United Nations Global Compact

To our stakeholders,

We are aware that the key requirement to participate in the UN Global Compact is the annual preparation and posting of the Communication on Progress (COP) report that includes the commitment of our CEO statement of the continued support to the UN Global Compact, a description of current actions that comply with the principles of the UN Global Compact, and the resulting actions.

We are currently preparing the 2020 Annual Sustainability Report (in compliance with the GRI Standards) that will be our COP. In this report, we are including the topics that the COP requires. We traditionally publish this report during May, since the information on the sustainable management of Banco Nacional de Costa Rica Financial Conglomerate (CFBNCR) needs to be collected. On the other hand, our report must include the audited financial statements of the CFBNCR, which are approved in March each year.

For the above reasons, we kindly request our COP deadline to be adjusted to June 15. We commit to preparing and presenting our report on a yearly basis, before this date.

Sincerely yours,

Margarita Murillo Vargas
Executive of Sustainability
Institutional Relations
Banco Nacional de Costa Rica
