**COMMUNICATION ON ENGAGEMENT (COE)**

December 02, 2021

Part I. Statement of Continued Support by the Chief Executive or Equivalent.

To our stakeholders:

I am pleased to confirm that "International Centre Save the Children from Cybercrimes " (ICSCC) reaffirms its support to the United Nations Global Compact and

its Ten Principles in the areas of Human Rights, Labor, Environment and Anti-Corruption. This is our Communication on Engagement with the United Nations Global

Compact. We welcome feedback on its contents.

In this Communication of Engagement, we describe the actions that our organization

has taken to support the UN Global Compact and its Principles as suggested for an organization like ours. We also commit to sharing this information with our stakeholders using our primary channels of communication.

ICSCC is already engaged in activities linked to the ten principles of the UN Global

Compact. We strongly believe that our participation in the UN Global Compact will foster our socially responsible initiatives and add further value to sustainable development at global level.

Sincerely yours,

Sergey Pestov,

CEO Autonomous Non - Commercial Organization

"International Centre Save the Children from Cybercrimes"

## **Part II. Description of Actions.**

We conduct individual work with parents and teachers in the following areas: pedagogy and psychology, law, information and computer security, analyze the content of user activity in social Internet networks.

In the course of monitoring activities on information social activity in educational institutions, we carry out information patronage in the following areas: research of accounts in social Internet networks, detection of potential cyber risks of involving minors in destructive communities.

We carry out the detection of conflict situations in the studied educational team, record such manifestations, with further notification of teachers about incidents and identified aggressive manifestations among students. We analyze the risks of destructive impact based on the collection of analytical data on the involvement of minors in destructive communities, with further prediction of the involvement of students in informal currents of an illegal nature.

According to the appeals of parents, guardians, legal representatives, we conduct a survey of social activity on the Internet on the submitted account of a minor, identify possible risks and conduct a detailed analysis of the pages.

We have done a lot of work, conducting monitoring studies on the Network, identifying and identifying new trends of destructive trends in the means of communication.

Every year, tens of thousands of pages of groups engaged in the dissemination of negative, harmful information for children have been transmitted and are being transmitted to Roskomnadzor and other government agencies. We have prepared a website page on which any Internet user can independently choose a state body to submit an application for illegal content in accordance with the subject of the appeal. (<http://62ru.ru/сообщить-о-нарушении.html>)

We provide assistance to parents, teachers, conduct consultations in various fields, by the organization, as well as with the involvement of specialists. In the future, if desired, we coordinate the necessary measures.

We prepare and distribute memos for parents, conduct lectures with teachers, presenting them with the necessary tools to resolve conflict and dangerous situations for minors. We are working to identify negative online communities, destructive orientation, potentially dangerous for minors: incitement of ethnic hatred in the adolescent environment; social inequality among the adolescent audience; non-traditional forms of interpersonal relationships; suicide, parasuicide, other dangerous forms of behavior, for example, anorexia, self-harm ("selfharm"); distribution of video images with real footage of people's deaths; psychoactive substances, alcohol, tobacco, drugs, "vaping"; tattooing as a form of destructive deviant self-expression; "hooking", "ruffering" and other dangerous actions that subsequently lead to the death of children; involvement of minors in early sexual relations, prostitution, use of children as an object of porn business; abuse of people and animals, violence against animals and bullying of people; introduction of depressive content into the social youth culture; propaganda of the cult of death;

denial of generally accepted norms of morality and morality; involvement of teenage children in participation in mass riots; aggressive manifestations against teachers, parents, society, individual social groups. These are just some of the destructive currents that are in the process of constant renewal, which are spreading in the information environment of youth and children's communications.

The work carried out by our organization in recent years to identify and prevent information risks on the Internet has allowed us to identify potentially dangerous areas of negative influence on young people, as a result of which we find and offer solutions that help reduce risks for children, provide teachers and parents with the necessary tools to ensure the safety of minors, come out with constructive proposals to public authorities to implement cybersecurity programs.

