
Conflict Minerals Policy Statement

OMON Group Inc. is committed to sourcing components and materials from suppliers and subcontractors that share our values with regards human rights, ethics and environmental responsibility. We expect all of our suppliers and subcontractors to abide by the requirements of our Business Ethics and Code of Conduct Policy for Suppliers and Subcontractors, which prohibits human rights abuses and unethical practices. We also require all suppliers to comply with applicable legal standards and requirements.

On August 22, 2012, the U.S. Securities and Exchange Commission ("SEC") issued the final conflict minerals rule under Section 1502 the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Conflict Minerals Rule"). The Conflict Minerals Rule requires publicly traded companies to report annually the presence of conflict minerals (tin, tungsten, tantalum and gold, or "3TG") originating in the Democratic Republic of the Congo or adjoining countries ("Covered Countries").

OMON Group Inc. requires that suppliers whose products contain tantalum, tin, gold and tungsten submit this information to OMON Group Inc. using the standardized EICC/GeSI Conflict Minerals Reporting Template that traces the metals back through the supply chain.

OMON Group Inc. requires all of our suppliers to provide us with completed conflict minerals declarations using the EICC/GeSI Conflict Minerals Reporting Template. We may reconsider our willingness to partner with suppliers that fail to comply with this Policy.

You can download a copy of the reporting template here:
