Provisions for pensions and similar obligations

Total	7,727	12,827	12,528	33,082	-29,648	707	4,141	

Netherlands

The plan is a defined benefit plan with premiums paid by the company and the employee. The plan is managed by an independent fund. Surpluses in the fund remain in the fund assets but can be utilized in the form of premium discounts. The plan is based on average salary and includes retirement pension, beneficiaries' pension and disability pension. The plan is obligated to meet the minimum legislated funding level. The plan applies a duration matching strategy to control the interest rate risk.

United Kingdom

The plan is a defined benefit plan with contributions paid by the company. The plan consists of retirement pension, beneficiaries' pension and disability pension. The plan was closed to new participants in 2007 and closed for future accrual in September 2018. The plan is managed by an independent company and assets are held separately, according to UK law. Any surpluses in the pension plan remain in the plan. Whilst ongoing contributions have ceased, deficit contributions remain payable until 31 March 2023 under the current Schedule of Contributions. Should the plan go into surplus during this period then deficit contributions would cease for as long as the surplus remained. The plan is obligated to meet the minimum funding level according to an agreement with the pension plan.

Sweden

In Sweden, the defined benefit obligation is mainly covered by the ITP2 plan and executive pensions. The ITP2 plan (supplementary pensions for salaried employees) encompasses employees born before 1979 and is a defined benefit

plan that provides retirement pension based on final salary. The ITP2 plan provides pension as a percentage of various salary intervals. The ITP2 plan is safeguarded by a fund, and the company may compensate itself using any surpluses in the plan assets. The pension plans for executives are largely retirement and beneficiaries' pension plans based on final salary and are closed to new participants and the liability largely comprises paid-up pension policies or pensions in payment. The pension plans for executives are largely unfunded and are credit-insured with PRI Pensionsgaranti.

Germany

In Germany, the defined benefit obligation comprises a number of different pension plans offering retirement pension, beneficiaries' pension and disability pension. Plans based on final salary exist but these are closed to new participants and the benefit depends on the length of service and final salary at retirement. Defined contribution plans are also offered in which the benefit depends on provisions made by the company and, in certain plans, even by the employee during the period of service, and guaranteed return on the provisions. The obligations are largely financed by two different funds and the company may, in certain instances, compensate itself using any surpluses in the plan assets.

US

In the US, the defined benefit obligations comprise retirement pensions in which the premiums are paid by the company and the benefit is based on a standard amount per service year. Only one plan is still open for new accrual for about 200 employees. The benefits are financed via a pension fund that

Costs for the period for defined benefit plans

SEKm	2018	2017	2016
Current service cost, after deduction for premiums paid by the employees	-589	-564	-511
Past service cost	36	104	-25
Pension-tax expense	-33	-32	-27
Remeasurement, net	9	-7	-5
Net interest income/expense	-83	-136	-117
Pension costs before effects of settlements	-660	-635	-685
Settlements	16	42	-
Pension costs after effects of settlements	-644	-593	-685

is obligated to meet the minimum legislated funding level. Surpluses in the pension fund can be utilized in the form of premium discounts.

TC5:2 Defined benefit obligations

SEKm	2018	2017	2016
Value, January 1	33,007	30,638	25,561
Current service cost	601	575	524
Interest expense	811	858	922
Past service cost	-36	-104	25
Pension-tax expense	33	32	27
Settlements and transfers	-251	212	-16
Acquisitions and disposals	2	972	2,168

Translation differences	-997	124	979
Fair value, December 31	-29,648	-30,418	-26,363

The plan assets are distributed according to the following classes of assets, 2018:

The plan assets are distributed according to the following classes of assets, 2017:

The plan assets are distributed according to the following classes of assets, 2016:

92% (95; 95) of the plan assets on the balance sheet date were traded on active markets in which market quotations are used for the valuation of assets. As in the preceding year, no financial instruments issued by Essity are included in the fair value of plan assets at December 31, 2018.

TC5:4 Effect of asset ceiling

SEKm	2018	2017	2016
Value, January 1	804	663	1,162
Interest expense	19	18	38
Transactions with shareholders	-	-	-498
Other changes to asset ceiling	-116	123	-39
Value, December 31	707	804	663

Effect of asset ceiling pertains to funds in two Swedish foundations that can be used for possible future undertakings for early retirement for certain categories of employees.

TC5:5 Principal actuarial assumptions

	Sweden	United Kingdom	Germany	Netherlands	US
2018					
Discount rate	2.26	2.72	1.87	1.94	4.30
Expected salary increase rate	3.25	N/A	3.00	3.00	N/A
Expected inflation	2.00	3.00	1.75	1.75	N/A
Life expectancy, men ¹⁾	22	22	20	21	20
Life expectancy, women ¹⁾	25	24	24	24	22
2017					
Discount rate	2.39	2.50	1.61	1.77	3.70
Expected salary increase rate	3.25	3.00	2.85	2.85	N/A
Expected inflation	2.00	3.00	1.60	1.60	N/A
Life expectancy, men ¹⁾	22	22	19	22	20
Life expectancy, women ¹⁾	25	24	23	24	22
2016					
Discount rate	2.73	2.72	1.31	1.80	4.13
Expected salary increase rate	2.75	3.00	2.85	2.85	N/A
Expected inflation	1.50	3.00	1.60	1.60	N/A
Life expectancy, men ¹⁾	22	22	19	22	20
Life expectancy, women ¹⁾	25	25	23	24	22

¹⁾ Life expectancy, expressed in years, for an individual currently aged 65.

The sensitivity of the defined benefit obligations with respect to the changes in the principal actuarial assumptions is as follows:

TC5:6 Change of obligation, increased obligation (-)

SEKm	
Discount rate +0.25%	1,361
Price inflation, incl. salary inflation +0.25%	-1,047
Life expectancy +1 year	-1,321

The above sensitivity analysis is calculated by changing one assumption while the others remain constant.

MULTIEMPLOYER PLANS

Essity has obligations for disability and family pensions for salaried employees in Sweden, secured through insurance with the insurance company Alecta. The company also has employees in Finland who are covered by the country's statutory TyEL pension plan. These obligations are secured through the insurance company Varma. These benefits are reported as defined contribution plans, since there is no basis for allocating the obligations, plan assets and costs to the individual companies covered by the plan.

Budgeted contributions

The budgeted contributions for the company's defined benefit pension plans for 2019 were calculated at SEK 1,017m. Contributions for multiemployer plans for 2019 were calculated at SEK 43m.

D. OPERATING ASSETS AND LIABILITIES

D1. INTANGIBLE ASSETS

AP ACCOUNTING PRINCIPLES

Goodwill

Goodwill arises in connection with business combinations where the consideration transferred exceeds the fair value of the acquired net assets. Goodwill is recognized at cost less accumulated impairment and is an intangible asset with an indefinite useful life. This means that goodwill is not amortized, but rather is tested annually for impairment. All goodwill is allocated to the cash-generating units that are expected to benefit from the synergies from the business combination. In connection with the sale of Group companies, the remaining carrying amount of the goodwill attributable to the divested unit is included in the capital gain/loss. Goodwill that arises in acquisitions of associates or joint ventures is included in the carrying amount of the respective associate or joint venture.

Trademarks

Trademarks arise either in connection with company acquisitions or through agreements to purchase trademarks. Trademarks are recognized at cost after any accumulated amortization and accumulated impairment. Trademarks that have an indefinite useful life are not amortized, but rather are tested annually for impairment along with the impairment testing of goodwill. Trademarks with a limited useful life are amortized on a straight-line basis during their anticipated useful life, which varies between three and ten years.

Licenses, patents and similar rights

Intangible assets also include patents, licenses and other similar rights. Acquired assets of this type are recognized at cost and are amortized on a straight-line basis during their anticipated useful life, which varies between three and 20 years.

Customer relations

Customer relations are measured at fair value at the time of the acquisition. The value of these customer relations is amortized over their useful life, which is considered to be between three and 15 years.

Research and development

Research expenditure is recognized as an expense as incurred. Identifiable expenditure for development of new products and processes is capitalized to the extent it is expected to provide future economic benefits. In cases in which it is difficult to separate the research phase from the development phase in a project, the entire project is treated as research and expensed immediately. Development costs for packing and packaging materials are expensed directly. In general, development projects are conservatively assessed due to the difficulty in determining what will lead to commercial success. Capitalized expenditure is amortized on a straight-line basis from the date when the asset starts to be used during the estimated useful life of the asset. The amortization period is between five and ten years.

Impairment testing

Goodwill is tested annually for impairment. When testing for impairment, the assets are grouped in cash-generating units. Essity has defined three cash-generating units for impairment testing, which coincide with the operating segments Consumer Tissue, Professional Hygiene and Personal Care. The test compares the carrying amounts of the cash-generating units with the recoverable amounts. The recoverable amount of each cash-generating unit is determined by discounting future cash flows in order to determine their value in use. The calculation of future cash flows is based on the strategic plans adopted by the Executive Management Team for the next three years. The carrying amount for the cash-generating unit includes goodwill, trademarks with indefinite useful lives and assets with definite useful lives, such as non-current assets, trademarks and working capital. Effects of expansion investments are excluded when calculating the value in use. The value of depreciated assets is tested for impairment whenever there are indications that the carrying amount might not be recoverable. In cases in which the carrying amount of an asset or cash-generating unit exceeds its estimated recoverable amount, an impairment loss is recognized on the asset down to the recoverable amount. An impairment loss recognized earlier is reversed, if the reasons for the impairment no longer exist. The carrying amount after the reversal is limited to what it would have been had no past impairment been recognized. Impairment losses on goodwill are never reversed.

Emission allowances and costs for carbon dioxide emissions

Essity participates in the European system for emission allowances.

When emission allowances relating to carbon dioxide emissions are received from an individual EU state, they are recognized as an intangible asset and as deferred income (liability). Allowances are received free of charge and measured and recognized at market value as of the date when the allocation is received. During the period, the intangible asset is expensed in pace with carbon dioxide emissions made at the same time the deferred income is reversed by the corresponding amount in the form of income, thereby resulting in no net effect in profit or loss. If the emission allowances received do not cover emissions made, Essity makes a provision for the deficit valued at the market value on the balance sheet date. Sales of surplus emission allowances are recognized as income on the delivery date.

If the market price of emission allowances on the balance sheet date is less than recognized cost, any surplus emission allowances that are not required to cover emissions made are impaired to the market price applying on the balance sheet date. In conjunction with this, the remaining part of the deferred income is recognized as income by a corresponding amount and therefore no net effect occurs in profit or loss. The emission allowances are used as payment in the settlement with the state regarding liabilities for emissions.

KAA KEY ASSESSMENTS AND ASSUMPTIONS

In connection with the annual impairment testing of goodwill, the recoverable amount is calculated. The recoverable amount for the cash-generating units is determined by calculating value in use. Calculation of the value in use is based on the three-year strategy plans adopted by the Executive Management Team, which in turn are based on assumptions and assessments. The most important assessments and assumptions pertain to forecasts for organic growth, the profit margin and the discount rate used. The discount rate used in the present value calculation of the anticipated future cash flows is the current weighted average cost of capital (WACC) established within the Group for the markets in which the cash-generating units conduct operations.

Profit margin assumptions are based on current market prices and costs with an addition for real price reductions and cost inflation as well as assumed productivity development. The growth assumption follows the Group's target of annual organic growth of above 3%. The growth assumptions are in line with historic outcome and expected global market growth.

The expected sustained future cash flow for periods that are beyond the planning horizon of the strategy plan are extrapolated from the final year of the strategy plan using assumed sustained growth of 2% (2; 2).

¹⁾ Amortization of Trademarks and Customer relations is included in Sales, general and administration while Technologies and Other intangible assets is included in Cost of goods sold.

Impairment testing

Annual testing for impairment of goodwill is carried out in the fourth quarter. The testing showed that no impairment was needed for 2018, 2017 or 2016. The WACC before tax used in the impairment testing of goodwill is presented in the table below. Sensitivity analyses show that reasonable changes to key parameters do not give rise to any impairment requirement. In addition to annual impairment testing of the cash-generating units,

outlined above under the section Impairment testing, goodwill, trademarks with indefinite useful lives and individual assets are also tested when there is an indication of an impairment need. During the period, intangible assets, mainly attributable to the operating segment Personal Care, were impaired by SEK -105m.

Distribution by operating segment

Value, December 31	91	71	76

D2. PROPERTY, PLANT AND EQUIPMENT

AP ACCOUNTING PRINCIPLES

Property, plant and equipment

Property, plant and equipment is recognized at cost less accumulated depreciation and any impairment. In cases where an investment in foreign currency has been recognized using hedge accounting, the gain/loss from the hedge is recognized as part of the acquisition cost. The cost of properties and production facilities included in major projects includes costs for running-in and start-up. Borrowing costs are included in the cost of investments exceeding SEK 250m that take more than 12 months to complete. Expenses for repairs and maintenance are expensed directly in profit or loss.

Depreciation and impairment

Land is not subject to depreciation. Buildings, machinery and equipment are depreciated on a straight-line basis over the expected useful lives of the assets. If, at the balance sheet date, there is an indication that property, plant and equipment has declined in value, impairment testing is carried out.

Expected useful lives

	Number of years
Pulp and paper mills	10–25
Converting machines, other machinery	7–18
Tools	3–10
Vehicles	4–5
Buildings	15–50
Energy plants	15–30

¹⁾ Included primarily in Cost of goods sold.

Impairment losses for the year totaling SEK -428m are mainly related to restructuring measures at production facilities in Professional Hygiene and Consumer Tissue.

During the period, interest was capitalized in machinery and equipment in an amount of SEK 24m (41; 19) and in construction in progress in an amount of SEK 0m (-; 31). The average interest rate used was 5% (5; 10).

Contract obligations relating to the acquisition of fixed assets amounted to SEK 3,563m at year end.

D3. INVENTORIES

AP ACCOUNTING PRINCIPLES

Inventories are measured at the lower of cost and net realizable value. Cost is calculated mainly by applying the first-in, first-out (FIFO) principle or weighted average cost formula. The cost of inventories and work in progress includes raw material costs, direct labor, other direct expenses and production-related overheads, based on a normal capacity utilization.

The net sales price is the calculated sales price received for normal business transactions less calculated sales costs.

Inventories

SEKm	2018	2017	2016

Total	10,190	9,575	8,843

D6. OTHER PROVISIONS

AP ACCOUNTING PRINCIPLES

Provisions are recognized in the consolidated balance sheet when there is a legal or informal obligation arising from events that have occurred and it is probable that payments will be required to settle the obligation. It must also be possible to reliably estimate the amount to be paid. The provision is valued at the present value of the anticipated future expenditure to settle the obligation.

A provision for restructuring measures is recognized when the Group has established a detailed plan and either implementation has begun or the main features of the measures have been communicated to the parties involved. Restructuring costs include, for example, costs for plant closures, impairment of production machinery and costs for personnel reductions.

KAA KEY ASSESSMENTS AND ASSUMPTIONS

The amount of the provisions made relating to national competition investigations is based on the company's best assessment, which was determined in consultation with local expertise in the field.

In respect of tax risks, these are also based on Essity's best assessment, which in most cases is determined in consultation with local tax experts.

Other provisions 2018

Distribution of other provisions by maturity¹⁾

¹⁾ The timing of provisions totaling SEK 221m cannot be assessed.

²⁾ At the end of January 2019, the Supreme Court in Spain dismissed Essity's appeal regarding breaches of competition law, meaning that Essity must pay fines of EUR 35m, corresponding to SEK 360m, in 2019. The amount has been recognized as a non-current provision in the 2018 year-end accounts but will be reclassified to current liabilities in the first quarter of 2019.

