CORPORATE GOVERNANCE PRINCIPLES AND STRUCTURE

The board of directors (the “**Board**”) and the management of Lenovo Group Limited (the “**Company**”, together with its subsidiaries, the “**Group**”) strive to attain and uphold a high standard of corporate governance and to maintain sound and well-established corporate governance practices for the interest sake of shareholders and other stakeholders including customers, suppliers, employees and the general public. The Company abides strictly by the governing laws and regulations of the jurisdictions where it operates and observes the applicable guidelines and rules issued by regulatory authorities. It regularly undertakes review of its corporate governance system to ensure it is in line with international and local best practices.

Compliance with Corporate Governance Code

Throughout the year ended March 31, 2019, the Company has complied with the code provisions of the Corporate Governance Code and Corporate Governance Report (the “**CG Code**”) set out in Appendix 14 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the “**Stock Exchange**”) (the “**Listing Rules**”), and where appropriate, met the recommended best practices in the CG Code, with the exception that the roles of the chairman of the Board (the “**Chairman**”) and the chief executive officer of the Company (the “**CEO**”) have not been segregated as required by code provision A.2.1 of the CG Code.

Since November 3, 2011, Mr. Yang Yuanqing (“**Mr. Yang**”) has been performing both the roles as the Chairman and the CEO. The Board has recently reviewed the organization human resources planning of the Company and is of the opinion that it is appropriate and in the best interests of the Company at the present stage for Mr. Yang to

continue to hold both the positions as it would help to maintain the continuity of the strategy execution and stability of the operations of the Company. The Board comprising a vast majority of independent non-executive directors meets regularly on a quarterly basis to review the operations of the Company led by Mr. Yang.

