

## CEO Statement of Continued Support

### Atlantia's ongoing commitment to UN Global Compact and its principles

Dear Secretary-General,

I am glad to reaffirm Atlantia's continued support for the United Nations Global Compact (UNGC) initiative and the Ten Principles. We do believe that business has an important role to play in creating a prosperous future, and with less than a decade left to deliver the Sustainable Development Goals (SDGs) there is still a lot to do to address social, environmental, and economic challenges while creating new markets and growing economies as we go through a transition that has to be just and affordable for everyone.

We believe that we will be a better business by taking a long-term, sustainable approach where we seek to create value for all our stakeholders, to protect their rights and fundamental freedoms, fight discrimination of any sort, address externalities of the business on the planet, foster good governance founded on ethics. Our stakeholders, including passengers, customers and employees are all showing preference for sustainable, purposeful, responsible businesses. Capital markets are recognizing sustainable business to be better positioned to create long-standing value. Policy makers and regulators are requiring that business make a bold contribution to address social and environmental challenges.

In this challenging and constantly evolving market environment, Atlantia aims to actively promote and drive change by playing a central role in the mobility ecosystem, and underpinning value creation for all our stakeholders via the powerful combination of sustainability and innovation. The challenge of decarbonisation calls for a radical transformation of the mobility ecosystem, involving a host of actors who will need to share objectives and priorities to ensure a fair transition and long-term prosperity. Transport infrastructure, new forms of mobility and technology applied to the entire ecosystem will play a central role in this transformation that we are committed to enable and support. To accelerate transformational change, a long-term Climate Action Plan in line with science has been drawn up. This sets out guidelines for achieving total decarbonisation of our subsidiaries' activities under their direct control, and a substantial and steady reduction in upstream and downstream value chain emissions, with a commitment to develop a further set of actions to pursue our goal of net zero, including indirect emissions, by 2050.

We foster a culture of transparency, accountability and dialogue with stakeholders as we believe they are of utmost importance for the long-term prosperity of the business. Therefore, our Climate Action Plan was put to an advisory vote at the Shareholders' Meeting on 29 April, 2022, thereby launching a season of periodic consultation on this key topic which is unprecedented in the Italian market, and that gained the support of over 98% of shareholders.

We consider our stakeholders to be vital partners with whom we strive to guide our growth in line with the Ten Principles of the UN Global Compact, which are among our founding values and an integral part of our DNA.

Best regards,

Carlo Bertazzo