Provisions for the period for Efficiency programs are mainly attributable to restructuring measures at the production facilities of Professional Hygiene and Consumer Tissue. Provisions for the period for Tax risks relate mainly to uncertainty concerning the outcome of ongoing tax audits. Of the provisions for the period for Environment, SEK 89m pertains to a liability for carbon dioxide emissions, which will be paid out in 2019. Provisions for the period for Legal disputes relate mainly to an increased provision in a case for which a provision has already been made.

Dissolutions for the period for Efficiency programs are related to a dozen different restructuring programs from previous years. Dissolution for the period for Tax risks is primarily attributable to a tax dispute in Denmark. Dissolutions for the period for Legal disputes relate to a case in Hungary. Other dissolutions are attributable to a new assessment of risk relating to foreign tax of a non-recurring nature on non-current assets outside Sweden arising from the split of SCA into two listed companies.

The provisions recognized at the end of the period attributable to Efficiency programs relate mainly to restructuring measures at production facilities of Professional Hygiene and Consumer Tissue. Provisions for Tax risks relate mainly to uncertainty concerning the restructuring programs implemented and the outcome of ongoing tax audits. Provisions for Environment pertain mainly to a liability for carbon dioxide emissions. Provisions for legal disputes mainly consist of reserves for cases relating to Spain, Chile, the Andean Community (CAN) and France. Other provisions mainly comprise reserves in connection with foreign tax of a non-recurring nature on non-current assets outside Sweden and grants received for future investment commitments in Italy.

E. CAPITAL STRUCTURE AND FINANCING

E1. FINANCIAL INSTRUMENTS BY CATEGORY AND MEASUREMENT LEVEL

AP ACCOUNTING PRINCIPLES

Financial instruments recognized in the balance sheet include cash and cash equivalents, securities, other financial receivables, trade receivables, trade payables, loans and derivatives.

Current investments and derivatives are recognized on the trade date. Financial assets and loans are recognized on the settlement date. Trade receivables and trade payables are recognized in the balance sheet once the invoice has been sent or received, respectively.

Financial assets are initially recognized at cost, and transaction costs are included for certain instruments that are not measured at fair value. Financial assets are recognized in the balance sheet until the rights in the agreement have been realized or the company no longer has the rights to the asset. Financial assets measured at amortized cost are continuously reviewed according to the expected loss model to assess the need for credit loss provisions.

Financial liabilities are recognized at amortized cost, except in cases where they are recognized at fair value using hedge accounting. Financial liabilities are derecognized from the balance sheet when Essity has met its commitments.

Essity recognizes financial instruments with a remaining maturity of less than 12 months as current assets and liabilities and those that exceed 12 months as non-current assets and liabilities.

Fair value measurement

For the financial instruments for which market quotations are available, actual prices are used for fair value measurement (Level 1). In the absence of market quotations for the instruments, Essity determines fair values with the aid of common valuation models, using quoted prices of similar assets or liabilities in active markets (Level 2).

The fair value of non-current loans measured at prevailing market interest rates is presented in Note E4 Financial liabilities on page 92. The fair value of short-term loans and investments is considered to correspond to the carrying amount, since a change in market interest rates does not have a significant effect on market value.

Classification and subsequent recognition

Classification is carried out in accordance with IFRS 9 in 2018. Under IFRS 9, financial assets are to be classified on the basis of the company's business model and the purpose of contractual cash flows.

Amortized cost

Financial assets held to collect contractual cash flows, and whose cash flows only consist of interest and the principal amount, are to be measured at amortized cost. The main rule is that financial liabilities are measured at amortized cost with the exception of the liabilities described in the measurement categories below. Since the majority of Essity's financial assets is held to collect contractual cash flows and are held to maturity, they are recognized at amortized cost according to the effective interest method. All liabilities, excluding derivatives, and the liabilities included in a hedging relationship, are measured at amortized cost.

Fair value through comprehensive income

Financial assets held to collect contractual cash flows, and which only consist of interest and the principal amount, and to sell the asset before maturity, are measured at fair value through other comprehensive income with the option to recirculate to profit or loss. Essity did not recognize any assets in this category during the year.

For financial assets comprising an equity instrument, the company can, on initial recognition, make an irrevocable choice to recognize the asset at fair value through comprehensive income without the option of recirculation to profit or loss. Essity has an asset valued at SEK 87m recognized in this category.

Fair value through profit or loss

Financial assets that do not fulfill the requirements as stated in the categories stated above are to be measured at fair value through profit or loss. Financial assets and liabilities can, on initial recognition, irrevocably and under certain circumstances, be recognized at fair value through profit or loss if this leads to more relevant information. Derivatives are recognized at fair value through profit or loss. During the year, Essity did not recognize any financial assets or liabilities, except for derivatives and liabilities that are part of a hedging relationship, in this category. For more information, refer to Note E6 Derivatives and hedge accounting on page 93.

Accounting for derivatives used for hedging purposes

All derivatives are initially and continuously recognized at fair value in the balance sheet. Gains and losses on remeasurement of derivatives used for hedging purposes are recognized in accordance with the accounting principles stated in Note E6 Derivatives and hedge accounting on page 93.

In 2017 and 2016, Essity classified its financial instruments in accordance with IAS 39 in the following categories.

Financial assets measured at fair value through profit or loss

Assets are classified in this category when the intention is to sell in the short term.

This category also includes derivatives with positive market values not recognized using hedge accounting. Only financial derivatives were classified in this category during 2017 and 2016.

Held-to-maturity investments

Financial assets that have determinable payments and that Essity intends to hold to maturity are included in this category. Assets in this category are measured at amortized cost applying the effective interest method, which means they are accrued so that a constant return is obtained.

Loan and trade receivables

This category comprises loan receivables that have determinable payments and are not quoted in an active market, as well as trade receivables. Receivables arise when Essity provides money, goods or services directly to another party with the intention to collect the contractual cash flows at maturity. Assets in this category are measured at amortized cost less a potential provision for impairment.

Available-for-sale financial assets

This category includes assets that are available for sale or that have not been classified in any of the other categories. These assets are measured at fair value through other comprehensive income.

Financial liabilities measured at fair value through profit or loss

This category includes derivatives with negative fair values that are not used for hedge accounting and financial liabilities held for trading. Liabilities in this category are continuously measured at fair value and changes in value are recognized in profit or loss. Only derivatives were classified in this category during 2017 and 2016.

Financial liabilities measured at amortized cost

This category includes financial liabilities that are not held for trading. These are recognized initially at fair value, net after transaction costs, and subsequently at amortized cost according to the effective interest method.

Accounting for derivatives used for hedging purposes

All derivatives are initially and continuously recognized at fair value in the balance sheet. Gains and losses on remeasurement of derivatives used for hedging purposes are recognized in accordance with the accounting principles stated in Note E6 Derivatives and hedge accounting on page 93.

Other non-current liabilities	D5	2	8	5	2
Current financial liabilities	E4	2	15	116	103
Other current liabilities	D5	2	21	24	21
Total			44	157	129

These financial instruments are measured at fair value, with the exception of loans and trade receivables and financial liabilities measured at amortized cost. According to Essity's assessment, the fair value essentially corresponds to the carrying amount, with the exception of non-current liabilities, the fair value of which is disclosed in Note E4 Financial liabilities on page 92.

Measurement levels

Level 1: Quoted prices on an active market for identical assets or liabilities, such as shares or bonds quoted on the stock exchange.

Level 2: Other observable inputs for the asset or liability than quoted prices included in Level 1, either directly (price quotations) or indirectly (obtained from price quotations), such as forward contracts or interest rate swaps.

E2. FINANCIAL ASSETS, CASH AND CASH EQUIVALENTS

AP ACCOUNTING PRINCIPLES

Cash and cash equivalents are defined as cash and bank balances as well as current investments with a maturity of less than three months from the acquisition date. Restricted deposits are not included in cash and cash equivalents. Loan receivables are recognized at amortized cost.

Financial assets measured at amortized cost are continuously reviewed to assess the need for credit loss provisions.

Financial assets, cash and cash equivalents

Financial assets measured at fair value through comprehensive income relate to an equity instrument which on transition to IFRS 9 was irrevocably classified in this category without any option of recirculation due to the long-term nature of the holding. The holding relates to shares in pension assets attributable to certain pension obligations. These assets are not included in

E2. FINANCIAL ASSETS, CASH AND CASH EQUIVALENTS, CONT.

the normal pension calculations, as set out in Note C5 Remuneration after termination of employment on page 82. For 2017 and 2016, this asset was recognized in Available-for-sale financial assets. Changes in value excluding exchange gains and losses are recognized in equity under other comprehensive income, while exchange gains and losses are recognized in profit or loss.

Cash and cash equivalents at December 31, 2018 include SEK 2,260m (1,974; 1,672) that is not fully available for use by Essity or for which other limitations exist, primarily cash and cash equivalents in countries that are subject to exchange restrictions and other legal restrictions. Accordingly, it is not possible to immediately use these cash and cash equivalents in other areas of the Group, although it is normally possible to use them in the operations of the respective country. These cash and cash equivalents can also be used to repay local debts in the respective countries. Such liabilities in these countries amounts to SEK 1,045m (821; 1,361).

E3. TRADE RECEIVABLES

AP ACCOUNTING PRINCIPLES

Trade receivables are recognized at amortized cost after a provision is made for doubtful receivables. As of 2018, provisions for doubtful receivables are made using the simplified impairment method that can be selected according to the expected loss model in IFRS 9 for trade receivables with an amount that corresponds to the expected credit losses for the remaining terms of all outstanding trade receivables as per the balance sheet date. The calculation of the impairment requirement for doubtful receivables is based on a combination of a collective and individual assessment. A collective assessment is based on experience from the historical confirmed total credit loss level in relation to total sales in the most recent five-year period adjusted for changes in credit risk based on current and forward-looking information regarding macroeconomic factors that can impact the payment capacity of customers. The collective assessment is therefore adjusted when necessary to take into account changed credit risk due to material changes in financial stability, GDP and employment in the countries where Essity conducts the majority of its sales. Individual assessment of the need to impair doubtful receivables is made in cases when it has been determined that the customer is experiencing financial problems, when no payment has been received for receivables that have long fallen due or because of other significant changes, such as financial crises or natural disasters.

At the beginning of 2018, confirmed credit losses on trade receivables for the years 2014–2017 averaged 0.03% of net sales. In conjunction with the implementation of IFRS 9, Essity has, on the basis of this loss level, recognized a non-recurring effect in the opening balance for 2018 and reduced trade receivables by SEK 9m and equity by SEK 7m after deferred tax on account of the changed accounting principles.

Previously, the impairment of trade receivables was based on the incurred loss model, according to which individual provisions were made for trade receivables that were not expected to be received due to known financial problems of the customer or when payment had not been received for older, overdue trade receivables despite several reminders and overdue notices. The major difference compared with the earlier principle is that Essity now also makes a provision for expected credit losses on trade receivables that have not fallen due or have fallen due for less than 90 days.

An impairment of trade receivables due to a possible credit loss impacts Essity's operating profit as a selling cost in profit or loss and as a reduction of trade receivables by increasing the reserve for doubtful receivables in the balance sheet. When the credit loss has been confirmed, the trade receiv-

able is written off against the provision to reserves for doubtful receivables. A credit loss is regarded as confirmed when it has been determined that the customer is unable to fulfill the legal obligation to pay Essity, when debt-collection measures are no longer cost efficient, the customer's operations have ceased or the customer has been declared bankrupt and this process has ended.

Essity's trade receivables are generally current and are not discounted. Note G5 Changes due to new accounting rules on page 107 describes the transition method and effects of the transition to IFRS 9 for estimation of credit losses on trade receivables.

Trade receivables			
SEKm	2018	2017	2016
Trade receivables, gross	18,963	17,864	16,116
Provision to reserves for doubtful receivables	-276	-257	-273
BS TE3:1 Total	18,687	17,607	15,843

TE3:1 Analysis of credit risk exposure in trade receivables			
SEKm	2018	2017	2016
Trade receivables, not overdue (net)	16,191	15,529	14,175
Trade receivables, overdue (net)			
< 30 days	1,486	1,389	1,161
30–90 days	593	425	276
> 90 days	417	264	231
Trade receivables, overdue (net)	2,496	2,078	1,668
Total	18,687	17,607	15,843

Essity's customer structure is dispersed, with customers in many different areas of business. In 2018, Essity's ten largest customers accounted for 23.6% (22.9; 26.6) of Essity's sales. The single largest customer accounted for 4.4% (3.6; 4.0) of sales.

Including confirmed credit losses in 2018, the average confirmed credit losses on trade receivables over the past five years has declined from 0.03% to 0.02% of net sales. This, combined with Essity's overall assessment that the credit risk in the countries where Essity conducts the majority of its sales has not changed materially in 2018, has meant that only a minor adjustment has been made to the collective assessment (see accounting principles above) regarding the expected impairment requirement for doubtful receivables.

In total, the Group has collateral mainly in the form of credit insurance taken out amounting to SEK 939m (1,329; 867). Of this amount, SEK 107m (203; 59) relates to the category trade receivables overdue but not impaired.

Provision to reserves for doubtful receivables			
SEKm	2018	2017	2016

Translation differences	-6	2	-5
Value, December 31	-276	-257	-273

The expense for the period for doubtful receivables amounted to SEK -28m (-55; -80).

E4. FINANCIAL LIABILITIES

AP ACCOUNTING PRINCIPLES

The main principle for recognition of Essity's financial liabilities is that they are initially measured at fair value, net after transaction costs, and subsequently at amortized cost according to the effective interest method.

In cases where loans with fixed interest rates are hedged using derivatives, both the loan and the derivative are recognized at fair value through a fair value hedge. Non-current loans that are subject to hedge accounting are discounted to the market interest rate without a credit spread. The cash flows from the interest rate derivatives are discounted to the market interest rate and the changes in value are recognized in profit or loss.

Financial liabilities			
SEKm	2018	2017	2016
Current financial liabilities			
Amortization within one year	347	269	256
Bond issues	3,005	2,946	-

Total financial liabilities	54,327	54,838	36,388
Fair value of financial liabilities	54,434	54,227	36,719

¹⁾ Fair value of current loans is estimated to be the same as the carrying amount.

Borrowing

Essity has a Euro Medium Term Note (EMTN) program with a program amount of EUR 6,000m (SEK 61,633) for issuing bonds in the European capital market. As of December 31, 2018, a nominal EUR 3,728m (4,188; 2,217) was outstanding with a remaining maturity of 4.2 years (4.7; 4.8).

Other non-current loans with maturities > 5 years	2,311	2,284
Total	9,195	9,309

Essity has a Swedish and a Belgian commercial paper program that can be utilized for current borrowing.

Commercial paper program¹⁾

Program size	Issued SEKm
Commercial paper SEK 15,000m	551
Commercial paper EUR 800m	2,880
Total	3,431

¹⁾ Included in Loans with maturities of less than one year in the Financial liabilities table.

Essity has syndicated bank facilities to limit the refinancing risk and maintain a liquidity reserve. Contracted bilateral credit facilities with banks are used to supplement these syndicated bank facilities.

Credit facilities

	Nominal	Maturity	Total SEKm	Utilized SEKm	Unutilized SEKm
Syndicated credit facilities	EUR 1,000m	2021	10,277	-	10,277
	EUR 1,000m	2024	10,277	-	10,277
Total			20,554	-	20,554

Maturity profile of gross debt¹⁾

¹⁾ Gross debt includes accrued interest in the amount of SEK 318m.

