Date	December 2020

Portrait of Gebrüder Weiss

With around 7,300 employees, 150 company-owned locations and a turnover of 1.7 billion euros in 2019, Gebrüder Weiss ranks among the leading transport and logistics companies in Europe.

In addition to its core business of land transport, air & sea freight and logistics, the company also operates a number of highly specialised industry solutions and subsidiaries under the umbrella of Gebrüder Weiss Holding AG, based in Lauterach (Vorarlberg, Austria). This includes logistics consultancy x|vise, tectraxx (industry specialist for hi-tech businesses), inet-logistics (software solutions for TMS transport management), dicall (telephone service, consulting and telemarketing), Railcargo (railway transport) and the Gebrüder Weiss parcel service GWP, a shareholder in the Austrian company DPD. This bundling of services allows us to respond to customer needs quickly and flexibly.

Having implemented a variety of ecological, economic and social initiatives, the family-owned company, which has a history going back 500 years, is considered a pioneer in terms of sustainable business today.

Who we are, what we do and what we stand for: <https://www.youtube.com/watch?v=Jm7QdpnCWZY>

Company Mission Statement

“We aim to fill our customers with enthusiasm, which is why our daily work is based on an exceptional quality of service.”

Based on its home markets in the Alpine-Danube region as well as Asia and North America, Gebrüder Weiss develops sector- and customer-specific transport and logistics solutions that enable the seamless meshing of production, business and transport processes.

For some time now, sustainability has involved much more than simply regulating our level of traffic on the roads. Intelligent logistics begins with the analysis of the entire system of procurement and distribution processes of our customers.

We review existing supply chains and select the appropriate means of transport on an individual basis. When logistics chains are optimally matched with one another, everything works like clockwork. Synergies are used, CO₂ emissions are reduced and profitability increases.

The Orange Strategy

Added value for customers.

As well as goods and data, Gebrüder Weiss also moves people who come into contact with the orange network, internally or externally. We are moving forward with our customers, with a forward-looking approach and innovative ideas. As a logistics specialist, GW controls global supply chains. We offer global solutions through our international network. Our main aim is Service Excellence.

We aim to impress with our services and products, to move our customers. We are aware of our financial and social responsibility as a business and seek environmentally-friendly solutions. As an independent company with a good capital base, marginal dependency on banks and a broad range of services, we will direct our actions towards sustainability and act responsibly and economically. The GW vision is rooted in the mentioned independence.

We don't think in quarters, we think in generations. That is why we don't act with merely short-term goals in mind but, on principle, with our long-term objective before us: we want to be the best, not the largest transport and logistics service provider.

Statement of Support

Dear Stakeholders,

Only a healthy company is able to act in a sustainable manner and to fully live up to its corporate responsibility. The successful business performance achieved strengthens and expands our sound financial position.

For us, sustainability means taking active responsibility; this has been the case for generations and remains one of our core values to this day. Today's global economy is based on the division of labour and relies on the ability to smoothly overcome barriers of distance and time. That is why our business model at Gebrüder Weiss entails optimising the flow of goods and commodities. At the same time, we aim to save resources through intelligent control of the supply chain as well as by indicating and facilitating more resource-efficient transport solutions.

At all levels of corporate activity, economic, social and environmental factors are taken into consideration as equally as possible, in order to create long-term values for the company, the environment and society. In our [Code of Conduct](#), we have set down the values we live by and which form the basis for our decisions and business practices. Our staff enjoy the freedom to place an individual emphasis or indicate new potentials, and are encouraged to do so – whether for CSR initiatives or with a view to process improvement. We offer attractive working conditions in a challenging environment and provide our employees with numerous opportunities for personal development.

In 2011, Gebrüder Weiss joined the UN Global Compact and we will continue to support this initiative. The ten principles in the areas of human rights, labour, environment and anticorruption correspond with our values and are included in our Code of Conduct. With this Communication on Progress, we like to share our 2019 activities with our stakeholders. We are looking forward to continuous exchange with you.

Wolfram Senger-Weiss, MBA

Managing Director

Gebrüder Weiss GmbH