Self-isolation has exacerbated many communication problems and created new potential risks. We can state that the number of disinformation messages in mass mailings in messengers and social networks has increased. Information attacks cover all sectors of society. Investigating the motives of all cybercrimes committed, we came to the conclusion that almost all of them are based on the presentation of false information, further manipulation, misleading, intimidation, blackmail. Thus, all programs aimed at reducing cyber risks without processing up-to-date information, identifying false information distributed on the Internet, and communicating the collected information to the general public in order to form a critical approach to information will be ineffective. This is the innovation of our approach-in identifying new trends of disinformation that affect almost the entire society, building programs to counter cybercrime using the latest data. We have also summarized the most common questions about the use of distance learning technologies and will cover the most relevant topics during the events. Work on the project will be carried out in target groups: schoolchildren, parents, teachers. The effectiveness of achieving the goals will be realized by holding a set of events with the participation of parents, legal representatives of teachers, the project team, and involving volunteers:

1. Monitoring and analytical activities: training at least 10 volunteers to legally collect and record information, conduct sampling in social networks of groups with destructive content and minors who are in them. Analysis with classification by region, passing information to the project team. In the future, take the necessary measures and provide assistance within the scope of competence, based on the current legislation.

2. Methodological and expert: preparation and release of materials: recommendations, algorithms of actions, memos, presentations, for parents, teachers, schoolchildren.

3. Public events: informational and educational, training, lecture halls, seminars. Possible application of distance learning technologies:

- a) from parents, legal guardians, teachers training group seminars;

- b) minor: lessons from media security, network behavior, introduction to health save technologies;

- C) round table with the participation of the concerned officials of relevant ministries and departments, law enforcement agencies, and the public;

d) regional webinar with teachers;

4. Consulting services. Individual psychological and legal consultations, possibly with the use of remote forms, by phone, in person. The main results of the project will be: improvement of competencies in the prevention and combating of cybercrime in the designated target groups, further application of knowledge.

### Part III. Measurement of Outcomes.

On **November 17, 2021**, we participated in the conference at the Public Chamber of the Russian Federation "Organization of NGO work with minors of the "risk group" and their families".

On **November 11, 2021**, the Academy of Civil Protection of the Ministry of Emergency Situations of Russia organized the international conference of the IV International Youth School of the CSTO "Topical issues of Eurasian Security. Protection of the population from emergency situations".

Sergey Pestov, General Director of the International Center Save the Children from Cybercrime, lecturer of the Department of Infocommunication Technologies and Communication Systems of the Academy of Civil Protection of the Ministry of Emergency Situations of Russia, made a report at the section "Countering New Challenges and Threats".

**October 24, 2021** In the final news of the week on NTV with Iraida Zeynalova. A story about new cyber threats for children. Sergey Pestov, General Director of the International Center for Saving Children from Cybercrime.

<https://youtu.be/ISxthH5CYXY>

**September 29, 2020** Comment in the press. Sergey Pestov, Director General of the International Center for Saving Children from Cybercrime, believes it is right that the curators of death groups began to be involved in a more serious article than driving to suicide. According to him, public figures have been insisting on this since 2016.

[https://stav.aif.ru/society/person/igral\\_s\\_chuzhimi\\_zhiznyami\\_sozdatelya\\_grupp\\_s\\_merti\\_s\\_kmv\\_otpravili\\_v\\_koloniyu](https://stav.aif.ru/society/person/igral_s_chuzhimi_zhiznyami_sozdatelya_grupp_s_merti_s_kmv_otpravili_v_koloniyu)

**September 22, 2021** Sergey Pestov's participation in the program with coverage of 12 million viewers "Digital ethics. Where do the digital boundaries of a teenager

end?"

<https://ok.ru/video/2697857474186>

**September 20, 2021** In the footsteps of the "Perm shooter": why it is necessary to provide psychiatric assistance to murderers. The head of the Center for Saving Children from Cybercrime, Sergey Pestov, noted that psychological and psychiatric care is "not available to most citizens today," since the services of a psychologist and a psychiatrist "are not included in the CHI system."