After additions for net pension provisions and with deductions for cash and cash equivalents, interest-bearing receivables and capital investment shares, the net debt was SEK 54,404m (52,467; 35,173). For a description of the methods used by Essity to manage its refinancing risk, refer to the Risks and risk management section on page 33.

E5. LIQUIDITY RISK

The table below shows the Group's liquidity risk regarding financial liabilities (including interest payments), net settled derivatives that constitute financial liabilities and negative cash flows from gross settled derivatives. For a description of the methods used by Essity to manage its liquidity risk, refer to the Risks and risk management section on page 38.

Liquidity risk

SEKm	Less than 1 year	Between 1 and 3 years	Between 3 and 5 years	More than 5 years
2018				
Loans including interest	10,998	14,864	13,686	16,975
Net settled derivatives	0	0	0	-
Energy derivatives	22	8	-	-
Trade payables	15,786	125	-	-
Total	26,806	14,997	13,686	16,975
Gross settled derivatives ¹⁾	57,937	2,101	466	-
2017				
Loans including interest	7,014	10,814	18,277	21,255
Net settled derivatives	-11	-22	-4	-
Energy derivatives	11	3	-	-
Trade payables	14,589	159	-	-
Total	21,603	10,954	18,273	21,255
Gross settled derivatives ¹⁾	65,401	1,921	1,414	-
2016				
Loans including interest	4,791	10,069	10,964	11,475
Net settled derivatives	-6	-16	-11	-
Energy derivatives	29	1	-	-
Trade payables	12,790	182	-	-
Total	17,604	10,236	10,953	11,475
Gross settled derivatives ¹⁾	38,315	2,392	51	1,373

¹⁾ The gross settled derivatives have, largely, corresponding positive cash flows and therefore, in the opinion of Essity, do not constitute any real liquidity risk.

E6. DERIVATIVES AND HEDGE ACCOUNTING

AP ACCOUNTING PRINCIPLES

Accounting for derivatives used for hedging purposes

All derivatives are initially and continuously recognized at fair value in the balance sheet. Gains and losses on remeasurement of derivatives used for hedging purposes are recognized as described below. When using hedge accounting, the relationship between the hedging instrument and the hedged item is documented. Assessment of the effectiveness of the hedge is also documented, both when the transaction is initially executed and on an ongoing basis. Hedge effectiveness is the extent to which the hedging instrument offsets changes in value in a hedged item's fair value or cash flow. The ineffective portion is recognized directly in profit or loss.

Cash flow hedges

Gains and losses on remeasurement of derivatives intended for cash flow hedges are recognized in equity under other comprehensive income and reversed to profit or loss at the rate at which the hedged cash flow affects profit or loss. If a hedge relationship is interrupted and cash flow is still expected, the result is recognized in equity under other comprehensive income until the cash flow affects the result. If the hedge pertains to a balance sheet item, the result is transferred from equity to the asset or liability to which the hedge relates when the value of the asset or liability is determined for the first time. In cases in which the forecast cash flow that forms the basis of the hedging transaction is no longer assessed as probable, the cumulative gain or loss that is recognized in equity under other comprehensive income is transferred directly to profit or loss. Cash flow hedges relating to energy are recognized as energy costs, that is, cost of goods sold. Cash flow hedges related to transaction exposure are recognized in consolidated net sales and expenses. Cash flow hedges relating to interest expenses are recognized in net financial items.

Hedges of net investments in foreign operations

Gains and losses on remeasurement of derivatives intended to hedge Essity's net investments in foreign operations are recognized in equity under other comprehensive income. The cumulative gain or loss in equity is recognized in profit or loss in the event of divestment of the foreign operation.

Fair value hedges

The gain or loss from remeasurement of a derivative relating to fair value hedges is recognized in profit or loss together with changes in fair value of the hedged asset or liability. For Essity, this means that non-current loans that are subject to hedge accounting are discounted without a credit spread to the market interest rate and meet inherent interest rate derivatives' discounted cash flows at the same interest rate.

Economic hedges

When Essity conducts hedges and the transactions do not meet requirements for hedge accounting according to IFRS 9, changes in fair value of the hedging instrument are recognized directly in profit or loss.

Outstanding derivatives

¹⁾ Nominal SEK 69,588m (100,661; 110,115) is outstanding before the right of set-off.

Balance sheet

Essity uses financial derivatives to manage currency, interest rate and energy price risks. For a description of how Essity manages these risks, refer to the

section on Risk and risk management on page 33. The table above shows the derivatives that impacted the Group's balance sheet on December 31, 2018. For more information relating to derivatives in the balance sheet, see Note E1 Financial instruments by category on page 90.

Income statement

Hedges pertaining to transaction exposure had an impact of SEK 92m (-106; 64) on operating profit for the period. At year-end, the net market value amounted to SEK 0m (-9; 45). Currency hedges increased the cost of non-current assets by SEK 1m (increased: 10; reduced: 5). At year-end, the net market value amounted to SEK -1m (20; 24). Energy derivatives had an impact of SEK 396m (90; -239) on operating profit for the period. Energy derivatives had an outstanding market value of SEK 366m (225; 317) at year-end. Derivatives impacted net interest items in an amount of SEK -362m (-289; -68). The net market value of outstanding interest rate derivatives amounted to SEK 489m (413; 550) at year-end. For further information relating to net financial items, see Note E7 Financial income and expenses on page 96.

Sensitivity analysis

Essity has performed sensitivity analysis calculations on the financial instruments' risk at December 31, 2018 using assumptions on market movements that are regarded as reasonably possible in one year's time. If the Swedish krona had unilaterally weakened/strengthened by 5% against all currencies, outstanding financial hedges, trade payables and trade receivables would have decreased/increased profit for the period before tax by SEK 7m (54; 4).

If the Swedish krona had unilaterally weakened/strengthened by 5%, currency hedges relating to the cost of non-current assets would have increased/decreased equity by SEK 0m (0; 1). If energy prices had increased/decreased by 20%, outstanding financial hedges relating to natural gas and electricity, all other things being equal, would have decreased/increased energy costs for the period by SEK 299m (214; 203). In addition to the earnings impact, equity would have increased/decreased by SEK 136m (120; 107). However, the total energy cost for the Group would have been affected differently if the price risk related to supply contracts was taken into account.

Derivatives with hedge accounting

The various risk management strategies are presented in the Risks and risk management section on page 33. The derivatives to which hedge accounting is applied are presented below. Essity also continuously hedges the transaction exposure and energy price risks for the risks that are recognized in the balance sheet and income statement. Hedge accounting is not applied in respect of these risks. For currency derivatives, the revaluation from the risks meets derivatives in the financial positions. For energy derivatives, the result is recognized in profit or loss.

IFRS 9, which came into effect on January 1, 2018, provides the option of hedging risk components. In 2018, Essity did not utilize this option except for energy, where Essity in the Nordic region hedges the system price, which is a sub-component. The hedging ratio for the various risks for which hedge accounting is prepared is consistently 1:1.

E6. DERIVATIVES AND HEDGE ACCOUNTING, CONT.**Cash flow hedges**

Cash flow hedges for currency risk are prepared for transaction exposure, large investments and energy price risks in connection with purchases of electricity and gas. For cash flow hedges, hedges are prepared whereby critical terms match the hedged item. For the cash flow hedges prepared, this means that the change in fair value of the hedging instruments and the change in the hedged item are very highly correlated. Any ineffectiveness could, for example, be due to the time or the amount of the forecast cash flow mismatching with the cash flow of the derivative. In 2018, SEK Om (0, 0) was recognized in profit or loss as ineffectiveness concerning the cash flow hedges. Currency derivatives mature within one year, while energy derivatives mature in December 2020.

Hedging of net investments

Essity has hedged net investments in a number of selected legal entities in order to achieve the desired currency distribution of net debt relative to assets so that performance measures that are important to the company's credit rating can be protected in the long term. The result of hedging

positions affected equity by a total of SEK -122m (-1,968, -437). This result is largely due to hedges of net investments in USD and EUR. In 2018, SEK Om (0, 0) was recognized in profit or loss as ineffectiveness. The total market value of outstanding hedging transactions at the end of the period was SEK 353m (170; 167). In total at year-end, Essity hedged net investments outside Sweden amounting to SEK -18,794m. The Essity Group's total foreign net investments at year-end amounted to SEK 65,679m. Primarily currency derivatives are used to hedge net investments. Loans in foreign currency (EUR) were also used to hedge net investments in 2018.

Fair value hedges

For fair value hedges, the hedges have the same nominal amount, maturity dates and fixed interest as the hedged item. Hedge ineffectiveness is attributable, for example, to the various discount curves for the hedging instrument and the hedged item. Hedge ineffectiveness per maturity date is presented in the table below. Ineffectiveness is recognized in Net financial items under the item Fair value hedges, unrealized. See Note E7 Financial income and expenses on page 96.

¹⁾ Outstanding derivatives with hedge accounting are included in the table Outstanding derivatives.

²⁾ Derivatives before offsetting.

³⁾ Cost of goods sold.

⁴⁾ Cost of goods sold, Net sales and Buildings, land, machinery and equipment

The results from hedging of net investments in foreign operations are recognized in the translation reserve, refer to Note E8 Shareholders' equity on page 96. The results from fair value hedges are recognized directly in profit or loss.

Hedge reserve in equity

Currency derivatives relating to hedging of transaction exposure mature mainly during the first quarter of 2019. With unchanged exchange rates, profit after tax will be affected in an amount of SEK 0m (neg. 1; pos. 2). Currency derivatives relating to hedging of the cost of non-current assets have a maturity spread until November 2019. With unchanged exchange rates, the cost of non-current assets will increase by SEK 1m (decrease: 15; increase: 2) after tax. The derivatives intended to hedge energy costs in the Group mature during 2019 and 2020. With unchanged prices, the Group's profit after tax will be affected positively in an amount of SEK 245m (pos: 152; pos: 164).

E8. EQUITY

AP ACCOUNTING PRINCIPLES

Transaction costs directly relating to the issue of new shares or options are recognized, net after tax, in equity as a reduction in the issue proceeds. Expenditure for the purchase of own shares reduces retained earnings in equity in the Parent Company and the portion of consolidated equity that pertains to owners of the Parent. When these shares are sold, the sales proceeds are included in retained earnings in the equity pertaining to owners of the Parent.

Furthermore, transactions considered to be transfers between companies that are jointly controlled are recognized as separate transactions with shareholders as shown below.

Equity totaled SEK 54,899m (49,570; 39,580) at December 31, 2018. The following tables show the distribution and profit for the period.

SEKm	Share capital	TE8:1 Reserves	Retained earnings	Equity attributable to Essity's shareholders	Non-controlling interests	Total equity

Sensitivity analysis

If interest rate levels had been 1 percentage point higher/lower, with unchanged fixed-interest terms and volumes in the net debt, interest expenses for the period would have been SEK 123m (83; 103) higher/lower. Sensitivity analysis calculations have been performed on the risk to which Essity was exposed at December 31, 2018 using assumptions on market movements that are regarded as reasonably possible in one year's time.

For a description of the methods used by Essity to manage its interest rate risk, refer to the Risks and risk management section on page 38.

At December 31, 2018, the debt/equity ratio amounted to 0.99 (1.06; 0.89). Changes in liabilities and equity are described in the Financial position section on page 32. Essity's target for capital structure is to establish an effective capital structure, while at the same time ensuring long-term access to loan financing. Cash flow in relation to net debt is to be taken into consideration with the aim of maintaining a solid investment grade rating.

Essity has a credit rating for long-term debt of Baa1 from Moody's and BBB+ from Standard & Poor's. Essity's financial risk management is described in the Risk and risk management section on page 33. The Essity share section on page 6 outlines Essity's dividend policy, while its capital structure is described in the Objectives, targets and outcomes section on page 12.

¹⁾ The take over by Essity Aktiebolag (publ) on December 30, 2016 of the majority of the external financing that existed within SCA is the reason for the major change in transactions with shareholders in equity in 2016. For further information, see note G4 Transactions with related parties on page 106.

F. GROUP STRUCTURE

F1. SUBSIDIARIES

AP ACCOUNTING PRINCIPLES

Subsidiaries

The companies over which Essity has control are consolidated as subsidiaries. Control means that Essity has sufficient influence to control the activities of the subsidiary, has the right to its returns, has control over its exposure and is able to impact the return of the company through its influence. Most of the Group's subsidiaries are wholly owned, which means that Essity has control over the companies. Essity owns 52% of Vinda, 50% of Familia and 49% of Unicharm Mölnlycke; Essity also has control of these companies, despite the fact that there are significant non-controlling interests in the companies.

Non-controlling interests

Non-controlling interests are recognized as a separate item in the Group's equity. Profit or loss and every component of other comprehensive income are attributable to the owners of the Parent and to non-controlling interests. Losses attributable to non-controlling interests are recognized even if this results in a negative balance for the non-controlling interest. In connection with acquisitions of less than 100% when a controlling influence is achieved, non-controlling interests are determined either as a proportional share of the fair value of identifiable net assets excluding goodwill or at fair value. Subsequent acquisitions up to 100% and divestments of participations in a subsidiary that do not lead to a loss of controlling influence are recognized as an equity transaction.

List of major subsidiaries

The Group's participations in major subsidiaries at December 31, 2018 are presented below. The following selection of wholly owned subsidiaries and subsidiaries with significant non-controlling interests includes companies with external sales in excess of SEK 500m in 2018.

¹⁾ Essity has a small number of jointly owned subsidiaries with significant non-controlling interests, see **TF2:1** on page 100.

F2. JOINTLY OWNED SUBSIDIARIES WITH SIGNIFICANT NON-CONTROLLING INTERESTS

Vinda

Vinda is one of China's largest hygiene companies. Essity has been a shareholder in Vinda since 2007, became its majority shareholder in late 2013 and has consolidated Vinda's financials since the first quarter of 2014. In 2014, Essity divested its hygiene business in China, Hong Kong and Macau for integration with Vinda. In 2016, Essity's divestment of its business in Southeast Asia, Taiwan and South Korea for integration with Vinda was approved by the company's independent shareholders and the transaction was completed on April 1, 2016. Following this transaction, Essity's holding amounted to 54.6%. In 2017, Vinda acquired a property via a private placement that diluted Essity's holding to 52%. Vinda's market capitalization on the Hong Kong stock exchange was SEK 16,868m (19,705; 19,329) at the end of the period.

Familia

Familia is 50% owned by Essity and 49.8% owned by the Gomez family. Essity is considered to have a controlling influence over Familia, despite the

fact that Essity does not hold a majority of shares in the company. Essity is deemed to have a controlling influence since it has control over the activities with the most significant impact on Familia's return. Familia operates in the South American market and sells Personal Care, Consumer Tissue and Professional Hygiene products. During the year, Familia acquired another subsidiary, see Note F6 on page 103.

Financial information

Financial information is disclosed below for both subsidiaries. Financial information has not been disclosed for other subsidiaries since no other individual subsidiary had a material impact on the Group's earnings and position.

These balance sheets have been presented taking into consideration the recognition of Vinda and Familia in Essity's consolidated financial statements, whereby consideration was given to adjustments for surplus values in connection with acquisitions.

³⁾ Other comprehensive income and the Balance sheets for the 2017 and 2016 fiscal years have been adjusted for Familia.

F3. JOINT VENTURES AND ASSOCIATES

AP ACCOUNTING PRINCIPLES

Joint arrangements

Essity classifies its joint arrangements as joint ventures or joint operations, which are presented in Note F4 Joint operations on page 102.

