His Excellency Antonio Guterres
Secretary General
UNITED NATIONS
New York, NY 10017
USA

Dear Mr. Secretary General,

I am pleased to confirm Natixis strong support to the UN Global Compact international initiative, and its commitment to the improvement of the 10 principals regarding human rights, labor, environment and anti-corruption.

One of the greatest challenges facing economies and individuals worldwide is their response to the current environmental and climate emergency, and this has taken on even greater importance since the Covid-19 crisis, bolstering our conviction that we must pursue our ecological and solidarity-driven transformation to build a more sustainable world.

Natixis is also mindful of its role to contributing to the Sustainable Development Goals (SDGs) adopted by the 193 Member States of the United Nations. Natixis identified 11 SDGs to which it has already made a material contribution, one that is set to expand in the years to come, through financing and investments as well as in its daily operation.

Each member of staff here at Natixis has a crucial role to play in this change, and so we constantly endeavor to raise awareness company-wide and encourage our staff's efforts via a range of community and environmental initiatives, as we reduce our use of resources, ensure we manage our buildings responsibly, and promote environmentally friendly mobility practices.

Natixis is the only financial institution worldwide to apply the Green Weighting Factor, which adjusts analytical RWA on our financing deals depending on their climate impact. With this innovative system, we are targeting a financing trajectory consistent with the goals set out in the Paris Agreement on the climate, while we also support our clients in their own ecological transition. Additionally, Natixis Assurances is the first insurer to start aligning its investment policy with the 2°C goal out to 2030.

The information presented in the Natixis 2019 Registration document corresponds to our Communication on Progress for 2019. It reflects Natixis contribution to sustainable growth and describes our commitment and concrete achievements in favor of the Global Compact principles.

A new growth model is emerging – based on low-carbon growth and greater awareness of our environmental and social impacts – and Natixis stands fully committed to addressing this challenge.

It is an honor for Natixis to be part of the United Nations Global Compact with a community of companies that are committed to jointly advance anti-corruption, human rights and environmental protection.

Yours sincerely,

23 décembre 2020