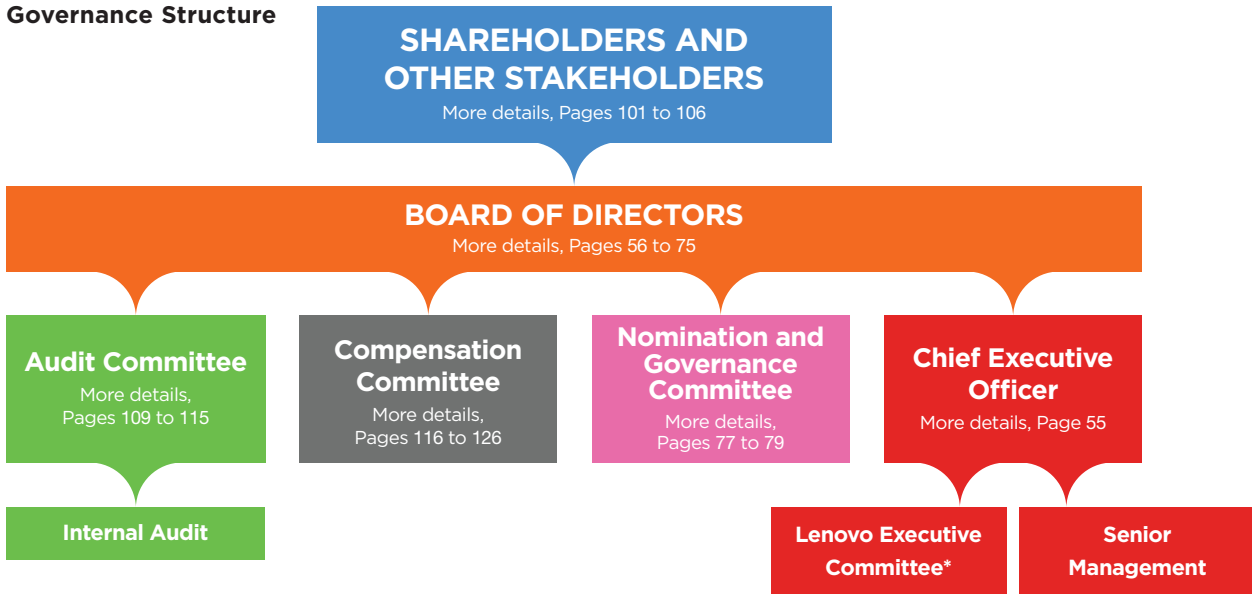

The Board also appointed Mr. William O. Grabe (“**Mr. Grabe**”) as the lead independent director (the “**Lead Independent Director**”) with broad authority and responsibility. Among other responsibilities, the Lead Independent Director chairs the Nomination and Governance Committee meeting and/or the Board meeting when considering (i) the combined roles of Chairman and CEO; and (ii) assessment of the performance of Chairman and/or CEO. The Lead Independent Director also calls and chairs meeting(s) with all independent non-executive directors without management and executive director present at least once a year on such matters as are deemed appropriate. Accordingly, the Board believes that the current Board structure with combined roles of Chairman and CEO, the appointment of Lead Independent Director and a vast majority of independent non-executive directors provide an effective balance on power and authorizations between the Board and the management of the Company.

Apart from the foregoing, the Company met the recommended best practices in the CG Code as disclosed in the respective sections of this report. Particularly, the Company published quarterly financial results and business reviews in addition to interim and annual results. Quarterly financial results enhanced the shareholders’ ability to assess the performance, financial position and prospects of the Company. The quarterly financial results were also prepared using the accounting standards consistent with the policies applied to the interim and annual financial statements.

During the year, the Board adopted a Nomination Policy which guides the Nomination and Governance Committee and the Board on nomination of candidates for the Board. This Policy sets out the selection criteria, the tenure, the election/re-election requirements and the nomination procedure, details of which are set out below.

Diversity

The Board values diversity as a factor in selecting candidates to serve on the Board, and believes that the diversity which exists in its composition provides significant benefits to the Board and the Company and forms an important part of the Nomination Policy.

The Board believes that a key success factor of an effective Board is that it comprises a range

and balance of skills, experience, knowledge and independence, with individuals that work as a team. The Board Diversity Policy which relates to the selection of candidates for the Board was adopted to ensure that diversity in its broadest sense continues to remain a feature of the Board. All Board appointments are made on merit, in the context of the skills and experience the Board as a whole requires being effective. The details of the appointment process can be found on page 59 of this report.

The Nomination and Governance Committee has been delegated with the responsibilities for the review of the Board Diversity Policy on an annual basis. During the fiscal year 2018/19, the Nomination and Governance Committee reviewed the below measurable objectives and the progress in achieving these objectives:

There is a formal and transparent procedure for the appointment of new directors to the Board, the primary responsibility of which has been delegated to the Nomination and Governance Committee. The Nomination and Governance Committee is composed of the Chairman and three independent non-executive directors. This composition ensures that any decisions made are impartial and are in the best interest of the Company.

The Nomination and Governance Committee’s assessment of the candidates includes, but is not limited to, consideration of the relevant knowledge and diversity of backgrounds, skills, experience and perspectives that would complement the existing Board.

The Nomination and Governance Committee also ensures that candidates satisfy the requisite skills and core competencies to be deemed fit and proper, and to be appointed as director. The nomination process involves the following six stages:

Corporate Governance Report

The Nomination and Governance Committee regularly reviews the structure, size and composition (including the skills, knowledge and experience) required of the Board and makes recommendations to the Board as appropriate. The Board has satisfied itself that the appropriate plan has been in place for orderly succession to the Board as well as procedures to ensure an appropriate balance of skills on the Board and its committees. In accordance with the articles of association of the Company (the “**Articles of Association**”), all directors are subject to retirement by rotation. At each annual general meeting, one-third of the directors for the time being shall retire from office. The retiring directors shall be eligible for re-election. New appointments either to fill a casual vacancy or as an addition to the Board are subject to re-election by shareholders of the Company at the next following annual general meeting of the Company. On May 22, 2019, the Nomination and Governance Committee conducted an annual review of the independence of all independent non-executive directors of the Company for the year ended March 31, 2019. Having taken into account the factors as set out in rule 3.13 of the Listing Rules in assessing the independence of independent non-executive directors, the Nomination and Governance Committee (with the relevant committee member abstaining from voting on the resolutions concerning his own independence) concluded that all of the independent non-executive directors satisfied the criteria of independence as set out in the Listing Rules.