Joint ventures

Joint ventures are defined as companies in which Essity together with other parties has shared control over operations. A joint venture entitles the joint owners to the net assets of the investment. Joint ventures are recognized in accordance with the equity method, meaning that a net item including the goodwill will be recognized for each joint venture in the balance sheet. A share in profits is recognized in the income statement as a component of "Share of profits of associates and joint ventures." Share of profits is calculated on the basis of Essity's share of equity in the respective joint venture. Joint arrangements recognized in accordance with the equity method are initially measured at cost. Measurement of acquired assets and liabilities is carried out in the same way as for subsidiaries. Essity's single largest joint

venture is Bunzl & Biach G.m.b.H., Vienna, which supplies the business with raw materials.

Associates

Associates are companies in which the Group exercises a significant influence without the partly owned company being a subsidiary or a joint arrangement. Normally, this means that the Group owns between 20% and 50% of the votes. Accounting for associates is carried out according to the equity method and they are initially measured at cost. Valuation of acquired assets and liabilities is performed in the same manner as for subsidiaries and the carrying amount for associates includes any goodwill and other Group adjustments.

The Group's share of profit after tax arising in the associate after the acquisition is recognized in the consolidated income statement in the line "Share of profits of associates and joint ventures." Share of profits is calculated on the basis of Essity's share of equity in the respective associate.

¹⁾ Net increase for the period includes the Group's share of the profit after tax of joint ventures and associates, as well as items recognized directly in equity (both after deductions for any non-controlling interests), in addition to an adjustment for dividends received during the period, which amounted to SEK 7m (5; 2) for joint ventures and SEK 79m (171; 147) for associates.

Joint ventures and associates

Asaleo Care Ltd

Asaleo Care Ltd manufactures and markets Consumer Tissue, Professional Hygiene and Personal Care products. Essity has licensed its Tork and TENA brands to Asaleo Care for sale in Australia, New Zealand and Fiji.

In 2015, 2016 and 2017, the company implemented a program to repurchase shares from the market, in which Essity did not participate. This has caused Essity's participation in Asaleo Care to increase to 36.2%. In 2018, the company recognized an impairment loss of AUD 148.5m relating to assets in the Tissue business in Australia and the Personal Care business in New Zealand. Essity has recognized this as an item affecting comparability, see Note B3 on page 77.

Bunzl & Biach

Bunzl & Biach is a joint venture that operates in the recovered paper market and supplies raw materials to Essity's business.

F4. JOINT OPERATIONS

AP ACCOUNTING PRINCIPLES

Joint operations are defined as companies in which Essity, together with other parties through an agreement, has shared control over operations. In joint operations, parties to the agreement have rights to the assets and obligations for the liabilities associated with the investment, meaning that the operator must account for its share of the assets, liabilities, revenues and costs according to the proportional method.

Measurement of acquired assets and liabilities according to the proportional method is carried out in the same way as for subsidiaries. Essity recognizes its proportional share of the company's assets, liabilities, income and expenses in its financial statements. A small number of companies within Essity are deemed to be joint operations, namely Uni-Charm Mölnlycke, ProNARO and Nokianvirran Energia, in which the parties to the agreement acquire all products and services from the companies and the companies are operated with near-zero profit.

Joint operations

Company name	Corp. Reg. No.	Domicile	Share of equity at December 31, 2018	Share of equity at December 31, 2017	Share of equity at December 31, 2016
Uni-Charm Mölnlycke B.V.	02-330 631	Hoogezand, Netherlands	40	40	40
ProNARO GmbH	HRB 8744	Stockstadt, Germany	50	50	50
Nokianvirran Energia Oy (NVE)	213 1790-4	Kotipakka, Finland	27	27	27

Uni-Charm Mölnlycke

Uni-Charm is classified as a joint operation since the parties to the agreement purchase all products produced by the company. The products are priced in a manner that allows the operations to receive full cost recovery for their production and financing costs. This means that the company in the joint operation is operated with near-zero profit and thus is not exposed to commercial risk. This joint operation has operations in Hoogezand in the Netherlands, Veniov in Russia and Delaware in the US.

ProNARO

A number of paper mills merged and formed the company ProNARO, whose main task is to negotiate favorable prices, optimize inventory levels, improve timber quality and reduce lead times and costs when purchasing timber. ProNARO's purchasing is based on forecast volumes from the paper mills. The company's production and administration costs are charged to the paper mills through the price set for the timber. Any budget or price deviations are charged to the paper mills for these additional costs, which means that ProNARO is not exposed to commercial risk.

Nokianvirran Energia

Essity has entered into an agreement with two other stakeholders to form a joint so-called mankala company in the Finnish energy market, where the joint parties produce heat and steam from biofuel. Each party in the joint operation is obligated to bear a portion of the fixed costs in proportion to its holding in the company and to pay for the raw materials used in the production of heat and steam in proportion to its consumption. Accordingly, the company is not profit-driven since the parties themselves bear their respective costs. The company is expected to generate near-zero profit and thus is not exposed to commercial risk.

F5. SHARES AND PARTICIPATIONS

Shares and participations

SEKm	2018	2017	2016
Value, January 1	32	32	33
Increase through acquisitions	4	3	
Divestments	-8	-3	-1
Translation differences	1	-	-
BS Value, December 31	29	32	32

Shares and participations pertain to holdings in other companies that are not classified as subsidiaries, joint arrangements or associates. Since these holdings are of an operating nature, the holdings are not classified as available-for-sale financial assets. Carrying amounts concur with fair value.

F6. ACQUISITIONS AND DIVESTMENTS

AP ACCOUNTING PRINCIPLES

Acquisition of subsidiaries

Essity applies IFRS 3 Business Combinations for acquisitions. In business combinations, acquired assets and assumed liabilities are identified and classified at fair value on the date of acquisition (also known as purchase price allocation). The purchase price allocation also includes an assessment of whether there are any assets that are intangible in nature, such as trademarks, patents, customer relations or similar assets that were not recognized in the acquired unit. If the cost is higher than the net value of the acquired assets and assumed liabilities, the difference is recognized as goodwill. Any surplus value on property, plant and equipment is depreciated over the estimated useful life of the asset. Goodwill and strong trademarks with indefinite useful lives are not amortized; instead, they are subjected to annual impairment testing. Some trademarks and customer relations are amortized over their estimated useful lives.

If the transferred consideration is contingent on future events, it is measured at fair value and any changes in value are recognized in profit or loss.

Transaction costs in conjunction with acquisitions are not included in cost, but rather expensed directly.

Companies acquired during the period are included in the consolidated financial statements as of the acquisition date. Divested companies are included in the consolidated financial statements until the divestment date.

Non-controlling interests

Acquisitions of non-controlling interests are measured on an acquisition-by-acquisition basis, either as a proportional share of the fair value of identifiable net assets excluding goodwill (partial goodwill) or at fair value, which means that goodwill is also recognized on non-controlling interests (full goodwill).

In step acquisitions in which a controlling influence is achieved, any net assets acquired earlier in the acquired units are remeasured at fair value and the result of the remeasurement is recognized in profit or loss. If the controlling influence is lost upon the divestment of an operation, the result is recognized in profit or loss and the portion of the divested operation that remains in the Group is measured at fair value on the divestment date, with the remeasurement effect recognized in profit or loss.

Acquisitions after controlling influence is achieved are recognized as an equity transaction, meaning a transfer between equity attributable to owners of the Parent and non-controlling interests. The same applies for divestments that take place without the loss of a controlling influence.

Acquisitions in 2018

During the first quarter of 2018, the earlier purchase price allocation from 2017 for BSN medical was confirmed (refer to the table on the next page) in which a final valuation of intangible assets in the form of customer relations, brands, technology and goodwill was carried out. In the first quarter of 2018, BSN medical had an impact of SEK 1,971m on consolidated net sales, SEK 407m on adjusted EBITDA and SEK 344m on adjusted EBITA.

In 2018, Familia, in which Essity has a 50% stake, completed three acquisitions. On February 16, the outstanding 50% of the company Productos Sancela del Peru, with operations in Peru and Bolivia, was acquired. The consideration transferred amounted to SEK 310m. Following the acquisition, Essity consolidated the acquisition of the company as a subsidiary with a minority interest. Prior to the acquisition, the company was consolidated as an associate according to the equity method. Remeasurement was carried out of the previously recognized equity portion at fair value in the amount of SEK 225m and this is recognized as an item affecting comparability in profit or loss. The acquisition did not have any material impact on Essity's net sales since the acquired company's operations are based on the onward sale of products from Familia, which prior to the acquisition recognized sales to Peru and Bolivia as external sales. The impact on Essity's earnings of the acquisition was not material. In February, a building was acquired that was supplemental to the share acquired at the end of 2017 in the company Continental de Negocias S.A, with operations in the Dominican Republic. See Acquisitions in 2017 below for further information. The consideration transferred amounted to SEK 85m. On April 3, the company Industrial Papelera Ecuatoriana S.A (INPAECSA) was acquired with operations in Ecuador. The consideration transferred was SEK 68m. The acquisition did not have any material impact on Essity's net sales or earnings in 2018.

Acquisitions in 2017

On December 19, 2016, it was announced that an agreement to acquire BSN medical, a leading medical technology company, had been concluded. BSN medical develops, manufactures, markets and sells products within the areas of wound care, compression therapy and orthopedics. The purchase price for the shares amounts to EUR 1,394m, and takeover of net debt to EUR 1,321m. The acquisition is fully debt-funded. The transaction, which was subject to customary regulatory approvals, was closed on April 3, 2017. Goodwill is justified by the synergies that arise as a result of BSN medical's leading market positions in attractive medical technology product cate-

gories, which create a shared future growth platform in combination with Essity's incontinence business, including the globally leading brand TENA. Furthermore, synergies are generated by being able to utilize a common customer base and sales channels for both businesses, enabling more rapid growth through cross selling. In 2017, restructuring costs amounted to SEK 96m and integration costs to SEK 48m. Costs for the acquisition amounted to SEK 229m, of which SEK 86m was recognized in 2017 and SEK 143m in 2016.

On December 27, Familia acquired the remaining 50% of its joint venture Continental de Negocias S.A in the Dominican Republic. The consideration transferred amounted to SEK 135m. Prior to the acquisition, the acquired company was recognized as an associate according to the equity method. Remeasurement was carried out of the previous equity portion at fair value in the amount of SEK 72m and this is recognized as an item affecting comparability in profit or loss.

Other minor acquisitions amounted to SEK 3m. During the period, liabilities relating to acquisitions in previous years were settled in the amount of SEK 170m, of which SEK 108m related to non-interest-bearing operating liabilities and SEK 62m to a financial debt; the payments mainly concerned two earlier acquisitions in the US within BSN medical.

Effect on sales and earnings in 2017 of acquisitions for the period

Since the date of acquisition, BSN medical has had an impact of SEK 6,301m on consolidated net sales, SEK 1,331m on adjusted EBITDA and SEK 1,150m on adjusted EBITA.

Had the acquisition been consolidated from January 1, 2017, the expected sales would have amounted to SEK 8,363m, adjusted EBITDA to SEK 1,767m and adjusted EBITA to SEK 1,526m. This is based on an annualization of the acquisition's impact since the acquisition date.

The acquisition of the remaining 50% in Continental de Negocias on 27 December did not have any impact on the Group's net sales, adjusted EBITDA or EBITA during the period. Had the acquisition been consolidated from January 1, 2017, the estimated sales would have amounted to SEK 123m, adjusted EBITDA to SEK 19m and adjusted EBITA to SEK 19m.

Acquisitions in 2016

On January 21, 2016, Wausau Paper Corp., one of the largest Professional Hygiene companies in the North American market, was acquired. The consideration transferred amounted to USD 513m (SEK 4,401m). Goodwill is motivated by synergies between Essity and Wausau Paper, including the capacity

F6. ACQUISITIONS AND DIVESTMENTS, CONT.

to offer customers a broad portfolio of products. The acquisition is expected to generate annual synergies of approximately USD 40m, with full effect three years after closing. Synergies are expected in sourcing, production, logistics, reduced imports, increased volumes of premium products and reduced sales, general and administration costs.

A minor acquisition of Sensasure in Canada was carried out. The consideration transferred amounted to SEK 45m, of which SEK 17m relates to earn-out payments that were made in 2017 (SEK 7m) and 2018 (SEK 10m).

Effect on sales and earnings in 2016 of acquisitions for the period

Since the acquisition date, the acquisition of Wausau has had an impact of SEK 2,996m on consolidated net sales, of SEK 272m on adjusted operating profit and of SEK 32m on profit for the period, including items affecting comparability, before tax. If the acquisition had been consolidated from January 1, 2016, the expected net sales would have amounted to SEK 3,164m and profit before tax, including items affecting comparability, to SEK 48m.

Acquired operations

The table below shows the fair value of acquired net assets recognized on the acquisition date, recognized goodwill and the effect on the Group's cash flow statements. All acquisition balance sheets for 2018 have essentially been confirmed and only minor deviations may arise in the first quarter of 2019.

Adjustment of preliminary acquisition balance sheets for 2018

A purchase price allocation is considered preliminary until it is confirmed. A preliminary purchase price allocation is changed as soon as new information regarding assets/liabilities on the acquisition date is obtained, although the acquisition balance sheet must be confirmed not later than one year from the date of the acquisition. The preliminary purchase price allocation for BSN medical from 2017 was confirmed in 2018 following Essity's conclusion of its valuation of BSN medical's balance sheet, in connection with which minor adjustments were made primarily to property, plant and equipment, cash and cash equivalents and financial liabilities against goodwill, in accordance with the above specification. In addition to this adjustment, inventory included in the acquisition of Continental de Negocias S.A in Dominican Republic at the end of 2017 was revalued upward by SEK 10m, which reduced preliminarily recognized goodwill by SEK 7m after adjustment of deferred tax liability.

Divestments

No new divestments were carried out during the year. Gain/losses and cash flow relate to earn-out payments for previously divested companies primarily in the US. All capital gains were recognized in items affecting comparability in profit or loss.

Assets and liabilities included in divestments

SEKm	2018	2017	2016

¹⁾ Excluding reversal of realized translation differences in divested companies to profit or loss. Gain/loss on disposal is included in items affecting comparability in profit or loss.

G. OTHER

G1. NON-CURRENT ASSETS HELD FOR SALE

AP ACCOUNTING PRINCIPLES

Non-current assets held for sale and discontinued operations

Assets are classified as held for sale if their value, within one year, will be recovered through a sale and not through continued use in the operations. On the reclassification date, the assets and liabilities are measured at the lower of fair value minus selling costs and the carrying amount. The assets are no longer depreciated after reclassification. Any gain from remeasurement is limited to the amount equivalent to previously made impairment charges. Gains and losses recognized on remeasurement and divestment are recognized in profit and loss for the period.

When an independent business segment or a significant operation within a geographic area is divested, it is classified as a discontinued operation. The divestment date, or the point in time when the operation fulfills the criteria for classification as held for sale, determines when the operation should be classified as a discontinued operation.

Profit/loss after tax from discontinued operations is recognized on a separate line in the income statement. The income statement is adjusted for the comparative period as though the discontinued operation had already been disposed of at the start of the comparative period.

Non-current assets held for sale and discontinued operations			
SEKm	2018	2017	2016
Buildings	31	9	59
Land	24	18	31
Machinery and equipment	14	15	66
BS Total	69	42	156

In 2018, non-current assets held for sale are attributable to the closure of a production plant in the US in the amount of SEK 30m and the closure of an operation in India in the amount of SEK 39m.

