## Human Rights

- **Principle 1 - Businesses should support and respect the protection of internationally proclaimed human rights**
- **Principle 2 - Make sure they are not complicit in human rights abuses**

## Assessment, policy and goals

CSOB fully respects, supports and has implemented principles underlying universal human rights, including the right to equal opportunity and non-discrimination, the right to the security of persons, the right of employees (including opposition to any forms of compulsory child labour, the right to a safe and healthy working place, the right to freedom of association and collective bargaining), respect for national sovereignty and obligations with regard to consumer protection and environmental protection. In this respect, CSOB proclaims a spirit of the United Nations Universal Declaration of Human Rights, the Fundamental International Labour Organization Conventions, the European Convention for the Protection of Human Rights and Fundamental freedoms and other international and regional human rights treaties containing internationally recognizes standards that the business sector must respect, and complies with the law, rules and regulations of the Slovak

Republic. The issue was adopted by the official KBC Group's statement on human rights. CSOB specifically defines its respect on human rights in written policies such as **KBC Group - wide employee stakeholder policy** (policy applies on Slovak republic), **Code of Conduct** (generalized document) and **Collective Contract** (special agreement concluded between the company as an employer and Trade Union of the company).

Explicit statement on respecting human rights is included also in the **Code of Conduct**, generalized document adopted from KBC Group. The Group's managers monitor compliance with the Code of Conduct and regularly evaluate the individual conduct of staff against group values. Failure to comply with the Code of Conduct can lead to the imposition of sanctions foreseen in the applicable rules, on the basis of which the local working relationship is regulated and will be applied after impartial, sensitive and fair examination. Code of Conduct is based on the group values, and forms the basis for the development of specific codes for specific target groups, Group Compliance Rules, Group Standards, etc.

Other important document defying the elimination or interdiction of discrimination is the **Collective Contract**. CSOB is obliged to ensure equal treatment of all employees regarding their working conditions, including remuneration and other monetary transactions and monetary value, training and opportunity to achieve post or other promotion. The unequal treatment is not a distinction to be determined by the **Labour Code** or by special legislation or if it is the real reason inherent in the nature of work the employee performs and which is necessary for this exercise. Relating to the labour, prohibited is direct and indirect discrimination on ground of sex, sexual orientation, race or ethnic origin, nationality, national or social origin, gender, language, disability, age, religion or belief, property, marital and family status or political or other opinion, membership and activity in political parties or political movements, trade union or employer organizations; discrimination because of pregnancy or maternity is considered sex discrimination. Discrimination is also considered deal involving incitement, inducement or coercion leading to the induction of discrimination.

Concerning the rules of **recruitment and employment**, all CSOB's internal regulations respect or are based on the **Labour Code**, effective and valid in the Slovak Republic that covers respecting human rights and preventing potential abuses.

CSOB requires its **suppliers to respect human rights**. Connecting with the KBC rules, the company implemented in 2009 requirement to the **Request for Proposal rules** (RFP). Since that all suppliers, who have been contacted with respect the RFP have to submit together with proposal also the declaration with such information.

## Implementation

CSOB fully respects written policies concerning human rights and provides equal opportunities for employment. Concerning rules of recruitment and employment, all CSOB's internal regulations respect or are based on the **Labour Code** effective and valid in the Slovak Republic that covers

respecting human rights and preventing potential abuses. CSOB follows all these regulations in every communication with employees or candidates. CSOB communicates all open job positions publicly, in both genders (he/she manager) as well.

According to Slovak legislation, the company has a duty to employ certain percentage of handicapped or disabled persons. The high of percentage depends on the number of employees of a particular company. If company is not able to comply with this condition based in law, it should either pay a penalty to the state organs or have a possibility to use services or purchase goods from sheltered workshops employing handicapped people. CSOB uses this possibility because CSOB hasn't been able to employ the exact number of handicapped people, but the company orders central security services from the sheltered workshop employing handicapped people.

CSOB demands to respect human rights also from its suppliers. Following the KBC rules, the company implemented it to the **Request for Proposal rules** (RFP). Since that all suppliers, who have been contracted with the respect to the RFP have to submit (to the CSOB's Procurement Unit), also the declaration with such information. If anyone of these suppliers does not provide us this declaration, he/she will be eliminated from the RFP. Suppliers by their signature of the document confirm non-acceptance of child and forced labor, respect to the **Collective Contract**, elimination of race and any discrimination, respect to an anti-corruption policy and reduction of negative environmental impacts.

All employees have a possibility to raise an objection or make a complaint about incidents of human rights violations towards any of their colleagues. Respecting special, delicate cases or non-specific requests the company created a separate mail box **my@csob.sk**, where all the requests and questions can be addressed. The mail box is checked by the CSOB's Communication Unit that afterwards deals with the requests or distributes them to the relevant units of the company.

CSOB is also aware of importance of awareness raising or training of employees on human rights. All above mentioned documents are available on the intranet (accessed by all employees) and irregularly presented via other internal communication channels (weekly newsletter, bimonthly e-magazine).

During the reporting period, CSOB implemented the topic of the protection of human rights in the special training, e. g. **Introduction days** for newcomers. This topic is covered in presentation of Human Resources Unit's representative and Trade Union's representative. Every new employee gets the short basic information on this topic signing the entrance contract and receiving all the entrance formalities. **In 2020, 276 new employees completed introduction day trainings.**

CSOB and its Compliance Unit have to prevent that the company incurs in a compliance risk or suffers damage, likely to derive from its noncomplying with applicable laws, regulations and internal rules falling under the scope of the Compliance function or under the domains assigned to it by the board of directors. The Board of Directors, as the case may be via the Audit, Risk and Compliance Committee, annually assesses on the basis of reports, the containment of the Compliance risk. The Board of Directors is responsible for ensuring the setting-up of the function, the development and the implementation of the Integrity Policy, to check the appropriateness of and obedience to relevant company policies.

Compliance Unit of CSOB is equally mandated to perform Compliance Monitoring Program (CMP) testing in the company under the functional steering of Group Compliance.

The development of the CMP was decided in order to better mitigate compliance risks by verifying the existence and soundness of internal controls (first line of defence) and to verify the reliability of assessments in its domains.

The set-up of the CMP consists of an overview of compliance requirements following from existing laws, regulations, policies and an inventory of related controls. Under a risk-based approach tests on the functioning of these controls are performed. The program then results in structural recommendations or concrete action plans. Follow-up and final reporting is also ensured.
