Global Compact Office
New-York, NY 10017
United States of America

Paris, 30th of May 2022

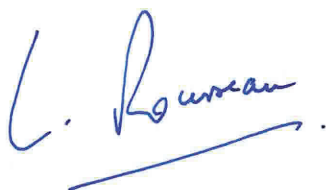

SCOR SE is please to renew its commitment to promoting and further advancing the success of the United Nations Global Compact, which the Group first formally endorsed in 2003.

Being at the heart of the key social, economic, and environmental issues facing society, SCOR SE's activities help to build the resilience of societies via its risk identification, analysis, transfer and pooling techniques. It is therefore pursuing the integration of the 10 principles covering human rights, international labour standards, environmental protection, and the fight against corruption, in a framework tailored to its sphere of influence.

Our 2022 Communication on Progress (COP) reflects this involvement. We notably outline our ambition in these domains and describe the implementation of our policies.

As SCOR SE aims at maintaining a high level of transparency on its environmental and social strategy, additional information can also be found in complementary reports such as the 2021 Activity Report, the 2021 Sustainable Investment Report and the 2021 Climate Report.

Yours faithfully,

Laurent Rousseau
Chief Executive Officer