G2. LEASES

AP ACCOUNTING PRINCIPLES

Lease agreements are classified and recognized as either operating or finance leases. In cases where a lease essentially entails that the risks and rewards incidental to ownership have been transferred to Essity, the lease agreement is classified as a finance lease. The leased asset is recognized as a non-current asset with a corresponding interest-bearing liability. The initial value of both these items comprises the lower of the fair value of the assets or the present value of the minimum lease payments. Future lease fees are divided between amortization and interest, so that each reporting period is charged with an interest amount that corresponds to a fixed interest rate on the recognized liability for the respective period. The leased asset is depreciated according to the same principles that apply to other assets of the same nature. If it is uncertain whether the asset will be taken over at the end of the leasing period, the asset is depreciated over the lease term if this is shorter than the useful life that applies to other assets of the same nature. Lease agreements in which the risks and rewards incidental to ownership are essentially carried by the lessor are classified as operating leases, and the lease payments are expensed on a straight-line basis over the lease term.

Leasing expenses			
SEKm	2018	2017	2016
Operating leases	-980	-776	-696
Finance leases, depreciation/amortization	-4	-2	-2
Finance leases, interest expense	0	0	0
Total	-984	-778	-698

Operating leases, future minimum lease payments			
SEKm	2018	2017	2016
Within 1 year	900	572	515
Between 1 and 5 years	1,770	975	1,209
Later than 5 years	1,297	980	1,392
Total	3,967	2,527	3,116

Operating lease objects comprise a large number of items, including warehouses, offices, other buildings, machinery and equipment, IT equipment, office fixtures and various transport vehicles. The assessment for a number of the objects is that, in actual fact, it is possible to terminate contracts early.

Finance leases, future minimum lease payments			
SEKm	2018	2017	2016
Within 1 year	1	1	1
Between 1 and 5 years	0	1	1
Later than 5 years	-	-	-
Total	1	2	2
Of which, interest	0	0	0
Present value of future minimum lease payments	1	2	2

Other disclosures

Total payments for finance leases during the period amounted to SEK -1m (-2; -31), of which amortization of debt accounted for SEK -1m (-2; -31). The carrying amount of finance lease assets at year-end amounted to SEK 1m (5; 5).

G3. CONTINGENT LIABILITIES AND PLEDGED ASSETS

AP ACCOUNTING PRINCIPLES

A contingent liability is recognized when there is a potential or actual obligation arising from events that have occurred that is not recognized as a liability or provision, either because it is improbable that an outflow of resources will be required to settle the obligation or because the amount cannot be calculated in a reliable manner.

Contingent liabilities			
SEKm	2018	2017	2016
Guarantees for			
associates	3	5	8
customers and others	44	43	39
Other contingent liabilities ¹⁾	333	294	214
Total	380	342	261

¹⁾ Other contingent liabilities above pertain to recycling fees/taxes for packaging in France, where the claim is subject to a judicial review.

With reference to infringements of competition rules, claims for damages have been brought against the company. The company contests its responsibility and does not expect the claim to have a material impact.

Pledged assets

SEKm	Pledged assets related to financial liabilities	Other	Total		
			2018	2017	2016
Real estate mortgages	27	-	27	65	7
Chattel mortgages	34	-	34	31	55
Other	61	216	277	250	130
Total	122	216	338	346	192

Liabilities for which some of these assets were pledged as collateral amounted to SEK Om (3; 0).

G4. TRANSACTIONS WITH RELATED PARTIES

Up until the split of SCA into two listed companies on June 15, 2017, Essity had a number of transactions with SCA units, both the former Forest Products business areas and the Parent Company Svenska Cellulosa Aktiebolaget SCA. These transactions and dealings are outlined in the table below. In relation to remuneration of senior executives, refer to Note C3 Remuneration of senior executives on page 80 and for disclosures regarding transactions with associates, joint ventures and joint operations to Notes F3 Joint ventures and associates on page 100 and to F4 Joint operations on page 102.

Purchases from Forest Products relate primarily to pulp used in Essity's manufacturing process. Pricing between units has adhered to the transfer pricing policy that applied at the SCA Group. Other income relates to management fees that are invoiced to Forest Products for such items as management functions and which have been allocated to Essity in connection with the preparation of the combined financial statements. The financial income is attributable to the internal bank's lending to Forest Products.

The most significant dealing during the presented fiscal years relates to the lending that Essity has conducted via the internal bank to Forest Products, which is classified as current financial receivables, Group companies. Transactions in the form of lending and reallocation of net debt have been classified as transactions with shareholders in equity, refer to Note E8 Equity on page 96. The take over by Essity Aktiebolag (publ) on December 30, 2016 of the majority of the external financing that existed within SCA in connection with the final allocation of assets and liabilities between Essity and SCA is the reason for the major change in transactions with shareholders in equity in 2016.

The remaining financial dealings between Essity and SCA were settled in conjunction with the split of the Group into two listed companies on June 15, 2017.

G5. CHANGES DUE TO NEW ACCOUNTING RULES

The new standards IFRS 9 Financial Instruments and IFRS 15 Revenue from Contracts with Customers came into effect on January 1, 2018. This Note presents the effects of the transition to these standards.

IFRS 9

Essity applies IFRS 9 prospectively from January 1, 2018. Comparative information has not been restated and is instead recognized according to IAS 39 for 2017 and 2016.

The new standard contains new principles regarding the recognition and measurement of financial assets. The decisive factors are the company's objective and the contractual cash flows of the financial assets. The principles for financial liabilities are largely unchanged.

A review of the Group's financial assets and liabilities according to the new IFRS 9 criteria did not result in any significant changes to Essity's reporting. A non-current financial asset of SEK 87m that was previously classified as available-for-sale financial assets has been classified in the measurement category of fair value through other comprehensive income. No other changes to the measurement of assets and liabilities have been made.

The new impairment model called expected credit loss (ECL) model has the largest impact on trade receivables for Essity. Essity has decided to apply the simplified model whereby loss allowances are made for the full lifetime of the assets. In the first quarter of 2018, Essity recognized a non-recurring effect of SEK 7m after tax in equity due to the changed calculation model for expected credit losses on trade receivables.

On the introduction of IFRS 9, there is the option of continuing to apply IAS 39 to the area of hedge accounting. Essity has decided not to make use of this option and instead also applies IFRS 9 to hedge accounting. All hedging documentation has been updated in accordance with the new rules. The transition to the new hedging rules did not impact amounts recognized in the balance sheet or income statement.

Effects in the balance sheet due to the transition on January 1, 2018

	December 31, 2017 in acc. with IAS 39	Transition effect	January 1, 2018 in acc. with IFRS 9
Assets			
Trade receivables, gross	17,864		17,864
Provision to reserves for doubtful receivables	-257	-9	-266
Trade receivables	17,607	-9	17,598
Total assets	17,607	-9	17,598
Equity			
Reserves	3,154	0	3,154
Retained earnings	36,785	-7	36,778
Total equity	39,939	-7	39,932
Liabilities			
Deferred tax liabilities	7,090	-2	7,088
Total liabilities	7,090	-2	7,088

The table below shows the changes in measurement due to the change in measurement class.

Changed classification upon the transition to IFRS 9

	Measurement category IFRS 9	
	Amortized cost	Fair value through com- prehensive income
Measurement category IAS 39		
<i>Financial receivables and liabilities</i>		
Trade receivables	17,607	17,598
<i>Available-for-sale financial assets</i>		
Equity instruments	87	87

The table below shows changes in equity due to reclassification upon the transition to IFRS 9 and the introduction of the expected credit loss model.

	Provision for available-for- sale assets	Provision for fair value through com- prehensive income	Retained earnings
Effects in equity			
Closing balance 2017 in acc. with IAS 39	6	0	36,785
Reclassification from Available-for-sale financial assets to Fair value through comprehensive income	-6	6	
Increased provisions for trade receivables			-7
Opening balance 2018 in acc. with IFRS 9	0	6	36,778

IFRS 15

Essity applies IFRS 15 prospectively from January 1, 2018. Comparative information for 2017 and 2016 has not been restated and instead 2017 and 2016 are recognized according to the previous rules, mainly IAS 18, which IFRS 15 replaced (refer to the New and amended accounting standards section under A1 General accounting principles and new accounting rules on page 63). A review of the Group's reporting of revenue from contracts with customers under new IFRS 15 criteria did not result in any changes to Essity's reporting in either the income statement or balance sheet. IFRS 15 contains more disclosure requirements than IAS 18, which are presented in a new Note B1 Net sales – Revenue from contracts with customers on page 70, where Essity's accounting principles for revenue recognition are also outlined. Application of IAS 18 in 2018 would not have resulted in any change in outcomes in either the income statement or balance sheet.

PC. PARENT COMPANY NOTES

PC1. OPERATING PROFIT/LOSS

Operating profit/loss by type of cost

SEKm	Note	2018	2017
Other operating income		192	367
Other external costs		-396	-597
Personnel and Board costs		-340	-334
Amortization of capitalized development costs	PC4	0	0
Depreciation of tangible fixed assets	PC5	-2	-2
IS Total		-546	-566

The item "Other external costs" includes primarily consultancy fees, travel expenses, lease expenses and management costs.

AUDITING EXPENSES

Remuneration to auditors can be specified as follows:

SEKm	2018	2017
EY		
Audit assignments	-13	-12
Auditing activities other than the audit assignment	0	-1
Tax consultancy services	0	-
Other assignments	-2	-
Total	-15	-13

Leasing

AP ACCOUNTING PRINCIPLES

The company recognizes all leases as operating leases.

Future payment commitments for non-cancellable operating leases are as follows:

SEKm	2018	2017
Within 1 year	24	24
Between 2 and 5 years	7	29
Later than 5 years	-	-
Total	31	53

Cost for the period for leasing of assets amounted to SEK -25m (-25). Leased assets comprise means of transportation and office premises.

PC2. PERSONNEL AND BOARD COSTS

Salaries and remuneration

SEKm	2018	2017
Board of Directors ¹⁾ , President, Executive Vice President and senior executives (4 (5))	-67	-67
of which variable remuneration	-22	-28
Other employees	-118	-134
Total	-185	-201

¹⁾ Board fees decided by the Annual General Meeting amounted to SEK -9m (-9). For further information, see Notes C1-C4 on page 80.

Social security costs

SEKm	2018	2017
Total social security costs	-147	-124
of which pension costs ²⁾	-89	-61

²⁾ Of the Parent Company's pension costs, SEK -14m (-16) pertains to the Board, President, Executive Vice President and senior executives. Former Presidents and Executive Vice Presidents and their survivors are also included. The company's outstanding pension obligations to these individuals amount to SEK 46m (51).

Pension costs

SEKm	2018	2017
Self-administered pension plans		
Costs excluding interest expense	-38	-49
Interest expense (recognized in personnel costs)	-5	-6
Sub-total	-43	-55
Retirement through insurance		
Insurance premiums	-31	-18

Sub-total	-70	-41
Policyholder tax	0	0
Special payroll tax on pension costs	-16	-17
Cost of credit insurance, etc.	-3	-3
Pension costs for the period	-89	-61

Premiums during the year for disability and family pension insurance with Alecta amounted to SEK -2m (-2). Premiums for 2019 are expected to amount to SEK 2m (see also Provisions for pensions in this note). Personnel costs also include other personnel costs in the amount of SEK -8m (-8).

Average number of employees

	2018	2017
Sweden	110	116
of whom women, %	49	49

Breakdown of employees by age groups, %

2018	21-30 years	31-40 years	41-50 years	51-60 years	61+ years
	1	22	40	28	9

Women comprised 50% (46) of Board members and 25% (36) of senior executives.

PC2. PERSONNEL AND BOARD COSTS, CONT.

Provisions for pensions

AP ACCOUNTING PRINCIPLES

The Parent Company applies the regulations in the Pension Obligations Vesting Act (Tryggandelagen). Recognition complies with the simplification rule for defined benefit pension plans in accordance with the voluntary exception in RFR 2 regarding IAS 19. The main difference compared with IAS 19 is that Swedish GAAP disregards future increases in salaries and pensions when calculating the present value of the pension obligation. This present value includes, however, a special reserve for future payments of pension supplements indexed for inflation. Both defined contribution and defined benefit plans exist in the Parent Company.

PRI Pensions

Pension liabilities pertaining to PRI pensions have been secured through a common Swedish Essity pension fund. The market value of the Parent Company's portion of the foundation's assets at December 31, 2018 amounted to SEK 191m (151). In 2018, compensation was received in the amount of SEK 6m (-). The capital value of the pension obligations at December 31, 2018 amounted to SEK 159m (134). Pension payments of SEK -5m (-6) were made in 2018. In 2018, the assets exceeded pension obligations by SEK 32m (17).

Other pension obligations

The Group's Note C3 Remuneration of senior executives on page 80 describes the other defined benefit pension plans of the Parent Company. The table below shows the change between the years.

Capital value of pension obligations relating to self-administered pension plans		
SEKm	2018	2017
Value, January 1	878	839
Compensation received for assumed pension obligations	-	21
Costs excluding interest expense	38	49
Interest expense (recognized in personnel costs)	5	6
Payment of pensions	-48	-37
BS Value, December 31	873	878

External actuaries have carried out capital value calculations pursuant to the provisions of the Swedish Act on Safeguarding of Pension Obligations. The discount rate is 0.6% (0.7). The defined benefit obligations are calculated based on salary levels valid on the respective balance sheet dates. All of the company's pension obligations were transferred from Svenska Cellulosa Aktiebolaget SCA on December 31, 2016. The pension obligations were formerly transferred when the County Administrative Board granted its approval in 2017. Next year's expected payments for the above defined benefit pension plans amount to SEK 52m. Part of the pension obligations are covered by capital redemption policies. The capital redemption policies are reported as other non-current receivables in the balance sheet.

PC3. INCOME TAXES

AP ACCOUNTING PRINCIPLES

Due to the links between accounting and taxation, the deferred tax liability on untaxed reserves is recognized in the company's annual accounts as a component of untaxed reserves.

Tax expense

Tax expense (+), tax income (-)		
SEKm	2018	2017
Deferred tax	940	-816
Current tax	-	-
IS Total	940	-816

Explanation of tax expense

The difference between the recognized tax expense and expected tax expense is explained below. The expected tax expense is calculated based on profit before tax multiplied by the current tax rate.

Reconciliation	2018		2017	
	SEKm	%	SEKm	%
IS Profit before tax	17,102		1,680	
IS Tax expense/income	940	5.5	-816	-48.5
Expected tax	3,763	22.0	370	22.0
Difference	-2,823	-16.5	-1,186	-70.5
The difference is due to:				
Taxes related to prior periods	0	0.0	-16	-0.9
Non-taxable dividends from subsidiaries	-3,576	-20.9	-934	-55.6
Non-taxable Group contributions from subsidiaries ¹⁾	-	-	-529	-31.5
Non-deductible Group contributions to subsidiaries ¹⁾	713	4.2	13	0.8
Other non-taxable/non-deductible items	30	0.2	280	16.7
Changed tax rate	10	0.0	-	-
Total	-2,823	-16.5	-1,186	-70.5

¹⁾ Non-taxable and non-deductible Group contributions relate to repayment from/to the respective subsidiary, which amounts to 78% of the Group contribution.

The Parent Company participates in the Group's tax pooling arrangement and up until 2017, paid the majority of the Group's total Swedish taxes. These were recognized in profit or loss as Group contributions paid and received. The net of paid and received Group contributions per subsidiary amounts to 22% and is the respective subsidiary's share of the tax cost for the Group. As of 2018, another Swedish subsidiary is used to pay the majority of the Group's total Swedish taxes.

