## **Re: Letter of Commitment**

In this period, we have expanded our community engagement in health-related issues in resource-poor settings with the goal of getting the community ready to adapt to the devastating effect of COVID-19. We are concentrating on post-pandemic grass root community mobilization efforts in our locality and a health awareness campaign that aims to awaken the consciousness of people regarding hygiene and health.

This is based on our continued support of the ten principles of the UN Global Compact with respect to human rights, labor, environment, and anti-corruption. With this commitment, we express our intent to advance these principles within our sphere of influence and will make a clear statement of this commitment to our stakeholders and the public.

We are ready to take part in the activities of the UN Global Compact where appropriate and feasible – through, for instance, participation in Country/Local Networks; involvement in specialized initiatives and workstreams; engagement in partnership projects; and reviewing and providing commentary to participating companies on their Communications on Progress.

Kind regards