<https://sevastopol.su/news/po-sledam-permskogo-strelka-pochemu-nuzhno-okazyvat-psihiatricheskuyu-pomoshch-ubiycam>

**May 26, 2021.** The safety of children in the Internet space and the issues of organizing safe leisure and employment of children and adolescents were discussed on May 26 2021 at the House of Public Organizations at a round table meeting "On the activities of SO NGOs of the Ryazan region on organizing safe

leisure for children and preventing Internet threats to the life of the younger generation."

The heads of two Ryazan public organizations told about the experience of combating Internet threats aimed at children: the Center for the Protection of Children from Internet Threats and the International Center Save the Children from Cybercrime. <https://ryazpressa.ru/kak-zashhitit-podrostkov-ot-internet-ugroz-obsudili-v-ryazani/>

**May 11, 2021** "The prevention system does not work. I have come across such schools while working on various incidents. Connivance and cover—up is the main factor in the mass death of children in schools," said Sergey Pestov, head of the Center Save the Children from Cybercrime, in an interview with a ForPost correspondent.

<https://sevastopol.su/news/tragediya-v-kazani-pochemu-v-shkolah-massovo-ubivayut-detey-i-chto-s-etim-delat>

**March 9, 2021** Children on the Internet. Fragment of the release from 09.03.2021 Kids love to imitate: surfing on the road or playing "Run or Die". Four years ago, the Internet was full of dangerous fun. Now, after a year of removal, a new surge ... Sergey Pestov lost his daughter in 2016. He was able to prove that the girl was deliberately brought to a dangerous line, sold the house, created a Center for saving children from cybercrime. "Now social networks will be responsible for what is located on their sites," said Sergey Pestov. — We have been going to this for five years."

**March 3, 2021** Sergey Pestov - How and from what are children protected in Russia? - Watch on the Air

**March 1, 2021**

Pestov told about proven cases of earnings of curators of death groups Who, how and for what money supervised children's death groups, said Sergey Pestov, Director General of the International Center Save the Children from Cybercrime, during a press conference of the Patriot Media Group and FAN.

"Death groups have their roots in the darknet. There, at one time, banned terrorist organizations organized red rooms and made bets on death on the air. It was very popular among rich people, so everything paid well. At one time there was such a "business on death," explained Sergey Pestov. <https://riafan.ru/1394726-pestov-rasskazal-o-dokazannykh-sluchayakh-zarabotka-kuratorov-grupp-smerti>

**February 16, 2021** Sergey Pestov, General Director of the ANO "International Center Save the Children from Cybercrime": It is clear that when some unpleasant situations happen, parents want to absolve themselves of responsibility and blame groups and publics in social networks that pushed their child to a rash step, but this is not the case. There are cases when children are overloaded both psychoemotionally and physically, because they must meet the expectations of others: study well, develop comprehensively, be obedient. But after some time, the child may realize that he has other interests and desires, but they are not taken into account, and he begins an internal conflict that can develop into a global problem at any moment. Parents should always know who their child is communicating with and what is bothering him.

[https://samara.aif.ru/society/details/deti\\_virtualnogo\\_mira\\_v\\_chyom\\_nuzhdayutsya\\_a\\_sovremennye\\_podrostki](https://samara.aif.ru/society/details/deti_virtualnogo_mira_v_chyom_nuzhdayutsya_a_sovremennye_podrostki)

**February 1, 2021** The Director General of the International Center Save the Children from Cybercrime spoke about unauthorized rallies.