Current tax liability (+), tax asset (-)

SEKm	2018	2017

Financial instruments by category

AP ACCOUNTING PRINCIPLES

The categories of financial instruments in 2018 classified according to IFRS 9 that exist in the Parent Company comprise financial assets and liabilities measured at fair value through profit or loss and amortized cost. In 2017, the Parent Company classified its financial instruments in the categories loans and trade receivables and financial liabilities measured at amortized cost, except for derivatives, which were measured at fair value through profit or loss. The transition to IFRS 9 did not entail any changes in valuations. All of the Parent Company's financial assets and liabilities measured at fair value through profit or loss are assessed according to measurement level 2. For a definition, refer to Note E1 on page 89. Financial assets measured at amortized cost are continuously reviewed to assess the need for credit loss provisions. If there is a material need for credit loss provisions, a provision is made in accordance with the expected credit loss model.

PC9. FINANCIAL INSTRUMENTS, CONT.**Financial instruments by category**

Total		213	184

PC13. ADOPTION OF THE ANNUAL ACCOUNTS

The annual accounts are subject to adoption by Essity Aktiebolag's Annual General Meeting and will be presented for approval at the Annual General Meeting on April 4, 2019.

PC14. EVENTS AFTER THE BALANCE SHEET DATE

No significant events occurred after the balance sheet date that impacted the financial statements.

H. NOTES TO NON-FINANCIAL INFORMATION

H1. GENERAL ACCOUNTING PRINCIPLES

Reporting principles

The environmental and social data reported pertains to the 2018 calendar year. The figures included comply with relevant reporting and consolidation principles in the financial statements. The figures cover the Essity Group's wholly owned subsidiaries and subsidiaries in which Essity owns at least 50%. If ownership in the subsidiary is at least 50% or more, the entire company is included in the reporting. Essity uses the global Greenhouse Gas Protocol standard for measuring, and calculating carbon data.

Subsidiaries with significant non-controlling interests (see Note F2), such as the Chinese company Vinda and the Colombian company Familia, social data, such as employee figures, employee turnover and health and safety data is reported in notes H14 and H15. Some other social data is not included, for example Note H13 Code of Conduct data as subsidiaries with significant non-controlling interests have their own Codes of Conduct. Vinda publishes an Environmental, Social and Governance (ESG) report, which is available at www.vinda.com. Familia reports in accordance with the GRI Reporting Standards. For more information, visit www.grupofamilia.com.co.

Newly acquired businesses are included in the reporting as soon as possible, though not later than when they have been part of the Group for one calendar year. The historic environmental and social data of newly acquired companies are included to the greatest possible extent in order to increase comparability. The data from divested companies is excluded in its entirety as of the divestment date. Historic data for discontinued units is retained.

A main site is a production facility that is wholly owned by Essity and that has 100 or more employees.

Data collection

Data provided in the report is compiled through various systems, primarily the Group's financial consolidation system, Resource Management System (RMS) and Essity's system for collection of social data.

Environmental data

The RMS encompasses more than 76 production sites, covering virtually the entire company's environmental impact and resource utilization from production. Data from stand-alone tissue converting sites is included in the main mother reel supplying site.

Each unit reports the following data to the system:

- raw material consumption
- incoming and outgoing shipments
- production volumes
- energy consumption broken down by hydro-electric power, co-generation and power from the grid
- fuel consumption broken down by biofuels, fossil fuels and electric boilers
- air emissions, including data on fossil and biogenic carbon dioxide
- water emissions
- solid waste

The data is reported both internally and externally at the mill level and for the Group as a whole. The values calculated are carbon dioxide (CO₂), methane (CH₄) and nitrous oxide (N₂O). Conversion factors used:

- Emissions of greenhouse gases from incineration are calculated using emission factors for the fuel's thermal value. Source: IPCC Guidelines 2006.
- Emissions of greenhouse gases from purchased electricity are calculated using the country's emission factor published by the International Energy Agency (IEA), 2016.

Social data

Data is provided from different internal systems and tools depending on the nature of the data. HR data resides in Essity's HR system and other qualitative data is collected in Essity's database for social data.

Comparability

This is Essity's second integrated Annual and Sustainability Report. The previous year's report is from February 21, 2018. Historical information is also obtained from previous publications of SCA's Sustainability Reports. This information is adjusted to make Essity's figures comparable. This applies for example to most of the GRI indicators and data encompassed by Essity's sustainability targets, such as information on CO₂ and health and safety. Figures from previous years are reported in parenthesis.

The results of the Group's CO₂ target and water target are adjusted each year in relation to production levels. Other environmental data is reported in absolute figures.

GRI reporting

Essity reports sustainability information in accordance with the Global Reporting Initiatives (GRI) guidelines for GRI Reporting Standards: Core. The Report has been structured in accordance with GRI principles, meaning that the content is determined by the issues that are most material to Essity and its stakeholders, and that the content provides a complete overview of the operations. Essity's 21 subject areas in the materiality analysis are matched against GRI indicators, and they form the selection of the indicators that Essity presents in this report. Essity reports in accordance with all GRI indicators and on a level identified as material. In addition, Essity reports a number of general indicators according to the GRI Standards: Comprehensive option as this clarifies the information in the report. Any omissions or incomplete data are commented on directly in the GRI index. The entire report has been reviewed by EY. The report is aimed at specialist audiences with an interest in sustainability performance, including analysts, investors and NGOs. Additional information about Essity's work on environmental and social issues is available at www.essity.com.

The UN Guiding principles

Essity uses the reporting framework for the United Nations Guiding Principles on Business and Human Rights (UNGPs) and has reported on the overarching aspects contained in the framework.

H2. CUSTOMERS AND CONSUMERS

Essity conducts systematic customer and consumer follow-up. This includes external reports, independent surveys and global systems for feedback. Complaints have remained at a stable and low level in recent years. For Personal Care products, the complaint frequency is lower than 1 in a million supplied products. In the Tissue operations, the corresponding figure is 2.6 per thousand tons.

Customer surveys

Customer feedback enables Essity to offer better products and services. Every business unit has methods to investigate customer satisfaction.

Essity also offers expertise and support for the development of operations in, for example, nursing homes and professional environments, where the company can help make a difference and create value for its customers and users. Essity places high value on opportunities for direct customer contact.

The retail trade accounts for a significant part of Essity's net sales. The company uses external comparison reports in which the largest retail chains assess their suppliers based on customer service, logistics, sales support, marketing and product development. Consumers who purchase retail products are followed up through general brand and product recognition surveys.

H3. INNOVATION

Essity has a Group target to provide social and/or environmental improvements on innovations launched. The target is for at least one-third of all innovations to achieve these criteria each year. 59% (42, 41) of Essity's innovations yielded social and/or environmental improvements. This refers to the percentage of sales of innovations measured over 36 months. In 2018, 29 innovations were launched.

People and nature innovations

Innovations that improve social and environmental performance also make financial sense. For Essity, these innovations have added value and are based on an in-depth understanding of customers and consumers.

¹⁾ 2012-2016

²⁾ 2011-2017

The life cycle assessments performed by Essity were verified by the Swedish Environmental Research Institute (IVL) in 2017. The table is updated every second year.

H4. HYGIENE SOLUTIONS

Essity's aim is to convey knowledge about hygiene to customers and consumers. In 2018, Essity educated around 2.5 million people in health and hygiene. Most, 66%, were children and teenagers who were educated in good hand hygiene and young girls about menstruation. Other target groups for this training were caregivers, doctors, staff at residential care facilities, parents and the immediate family to pensioners. Areas covered by the training sessions included hand hygiene, puberty and menstruation, incontinence, wound care and parental education.

H5. COMMUNITY RELATIONS

Essity strives to be a dedicated partner in the local communities in which it operates.

In 2018, Essity invested approximately SEK 18m in over 300 projects. Most of the projects were related to hygiene and health.

Essity's community relations instruction states that Essity shall be politically and religiously neutral. The company must not make payments or product donations to political parties or candidates, or their institutions, agencies or representatives, or religious institutions/organizations or their representatives. Essity did not support any organizations or projects with political or religious aims in 2018.

Community relations by focus area 2018

H6. FIBER SOURCING

In 2018, Essity updated its global fresh fiber sourcing policy and thereby reinforced its commitment to sustainable forestry operations, forest certification and traceability for fiber content. The new policy is available at www.essity.com.

Essity is a global purchaser of both fresh fiber and recovered fiber and has communicated its clear commitment that all fresh wood based fiber raw material will originate from responsibly managed forests. Essity's target for fresh wood based fiber sourcing is to continuously increase the share of certified fiber in its products and packaging, with a preference for FSC® certification, until all of the fiber is certified. All fiber that is not yet certified must fulfill the FSC Controlled Wood standard to be eligible for purchasing. Goal fulfillment for certified fiber in 2018 was 76%. The remainder fulfilled FSC's Controlled Wood standard.

Most of Essity's wholly owned manufacturing units are now certified in line with FSC and/or PEFC Chain of Custody standards.

Essity's fiber use

Renewable raw materials (fresh fiber and recycled fiber) account for the largest share of the total volume of material in tissue products and are an important material in Personal Care products. Synthetic materials are used in Personal Care products to meet the user's function and quality requirements.

In 2018, Essity sourced 2.9 million tons of fresh fiber and 2.1 million tons of recovered fiber. Fresh fiber mainly comprises pulp, 97.4%, and the remainder comprises packaging, externally sourced mother reels and products manufactured by third parties. Of the 2.1 million tons of recovered fiber sourced, 91% is used in tissue manufacturing. The remainder consists of recovered fiber, which is found in sourced packaging material and sourced mother reels.

Recovered fiber

The proportion of recovered fiber in Essity's products varies between regions due to differences in quality, user preferences and fiber supply and demand. The North American operations use 97% recovered fiber, while the proportion of recovered fiber in Latin America is 77% and in Europe 38%.

Results of audit of pulp suppliers

The eleven largest of Essity's pulp suppliers to wholly owned companies represent 80% the volume sourced. Essity audits all of its pulp suppliers to verify compliance with Essity's sourcing policy for fiber. In addition to this, all suppliers must sign Essity's Global Supplier Standard. Pulp suppliers are also assessed through the use of detailed questionnaires to verify that they fulfill the requirements of chain of custody certification and ecolabeling. All pulp suppliers in 2018 showed that they comply with the standards and requirements made on them by Essity.

During 2018, Essity's personnel visited ten supplier facilities to assess compliance with the company's requirements. In addition to these pulp supplier audits, Essity has provided support to several other suppliers where wood fiber may be part of the raw material. The purpose of this was to help them achieve FSC chain of custody certification.

Pulp consumption 2018

Recovered paper consumption 2018

Essity's fresh fiber use 2018

H7. ENERGY AND EMISSIONS TO AIR/ SCIENCE-BASED TARGETS

Essity's Group target is to reduce CO₂ emissions, in relation to the production level, from fossil fuels and from purchased electricity and heating by 20% by 2020, with 2005 as reference year. CO₂ emissions declined at year-end 2018 by 18.8% compared with the reference year of 2005.

Energy utilization

Energy use calculations include purchased energy (heating, electricity and fuel) and use of biomass and electricity generated on site. Energy efficiency, new technology and the greater use of renewable energy are required to achieve Essity's stated targets.

ESAVE

In 2010, Essity adopted a target for ESAVE: to reduce energy consumption per ton of product produced by 14% by 2020. During 2018, energy consumption rose 1.4% (-0.4), the first increase in ten years. The accumulated energy savings in the 2010-2018 period amounted to 8.0%.

The EU Emissions Trading Scheme (EU ETS)

Essity had 24 mills and plants included under the EU ETS in 2018. Essity's operations have a deficit of emission allowances during the third phase of EU ETS (2013-2020). The deficit involves an average of approximately 0.2 million tons of carbon dioxide equivalents per year during the period. The average market price for emission rights in 2018 was about EUR 15.9 per ton and Essity purchased 240,000 emission rights.

Emissions

Essity's climate-affecting emissions are divided into three different scopes depending on origin. Scope 1 and 2 are directly linked till Essity's production facilities and are dependent on production volumes. This also includes direct emissions from fuel consumption and indirect emissions from the use of purchased energy. Scope 3 reports indirect emissions in Essity's value chain.

Scope 1 consists of emissions from burning of fuels at Essity's production facilities. The reported data is based on energy use with associated emission factors.

Scope 2 consists of emissions from purchased energy and is primarily linked to the use of electricity and also purchased thermal energy in the form of steam. The calculation of emission data uses country and region-specific emission factors.

Scope 3 emissions derive from, for example, energy use that is not owned or controlled by Essity. The emission categories included are from the production of purchased raw materials, incoming and outgoing transportation, and the handling of production waste and waste from used products. In 2019, Essity will further develop the working methods for monitoring and reporting Scope 3 based on established methods.

Other air emissions from use of fuel in production facilities include nitrogen oxides and sulphur oxides (NO_x and SO_x). These are reported in Essity's environmental reporting system.

Science-Based Targets

In addition to the aforementioned Group target, Essity's new targets to reduce greenhouse gases emissions have been approved by the Science Based Targets initiative. In terms of energy consumption within the company and purchased electricity (Scope 1 and 2), Essity has undertaken to reduce greenhouse gas emission by 25% by 2030 compared with 2016. The outcome for 2018 was 5.0% for Scope 1 and 2.

Essity has, moreover, undertaken to reduce greenhouse gas emissions from the most important purchased raw materials, transport, waste arising from operations and handling at the end of the life cycle for sold products (Scope 3) by 18% by 2030 compared with 2016. The outcome for Scope 3 will be reported as of 2019.

Electricity consumption 2018

Distribution of fuel consumption 2018

All biofuels are renewable, the others are fossil-based (non-renewable)

H8. WATER

Essity's Group target for water is that the company's tissue operations will reduce the level of suspended solids, the volume of water used and organic content (BOD) by 10% by 2020, with 2014 as reference year.

In 2018, levels of suspended solids decreased by 18.5%, volumes of effluent water by 2.9% and the amount of organic content (BOD) by 25.0%.

Usage and discharge of water

Most of Essity's water is used to transport fibers during production processes and the remainder is mainly used as cooling water. 75% of the water used is drawn from surface sources. Essity's reporting of water usage states totals for surface water, groundwater and municipal water systems. Essity's effluent water is divided into cooling water and process water. Cooling water has simply been heated and is not contaminated in any way. The total volume of discharged water was 93 million cubic meters. The water is treated using mechanical and biological treatment systems. The figures for 2018 refer to process water emissions.

The emissions to water stated in the tables comprise COD, BOD, suspended solids, AOX, P and N. Methods of measuring differ in some respects.

In 2018, the Group used 100 million cubic meters of water in pulp and paper production.

Seven of Essity's wholly owned production facilities are located in so-called water-stressed areas. The sites accounted for 6% of Essity's total water consumption in 2018, distributed between 40% from surface sources, 28% from groundwater and the remainder from recycled water and municipal water systems.

Water extraction 2018

H9. WASTE

Essity's target for production waste is that all waste from all production units will be subject to material and energy recovery by 2030. In 2018, Essity's production waste amounted to a total of 1.65 million tons. In Essity's production process, particularly when recovered fiber is used as input goods, waste is generated in the form of ash, sludge, organic waste and plastic. The production sites work to reduce waste and to find alternative solutions for their waste. In 2018, a significant part (1 million tons) was recovered as raw materials for other industries, such as the construction industry, or as an energy source. The remainder was sent to landfill.