In addition, the Nomination and Governance Committee affirmed that all independent non-executive directors of the Company provided a strong independent element on the Board, were free from any business or other relationship which could materially interfere with the exercise of their judgement, and remained independent for the year ended March 31, 2019.

of focus for the Board, which appear as items on the Board's agenda at relevant times throughout the financial year. Concentrated discussion of these items assists the Board in making the most appropriate decision based on the long-term opportunities for the business.

Corporate Governance Report

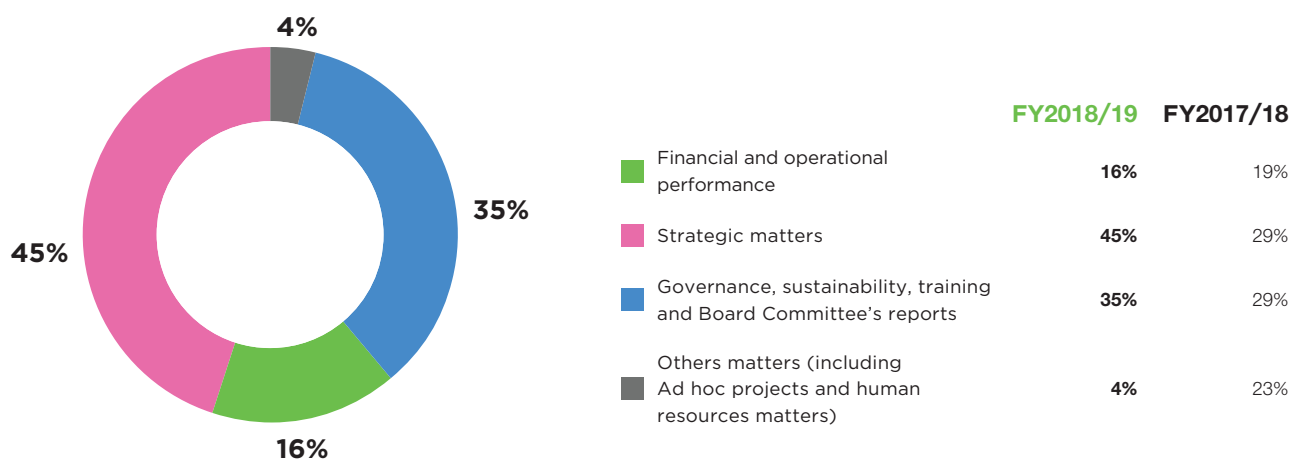

Main activities during FY2018/19

During the fiscal year 2018/19, a total of eight Board meetings were held, of which four Board meetings were primarily to review quarterly business performance and strategy execution and four Board meetings were for reviewing strategy in the business or other relevant areas. Given the geographical spread of the Group's businesses, the

Company held meetings in Hong Kong, New York, Beijing and Raleigh during the year. Offsite Board meetings give the Board further insights into the businesses of the Group. The below chart shows how the Board allocated its agenda time during the year.

THE BOARD

Allocation of agenda time

Directors are expected to attend all meetings of the Board and the Committees on which they serve and to devote sufficient time to the Company to perform their duties. Where directors are unable to attend a meeting they receive papers for that meeting giving them the opportunity to raise any issues with the Chairman in advance of the meeting.

At each scheduled meeting the Board receives updates from the CEO and Chief Financial Officer on the financial and operational performance of the Group and any specific developments

in their areas of the businesses for which they are directly responsible and of which the Board should be aware. Chairpersons of the respective Board committees would also report on matters discussed and/or approved at the relevant Board committees' meetings held prior to the Board meetings. Meetings are structured so as to allow for consideration and debate of all matters.

The main matters and areas that the Board reviewed and considered at its eight meetings (including four specific meetings focusing on strategy) during the year were as follows:

Risk Management and Internal Control

At Lenovo, risk is defined as a potential action, event or circumstance that could impact the Company's ability, favorably or unfavorably, to meet its strategic goals. Risk is an inherent part of the Company and needs to be understood and managed properly to provide a foundation for the Company's sustained growth.