– The problem of information security was, is and will be. But it is especially relevant for the younger generation, which, under the influence of networks, forms a worldview and political views. If this field is dirty, with unreliable, inaccurate and frankly fake content, then we will get an unhealthy society. We all need to learn that the protection of children and young people begins with the information they receive. <https://rv-ryazan.ru/sergej-pestov-kogda-internet-stanovitsya-opasen/>

**January 29, 2021** HOW CHILDREN ARE LURED INTO DEATH GROUPS. The TV channel SAVED 936 thousand subscribers <https://youtu.be/D67lxuo2F8o>

**January 27, 2021** The path of insults, Pestov is sure, leads nowhere. This only benefits those who manipulate children. <https://sevastopol.su/news/otcy-i-deti-stoit-li-vyshedshih-na-miting-podrostkov-schitat-predatelyami>

**January 26, 2021** "At the moment, as far as I know, there are no programs in the world that automatically regulate video content. The content is regulated either by the users themselves, who demand to delete videos of questionable content, or the Internet platform itself does it, relying on internal rules for posting videos," Pestov explained. <https://sevastopol.su/news/smert-v-pryamom-efire-tresh-strimeram-obyavili-voynu>

**November 29, 2020** Following the results of the conference in St. Petersburg, published in the collection of materials of the scientific and practical conference "Youth policy: state, problems, prospects" 2020.

A scientific article was published:

THE STATE AND PROSPECTS OF DEVELOPMENT OF THE INFORMATION SOCIETY IN RELATION TO YOUTH AND CHILDREN IN THE MODERN WORLD

Authors:

Shkurupey O.V., Head of the Methodical Department of St. Petersburg State University

S.V. Pestov, General Director of the ANO "International Center Save the Children from Cybercrime",

**November 26, 2020** The current legislation already provides for liability for people who try to incite social, religious or racial hostility. Head of the Center for Saving Children from Cybercrime Sergey Pestov.

<https://sevastopol.su/news/cenzura-v-shkole-kto-v-uchitelyah-uvidel-vragov-rodiny>

**October 17, 2020** We talked with the general director of the non-profit organization "International Center Save the Children from Cybercrime" Sergey Pestov. This is the first legal precedent when the curators of the "death groups" were involved under the article "attempted murder". The convicts are residents of Primorye. Our Ryazan child almost died because of them. One of the defendants is 22-year-old Ilya Tolmachev, known online under the nickname "May", the second is 24-year-old Elena Sinelnikova. Due to the special importance and danger of the crime, the investigation was conducted by the central office of the Investigative Committee. 35 examinations were carried out.

<https://rg62.info/2020/10/16/deti-v-internete-uroven-smerti/>

**October 1, 2020** The Center Save the Children from Cybercrime is one of the organizations that helps law enforcement agencies identify destructive groups on social networks, including those involving teenagers.

Specialists of the public organization have repeatedly saved the lives of children and helped put the curators of the "death groups" in prison. The head of the center, Sergey Pestov, is sure that there is nothing for teachers to do on this virtual battlefield.

"Despite this, teachers are sometimes recommended to view the social networks of schoolchildren. It's one thing if a teacher wants to communicate with a student on the Internet. Even special class groups are created in social networks that can be useful for the educational process. Another thing is when teachers are forced to evaluate the pages of children in various public places. It will not lead to anything good," Pestov stressed. <https://sevastopol.su/news/uchitelya-ustroili-ohotu-zapodrostkami-v-socsetyah-pochemu-eto-dvazhdy-plohaya-novost>

**September 9, 2020** Pestov is sure that a schoolboy who was placed in a mental hospital will hate his parents. Perhaps he will stop communicating with his father and mother for life, or perhaps he will blame them until he realizes that his parents saved his life by such a decision.

"The state should actively support non-profit organizations specializing in providing psychological and legal assistance to the population. For example, presidential grants have so far bypassed NGO projects to provide targeted psychological assistance, assistance to adolescents in the information space, while the UN has already taken a course to prevent cybercrime, including in the adolescent environment," Pestov stressed. <https://sevastopol.su/news/pacan-k-uspehu-shel-rossiyskie-regiony-zahlestnulo-dvizhenie-kolumbayn>

**August 28, 2020** The decision of the Supreme Court of the Russian Federation to ban the movement of AUE\* will have a positive impact on crime prevention in the country. This experience can be used in the future to prevent the spread of other extremist trends in Russia. Pestov noted that groups on social networks advertising the criminal subculture have already been blocked. <https://sevastopol.su/news/bez-brigady-i-sashi-belogo-v-rossii-zapretili-aue>

**August 24, 2020** On August 17, the Supreme Court of Russia recognized the public movement "Arrest Criminal Unity" (AUE) as an extremist organization. The harm caused by its ideology was discussed in the program "Family Abc". And the guest was Sergey Pestov, head of the International Center Save the Children from Cybercrime.

