BPC's Corporate Social Responsibility Goals

Founded in 1996, BPC (Banking, Payments: Context) has transformed over the years to deliver innovative and relevant solutions which fit with today's consumer lifestyle when banking, shopping or moving in both urban and rural areas. Our purpose is to create a bridge between real life and the digital world, ensuring the technology we bring to market is a sign of self-development and progress for our economies. We have embedded major United Nations' Sustainable Development Goals into everything we do. Here are couple of examples of our initiatives for each goal.

FIGHTING POVERTY

Today, over 1.7 billion adults remain excluded from the banking system. BPC has always made financial inclusion a key priority, blending tailored solutions and smart data with processes that ensure successful inclusion. We make it possible for microfinance institutions to empower micro and small enterprises and foster their growth.

Example: Apna Microfinance initiative in Pakistan

QUALITY EDUCATION

With fintechs offering a host of opportunities for job creation, BPC believes it has to start with fintech education and hands-on experience. As a result, BPC has joined a number of educational initiatives to share knowledge with students in developing countries, offering them the opportunity to learn, to join BPC as an intern, or to improve their chances of finding employment within the industry.

Example: Aceda University in Cambodia

GENDER EQUALITY

To ensure equality among its employees and to deliver inclusive banking services, BPC embraces the equality movement. BPC joined the financial alliance for women for better education and inclusion of gender intelligence in financial services. BPC applies its key learnings to its own organization as well as sharing best practices with clients.

Example: Safal Fasal Marketplace by BPC for female farmers

INNOVATION

BPC takes a macro to micro view when it comes to innovation in banking, payment and mobility. From building national payment infrastructure to micro finance and smart city mobility, all worlds are intertwined. BPC does not hesitate to join forces to establish progressive concepts. We co-invest and co-innovate whenever it makes a positive impact on people's lives.

Example: Private and Public Partnerships in smart city projects such as Kyrgyzstan

BPC's Corporate Social Responsibility Goals

REDUCE INEQUALITIES

Income inequality is still a reality in many societies. BPC and its Safal Fasal Marketplace helps onboard isolated and remote farmers who own a very small parcel of land. The marketplace opens up new opportunities to join other producers and cooperatives with better chances to access direct buyers, resulting in higher and more regular income.

Example: Safal Fasal Marketplace by BPC, focusing on small parcel and remote farmers

SUSTAINABLE CITIES

BPC has expanded its business model with mobility and smart city services in response to governments' digital agenda. These industries have been experiencing a boom since the outbreak of the Covid-19 pandemic. With O-CITY, BPC promotes greener cities and citizens' well-being. The goals include zero paper, zero cash handling, and a reduction in individual car traffic for a greener and inclusive city.

Example: O-CITY by BPC in over 130 cities worldwide

LIFE & LAND

Out of respect for our biodiversity, BPC goes beyond technology with better education to respond to the land we live in. Through our Safal Fasal agritech marketplace, BPC conducts webinars to educate farmers on best practices to conduct their activities in a way that respects the safety of land and life, such as planting, organic production methods and a limitation on the use of pesticides.

Example: Safal Fasal Marketplace by BPC focusing on female farmers

PARTNERSHIPS

Go alone and you will go faster; go together and you will go far. BPC believes in building an ecosystem of players that can make a better impact in the world we live in. This includes financial inclusion, access to finance, fostering small enterprise growth and growing together. To deliver on our promise, we have built a strong network of partners in every country we work in.

Example: Partnership with Accion, NGOs and alliances

BPC's Environment Policy

It's vital to our future that every business does its part when it comes to reducing waster and protecting the environment, for these reasons BPC has put several measures in place to empower every employee to make an impact.

REMOTE WORKING

For BPC, Remote working has started from its inception. The company never believe in having its entire management team at its headquarters and spending times on aircraft. For BPC, proximity is essential, despite having 21 offices worldwide, BPC enables employees to work from they live from over 50 countries worldwide. That creates proximity with clients, unparalleled payment contextual knowledge and helps save the planet from unnecessary

Reduce the use of cars

GREEN OFFICES

At BPC, making the office green is everyone's role, use of plants across desks and spaces, no printing unless essential, recycling bins, switching off lights and investment in motion active lights, limiting the use of AC, switching off display screens, use of mugs instead of disposable glass and utensils. BPC is also exploring new water dispenser based on tap water and less electricity consumption.

Reduce, Re-use, Recycle

SUSTAINABLE CITIES

BPC has expanded its business model with mobility and smart city services in response to governments' digital agenda. Together with ministries of transport, BPC drives the removal of kiosks, paper based tickets, and the reduction of traffic through digital payments in tollgates, parking, public and private transfer, making these more attractive over single use of cars.

More public transport, less cars, no more paper tickets

LIFE & LAND

With its Safal Fasal marketplace, BPC conducts educative session to limit the usage of pesticide, to use water in a smart way and preserve soil to continue to grow healthy food for all. Over 500,000 farmers across India have joined our program where business is linked to preserving our lands from chemicals. BPC expects to impact on 1 million farmers in its second year of operations.

In Partnership with Accion, NGOs and alliances

Testimonials

Gender Equality and Fighting Poverty

Bhulaxmi MACS President
Bandari Shyamala

Visit Our MarketPlace →

“ Women farmers have come together to form Bhulaxmi Mahila Rythula Paraspava Sahaya Sakava Parapathi Marketing Ltd., a Mutually Aided Cooperative Society based out of Siddipet, Telengana. I am the President of this MACs. Our objective is to work toward female farmers empowerment . Due to COVID-19, there is a supply chain disruption and there is a distress kind of situation where the farmers’ produce are getting wasted. Safal Fasal platform has come to our rescue in this situation. ”

Board of Director member
Chikoti Pushpa

Visit Our MarketPlace →

“ Safal Fasal platform has facilitated vegetables transaction of over INR 3 lakhs for our MACs in last 2 months. This is really helping our farmers increase their income and the FPC has also earned around INR 25000 during this period. This earning will also be passed on for the benefits of the farmers. Apart from market linkages for agri-output, Safal Fasal is also advising the farmers and providing the farmers access to agri-inputs. ”