The solid waste reported by Essity is waste that is sent to landfill and recycled waste. Recycled waste refers to materials that can be used as raw materials in other industries, such as the cement, brick-making and construction industries. This includes waste generated in the production process. Some of the waste can be composted or used for energy extraction. By reducing the amount of production waste sent to landfill and instead recycling the waste or extracting energy from it, greenhouse gas emissions can be reduced, thereby helping Essity to achieve its Science-Based Targets.

A very small proportion (0.2% or 3,200 tons) is hazardous waste, which is primarily waste oil, but also includes organic solvents, batteries and strip lights.

Waste

H10. TRANSPORT

Raw materials are transported to Essity's production plants and finished products are delivered to Essity's customers. Essity uses external suppliers for most of its transportation needs. Essity's total transportation amounted to 14 (13, 13) billion ton-kilometers. Sea freight accounts for the greatest portion of Essity's transport and the remainder consists of road and rail. The Group's total carbon emissions from transport in 2018 amounted to 480,000 (457,000, 517,000) tons.

Emissions from transportation is included in Essity's report of Scope 3 objectives in Science-Based Targets. Emission data for 2016 and 2017 was updated to bring it into line with the guidelines for Science-Based Targets.

Distribution of transport usage 2018

H11. SUPPLY CHAIN MANAGEMENT

Essity's target for responsible sourcing is that all of our sourcing is to be from suppliers that share the company's values, as defined in Essity's Global Supplier Standard. This is to ensure responsible business methods and respect for human rights. By 2020, the aim is to source 100% of Essity's procurement spend from suppliers that undertake to commit to the criteria specified in the Global Supplier Standard. In 2018, 71% (64) of the procurement spend was sourced from suppliers who fulfill this criteria.

Essity has an established process to perform continuous risk assessments of the company's suppliers and sourcing categories. The aim is to secure deliveries and minimize risks linked to the company's sourcing. Certain materials, such as cotton and wood fiber, are considered to have higher risk lower down in the value chain. Essity takes specific measures here, such as audits of subcontractors, or chooses certified raw materials that guarantee more sustainable extraction and production. In 2018, Essity has continued to implement sustainable sourcing linked to the Medical Solutions product category (previously BSN medical, which was acquired in 2017) by introducing the same working methods as used by other suppliers.

Ethical audit results

During 2018, Essity evaluated the outcome from 59 ethical supplier audits, of which 30 were carried out by SGS on Essity's behalf in China, Romania, Russia, Brazil, Spain, India, Israel and Mexico. In addition, 29 ethical audits performed on behalf of other customers of the suppliers were approved by Essity.

Essity is informed within 24 hours in cases of critical observations. To date, this type of action has been necessitated due to rare cases of excessive overtime, overtime not being paid at a premium, or no evidence of fire drills being conducted in the last 12 months. No agreements with strategic suppliers were terminated on the grounds of sustainability-related non-compliance in 2018.

Risk exposure in Essity's supplier base

Approximately 81.1% of Essity's supplier base is located in Europe, 18.4% in North and South America and 0.5% in Asia/Middle East. Many of the strategic suppliers' production facilities located in Asia and Latin America belong to large multinational corporations based in Europe and the US. This is a conscious choice by Essity and reduces the social and ethical risks within the supply chain.

Global and regional strategic suppliers of raw materials and merchandise represent about 76% (61) of Essity's procurement spend. 21% (22) of suppliers' manufacturing units are located in high-risk countries according to the Maplecroft Human Rights Index. These suppliers are in scope for ethical audits with a focus on health and safety, human rights, employment conditions and corruption. Essity has various tools to assess the need for an ethical audit, such as a low rating in Sedex, a low health and safety score in Essity's supplier qualification audit or warning signals in conjunction with Essity's regular risk assessments. Sedex is an online database that enables suppliers to share information with their customers on their status in areas such as labor conditions, health and safety and business ethics. At the end of 2018, Essity had a total of 694 (481) supplier plants that share this type of data via Sedex.

H12. CERTIFICATIONS

Reliable management systems, which are certified by a third party, play an important role in Essity's corporate responsibility. Essity uses the certified environmental management system ISO 14001 and EMAS (the EU's Eco Management and Audit Scheme). A large number of production units are certified in accordance with ISO or/and EMAS. ISO 9001 is the most important quality management system used by Essity. Essity implements the international standard OHSAS 18001 (Occupational Health and Safety Assessment Series) to ensure the use of uniform processes throughout the Group and that Essity's units continuously improve workplace-related health and safety. OHSAS specifies requirements regarding the organization's occupational health and safety management systems.

Certified volumes, Essity's main sites¹⁾

		Consumer Tissue and Professional Hygiene			Personal Care		
		2018	2017	2016	2018	2017	2016
ISO 9001	%	73	73	77	97	97	96
ISO 14001	%	80	85	86	86	85	85

¹⁾ A main site is a production facility that is wholly owned by Essity and that has 100 or more employees.

H13. CODE OF CONDUCT AND WORK WITH ANTI-CORRUPTION

Essity's target is for all employees to receive regular training in the Code. During 2018, 90% of all new employees had received training in Essity's Code of Conduct.

Essity has an anti-corruption e-learning course, translated into 21 languages, which is included in onboarding programs. Essity also trains employees using e-learning courses on EU competition law and US antitrust legislation.

Risk analysis

Essity's human rights and corruption risk analysis is based on assessments carried out by Amnesty, Transparency International and Sedex. Approximately 30% of Essity's revenue is generated in countries with a high risk of human rights violations. About 31% comes from countries with a relatively high risk of corruption. In the 2018 Sedex assessment, all of Essity's main facilities received a low to medium risk classification.

Reported breaches

In 2018, 81 (63, 71) cases of potential breaches of laws or of the Code of Conduct were reported to Essity's whistleblower function. Of the 81 reported complaints, 24 were still subject to investigation at year-end. Among the reported complaints, three related to the suspicion of corruption. All of the three investigations were closed during the year without any corruption being identified and no one was dismissed on suspicion of corruption. Other reported complaints included 58 HR-related incidents and concerned accusations of discrimination and harassment and the remaining 20 cases concerned potential violations of the company's other policies.

Internal audits conducted of the Code of Conduct

In 2018, Code of Conduct audits were conducted at two sites in Colombia and South Africa. Both are acquired units from BSN medical and a number of areas for improvement were identified to raise levels to normal Essity standard, in areas including working environment, health and safety. In addition, there was little or no knowledge of BSN medicals' or Essity's Code of Conduct among employees. An action program is in place and has been implemented or will be implemented in 2019.

Internal audits conducted of business ethics

In 2018, business ethics audits were conducted in the US, Mexico, the UK and Indonesia and of exports to Kazakhstan and countries in the Middle East. The audits in the US, Mexico and Indonesia related to the acquisition of BSN medical units in 2017. These have a number of areas for improvement to reach Essity's standard. For example, staff require further training in the Code of Conduct and other policy documents, performance reviews need to be introduced and encryption of e-mails is necessary. The audit in the UK resulted in few and minor improvement measures. The unit for export sales was generally considered to follow Essity's guidelines but implemented internal training in the Code of Conduct and other policy documents needs to be better documented. Action plans are in place and have been carried out or will be carried out 2019.

Ongoing anti-trust cases

In May 2018, the Andean Community imposed fines of approximately USD 18m on Productos Familias S.A.'s operations in Ecuador and Colombia. The company has appealed the decision. In the same year, the Hungarian competition authority withdrew its investigation into the company. In early 2019, the Supreme Court in Spain rejected the company's appeal against the Spanish competition authority's decision to impose a fine from May 2016.

H14. EMPLOYEES

In 2018, Essity comprised on average 47,222 (46,385, 42,149) employees in some 50 countries, of whom 34% (34, 32) are women. The employee turnover rate is 15% (14, 13). The majority of Essity's employees are permanent/full-time employees and a minor share, about 5%, are temporary/part-time employees.

Individual development and salary statistics

In 2018, 88% (92, 90) of white-collar employees participated in performance management reviews. The corresponding number for blue-collar employees is 78% (80, 85).

Essity strives to provide salaries aligned with market terms, based on the executive's position and local labor market. Unjustified salary differences should not exist. In three of the countries, France, Germany and Sweden, where Essity has most employees in wholly owned operations, salary analyses are conducted annually that include comparisons between men's and women's salaries. In France, salaries for women on managerial levels range between 96% and 106% of their male counterparts, depending on the position held. For women on non-managerial levels, the corresponding figures were between 101% and 105%. In Germany, salaries for women on managerial levels range between 85% and 88% of their male counterparts, depending on the position held. For women on non-managerial levels, the corresponding figures were between 97% and 129%. In Sweden, salaries for women on managerial levels range between 88% and 96% of their male counterparts, depending on the position held. For women on non-managerial levels, the corresponding figures were between 97% and 102%. Essity continuously endeavors to narrow unjustified pay gaps and differences in other employment conditions.

Training

One prioritized area is to develop the potential of all employees and Essity's strategy is that most of this development should take place in daily work. Essity offers a global leadership platform, and approximately 700 managers took part in 2018. 290 people participated in the mandatory one-day onboarding program for all newly appointed managers. 240 participated in Core 1, a six-day program to develop managers who have been in their role for six to 12 months with a focus on leadership skills. Core 2 is conducted for more experienced managers, which is a leadership program to develop people's capabilities to lead in a complex environment, engage people and manage change. Creating Value is another course to further strengthen participants' capabilities in strategic leadership areas. In 2018, a total of 70 people took part in this program. During 2018, great emphasis was put on managing change and more than 100 managers took part in training about change management.

Other programs include the Hygiene Academy, which offers training in brand activities, digital marketing and innovation. 490 people in total took part in these programs. Essity has also established a training program in sustainability with the aim of improving understanding of sustainability's impact on products and services, customers and consumers.

The average number of training hours per employee was 15.

Diversity

In 2018, the proportion of women among Essity's top management was 25% (36, 33). Among senior management, the proportion of women was 26% (27, 25) and 27% (23, 27) among senior/middle management.

Senior management comprised 17 (18, 21) different nationalities and the corresponding figure was 39 (36, 32) for senior/middle management. Encouraging greater diversity is part of Essity's leadership platform and succession planning.

Leveraging a strong winning culture

Essity regularly carries out employee surveys. Employees are the company's main asset and an employee survey was held in 2018 that covered 31 statements at five levels. The statements were updated to reflect Essity's focus on hygiene and health and the company's new Beliefs & Behaviors. To achieve greater efficiency, the survey was carried out digitally for the first time. The results are expressed as indexes for Care, Committed, Courage, Collaboration and Engagement, as well as an overall Essity index. The response rate var 80% (88% in 2015). Essity's index var 75 (72 in 2015) on a scale of 1-100. Based on the outcome of the employee survey, all teams will develop and implement action plans to further strengthen Essity and make the company an even better place to work.

H14. EMPLOYEES, CONT.

Essity's employee index

Employee relations

Union involvement varies among Essity's countries of operation, but on average 63% (61, 54) of Essity's employees are covered by collective agreements.

There are health and safety committees on which representatives of about 82% (86) of employees serve.

The notice period in connection with organizational changes in the Group varies, but averages about five weeks.

WASH pledge

As a hygiene and health company, Essity wants its employees to enjoy first-class standards when it comes to workplace hygiene. Essity reported its WASH (Water, Sanitation and Hygiene) Pledge for the first time in 2016. The pledge is an initiative linked to the World Business Council for Sustainable Development (WBCSD). By signing the pledge, Essity undertakes to comply with a prescribed workplace WASH standard for its wholly owned units within three years. This includes areas such as workplace sanitation and health issues, as well as training to improve employees' awareness.

H15. HEALTH AND SAFETY

Essity's Group target is to decrease the accident frequency rate by 50% in the 2014–2020 period. In 2018, the accident frequency rate declined by 1% year-on-year to 3.8 (3.8, 4.1) and 39% compared with the base year of 2014.

In 2018, Essity developed a tool to measure and assess physical, mental and social health. The tool compiles local reactive, proactive and preventive efforts and provides feedback with practical improvement proposals. The tool will be launched worldwide in 2019.

Group-wide key performance indicators (KPIs)

In recent years, Essity has worked intensively to systematize and improve its safety work. Essity uses the following Group-wide KPIs:

- Number of Lost Time Accidents (LTA): accidents that result in an employee missing the next regularly scheduled work day or shift.
- Days Lost due to Accidents (DLA): number of work-days lost due to an LTA.
- Accident Severity Rate (ASR): The DLA / LTA.
- Accident Frequency Rate (FR): LTA / 1,000,000 hours worked.
- Incidence Rate (IR): LTA / 200,000 hours worked.

Health and Safety, key figures¹⁾

	2018	2017	2016	2015
Average headcount	27,900	27,100	24,900	24,200

PC16. AUDITOR'S REPORT

To the general meeting of the shareholders of Essity AB, corporate identity number 556325-5511

REPORT ON THE ANNUAL ACCOUNTS AND CONSOLIDATED ACCOUNTS

Opinions

We have audited the annual accounts and consolidated accounts of Essity AB (publ) except for pages 39–55 and 114–121 for the year 2018. The annual accounts and consolidated accounts of the company are included on pages 6–8 and 20–122 in this document.

In our opinion, the annual accounts have been prepared in accordance with the Annual Accounts Act and present fairly, in all material respects, the financial position of the parent company as of 31 December 2018 and its financial performance and cash flow for the year then ended in accordance with the Annual Accounts Act. The consolidated accounts have been prepared in accordance with the Annual Accounts Act and present fairly, in all material respects, the financial position of the group as of 31 December 2018 and their financial performance and cash flow for the year then ended in accordance with International Financial Reporting Standards (IFRS), as adopted by the EU, and the Annual Accounts Act. Our opinions do not cover pages 39–55 and 114–121. The statutory administration report is consistent with the other parts of the annual accounts and consolidated accounts.

We therefore recommend that the general meeting of shareholders adopts the income statement and balance sheet for the parent company and the group.

Our opinions in this report on the annual accounts and consolidated accounts are consistent with the content of the additional report that has

been submitted to the parent company's audit committee in accordance with the Audit Regulation (537/2014) Article 11.