In line with the commitment to deliver sustainable value, Lenovo adopts a holistic risk management and internal controls framework to proactively manage risks. This framework is put into effect by Lenovo's Board of Directors and the Audit Committee to support the Board in monitoring risk exposures, the design and operating effectiveness of the underlying risk management and internal controls systems.

Corporate Governance Report

Board	<ul style="list-style-type: none"> • Has overall responsibility for the Lenovo's risk management and internal control system. • Oversees and monitors the overall effectiveness of the risk management system and internal audit function through the Audit Committee.

Internal Audit (IA)	<ul style="list-style-type: none"> • Supports the Audit Committee in reviewing effectiveness of internal controls system. • Capitalizes on the audit processes to independently assess the effectiveness of established system of controls. • Independent investigations regarding certain allegations of fraud and violations of Lenovo's Code of Conduct ("the Code") and other company policies.
Senior Management	<ul style="list-style-type: none"> • Provide leadership and guidance for the balance of risk and return. • Designs, implements and reviews Lenovo's risk management framework. • Ensures that salient risks are highlighted to the Audit Committee, along with the status of actions taken to manage these risks.
Enterprise Risk Management (ERM)	<ul style="list-style-type: none"> • Responsible to design, implement, review and update Lenovo ERM framework. • Coordinates the risk identification and assessment process, highlights identified risks to the Audit Committee, along with the status of actions taken to manage these risks. • Risk projects.
Business Functions	<ul style="list-style-type: none"> • ERM Risk Champions are appointed in each functions where risk ownership is established. • Identify risk, assess and initiate control and mitigation measures in their areas of responsibility. • Establish group-wide policies and guidelines where appropriate. • Quarterly management disclosure and certification process trigger reporting of unusual items, occurring in of the ordinary course of our business, which raise significant financial or business risks.

This risk management and internal control framework is in place to improve communication of identified risks with management, measure the impact of the identified risk and facilitate implementation of coordinated mitigating measure.

Internal Control

For many years, the Company has had an integrated approach for internal control which is consistent with the Committee of Sponsoring Organizations of the Treadway Commission (COSO) internal control framework.

Within this framework, management is responsible for setting the appropriate tone from the top, performing risk assessments, and owning the design, implementation and maintenance of internal control. Other teams such as Finance, Legal, and Human Resources provide assistance and expertise to management to assist it in undertaking its responsibilities. The Board and its Audit Committee oversee the actions of management and monitor the effectiveness of the established controls, assisted by assurance provided by the external and internal auditors. Lenovo's internal control framework is designed to manage rather than eliminate the risk of failure to achieve business objectives, and as such, provides reasonable (rather than absolute) assurance against material misstatement or loss.

Management of internal control

Essential to this internal control system are well defined policies and procedures that are properly documented and communicated to employees. The corporate policies form the basis of all the Company's major guidelines and procedures and set forth the control standards required for the functioning of the Company's business entities.

Corporate Governance Report

Additionally, Lenovo has a strong corporate culture based on ethical business conduct. Lenovo's Code of Conduct (the "**Code**"), is the cornerstone of our commitment to conducting business legally, ethically, and with integrity. The Code, by its terms, applies to all employees (including full-time, part-time, and supplemental or temporary), consultants and contractors working for Lenovo. As the Code is not intended to describe every law, policy, procedure or business process that applies to Lenovo, the Code also provides employees guidance on when and how to seek additional guidance or report potential concerns.

All Lenovo employees are required to comply with the Code, which is available in multiple languages on the Company's publicly-facing website and our internal intranet. Regular training on the Code and related policies is provided to reinforce the Company's commitment to compliance and conducting business with integrity. Lenovo is committed to investigating all reported concerns. Lenovo regards any violation of the Code as a serious matter. Failure to follow the code, or violation of the policies described in the Code, can result in disciplinary action, including termination of employment or relationship.

