## Grace Letter

Dear stakeholders

As a member of the UN Global Compact, we believe that the Communication on Progress (COP) is a focal point for driving positive change. As a mutually owned company, transparency is one of our core values. It is also an important driver for all who wish to achieve sustainable development. You manage what you measure, and you commit to what you communicate.

We adjusted our reporting cycle last year, but the process concerning our reporting cycle stretches a bit longer than first expected due to the scheduling of the executive board meetings where the report needs final approval. Therefore, we will be submitting our COP later than first anticipated. We will adjust our reporting cycle accordingly moving forward.

Please feel free to reach out if you have any questions. And we look forward to sharing our 2019 COP with you.

Kind regards

Mikkel Klausen  
Head of Corporate Communications and CSR  
LB Forsikring
