

Paris La Défense, the 13th January 2022

Communication of Progress 2022 statement

To our Stakeholders,

I am pleased to confirm that Safic-Alcan reaffirms its support of the Ten Principles of the United Nations Global Compact in the areas of Human Rights, Labor, Environment and Anti-Corruption.

In this second sustainability report, we describe our actions to continually improve the integration of the Global Compact and its principles into our business strategy, culture and daily operations.

The difficulties of the Covid crisis tested our resilience and adaptability, but we continued to act on our commitment to be the long-lasting, durable link connecting both principals and customers together in the implementation of sustainable innovation in the marketplace.

In 2020, Safic-Alcan conducted its first materiality assessment, a formal process of listening to and consulting with stakeholders on ESG topics. The assessment has brought genuine added value by confirming the adequacy of ESG initiatives already in place and suggesting pathways for improvement. We are now in the process of integrating and deploying those initiatives in our businesses. As such, we have decided to concentrate our contribution on four Sustainable Development Goals instead of five as we used to do.

Throughout this report, we describe progress we have made over the past year in support of our commitment of the UNGC and its SDGs. We also commit to sharing this information with our stakeholders using our primary channels of communication.

Philippe Combette
Chairman of Safic-Alcan

2021, extra-financial performance recognized by EcoVadis and CDP

Safic-Alcan ESG approach is regularly assessed by extra-financial rating agencies. This year, two non-financial rating agencies have released their evaluation findings which show sustainable progress in the Group's ESG performance:

ecovadis

Safic-Alcan decided to implement a CSR (Corporate Social Responsibility) ongoing assessment process by using the EcoVadis CSR rating methodology, which is widely recognized and used by its suppliers, as well as its customers. The framework is based on the evaluation of the quality of a company's CSR management system through its policies, actions and results with regards to environmental, labour practices & human rights, fair business practices and sustainable procurement issues.

CDP, an international non-profit organization which analyses the integration of the environmental dimension in the strategies of companies, has assessed Safic-Alcan SAS (France only) in the Climate change area.

Safic-Alcan SAS received the "B-" rating in 2021, improving its rating from "C" to "B-" compared to 2020.