In keeping with best practices, Lenovo has also developed and implemented numerous policies to provide more detailed guidance to employees regarding compliance with rules and laws related to the prevention and detection of bribery and corruption. Additional policies include an Anti-Bribery and Anti-Corruption Policy, a Conflict of Interest Policy, and a Gift, Entertainment, Corporate Hospitality and Travel Policy.

Lenovo recognizes that an environment where employees feel empowered to bring concerns to management is required to make the Company's internal control system successful. Lenovo provides employees with confidential and anonymous methods for raising concerns or reporting suspected misconduct, as permitted by applicable law. Lenovo's commitment to maintaining the confidentiality of reports, investigating all alleged misconduct and non-retaliation is incorporated in our Code. Lenovo does not tolerate retaliation against any employee, consultant or contractor

for reporting an issue or raising a concern he or she believes to be true, cooperating with an investigation or audit, or refusing to participate in activities that violate the Code, laws or company policies.

Another feature of Lenovo's internal control system is the execution of key control self-testing by management to reasonably assure that internal controls are working as intended and that necessary actions have been taken to address control weaknesses. Specific employees with controls knowledge and expertise have been identified within the business to further assist management with designing, executing, and monitoring controls. The Group Controller oversees controls related activities of these individuals across organizations and process owners.

This comprehensive internal control framework established by the Company covers all activities and transactions. Management performs periodic enterprise wide risk assessments and continuously monitors and reports progress of action plans to address these key risks. Management also assesses business risks when formulating corporate strategies, and tracks and reports on the implementation of strategic initiatives, business plans, budgets and financial results regularly to the Board. Additionally, as part of Lenovo's commitment to financial integrity, all relevant senior executives regularly verify the accuracy and completeness of the quarterly financial statements and confirm compliance with key internal controls.

To assist the Audit Committee in its oversight and monitoring activities, the Company maintains an independent, worldwide Internal Audit function. Internal Audit provides objective assurance to the Audit Committee that the system of internal controls is effective and operating as intended. The mission of Internal Audit is to provide the Board and Lenovo management with:

- Independent and objective assessment of Lenovo's system of internal controls;
- Guidance to Lenovo stakeholders for improving risk management;

- Proactive support to improve Lenovo's control posture; and
- Independent investigations regarding certain allegations of fraud and violations of the Code and other company policies.

To enable it to fulfill its mission, Internal Audit has unrestricted access to all corporate operations, records, data files, computer programs, property, and personnel. To preserve the independence of the Internal Audit function, the Head of Internal Audit reports directly to the Audit Committee on all audit matters and to the Chief Financial Officer on administrative matters. The Head of Internal Audit is authorized to communicate directly with the Chairman of the Board, the Chairman of the Audit Committee and other Board members as deemed necessary. To help ensure the quality of the Internal Audit function and provide assurance that the Internal Audit function is in conformity with the standards of the Institute of Internal Auditors, Internal Audit has implemented a comprehensive and continuous quality assurance program covering all Internal Audit activities. In addition, the Audit Committee periodically commissions an independent, external quality assurance review of the Internal Audit function.

In selecting the audits to perform each year, Internal Audit performs a risk assessment using information collected from process owners, the enterprise risk management team, senior executives, the external auditor and the Board along with an analysis of prior audit issues and other data. Internal Audit develops an audit plan that prioritizes areas with significant risks or deemed to be strategic in nature to the business. The audit plan is reviewed by the Audit Committee, which is also given quarterly updates on the performance of the plan and key findings. As necessary throughout the year, the audit plan will be modified to reflect emerging risks or changes to business plans. Ad hoc reviews of areas of concern identified by management or the Audit Committee may also be performed. During the last

year, Internal Audit issued multiple reports covering all significant operational and financial units worldwide. In keeping with best practices, Internal Audit regularly monitors the status of management action plans resulting from audit findings to ensure completion and reports progress each quarter to the Audit Committee.

Audit Committee reporting also includes identified key control issues to provide the Audit Committee full visibility to the status of Lenovo's control environment.

