

ESG Scorecard

Our ambition is to help build the most sustainable food supply chains in the world. Our commitments drive us forward.

Transparency in Focus

Cargill's purpose is to be the leader in nourishing the world in a safe, responsible and sustainable way. We have set science-based targets and invested in bold action to deliver on our ambition. We are committed to reporting progress against those goals, and to expanding transparency about the impacts of our operations, products and services, and supply chains around the world.

ENVIRONMENTAL

	Strategic Commitments and Targets	Progress by end of FY21
Climate Change Our targets contribute to the following SDGs:  	<p>Scope 1 and 2 (Operations)¹: Reduce absolute operational greenhouse gas (GHG) emissions 10% by 2025</p> <p>Scope 3 (Supply Chain): Reduce global GHG emissions from our global supply chain by 30% by 2030, measured per ton of product</p>	<p>-3.97% reduction² from FY17 baseline </p> <p>0.06M MT CO₂e reduced³ </p>
Water Resources Our targets contribute to the following SDGs:  	<p>Priority watersheds: Achieve sustainable water management⁴ in all priority watersheds by 2030</p> <p>Operations: Implement water stewardship practices at all priority facilities by 2025</p>	<p>Target met in 4 priority watersheds (3% progress) </p> <p>52% average implementation of water stewardship practices across all priority facilities </p>
Land Use Our targets contribute to the following SDGs: 	<p>Transform our agricultural supply chains to be deforestation-free by 2030</p> <p>Achieve zero deforestation across our priority supply chains of palm, soy and cocoa</p>	<p>Please visit our Reporting Hub for detailed land use reporting on our priority supply chains </p>

¹ Scope 1 and 2 refer to GHG emissions from our operations and from energy purchased from the grid, respectively. Scope 3 refers to upstream and downstream supply chain emissions.

² Calendar year 2020 results. Cargill's Scope 1 and 2 GHG inventory for calendar year 2020 was verified at a limited level of assurance by Optera. Please see Cargill's 2021 CDP Climate response for more information.

³ Cargill will report a % reduction against baseline by end of FY2022

⁴ We define sustainable water management as effectively balancing and addressing the shared water challenges of availability, quality and access to safe drinking water, sanitation and hygiene (WASH), using an approach that is informed by local context.
