CEO COMMITMENT TO THE UNITED NATIONS GLOBAL COMPACT

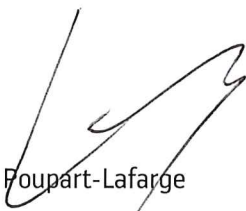

As a promoter of sustainable mobility, Alstom develops and markets systems, equipment and services for the transport sector.

The Company, which is a world leader in integrated transport systems, has in its portfolio a complete range of offerings (from high-speed trains to metros, tramways and e-buses), passenger solutions, customised services (maintenance, modernisation), electrical and mechanical infrastructure, signalling and digital mobility solutions.

Alstom's products and services help to shape the future of transport infrastructure, thereby directly impacting the way of life of people across the globe. Alstom is renowned for setting the benchmark in innovative and environmentally-friendly technologies. The Company is also well known for its broad range of products and services and its commitment to meeting the growing needs for clean, efficient and sustainable transport technologies.

In today's fast-evolving world, Alstom contributes proactively to providing solutions which help to address economic, environmental and social concerns whilst acting responsibly in its day to day operations. It employs robust governance and management processes to drive forward its corporate responsibility performance, measuring this against its peers through the use of leading global corporate responsibility and sustainability benchmarks.

The Company strongly supports the United Nations Global Compact, demonstrating this through its active involvement in the Global Compact Network and its compliance with the ten Global Compact principles for business activities.

Henri Foupard-Lafarge
