Description of Actions

As an independent non-profit Think Tank we operate as a research organization within the civil society space. Hence our activities encompass expectations from both academic and civil society organizations. CESD incorporated the UN Global Compact principles into its internal operations. We did this by making advocacy for human rights especially women's rights, sustainable infrastructure delivery, environmental sustainability and anti-corruption integral parts of our corporate identity. In addition promoting UNGC principles is stated as one of CESD's corporate objectives.