Furthermore, Internal Audit is responsible for investigating certain allegations of potential violations of the Code, or any other company policies as appropriate. Internal Audit partners with Legal, Ethics and Compliance, Human Resources, and other subject matter experts where necessary to ensure the appropriate expertise when performing these investigations. Management and the Audit Committee are informed of the results of these investigations, any resulting required actions, and status updates on actions.

Inside information

Regarding procedures and internal controls for the handling and dissemination of inside information, the Company:

- (i) is aware of its obligations under the SFO and the Listing Rules and the overriding principle that inside information should be announced immediately if it is the subject to the requirements and the safe harbors as provided in SFO;
- (ii) conducts its affairs with close regard to the applicable laws and regulations prevailing in Hong Kong;
- (iii) has included in the Code a strict prohibition on the unauthorized use of non-public or inside information;

Corporate Governance Report

- (iv) has established a Continuous Disclosures Policy along with its guidance notes for monitoring, reporting and disseminating inside information to our shareholders, investors, analysts and media. These policy and guidance notes also identify who are the Company's authorized spokespersons and their responsibilities for communications with stakeholders; and
- (v) has communicated to all relevant staff regarding the implementation of the Continuous Disclosures Policy and the relevant trainings are also provided.

Control effectiveness

The Board, through the Audit Committee of the Company, conducts a continuous review of the effectiveness of the internal control system operating in the Company and considers it to be adequate and effective. The review covers all material controls, including financial, operational, information technology, and compliance controls, and risk management functions. The Board is not aware of any significant areas of concern which may affect the shareholders. The Board is satisfied that the Company has fully complied with the code provisions on internal controls as set forth in the CG Code.

Enterprise Risk Management

Lenovo's ERM framework is effected by Lenovo's Board of Directors and management team, and is applied in strategy setting and across all major functions of the Company. It involves:-

- The ERM team, who is responsible to design, implement, review, and update Lenovo ERM framework.
- All Lenovo major functions, where risk ownership is established via the appointment of ERM Champions in each function.

Lenovo recognizes that risk management is the responsibility of everyone within Lenovo, and that risk is best managed when business functions take responsibility and are accountable for risks. Rather than being a separate and standalone process, risk management is therefore incorporated as part of Lenovo annual strategic planning process across all major functions of the Company. During strategy planning, all business functions are required to identify material risks that may impact their strategy objectives. They also identify, assess and evaluate operational risks. Many aspects of risks are considered, including but not limited to these listed below.

Plans to mitigate the identified risks are, at the same time, developed for implementation, to continuously deliver sustainable value.

With this practical and effective framework, risk management features are integrated into each function. Critical and major risks of the business functions, especially in view of the changing business environment, are identified and assessed based on risk assessment matrix that helps to rank the risks and prioritize risk management effort to determine the appropriate risk mitigation plans.

Risk Rating Matrix						
IMPACT	4	Extreme	H	H	VH	VH
	3	High	M	M	H	H
	2	Moderate	L	L	M	M
	1	Low	L	L	L	L
Risk Rating			Remote	Unlikely	Possible	Almost Certain
	VH	Very High	1	2	3	4
	H	High	LIKELIHOOD			
	M	Moderate				
	L	Low				

The risks are monitored and reviewed by each business function as well as at the group level. And at least annually, the ERM team coordinates the risk identification and assessment process and the identified risks are highlighted to the Audit Committee, along with the status of actions taken to manage these risks.

Details of some of these risks may be found under “Material Risks of the Group” on Page 22. This framework will continue to be strengthened to create a robust and holistic risk management culture to safeguard the value of the Company.

At the enterprise level, Lenovo’s risk tolerance is also reviewed periodically, and changes are approved by the Audit Committee. The ERM team

engages actuarial studies to quantify risks, and the Company’s risk tolerance is adjusted when appropriate. The risk tolerance represents the amount of risk the Company is willing to undertake in the pursuit of its strategic and business objectives. Where necessary, ERM employs risk transfer strategies through insurance management. ERM also initiates risk projects to improve risk awareness.
