

At Zonsen, we have been committed to the Ten Principles set forth by the UN Global Compact for over a year, and they continue to guide each decision we make across the organization.

Within our 2022 Corporate Responsibility Report you will find our approach, policies, and performance to implement these principles in the areas of human rights, labor, environment, and anti-corruption. Our report is fully accessible online for all stakeholders to access. The report opens with a letter from our Chief Executive Officer Li Sen, which further reaffirms our support of and commitment to the UN Global Compact now and in the future.
