Dear Sirs,

At a time when we have all been forced to confront complicated situations, Técnicas Reunidas has reinforced its commitment to sustainability as the basic guide for all its activities. As a Signatory to the United Nations Global Compact since 2011, and now with even greater reason, Técnicas Reunidas is firmly committed to the Sustainable Development Goals (SDG) and the 2030 Agenda.

For this purpose, Técnicas Reunidas has approved in 2020 a Sustainability Policy that establishes the general principles and bases of the Técnicas Reunidas Group's sustainable development strategy, to guarantee that all its corporate and operational activities promote the creation of value in the long term for all Técnicas Reunidas stakeholders. In particular, Técnicas Reunidas contributes with its activities to the protection of the environment and the fight against climate change, by developing technical solutions that allow the construction of sustainable and efficient plants for its clients and generating quality employment for its professionals to the progress of the communities of all the continents in which it is present.

Within the Sustainable Development Goals, the Group particularly meets goals 7, 9 and 13, referring to the supply of affordable and non-polluting energy, building resilient infrastructure, promoting inclusive and sustainable industrialization and fostering innovation and the fight against climate change.

Other Sustainable Development Goals to which Técnicas Reunidas is especially committed are SDG 1, "End of poverty", through a commitment to local suppliers and subcontractors that meet high sustainability standards; SDG 8, "Decent work and economic growth", promoting sustained, inclusive and sustainable economic growth and decent work for all; SDG 12, "Responsible consumption and production", guaranteeing sustainable production methods and betting on the circular economy; SDG 13, "Action for the climate", developing proprietary technologies directly related to the reduction of CO₂, NO₂ or NO_x; and SDG 17, "Alliances to achieve the objectives", collaborating with our clients, suppliers and other top-level entities such as the Global Compact, CDP or the Club of Excellence in Sustainability.

For all these reasons, it is an honor for me to renew the adherence of Técnicas Reunidas to the Global Compact for the year 2021, with the firm intention that this also happens in the coming years.

Juan Lladó Arburúa
Executive Chairman
