

**4 December 2020**

To our stakeholders:

We recognize that a key requirement for participation in the UN Global Compact is the annual preparation and posting of a Communication on Progress (COP) that comprises of a CEO statement of continued support for the UN Global Compact, a description of practical actions with regard to the main issue areas of the UN Global Compact, and a measurement of outcomes or expected outcomes.

Making healthcare more accessible in Asia has underpinned the Zuellig Pharma business throughout our history and seen us grow to become one of the largest healthcare services companies in our region. Our approach to business has always involved looking beyond immediate needs to consider the long-term future of our employees, clients and customers.

In 2019, we embarked on a journey to extend this philosophy and make sustainability a fundamental and integral part of the way we run our business. We joined the UN Global Compact in the same year to join a worldwide movement and strengthen our commitment to building a healthier future for the communities that we serve.

This year, we are taking further steps to make tangible, metric-driven impact through our first-ever Sustainability Report, due to be released in the first quarter of 2021. For this reason, **we would like to align our internal reporting cycle with the COP deadline and hereby request our COP deadline to be adjusted to 1 Mar 2021.**

We look forward to working with our employees, clients, customers and suppliers to showcase #SustainabilityInAction founded on our four key sustainability pillars. You may learn more about Sustainability in Zuellig Pharma on our website [here](#).

Sincerely,

**Raymund Azurin**  
Senior Vice President, Government Affairs & Sustainability  
Zuellig Pharma Holdings Pte. Limited