**August 18, 2020**, The head of ANO "ICSDK" Sergey Pestov took part as an expert in the program "Radio of Russia" "Relevant. Events, facts, comments" with presenter Ivan Volonikhin. The adoption of a decision by the Supreme Court of the Russian Federation on the recognition of the AUE movement as extremist in the territory of the Russian Federation was discussed. <https://youtu.be/IQD4wkeLVPI>

**August 12, 2020**, at the invitation of the Minister of Territorial Affairs and Information Policy of the Ryazan Region, Zhanna Fomina, a meeting of representatives of non-profit organizations engaged in public activities in the field of information security was held: ANO "ICSDK" and ANO "TSZDIU". During the meeting, in particular, the Director General of the International Center for Saving Children from Cybercrime Sergey V. Pestov outlined important points of interaction with regional government organizations. The meeting was held in a friendly atmosphere of mutual understanding and in a constructive manner.

**July 9, 2020**, Sergey Pestov, General Director of the International Center Save the Children from Cybercrime, was solemnly awarded a master's degree in jurisprudence at the Russian Academy of National Economy and Public Administration under the President of the Russian Federation: "Lawyer for business and government to ensure human rights."

The master's thesis of S. Pestov: "Modern information society and youth, legal research" became the best final qualifying work in the direction of preparation of the magistracy "Jurisprudence" at the Presidential Academy.

**2 July 2020** According to Sergey Pestov, the head of the Center Save the Children from Cybercrime, progress has been made in the fight against the Blue Whale groups in Russia over the past three years.

<https://sevastopol.su/news/detskie-igry-v-smert-siniy-kit-uplyl-v-telegram>

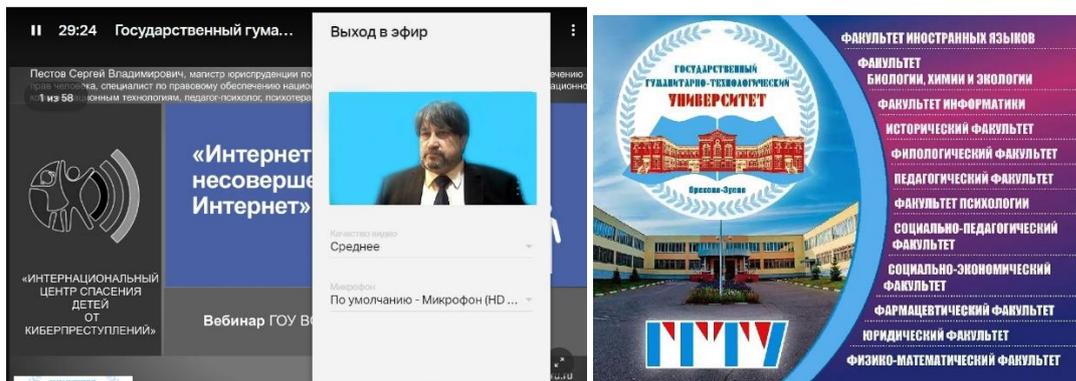

**June 24, 2020** The head of the Center for Saving Children from Cybercrime, Sergey Pestov, told RIA Novosti that in the last three weeks alone, his staff had transmitted to the UK data on 30 children who are in potential danger.

On the part of the state, Roskomnadzor should identify and block such content. Since 2017, the agency has restricted access to 168 thousand pages with suicidal content in the social networks VKontakte, My World and Odnoklassniki.

