Statement of Continued support

With this letter Movestic is pleased to confirm its continued support regarding the Ten principles of the United Nations Global Compact on human rights, labor, environment and anti-corruption. With this communication, we confirm our continues commitment to the principles and making it part of the strategy, culture and day-to-day operations of our company.

Being a provider of occupational pension, private pension and insurance related to life and health, our position gives us a unique opportunity, as well as a responsibility, to influence. We have the possibility to, encourage and help both our business partners and our customers to act with a long-term focus on the Ten principles.

Our company is developing digital services and information tools to inform, engage and educate towards *inter alia* more sustainable development. Ultimately this will contribute to the global shift and drive demand for more sustainable investment products and services.

To this letter we attach the Communication on Progress (COP) outlining our most recent actions. Our responsibility as an insurance company with focus on both pensions and insurance cover for life and health, is to contribute to a more sustainable development, both from a collective and individual perspective. Movestic's sustainability work covers three areas, responsible investments with focus on the long-term sustainability of our society, financial security for our customers, now and in the future, a long-term sustainable working life for our employees and for society as a whole.
