ACERINOX ACHIEVES ITS BEST RESULTS EVER IN 2021

February 27, 2022

• 2021 revenue increased by more than 44% to EUR 6,706 million, and EBITDA totalled EUR 989 million (+158%).

• The Group multiplied by 11 its net profit to achieve EUR 372 million, the highest since its incorporation in 1970.

• Melting shop production amounted to 2.6 million tonnes, exceeding that of 2020 by 19%, and setting a new all-time record.

• The outlook for the first quarter of 2022 is favourable for the seventh consecutive quarter thanks to good demand, low inventory levels, improved prices and increased regionalisation of the markets.

• The Group positions itself as a benchmark for the circular economy. In 2021 its products were manufactured with a recycled content of more than 90%, and more than 70% of the waste generated during the process was reused.