Basis for Opinions

We conducted our audit in accordance with International Standards on Auditing (ISA) and generally accepted auditing standards in Sweden. Our responsibilities under those standards are further described in the Auditor's Responsibilities section. We are independent of the parent company and the group in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements. This includes that, based on the best of our knowledge and belief, no prohibited services referred to in the Audit Regulation (537/2014) Article 5.1 have been provided to the audited company or, where applicable, its parent company or its controlled companies within the EU.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

Key Audit Matters

Key audit matters of the audit are those matters that, in our professional judgment, were of most significance in our audit of the annual accounts and consolidated accounts of the current period. These matters were addressed in the context of our audit of, and in forming our opinion thereon, the annual accounts and consolidated accounts as a whole, but we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

VALUATION OF GOODWILL AND OTHER INTANGIBLES ASSETS (TRADEMARKS)

Description	How our audit addressed this key audit matter
<p>The value of goodwill and other intangibles (trademarks) with an indefinite useful life as of 31 December 2018 amounted to 46,5 billion SEK. An impairment test is a complex process and contains a high degree of judgment regarding future cash flows and other assumptions. The Company performs annual impairment tests as well as when impairment indicators have been identified. The recoverable amount for each cash-generating unit is determined as the value in use, which is calculated based on the discontinued present value of future cash flows. Key assumptions in these calculations are future growth rate, gross profit and applied discount rate and are presented in Note D1 ("Intangible assets") The process is by nature based on assumptions and judgment, not least because it is based on estimates of how the company's business will be effected by future market developments and by other economic events, and the underlying calculations are in themselves complex. We have therefore assessed valuation of goodwill and other intangibles assets with an indefinite useful life to be a key audit matter.</p>	<p>In our audit we have evaluated and reviewed key assumptions, applications of recognized valuation practice, discount rate (called WACC – "Weighted Average Cost of Capital") and other source data that the company has used. This has been done by comparing to external data sources, such as forecasts of inflation or assessment of future market growth and by evaluating the sensitivity in the company's valuation model. We have specifically focused on the sensitivity in the calculations and have made an independent evaluation of whether there is a risk that reasonably probable events would give raise to a situation where the value in use would be lower than the carrying amount. In this assessment we have also evaluated the company's historical capability to forecast in impairment tests with the amounts that finally turned out, in order to assess the company's historical precision in its estimates and assessments. We have as appropriate included valuation experts in the team performing our review. Finally, we have evaluated if disclosures provided in Note D1 ("Intangible assets") in the company's notes are appropriate, specifically with regards to the disclosure of which of the stated assumptions that are most sensitive in calculating the value in use.</p>

REVENUE RECOGNITION AND RELATED SALES INCENTIVES

Description	How our audit addressed this key audit matter
<p>Revenue recognition and accounting for related sales incentives (bonuses and rebates) are areas with a greater degree of estimates and assessments. We have noted that bonuses, rebates and other adjustments of sales prices in some cases can be material. Incentives related to sales are reported as reduction of the company's revenue. Incentives can for example be structured as percentage reductions on sales, discounts per item, fixed amounts with or without thresholds or in other ways. The company calculates an estimate of final incentives based on the information available the end of the period. We have therefore assessed revenue recognition and related sales incentives to be a key audit matter.</p>	<p>In our audit we have reviewed the company's revenue recognition with focus on bonuses and rebates. We have evaluated the company's revenue process and tested the company's controls within the process. We have also reviewed the accrued costs related sales incentives (bonuses and rebates) to customers as of 31 December 2018 which amounted to 4.8 billion SEK to underlying customer agreements and performed a retrospective analysis of the accruals per 31 December 2017. Our audit has also included review of credit invoices and other adjustments to trade receivables that have taken place after 31 December 2018. We have also reviewed revenue recognition for non-standard customer agreements. In our audit we have tested larger payouts to the company's customers that have taken place during 2018 in order to confirm that they are in accordance with signed agreements and also accrued correctly in the accounting. Finally, we have audited manual journal entries related to bonus and rebates in order to confirm that sufficient documentation and suitable attestations exist for these entries.</p>

Other Information than the annual accounts and consolidated accounts

This document also contains other information than the annual accounts and consolidated accounts and is found on pages 1-5, 9-19 and 127-134. The Board of Directors and the Managing Director are responsible for this other information.

Our opinion on the annual accounts and consolidated accounts does not cover this other information and we do not express any form of assurance conclusion regarding this other information.

In connection with our audit of the annual accounts and consolidated accounts, our responsibility is to read the information identified above and consider whether the information is materially inconsistent with the annual accounts and consolidated accounts. In this procedure we also take into account our knowledge otherwise obtained in the audit and assess whether the information otherwise appears to be materially misstated.

If we, based on the work performed concerning this information, conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors and the Managing Director

The Board of Directors and the Managing Director are responsible for the preparation of the annual accounts and consolidated accounts and that they give a fair presentation in accordance with the Annual Accounts Act and, concerning the consolidated accounts, in accordance with IFRS as adopted by the EU. The Board of Directors and the Managing Director are also responsible for such internal control as they determine is necessary to enable the preparation of annual accounts and consolidated accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts and consolidated accounts, The Board of Directors and the Managing Director are responsible for the assessment of the company's and the group's ability to continue as a going concern. They disclose, as applicable, matters related to going concern and using the going concern basis of accounting. The going concern basis of accounting is however not applied if the Board of Directors and the Managing Director intends to liquidate the company, to cease operations, or has no realistic alternative but to do so.

The Audit Committee shall, without prejudice to the Board of Director's responsibilities and tasks in general, among other things oversee the company's financial reporting process.

Auditor's responsibility

Our objectives are to obtain reasonable assurance about whether the annual accounts and consolidated accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and generally accepted auditing standards in Sweden will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts and consolidated accounts.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the annual accounts and consolidated accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of the company's internal control relevant to our audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors and the Managing Director.
- Conclude on the appropriateness of the Board of Directors' and the Managing Director's use of the going concern basis of accounting in preparing the annual accounts and consolidated accounts. We also draw a conclusion, based on the audit evidence obtained, as to whether any material uncertainty exists related to events or conditions that may cast significant doubt on the company's and the group's ability to continue as

a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the annual accounts and consolidated accounts or, if such disclosures are inadequate, to modify our opinion about the annual accounts and consolidated accounts. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause a company and a group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the annual accounts and consolidated accounts, including the disclosures, and whether the annual accounts and consolidated accounts represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated accounts. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our opinions.

We must inform the Board of Directors of, among other matters, the planned scope and timing of the audit. We must also inform of significant audit findings during our audit, including any significant deficiencies in internal control that we identified.

We must also provide the Board of Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Board of Directors, we determine those matters that were of most significance in the audit of the annual accounts and consolidated accounts, including the most important assessed risks for material misstatement, and are therefore the key audit matters. We describe these matters in the auditor's report unless law or regulation precludes disclosure about the matter.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

Opinions

In addition to our audit of the annual accounts and consolidated accounts, we have also audited the administration of the Board of Directors and the Managing Director of Essity AB (publ) for the year 2018 and the proposed appropriations of the company's profit or loss.

We recommend to the general meeting of shareholders that the profit be appropriated (loss be dealt with) in accordance with the proposal in the statutory administration report and that the members of the Board of Directors and the Managing Director be discharged from liability for the financial year.

A separate list of loans and collateral has been prepared in accordance with the provisions of the Companies Act.

Basis for opinions

We conducted the audit in accordance with generally accepted auditing standards in Sweden. Our responsibilities under those standards are further described in the *Auditor's Responsibilities* section. We are independent of the parent company and the group in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

Responsibilities of the Board of Directors and the Managing Director

The Board of Directors is responsible for the proposal for appropriations of the company's profit or loss. At the proposal of a dividend, this includes an assessment of whether the dividend is justifiable considering the requirements which the company's and the group's type of operations, size and risks place on the size of the parent company's and the group's equity, consolidation requirements, liquidity and position in general.

The Board of Directors is responsible for the company's organization and the administration of the company's affairs. This includes among other things continuous assessment of the company's and the group's financial situation and ensuring that the company's organization is designed so that the accounting, management of assets and the company's financial affairs otherwise are controlled in a reassuring manner. The Managing Director shall manage the ongoing administration according to the Board of Directors' guidelines and instructions and among other matters take measures that are necessary to fulfill the company's accounting in accordance with law and handle the management of assets in a reassuring manner.

Auditor's responsibility

Our objective concerning the audit of the administration, and thereby our opinion about discharge from liability, is to obtain audit evidence to assess with a reasonable degree of assurance whether any member of the Board of Directors or the Managing Director in any material respect:

- has undertaken any action or been guilty of any omission which can give rise to liability to the company, or
- in any other way has acted in contravention of the Companies Act, the Annual Accounts Act or the Articles of Association.

Our objective concerning the audit of the proposed appropriations of the company's profit or loss, and thereby our opinion about this, is to assess with reasonable degree of assurance whether the proposal is in accordance with the Companies Act.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with generally accepted auditing standards in Sweden will always detect actions or omissions that can give rise to liability to the company, or that the proposed appropriations of the company's profit or loss are not in accordance with the Companies Act.

As part of an audit in accordance with generally accepted auditing standards in Sweden, we exercise professional judgment and maintain professional skepticism throughout the audit. The examination of the administration and the proposed appropriations of the company's profit or loss is based primarily on the audit of the accounts. Additional audit procedures performed are based on our professional judgment with starting point in risk and materiality. This means that we focus the examination on such actions, areas and relationships that are material for the operations and where deviations and violations would have particular importance for the company's situation. We examine and test decisions undertaken, support for decisions, actions taken and other circumstances that are relevant to our opinion concerning discharge from liability. As a basis for our opinion on the Board of Directors' proposed appropriations of the company's profit or loss we examined the Board of Directors' reasoned statement and a selection of supporting evidence in order to be able to assess whether the proposal is in accordance with the Companies Act.

The auditor's examination of the corporate governance statement

The Board of Directors is responsible for that the corporate governance statement on pages 46–55 has been prepared in accordance with the Annual Accounts Act.

Our examination of the corporate governance statement is conducted in accordance with FAR's auditing standard RevU 16 *The auditor's examination of the corporate governance statement*. This means that our exam-

ination of the corporate governance statement is different and substantially less in scope than an audit conducted in accordance with International Standards on Auditing and generally accepted auditing standards in Sweden. We believe that the examination has provided us with sufficient basis for our opinions.

A corporate governance statement has been prepared. Disclosures in accordance with chapter 6 section 6 the second paragraph points 2–6 of the Annual Accounts Act and chapter 7 section 31 the second paragraph the same law are consistent with the other parts of the annual accounts and consolidated accounts and are in accordance with the Annual Accounts Act.

The auditor's opinion regarding the statutory sustainability report

The Board of Directors is responsible for the statutory sustainability report on pages 33–45 and 114–121, and that it is prepared in accordance with the Annual Accounts Act.

Our examination has been conducted in accordance with FAR's auditing standard RevR 12 *The auditor's opinion regarding the statutory sustainability report*. This means that our examination of the statutory sustainability report is different and substantially less in scope than an audit conducted in accordance with International Standards on Auditing and generally accepted auditing standards in Sweden. We believe that the examination has provided us with sufficient basis for our opinion.

A statutory sustainability report has been prepared.

Ernst & Young AB with Hamish Mabon as auditor in charge, Box 7850, 103 99 Stockholm, was appointed auditor of Essity AB by the general meeting of the shareholders on April 12, 2018 and has been the company's auditor since May 27, 2016.

AUDITOR'S REPORT ON THE LIMITED REVIEW AND AUDIT OF THE SUSTAINABILITY REPORT OF ESSITY AKTIEBOLAG (PUBL)

This is the translation of the auditor's report in Swedish.

To Essity AB (publ), corp id 556325-5511

INTRODUCTION

We have been engaged by the Board of Essity Aktiebolag (publ) to undertake a combined assurance engagement of the Sustainability Report for Essity Aktiebolag (publ) for the year 2018. Essity Aktiebolag (publ) has defined the scope of the Sustainability Report to the pages referred to in the GRI index on pages 127–128.

RESPONSIBILITIES OF THE BOARD AND EXECUTIVE MANAGEMENT FOR THE SUSTAINABILITY REPORT

The Board of Directors and Executive Management are responsible for the preparation of the Sustainability Report in accordance with the applicable criteria, as defined on page 114, and are part of the Sustainability Reporting Guidelines published by GRI (The Global Reporting Initiative) that are applicable to the Sustainability Report, as well as the accounting and calculation principles that the Company has developed. This responsibility includes the internal control relevant to the preparation of a Sustainability Report that is free from material misstatements, whether due to fraud or error.

RESPONSIBILITIES OF THE AUDITOR

Our responsibility is to express a conclusion on the Sustainability Report based on the assurance procedures we have performed. Our engagement is limited to historical financial information and does therefore not include future oriented information.

We conducted our engagement in accordance with ISAE 3000 Assurance engagements other than audits or reviews of historical financial information. The engagement includes a limited assurance engagement on the complete Sustainability Report and audit on fossil fuels and grid supply data on page 117. The objective of an audit is to obtain reasonable assurance that the information is free of material misstatements. A reasonable assurance engagement includes examining, on a test basis, evidence supporting the quantitative and qualitative information in the Sustainability Report. A limited assurance engagement consists of making inquiries, primarily of persons

responsible for the preparation of the Sustainability Report, and applying analytical and other limited assurance procedures. A limited assurance engagement is different from and substantially less in scope than reasonable assurance conducted in accordance with IAASB's Standards on Auditing and other generally accepted auditing standards in Sweden.

The firm applies ISQC 1 (International Standard on Quality Control) and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements. We are independent of Essity Aktiebolag (publ) in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements.

The conclusion based on our limited assurance procedures does not provide the same level of assurance as the conclusion of our reasonable assurance procedures. Since this engagement is combined, our conclusions regarding reasonable assurance and limited assurance are presented separately below.

Our procedures are based on the criteria defined by the Board of Directors and the Executive Management as described above. We consider these criteria suitable for the preparation of the Sustainability Report.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion below.

CONCLUSIONS

Based on the limited assurance procedures we have performed, nothing has come to our attention that causes us to believe that the Sustainability Report is not prepared, in all material respects, in accordance with the criteria defined by the Board of Directors and Executive Management.

In our opinion the information in the Sustainability Report which has been subject to our reasonable assurance procedures have, in all material respects, been prepared in accordance with the criteria defined by the Board of Directors and Executive Management.

¹⁾ 2015 includes the sale of securities, SEK 970m.

²⁾ 2018, 2017, 2016, 2015 and 2014 include items affecting comparability of SEK -1,375m, SEK -855m, SEK -2,645m, SEK -292m and SEK -1,009m.

³⁾ 2015 does not include the sale of securities, SEK 970m.

⁴⁾ Calculation of average capital employed is based on five measurements.

⁵⁾ See definitions of key figures in Note A2, pages 64–69.

⁶⁾ Dividend proposed by the Board of Directors.

Communication and collaboration for a better world

Hygiene and health play a decisive role in solving several of the societal challenges addressed by the UN Sustainable Development Goals. Through Essity's "Essentials Initiative" communication platform, we are pursuing a global dialogue to increase awareness of the importance of hygiene and health and the link to well-being. The "Essentials Initiative" is based on a global survey of attitudes to hygiene and health and on a report. The 2018/2019 report was produced in partnership with the UN body Water Supply and Sanitation Collaborative Council (WSSCC). It showcases new research, inspiring examples and possible solutions as well as the societal impacts that can be achieved if hygiene and health are prioritized in the decision-making processes among politicians and caregivers as well as private individuals.

Essity was – for the third consecutive year – the convening partner to the United Nations Foundation's (UNF) Global Dialogue, held at the UN headquarters in New York. The event facilitates discussions between businesses, NGOs and government authorities. Essity's President and CEO Magnus Groth gave the opening and closing speeches, addressing matters such as the importance of

collaboration between companies and organizations in order to contribute to the UN Sustainable Development Goals.

Essity is collaborating with the Fotografiska Museum in Stockholm, Sweden, to develop joint exhibitions on the theme of hygiene and health. In 2018, the "Hand to Hand" exhibition was arranged with images taken by the internationally acclaimed photojournalist Paul Hansen. The exhibition also contained images by the documentary photographer Åsa Sjöström, who followed students at a school in the UK to portray an ongoing Essity initiative where children learn at an early age the importance of personal hygiene.

Awards and memberships

This Annual and Sustainability Report was produced by Essity in collaboration with Hallvarsson & Halvarsson. Photos: Juliana Fällidin, Lena Granefelt, Emmy Jonsson and Essity. Printing: Göteborgstryckeriet 2019. Translation: The Bugli Company.

The name Essity stems from the words **essentials** and **necessities**.
 We are a leading global hygiene and health company that offers products and solutions that are a necessity in everyday life. Hygiene and health are central to people's well-being. Improved hygiene and health are preconditions for a better life and play an essential role in well-being.

That is why we are called Essity.
