

Communication on Progress Report
UN GLOBAL COMPACT 2021

FOREWORD

Dear Reader,

The ALDI SOUTH Group is one of the world's most successful retailers because of the daily commitment shown by our employees and business partners. Our joint efforts provide us with the potential to make real and lasting change across markets and within our supply chains.

In 2021, we announced our new International Corporate Responsibility (CR) Strategy, with its 2030 Vision of [“Making sustainability affordable to our customers”](#).

We know that by embedding sustainability across all aspects of our business, our organisation will have a more positive impact in tackling global challenges relating to the critical areas of respecting human rights, improving resource efficiency, realising zero carbon emissions and being an employer of choice.

Our international strategy continues to build on our previous achievements and commitments. It also supports the ten UN Global Compact (UNGC) Principles in the key areas of human rights, labour, environment, and anti-corruption.

Our report shows that we are continuing to progress towards bringing our Vision 2030 to life and that our everyday actions are helping deliver positive change to social and environmental challenges.

I hope you find this report interesting and informative,

Anke Ehlers

Managing Director Corporate Responsibility International (CRI) on behalf of the national organisations of the ALDI SOUTH Group