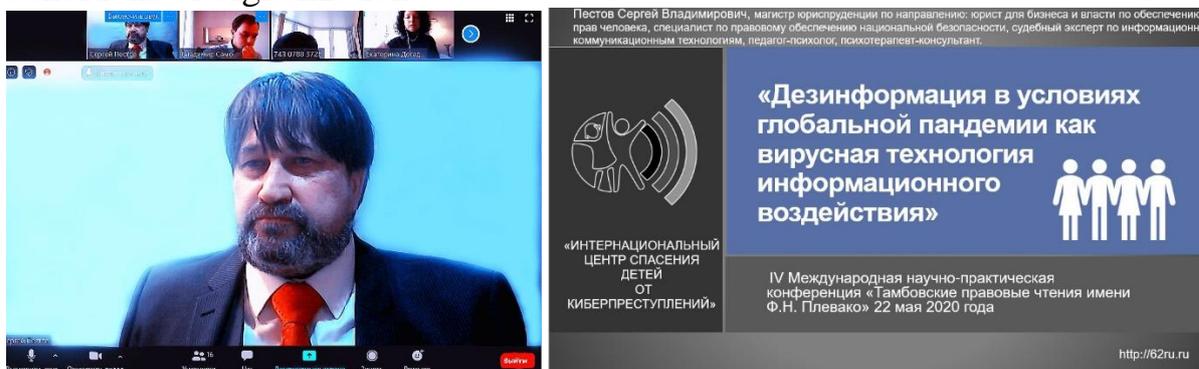

<https://ria.ru/20200620/1573186152.html>

**June 4, 2020** At the invitation of the "State University of Humanities and Technology" (Moscow), the General Director of the "International Center Save the Children from Cybercrime" Sergey Pestov held a webinar on the topic: "Internet threats to minors on the Internet" with teachers of educational institutions of the

Moscow region and Moscow. The event was attended by teachers of the city districts of Bogorodsky, Pavlovsky Posad, Elektrogorsk, Noginsk, Shatura, district settlements: Zeleny, Obukhovo and others, as well as the city of Moscow. Materials are presented for teachers, for further work in teams, with parents and children.

**May 22, 2020**, The partner of the International Center for Saving Children from Cybercrime, the Institute of Law and National Security of the Tambov State University named after G.R.Derzhavin, within the framework of the IV International Scientific and Practical Conference "Tambov Legal Readings named after F.N. Plevako", held a round table "Modern Law and the state in the conditions of digitalization".

From **April 13 to 17, 2020**, the General Director of the International Center for Saving Children from Cybercrime, Sergey Vladimirovich Pestov, took part in a complex of scientific events for students "Golden Ring" at the Vladimir Law Institute of the Federal Penitentiary Service of Russia. Within the framework of the "Golden Ring", scientific events (intellectual games, conferences, contests, quizzes, round tables, etc.) for cadets, students and law students were held during the week at the VUI of the Federal Penitentiary Service of Russia.

**March 18 , 2020** At the invitation of the Head of the Migration Department of the Ministry of Internal Affairs of Russia in the Orel region Natalia P. Balashova, Director General of the International Center for Saving Children from Cybercrime Sergey V. Pestov held a master class on cybersecurity in the information society and youth.

There were also discussions with employees of special security units working in the field of prevention and disclosure of cybercrime on the Internet.

**March 17 , 2020** Academy of the President of the Russian Federation, - RANEPA: Central Russian Institute of Management - branch of RANEPA, Orel. Sergey Pestov, General Director of the International Center for Save the Children from Cybercrime, held a lecture on cybercrime with students of the Law Faculty of the RANEPA Banking College. The students showed genuine interest in the lecture information. The issues of manipulation in the information environment were also dealt with.

We thank the organizers and Associate Professor of the RANEPA Banking College Borisov Alexander Sergeevich for inviting and organizing the event.

**March 11, 2020** From trolling to bullying. Is there a way out? Public Television of Russia 166 thousand subscribers the guests
