

Ongoing support for the United Nations Global Compact

Paris, November 18, 2021

A signatory to the United Nations Global Compact since 2012, Klépierre reiterates its full backing for this voluntary international CSR initiative, and its commitment to the improvement process on the 10 universal principles promoted by the Global Compact.

Based on strong and long-standing convictions, our CSR approach “Act for Good® with Klépierre” is an integral part of our strategy. Jointly developed with our stakeholders and based on the risks and opportunities related to our activity, Act for Good® contains concrete commitments for the planet, for territories and for people, to be reached by 2022. It also sets our ambitions for 2030 in the same areas.

The information presented in our **2020 Registration Document** available on our corporate website reflects our convictions and corresponds to our *Communication on Progress* for 2020. It gives a better idea of the Group’s commitments and responsibility, and is presented with a genuine concern for transparency.

Because these commitments are supported across all Group functions and by all employees on a daily basis, we constantly innovate to ensure that the conditions for sustainable growth are in place.
