

COMMUNICATION ON PROGRESS (COP)

By Environmental Solutions (Asia) Pte Ltd

Period of Reporting: 16 Feb 2020 to 15 Feb 2021

16 Feb 2021

Dear stakeholders, partners and clients,

I am pleased to reaffirm Environmental Solutions Asia's commitment to and support of the Ten Principles of the United Nations Global Compact in the areas of Human Rights, Labour, Environment and Anti-Corruption. We have been a member since May 2019.

In this annual Communication on Progress, we describe our actions to continually improve the integration of the Global Compact and its principles into our business strategy, culture and daily operations.

Our sustainability strategy is our business strategy. This means that we imbue our sustainable business practices in all that we do. We are aligned with the 17 UN Sustainable Development Goals, where we actively contribute to 5 goals while supporting 4 other goals.

Yours Sustainably,

Quek Leng Chuang

Chief Executive Officer

Human Rights

- Ensure workers are provided safe, suitable and sanitary work facilities (Please refer to our Health & Safety Policy attached)
- Take measures to eliminate designs, defects or side-effects that could harm or threaten human life and health during the processing of waste and in all areas of our operations

Labour

- Ensure that the company does not participate in any form of forced or bonded labour
- Ensure that employment-related decisions are based on relevant and objective criteria

Environment

- Actively contribute to the mitigation of climate change by using renewable energy in our operations (See Energy Management Policy attached)
- Promote and maintain a sound environmental culture, through the full cooperation of all working personnel (See Environmental Policy attached)

Anti-Corruption

- Assess the risk of corruption when doing business
- Ensure that internal procedures support the company's anti-corruption commitment

Key Outcomes in 2020

- Recycling rate: Diverted 20,000 MT of waste away from landfill
- GHG Emissions: Contributed to a nett negative 130MT CO2 eq through the use of renewable energy derived from waste wood gasification

Key Targets by 2023

- Recycling rate: Increase the national recycling rate of plastic, wood, ash & sludges by 2%, 10%, 20% respectively (using 2019 as the base year)
- GHG Emissions: Contributed to a nett negative 22,000MT CO2 eq through the use of renewable energy

Our commitment to the UN Sustainable Development Goals

We protect our environment by treating and disposing of waste responsibly.

We address climate change by generating affordable and clean energy.

We forge partnerships for goals to create social impacts for decent work and economic growth.

We strengthen our industry, innovation and infrastructure with new technological applications.

We reduce the nation's material footprint by transforming hazardous and general waste into renewable resources.

We promote responsible consumption and production, sustainable cities and communities through main business activities.
